American Railroad Journal.

Saturday, March 9, 1861.

Share and Money Market.

The Share Market has been in a feverish condition during the week. The inauguration of the new President with the declaration of his policy in his message, engrossing almost entirely the public attention. The first effect of the message was favorable, followed by a downward turn under which prices fell off largely. There is an universal feeling that we are on the brink of hostilities, which may at any moment be precipitated by some unseen accident or cause. There are so many points in which we can come in collision, and so many questions arising for which no apparent solution exists, it is felt that one is not sure that peaceful relations will continue for an hour. Under such circumstances we must expect to witness the greatest degree of sensitiveness, till the future is more clearly seen. The struggle now is to avoid a hostile outbreak, and to preserve from interruption the commercial operations of the country. Almost the sole value of the Union is the entire freedom it has given in our internal trade, which has now become of such vast magnitude, that the least interruption to it causes a tremendous loss. The message is so variously understood that we must see how it is construed by the administration, before we can judge of its policy.

The only solution of our difficulties is *time*, and should the National Government, and that of the Seceding States remain inactive, the necessities and wants of the people would in the end point out the remedy. If our commercial matters can move on harmoniously, we could afford to wait indefinitely upon political events. We can hardly expect cordial sympathy to exist between the extremes of the country, upon political subjects, while, at the same time, we may remain a homogeneous people in all our commercial relations.

The season opens very promisingly for our railroads. All the great interior water routes will soon be navigable, and we shall then commence moving last year's crop, the greater portion of which still remains in first hands. The winter has been a favorable one, the earnings of our roads being, on the average, considerably in excess of the previous year. The active demand abroad for bread stuffs will give our public works full employment for the year to come.

(From the Vicksburg Whig, Feb. 27th.)

Complimentary Testimonial.

PRESENTATION OF A SPLENDID SILVER SERVICE TO THE HON. WM. C. SMEDES, PRESIDENT OF THE SOUTHERN RAILROAD COMPANY.—The magnificent silver dinner service, voted to the Hon. Wm. C. Smedes, by the Southern Railroad Company, as an appreciation of his faithful and efficient services as President of the the road, was presented to Mr. Smedes yesterday morning, in the presence of the Board of Managers and a few invited friends. The presentation took place at the office of the President at the depot, and the presentation speech was made by Dr. M. Emanuel, Vice-President of the road, in an appropriate and well-timed commentary on the services of Mr. Smedes, as well as the important advantages likely to flow from the completion of this great public work. The response of Mr. Smedes was eloquent and feeling, and like all his speeches, equal to the occasion.

The service presented was manufactured to the order of Mr. J. N. Klein, jeweler of this city, and is the most splendid dinner set we have ever seen, or that ever has been exhibited, perhaps, in this section of the country. It consists of seventeen pieces, magnificently and elaborately wrought. The design is a deer chase, beautifully displayed on the large pieces. Altogether it is a gift alike creditable to the givers and to the receiver.

The occasion of the presentation was made one of general good feeling. Incidents in the history of the progress of the road were detailed, complimentary sentiments were offered, and congratulations exchanged over the completion of a work calculated to do so much in developing the resources of our State and building up our own city.

We cannot refer to the public importance of the completion of this great work in more appropriate terms, than by quoting the following passage from the remarks of Dr. Emanuel:

"A large and valuable portion of our State, that was an unapproachable wilderness, and of little more utility than when inhabited by Indians, has been redeemed and regenerated, and will ere long, contain a thriving population not inferior to that of any section of the State. It was aptly remarked by Ragnal that "if we travel over all the earth, wherever we shall find no facility of passing from a city to a town, or from a village to a hamlet, we may pronounce that country and that people to be barbarous." By such a test applied to that country previous to the building of the Southern Railroad, but few countries exhibited a greater need of railway improvement to develope its resources, than that through which our road has been built. It already begins to show the beneficial effects and stimulating influence of that most potent and wonderful of all physical and ameliorating agents, the railway and steam engine. By their magical effect we see that once desolate country brought rapidly under man's subjection, and made to blossom like the rose, and capable of being made to teem with plenty, placing mankind on the high road to success in life, securing to them all the advantages of a concentration of population, capital, and enterprise, giving them all the facilities for railroad transportation, of such vital importance to their prosperity and well being. That road is now happily performing the functions of a main artery of the human system, supplying blood to its members. It is now conveying and distributing the great essential necessity of life, *bread*, to whole communities, threatened with famine, to them as essential for the preservation of life as the vital blood itself. But I trust the day is near at hand, when our road will assume the important attitude, and fulfill, not only the designs and expectations of its early friends, but the great and actual necessity of the day—and that is to connect Vicksburg by railway on a direct east line with Montgomery, now the proud capital of the South, and bring these two important cities within fifteen hours of each other. What our road now is, and what it would be then, might be compared to the hues of the purple dawn, contrasted with the refulgence of the full orbed-sun.

"Whether the absurd and wicked war policy of the old government, shall prevail, or whether wise council and true patriotism shall interpose to avert the calamities of civil war, the seat of Government of the Confederated States of America, at least for the next four years, in my opinion, will be established at Montgomery. Then, in the event of war what a necessity would immediately arise that there should be an unbroken line of railway from Monroe in Louisiana, on the Ouachita river, seventy-five miles west of Vicksburg, to which point the V. S. & T. Railroad is now completed, to Savannah and Charleston via Montgomery; so that troops and army supplies could be transported with the utmost certainty and celerity, through the Confederated State, exclusively, from East to West, and from West to East, as they may be required. How strong and urgent then, is the necessity of supplying with the least possible delay, those broken links in the line between Vicksburg, on the Mississippi, and Montgomery, on the Alabama river.

But if, on the other hand, the South is peaceably permitted to establish its independence, and enjoy the Government of its own preference, nothing will be more conducive to the rapid development of its growth, strength and prosperity, than such a direct east and west line of railway, penetrating as this would do, through five out of six of the cotton States, now constituting the new Confederacy. And here let me remark, that in my view the wide spread existence of railways through the American States, will more than all other instrumentalities operate to prevent war. But if unhappily reckless madness shall wield the power and direct the destinies of the country, and light the flames of war, the same all-powerful cause will contribute more than every other means, to lessen its horrors and shorten its duration. No small share of the honor and credit of producing these sublime and benevolent effects is due to you, Sir, as the builder of the Southern Railroad, and as long as that work endures it will honorably perpetuate the name and fame of Wm. C. Smedes, its distinguished President.

Cincinnati and Chicago Air Line.

The last rail on the Cincinnati and Chicago Air Line Railroad, which completes the line from Richmond to Valparaiso, the intersection with the Chicago and Fort Wayne has been laid.

Providence and Worcester Railroad.

At the annual meeting of the Providence and Worcester Railroad Company held on the 4th ult., the following gentlemen were elected Directors for the ensuing year: Horatio N. Slater, E. P. Mason, James Y. Smith, Alexander DeWitt, Paul Whitin, Harvey Chace, Thomas P. Shepard, William M. Bickford, Henry Goulding, Isaac Davis, Isaac H. Southwick, Edward Pearce, Duty Greene, Henry Chapin, William S. Slater, John Carter Brown, Peleg W. Lippitt, Gideon L. Spencer.

Railroad Interests in Missouri.

A bill of great importance to the railway interest of Missouri has been introduced in the lower House of the State Legislature, of which the following is a synopsis:—Section 1 releases the first lien of the State on the Iron Mountain Railroad to the extent of $1,000,000; on the southwest branch to the extent of $2,000,000; on the Pacific Railroad from Jefferson City to Independence to the extent of $1,500,000; on the North Missouri to the extent of $2,000,000; and Platte Valley Railroad $500,000; and authorizing the companies named to issue first mortgage bonds on their road, appurtenances, etc.

One object is to enable the North Missouri Railroad to complete its own road, and also the Missouri Valley Railroad, and the Chariton and Randolph Railroad, with a view of connecting these roads with the North Missouri Railroad. The State, in effect, allows the road to borrow $7,000,000 upon first mortgage bonds, but should the $7,000,000 not complete the roads, and put them in a condition to fulfil their present obligations, the State steps in and runs the roads for its benefit, to the exclusion of the new bondholders' interests.

Interest and Dividends.

The coupons of the first mortgage bonds (Eastern Division) of the La Crosse and Milwaukee Railroad Company, due Nov. 1, 1860, will be paid on presentation at the office of the Receiver in Milwaukee, with exchange on New York.

The coupons of the bonds of the City of Milwaukee, issued to the La Crosse and Milwaukee, and Milwaukee, Fond du Lac and Green Bay Railroads, due September 1, 1859, and March 1, 1860, will be paid on presentation at the office of the Receiver of the La Crosse and Milwaukee Railroad, in Milwaukee, with exchange on New York.

Southern Railroad Completed.

The Vicksburg *Whig*, of 6th ult., says the iron has been laid on the entire track between that city and the terminus at Meridian, in Lauderdale county, connecting with the Mobile and Ohio Railroad. A bridge which had been completed, but was washed away by a late heavy freshet, alone prevents the cars from running through. By the 4th of March, we learn, the entire line will be open to business and travel.

Cumberland River Draw Bridge.

W. Whitman, foreman of this great structure, reported that from October 28th, 1859, when it was first closed, to January 1st, 1861, nine thousand, nine hundred and ninety-nine locomotives crossed it without the slightest casualty of any kind.

During the year 1860 one thousand and nineteen steamboats, ascending and descending, passed through the draw without accident.

Pennsylvania Railroad.

The annual election for Directors of the Pennsylvania Railroad, was held on the 4th inst., at the office of the Company, and resulted in the re-election of the old Board of Directors, viz:—Messrs. J. Edgar Thomson, Washington Butcher, William R. Thompson, Josiah Bacon, Thomas Mellon, John Hulme, G. D. Rosengarten, Wistar Morris, G. W. Cass, and W. H. Smith of Pittsburg.

Real and Personal Property in Indiana.

The following statement, containing the aggregates of the assessment of real and personal property in Indiana, for the year 1860, is taken from the report of the Auditor of State:

Number of acres	21,867,641
Value of lands without improvem'ts	$219,661,783
" improvements	55,491,249
" lands and improvements	275,153,032
" town lots and improvements.	47,473,326
Total value of railroad assessment	6,619,342
Other corporation stock	1,819,246
Other personal property	122,944,432
Total valuation	455,011,378
Number of polls	203,098

On the above stated amount of property and number of polls, there are levied the following amounts of taxes:

State tax	$ 659,159 12
County tax	1,192,437 95
School tax	536,044 86
Road tax	338,347 81
Township tax	141,641 21
Sinking fund tax	88,736 88
Railroad tax	41,339 92
Other corporation tax	607,721 99
Total amount of taxes for 1860	3,768,426 87
Delinquent tax	702,699 64
Total amount of taxes	4,471,126 51

—*Evansville Journal, Feb.* 14.

Journal of Railroad Law.

ACTION FOR DAMAGES: LIABILITY OF PLAINTIFFS FOR THE NEGLIGENCE OF THIRD PARTIES: QUESTION FOR THE JURY.

The plaintiff, Frances A. Brown on the 21st of October, 1858, employed one Thomas, the owner and driver of a stage coach running from Albion to Batavia, in the State of New York, to carry her to Elba, a place between those villages, and took her seat in the stage with other passengers. The usual route was across the track of the New York Central Railroad Company. The stage started at about ten o'clock in the morning, which was about the time when a regular passenger train usually passed over the railroad. On this occasion, the conductor, in order to drop a car at Albion, had divided the train into three parts, with one or more brakemen on each section. The stage driver knew of the passage of the train at that hour. On approaching the railroad, he discovered the train which was moving at the rate of from eight to twelve miles an hour, and stopped his horses. After the main train had passed, that is, the engine and ten or twelve freight cars attached, he started again, and went to within three rods of the track, when he saw a single car approaching, and stopped again. When that car had passed, not seeing any others, he again started ahead with a view of driving across the track. He immediately discovered two other cars coming. Instead of stopping and jerking his horses back, he raised his whip, hit his horses, and attempted to cross the track ahead of these two cars, and the hind part of his carriage was struck by the cars. The alleged injury occurred in this way.

Upon this state of facts the questions to be determined were: first, whether there was negligence upon the part of the driver of the stage coach which materially contributed to the accident; second, whether the negligence of the stage driver, if any, should be imputed to the plaintiff in this action so as to affect the question of her recovery against the company; and third, whether, admitting the liability of the plaintiff for the negligence of the driver, the question as to whether there was or was not negligence on the part of the driver, was in this case a question to be decided by the court or by the jury.

Upon the trial of the case the Justice was requested to non-suit the plaintiff; but the court refused and submitted to the jury the question as to the negligence of the driver, as well as the negligence of the defendants.

The jury found a verdict in favor of the plaintiff for $500, and the defendant appealed.

The following is the opinion of the Cayuga General Term of the New York Supreme Court—the appellate tribunal.

JOHNSON, J.—It is insisted by the defendants' counsel, that the carelessness of the stage driver contributed to the injury sustained by the plaintiff; and, that the case on this point is so clear upon all the evidence, that it ought not to have been submitted to the jury, but should have been determined by the court as a question of law.

The plaintiff's counsel contends that the plaintiff is in no respect responsible for the carelessness of the driver of the stage, in which she was riding at the time of the injury, it being a public conveyance for all persons, and the plaintiff only an ordinary passenger. To sustain this position the counsel refers us to the case of Knapp *vs.* Dagg. That was a private carriage, in which the plaintiff was riding with her brother, and the judge at the circuit held that she was not chargeable with the negligence of the driver, with whom she was riding. It must be admitted that that was a stronger case against the plaintiff than this, where the driver was exercising a public employment as a carrier of passengers. But that was a decision upon a trial at the circuit and is not entitled to any great weight as an authority. And with all respect I am entirely satisfied that the decision is not law. This question, of passengers who have received injuries while traveling in public conveyances, such as omnibuses and vessels being chargeable with the negligence of the persons in charge of such conveyances, in actions brought by them to recover for such injuries, was very fully and thoroughly discussed, by the ablest counsel, before the common bench in England in the cases of Thorogood *vs.* Thorgood and Catlin *vs.* Stiles, and the judges unanimously held that the passenger bringing the action against the proprietors of other carriage, or vessel, which directly caused the injury, was chargeable with the negligence of the person in charge of the conveyance in which he was riding, the same as though it were his own. The principle seems to be, that the passenger having selected his conveyance, and entered into a contract with the owner, to convey him safely, has a remedy against such owner for any injury occasioned by the negligence of his servant, in managing and conducting such conveyance, and must take the consequences of any default of the servant or driver whom he thought fit to trust, as to all injuries, from other persons during the passage. The judge at the circuit, however, placed the case in this respect, upon the true ground, and charged the jury that the negligence of the driver, if any, must be regarded for all the purposes of the action, as the negligence of the plaintiff.

The only question is, whether upon the whole evidence it was so clear that the negligence of the driver contributed to the injury, that the case ought not to be submitted to the jury. In view of all the facts and circumstances proved upon trial, I am of the opinion that it was a proper case to be passed upon by a jury. It is not every point of negligence on the point of a plaintiff which will preclude him from recovering for an injury occasioned by the negligence of the defendant. To have that effect, his negligence must be such that he might, with ordinary care, have avoided the consequences of the defendant's negligence. It is true that a person crossing a railway track is bound to use his eyes and ears to discover and avoid danger; and if he fails to do this, and receives injury which he might otherwise have avoided, he will not be allowed to recover.

But here it is apparent that the driver was on the lookout. He first stopped to let the engine and train pass and then started and stopped again to let a detached car which had been switched off, pass, before approaching the track. He then started again, supposing only one car had been switched off, and got so near the track that the horses heads were over the rail, when he saw the other cars coming, which had also been detached from the train about two rods distant. Under these circumstances I think it was a fair question for the jury whether the driver exercised ordinary care and prudence in attempting to cross the track after he saw the cars, which immediately caused the injury, approaching. Every one knows that the most experienced and careful driver has not the same immediate control over the motions and spead of his team, however safe and manageable, that a footman has, over his own, when approaching a railway track, where trains are likely to pass.

The driver whose attention is necessarily more or less directed to his team has not the same opportunity to observe every thing which may be approaching. And it is quite obvious that in a given position it might be the height of care and prudence in a driver to attempt to cross with his team, when it would be inexcusable negligence and rashness in footman to do so. All these were questions of fact, which were submitted to the jury, as appears from the case, with great care and fairness; and as we think it was not a case of non-suit, a new trial must be denied.

New Haven, New London and Stonington Railroad.

The income of this road for the year ending December 31, 1860, was:

From passengers		$111,353 53
" Freight		15,564 21
" Mails, express, rents, etc.		8,153 82
		$135,071 55
Gross earnings of Extension road		42,930 45
		$178,002 00

And the expenditures were:

For operating and ordinary repairs	$86,908 08	
Renewals, new buildings new equipment, etc.	29,785 68	
Newport connection	5,716 34	
Operating Extension road	19,320 79	
		141,730 89
		$36,271 11
Interest on old road	$6,495 84	
Interest on Extension bonds	13,500 00	
Construction of Extension	10,109 66	
		30,105 50
		$6,165 61

The following is a statement of the receipts and disbursements during the year:

Cash and bills receivable Jan. 1, 1860.	$8,466 12	
Gross earnings as above	135,071 55	
Bills payable	25,465 42	
		$169,003 09
Repairs, renewals and interest, as above	$128,905 94	
Bills receivable	10,431 13	
Cash	7,884 09	
Bills payable Jan. 1, 1860	21,781 93	
		$169,003 09

The following is a statement of the receipts and expenditures of the Extension road to Dec. 31, 1860.

RECEIPTS.

Stock subscriptions collected	$224,060 00	
Proceeds of Extension bonds sold	129,550 00	
Bills payable	104,262 44	
Receipts from N. Y., Prov. and Boston Railroad Company	17,809 81	
Balance rent account	13,525 00	
Gross earnings of Extension road	42,930 45	
		$532,137 70

EXPENDITURES.

Road and buildings	$208,070 96	
Land damages and real estate	48,045 58	
Iron	76,172 30	
Steamboat dock at Groton	63,472 65	
Bridging	18,793 11	
Steamboat	31,537 30	
Groton Ferry	11,411 12	
Legislation	5,129 09	
Tools and machinery	2,506 45	
Extension coupons paid	$21,510 00	
Interest	19,005 70	
Bills receivable	6,003 22	
Insurance	977 02	
Expenses of operating	19,503 20	
	66,999 14	
		$532,137 70

The number of passengers transported during the year was 155,996: the number of miles run by passenger and other trains, 129,990. The report says:

In presenting the foregoing statement of the earnings and expenditures of your road for the year 1860, the Board of Directors take much pleasure in reporting the fact that the Extension road from New London to Stonington is finally complete, notwithstanding every conceivable impediment which the enemies of the enterprise could place in our way, and the very limited faith of our friends. Our earnings in consequence are realizing our most sanguine expectations.

During the year we have constructed a very substantial steamboat dock, depot and other buildings, at Groton, at a cost of over $60,000, whereby we secure a permanent business to the Extension road, making that portion of your property as valuable as the best railroad investment in the country; and it is confidently expected that with the increase of business which is now secured by the steamboat connection at Groton, the united earnings of the whole road the present year will reach at least $200,000; and should we, by judicious economy, be able to operate and maintain the road for fifty per cent. of the gross earnings, as we believe, the affairs of the Company would soon be placed upon a firm and reliable footing.

The holders of a large proportion of the over due coupons of our first mortgage bonds have funded the same, in accordance with plans suggested in our last annual report. Provision is also made for the one hundred thousand over due ten per cent. bonds and coupons on the same; also for the past due coupons on the second mortgage bonds, by authority to issue two hundred thousand seven per cent. bonds, which your Directors propose to offer as soon as the obligations of the Company can be met without the danger of future default.

It is apparent from the amount expended for the construction of the Extension road and for the re-construction of the old road, that the previous estimates came far short of the amount required, which has contributed, in no small measure, to our pecuniary embarrassment hitherto, making us more cautious how we promise immediate returns on the investment, but in no degree discouraged as to the permanent value and future income of your property.

President.—CORNELIUS S. BUSHNELL.

Directors.—Wyllis Blackstone, New York; Cornelius S. Bushnell, New Haven; E. C. Scranton, Madison; A. O. Wilcox Madison; Sumner Bull, Saybrook; Charles J. McCurdy, Lyme; Charles C. Griswold, Lyme; Charles Mallory, Mystic; James I. Day, Stonington.

Secretary and Treasurer.—WM. T. BARTLETT.

Superintendent.—FREDERICK J. CALHOUN.

Vicksburg, Shreveport and Texas Railroad.

We have received the annual report of this company to the General Assembly of the State of Louisiana. It is dated at the office of the company, Monroe, La., January 21, 1861. It says:

During the past year the track has been extended on the Eastern Division, from Vicksburg, westwardly, to a point within three miles of Bœuf River, and the iron has been laid from the Ouachita to the Bœuf River, leaving a gap of only three miles between the ends of the rails, which will be closed so as to enable the cars to run through from Vicksburg to Monroe during the early part of the present session of the Legislature. Upon the Western Division, the work has been temporarily suspended by the pressure of the times, after having laid five miles of the track, and nearly completing the graduation of the entire road across the parish of Caddo. In all, upon reaching Monroe, we shall have seventy-nine miles of finished road, with six engines and a sufficient number of cars for immediate use, with fifteen additional miles of road nearly graded and ready for the superstructure, and iron enough in bond in New Orleans to lay this length of track. This gives the company the absolute right to sell nearly one-half of the 350,000 acres of land granted by Congress to aid in building the road. These lands reach nearly across the State, from east to west, and lie along the line of the road on either side of it, in the centre of the cotton zone, and a large portion of them are among the most productive lands in the world. About 5,000 acres of these lands have been sold at prices ranging from $2 50 to $20 per acre.

Omitting fractions, the company has $275,000 still due on reliable private and municipal subscriptions, the payment of which will entitle it to draw from the State $68,000 in bonds, making $344,000. In addition to which, the Treasurer holds $23,944 of bills receivable, being chiefly mortgage notes for lands sold; $21,159 in cash and cash assets; and $21,000 in State bonds, in all, $66,103, which, added to the subscription due as above, makes up the sum of $410,103; to which should be added the subscription of Fannin, Grant & Co., payable in work and materials in the progress of their contract, at cash prices, and the unsold Capital Stock and bonds of the company, and future sales of land.

The floating debt of the company amounts to $200,520, of which $49,000 is for money borrowed upon city acceptances during the past year; $102,430 is due to Contractors, and $49,090 is due on the purchase of iron. The company has expended, of its capital stock, $1,406,936, and has disposed of $280,000 of its first mortgage bonds, maturing 1st September, 1877.

Events are beginning to justify the policy of the State in extending aid to the full extent of Constitutional ability to the various railroads projected within its boundaries, and which together form a system admirably adapted to the development of its resources. Let us briefly illustrate this by reference to our own road. The State subscribed $800,000 of the capital stock of this road, and in payment of calls made, has issued to it $281,000 of bonds, running forty years, to meet the interest on which the people of the State pay an annual tax of $16,860. As the work progresses, and calls are made on the State for the residue of its subscription, this tax will be gradually increased, until the road shall have been finished and the business formed, when the people will be relieved from any further burden then on account of it, as no one competent to judge, acquainted with the condition of the company, the economy practiced by it, the value of its land grant, the location of the road, the importance of its communications, and the wealth and resources of the country through which it passes, can doubt that so soon as finished, the road will pay into the State Treasury annually, an amount sufficient to pay the interest upon the bonds which shall have been issued to it, and create a sinking fund adequate to redeem the principal before maturity. A comparison of the assessment rolls shows that since the work was begun on this road, the value of the taxable property has increased more than $25,000,000 in the parishes in which its lands are situated, being those more immediately benefitted by it. This increase is chiefly owing to the progress and prospects of the road. In a portion of the parishes other causes have operated.

The general prosperity of the country has had its influence here as elsewhere, as is shown by the advance in the price of certain species of property, which is only slightly and indirectly influenced by railroads. In two of the parishes the extension of the levees on the Mississippi River has had a decided influence in increasing the value of property. In other parishes the road is the only new element of universal prosperity, and after making a liberal allowance for the operation of other causes, we must set down at least $15,000,000 of this increase to the influence of the railroad. Upon this amount of taxable property, the State derives an annual revenue of $45,000 which is equal to 16 per cent. interest upon the amount of bonds the State has issued to the company. The parishes receive a corresponding advantage in the shape of parish taxes upon the property developed within their limits. The parishes of Madison and Carroll have already received into their Treasuries in levee and other parish taxes, assessed upon property developed and brought into these parishes by the road more than the amount contributed by them toward building it. This is well illustrated in the case of the city of Vicksburg, which subscribed $100,000, and within twelve months from the passage of the ordinance making the subscription, and before the second instalment of $20,000 was paid, the road in the meantime having reached the western boundary of Madison parish, and brought in the rich trade from the Roundaway, Tensas, and Joe's Bayou, the assessed value of the property in that city had increased $612,000. In addition to the wealth it has brought into the State, a large number of worthy citizens have been made rich by the increase in the value of their lands, and owe their fortunes to this road. The Treasury of the State has been enriched by the sale of swamp lands, and internal improvement lands brought into market by it. It has stimulated emigration to the State, and the parishes along its line are increasing in population in a manner unprecedented in the history of Louisiana. The unparalelled productiveness of the cotton lands along the line of this road, the known facilities it will afford for transportation and travel are attracting attention, and inviting capitalists from other States. There are other beneficial effects resulting, and to result from the construction of this road, which should not be overlooked. It is beginning already to bind together in community of interest sections of the State which have heretofore had little sympathy with each other. The levees built on the Mississippi, to reclaim the swamp lands, being necessary also to protect the railroad, will cause the upland parishes to feel interested to aid in keeping up the levees to the full extent that they appreciate the privileges and ad-

vantages of their railroad. Another year will show that this road will, next the Mississippi Central, be the largest feeder to the New Orleans, Jackson and Great Northern Road, in which the State and City of New Orleans are so largely interested. For all practical purposes our road terminates in New Orleans, discharging and receiving freights at the foot of Canal Street, and passengers on Calliope. The advantages enumerated will increase in an arithmetrical ratio, as the road progresses toward completion.

La Crosse and Milwaukee Railroad.

The earnings of this road for the year 1860 were—

From passengers		$229,485 22
" freight		486,185 64
" mails, express, etc.		40,804 89
		$756,475 75
Ordinary operating expenses	$389,662 29	
Extraordinary expenses	37,233 25	
		426,895 54
Net earnings		$329,580 21

The proportion of gross earnings of the year belonging to the respective divisions is as follows:

Eastern Division	$526,277 30
Western Division	230,108 45

The following report of the Receiver, H. Crocker, Esq., covers the period from June 11th, to Dec. 31, 1860:

	Dr.	
To gross earnings from June 11 to this date as per manager's report		$512,212 86
Amount due foreign railroads for tickets and freight balance		17,369 14
Amount due on accounts	$10,635 94	
Amount due on pay rolls	18,205 00	
		28,840 94
Total		$558,422 94
	Cr.	
By expenses incurred in the operating department		$257,980 00
Due pay rolls, monthly accounts, and foreign balances, at the time of taking possession of the road		45,296 38
Amount paid on account of incumbrances on real estate:		
Eastern division	$32,283 27	
Western division	3,208 66	
Right of way, Eastern division	2,191 00	
Do. Western division	10,119 92	
		47,802 85
Paid on account of rolling stock		60,484 22
Amount paid interest coupons 1st mortgage bonds, Eastern division, due May 1, 1860		34,379 70
Amount due from foreign railroad tickets and freight		983 48
Amount due from others		1,620 32
Amount due from P. O. Department.		3,920 32
Amount in the hands of agents for advanced charges		1,004 33
Balance cash on hand	$97,445 34	
Cash received since December 31, but earned previous to that date	7,504 64	
		104,949 98
Total		$558,422 94

The report of the Trustees of the Sinking Fund shows that 1st mortgage bonds, Eastern Division, to the amount of $48,500 have been purchased, and that on the 31st December, there was a balance of $3,826 30 in the hands of the Trustees.

The Receiver has applied for permission to build a grain elevator at La Crosse, costing $10,000, which he says will be returned twice over in one year, in the saving of labor. For the next year, $19,610 must be expended in bridge and culvert repairs, and as much more yearly for three years.

Railroad Iron at New Orleans.

March 6th, 1861. 6t10

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the **patented device of the "Double Punch,"** viz, two punches operating from opposite sides **towards the centre of the Nut, forces into the body of the Nut most of the Iron** which in all other processes is punched out, and also **condenses the Iron** around the Bolt hole, thus ensuring **the greatest strength in the Screw Thread**, and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an **upset solid head, perfectly true on all sides**, and of **uniform size.** The Iron used is of **our own manufacture**, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish **SAMPLES** and **PRICE LIST** on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER, and MARBLE DUST, all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

LYONS' TABLES.

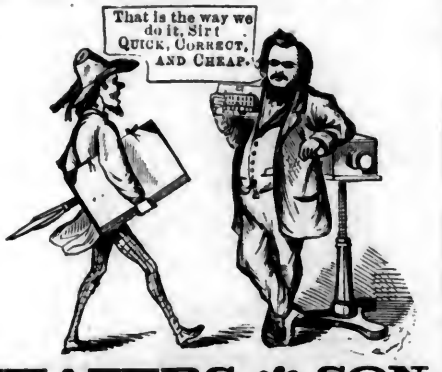
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24	"	¾ to 1
4.	" 14	"	1½ to 1	16.	" 24	"	1½ to 1
5.	" 15	"	¾ to 1	17.	" 25	"	1½ to 1
6.	" 15	"	1 to 1	18.	" 26	"	1½ to 1
7.	" 15	"	1½ to 1	19.	" 28	"	¾ to 1
8.	" 16	"	¾ to 1	20.	" 30	"	1 to 1
9	" 16	"	1 to 1	21.	" 30	"	1¼ to 1
10.	" 18	"	¼ to 1	22.	" 30	"	1½ to 1
11.	" 18	"	½ to 1	23.	" 32	"	1 to 1
12.	" 18	"	1 to 1	24.	" 32	"	1¼ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**



ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, March 16, 1861.

Finances of Nova Scotia.

It would seem that the large revenue of Nova Scotia last year is due to the vigilance of the Government in collecting it, and not to any increase in the Provincial Trade. The imports of 1859 were $8,100,955; those of 1860, $8,055,439, a falling off of $45,116. The exports show a much greater decline. In 1859 these were $6,889,130; last year they were $6,619,534, a falling off of $269,596. Among the articles the importation of which have increased are: cotton, linen, flour, rum, wine, whiskey, tea and salt. There was a decrease in the imports of codfish, sugar, molasses, hardware, tobacco, oats, barley, butter, etc.—In the export of codfish, mackerel, alewives, potatoes, barley and woodware, the decrease was very large. The revenue of the Province last year was $694,083 excise and light duties, and $50,156 casual revenue. For education, the Sister Province expended $65,983; for salaries of public officer, $62,554; road service, $103,855; interest on debt, $191,937; legislative expenses, $45,031; and $15,335 were paid toward defraying expenses of the Prince's visit.

Galena and Chicago Union Railroad.

The earnings of this road for the fiscal year ending January 1, 1861, were:

From freight		$1,041,564 61
" Passengers		341,383 94
" Mails, etc.		79,803 25
Total		$1,462,751 80
And the expenses were:		
Repairs of track	$202,978 85	
" Bridges	11,209 11	
" Buildings etc.	23,953 27	
" Locomotives	64,829 55	
" Cars	57,328 09	
Locomotive service	63,721 36	
Train service	43,972 66	
Station service	96,399 67	
Fuel	92,529 43	
Oil and waste	11,596 21	
Salaries	29,533 99	
Exchange paid	12,527 04	
Foreign expenses	12,104 03	
Damages	16,475 70	
Taxes	32,333 29	
All other expenses	38,987 01	
		810,491 26
Net earnings		$652,260 54
Add surplus Jan 1, 1860		250,687 42
Total		$902,947 96
Dividend Feb., 1860	$180,834 00	
Interest on 1st mortgage bonds	139,510 00	
Interest on 2d mortgage bonds	108,850 00	
Cost of bonds for second mortgage sinking fund	100,582 50	
Other items charged income account	37,959 45	
		567,735 95
Net surplus Jan. 1, 1861		$335,212 01

The whole amount of second mortgage bonds now purchased from current revenues and canceled on account of sinking fund is $480,000.

The ratio of expenses to earnings has been 55.4 per cent.—an improvement in this respect of more than three per cent. over the previous year. It is believed that, as the business of the road revives, this ratio can be still further reduced.

During the year extensive and thorough repairs have been made in the road bed, track, bridges and buildings; several new station and engine houses have been built; and the rolling stock has been maintained in an efficient condition.

MONTHLY EARNINGS.

1860.	Freight.	Passengers.	Mails, etc.	Total.
January	$37,266 58	$13,807 50	$4,578 64	$60,652 72
February	38,201 86	19,755 66	4,740 67	62,698 19

May	73,696 73	33,883 38	7,925 39	115,506 50
June	61,332 78	25,674 47	6,441 65	93,448 90
July	46,445 36	27,955 16	6,304 83	80,705 35
August	133,040 61	27,219 26	6,280 97	166,540 84
September	178,019 65	35,972 00	5,536 06	219,527 71
October	200,183 79	46,419 76	5,504 77	252,108 32
November	106,224 40	29,909 67	6,523 74	142,657 81
December	57,666 34	21,676 39	15,516 82	94,859 55
Totals	$1,041,564 61	$341,383 94	$79,803 25	$1,462,751 80

During the first half of the year, the business of the road was smaller than at any previous period since its completion. After the new crops began to come forward, its business became very satisfactory; and as a large amount of products, particularly corn, still remains in the country, a much better business is anticipated up to the time of the coming in of the next harvest, than during the same period for the past two years.

In reference to the extension of the first mortgage bonds, the report says:

As our first mortgage bonds will begin to fall due on the first of February, 1862, a proposition will soon be made to the holders of these bonds for their extension, at par, for a period of twenty year, with new sheets of coupons attached, and a sinking fund provided which will extinguish the entire amount of this debt within the above-mentioned period.

A first mortgage of only two millions upon so valuable a property, with an ample sinking fund, offers a security so entirely sound and reliable, that we have reason to believe that the present holders will generally avail themselves of the opportunity thus offered of renewing their bonds. Renewals to some extent, indeed, have already been tendered, on the terms proposed. Provision will of course be made to pay at maturity the bonds of any parties who do not prefer to extend them.

It is proposed so to graduate the sinking fund of the extended bonds, that the annual amount taken from the earnings of the road for interest and sinking fund purposes, shall not exceed the amount paid for those purposes during the past year. With the extension of these bonds perfected as proposed, provision will be made for the payment of the entire debt of the Company within a reasonable period, without an additional annual charge upon its finances.

The amount of funded debt at the date of the

last annual report was $3,633,200 since which there has been purchased and canceled on account of the sinking fund, of the second mortgage bonds $109,000, making the amount of present funded debt $3,524,200. This is composed of—

First Mort. Bonds, due Feb. 1, 1862	$262,000
" " " " Aug. 1, 1862	160,000
" " " " Feb. 1, 1863	60,600
" " " " Aug. 1, 1863	1,511,000
Total	$1,993,000
Second mort. bonds, due May 1, 1875	1,520,000
Litchfield bonds, due on St. Charles Air Line purchase	11,200
	$3,524,200

The amount charged to construction account Jan. 1, 1860, was $9,354,513 75; to which add $467.52 on account of Fulton Extension and St. Charles Air Line, and deduct proceeds of wharf boat sold $2,500—making the total sum charged to construction account Jan. 1, 1861, $9,352,481 27, as follows, viz:

Construction—Main Line	$2,127,906 29
Beloit Branch	410,522 61
Chicago, Fulton, and Iowa Line	2,294,046 19
Second Track	405,868 06
Depot grounds and buildings	824,031 88
Fulton Extension	15,590 72
Equipment	1,311,916 75
Chicago, St. Charles and Mississippi Air Line Railroad	549,581 49
Expended for additional grounds, &c	62,019 31
This Company's proportion of the cost of a bridge, track, &c., for connection with Eastern roads	20,000 00
Discount on bonds, interest and incidentals	644,487 97
Bonus stock, issued August, 1854	686,510 00
	$9,352,481 27

The capital stock of the Company now consists of 60,283 shares—six shares having been added during the year by the conversion of outstanding scrip. In reference to the connections of this road, the report says:

The Chicago, Iowa, and Nebraska, Railroad Company have completed the arrangement alluded to in our last Annual Report, for passing loaded cars across the narrow channel of the Mississippi between the Iowa shore and Little Rock Island, by means of a steam ferry boat. This arrangement has proven very satisfactory, and no change of cars is now necessary in transferring freight and passengers from one road to the other, and an uninterrupted line is thus formed between Chicago and Cedar Rapids, a distance of 218 miles. A contract has been entered into for a close running connection between the two companies.

In the circular addressed to you by this Board, on the second of July last, the claims of the Cedar Rapids and Missouri River Railroad Company to aid, by means of individual stock subscriptions, was strongly urged. To this appeal no satisfactory response has been made, owing, no doubt, in some measure, to the deranged state of political and monetary affairs. The importance of the speedy completion of that road to the interests of this Company, can hardly be overestimated. It forms, as is well known, in connection with our Fulton line and the Chicago, Iowa and Nebraska Railroad, a direct east and west line between Chicago and a point on the Missouri river, near which one branch of the Pacific Railroad will probably terminate. It is quite clear that by no other projected line of road can the Pacific Railroad be so directly connected with the great lakes.

The Cedar Rapids and Missouri River Railroad Company have, with commendable energy, within a short time, notwithstanding the embarrassed state of affairs, placed under contract seventy miles of their road, extending westerly from Cedar Rapids, a section of forty miles of which is to be completed by the first day of December next, in compliance with the terms of their land grant. The difficulties surrounding a new enterprise of this kind, can be readily imagined; and in order to place its speedy completion beyond question, and to prevent the benefits to be derived from it from being transferred to other and rival lines, we present for your consideration the propriety of authorizing, at your next annual meeting the extending of direct aid to this Company, in such form as may be deemed advisable, on condition that a satisfactory arrangement can be made with this and the Chicago, Iowa and Nebraska Company, for a perpetual business connection.

The Chicago, Iowa and Nebraska Railroad is already an important feeder to ours. The amount received by us from freight and passengers coming from that road during the past year, is about 90,000. The completion of the Cedar Rapids and Missouri River Railroad would probably double this amount, which would continue to increase from year to year, as the resources of a rich agricultural region were developed under the stimulus afforded by the opening of this road.

The recent commercial panic has retarded the prosecution of the Sterling and Rock Island line. It is the present expectation of the contractors, however, that it will be opened for business during the coming Spring.

The number of miles run by passenger and freight trains was 792,029; by wood and gravel trains and switching engines, 193,989; by C. B. & Q. trains on G. & C. track, 127,268. The number of tons of freight transported was 381,188; number carried one mile, 33,338,699. The number of passengers carried in the cars was 330,936; the number carried one mile, 14,162,324.

The length of the entire line of road is	261¼ miles.
Double track	30 miles.
Sidings and gravel pit tracks	44½ miles.
Total length of track	335¾ miles.

GENERAL STATEMENT.

Construction and equipm't, as above	$9,352,481 27

Total	$10,469,355 65

The office of the company is an Chicago, Ills. The officers and directors chosen at the annual meeting, June 6, 1860, are as follows:

President—WALTER L. NEWBERRY.

Directors—Walter L. Newberry, William H. Brown, Orrington Lunt, Flavel Mosely, Jason McCord, Jonathan Burr, Edward K. Rogers, Wm. Larned, John Wentworth, Chicago; Charles S. Hempstead, Galena; Thos. D. Robertson, Rockford; D. A. Knowlton, Westfield, N. Y.; William H. Ferry, Utica, N. Y.

Vice-President—WILLIAM H. BROWN.

General Sup't—EDWARD B. TALCOTT.

Assistant Sup't—EDWARD H. WILLIAMS.

Secretary—WILLIAM M. LARRABEE.

Treasurer—WILLIAM LARNED.

Auditor—HENRY TUCKER.

Attorney—ELLIOTT ANTHONY.

Engineer—W. S. POPE.

The Iron Steam Ship Wm. G. Hewes.

The following is a description of the steamship "Wm. G. Hewes" constructed by Messrs. HARLAN, HOLLINGSWORTH & Co., of Wilmington, Del. She is designed to run between New Orleans and Galveston, Texas; and is named in honor of the President of the New Orleans, Opelousas and Great Western Railroad Company. Her machinery was constructed by the Morgan Iron Works of this city.

Length on deck, 239 feet 4 inches; length at load line, 239 feet; breadth of beam (molded,) 33 feet; depth of hold 10 feet; debth of hold to spar deck, 18 feet; draft of water to load line, 9 feet; area of immersed section at the above draft, 270 square feet; displacement at load line, 1,253 tons, tonnage, 1,477.45 tons.

Her frame is of wrought iron bars, 4 inches by 1 inch and 4 inches by ⅞ of an inch in thickness, which are fastened with keepers 3½ inches, by ⅜ of an inch thick, every 12 inches, together with rivets ¾ of an inch in diameter. Distance of frame apart from centers, 16 inches; they are molded 4 inches and sided one inch. Number of strakes of plate, from keel to gunwale, 16; thickness of plates, one-half to eleven-sixteenths of an inch. There are 14 cross floors, shaped T; depth of these, 18 inches; thickness, nine-sixteenths and one-half of an inch, forming belts with angle iron on top, six of them continuing up to guard deck clamp, and the balance to main deck lodger. Shape of keel, U.; constructed of double plates, ⅝ and ½ of an inch in thickness; depth of same 6 inches. There are 10 fore-and-aft keelsons, 18 inches high and shaped, T; these are capped with angle iron, continuing from end to end.

The Wm. G. Hewes is fitted with one vertical beam condensing engine; number of cylinders 1; diameter of same, 50 inches; length of stroke of piston, 11 feet; length of engine room, 76 feet; diameter of water wheels over boards, 30 feet;

length of wheel blades, 7 feet 6 inches; width of blades, 7 feet 6 inches; depth of blades, 1 foot 8 inches; number, 26; material, iron; dip of wheels at load line 6 feet.

She is also supplied with 1 return tubular boiler, made of steel plates, which is the only one of any size ever constructed in this country. Length of boiler, 21 feet; breadth, 17 feet; height, exclusive of steam chimney, 9 feet; location, in hold, forward of engine; it has a water bottom. Number of furnaces, 4; breadth of same, 3 feet 6 inches; length of grate bars, 6 feet 8 inches; number of tubes, above, in boiler, 92; number of flues below, 8; internal diameter, of tubes above, five inches; internal diameter of flues below, 1 foot 7 inches; length of tubes above, 15 feet; length of flues below, 11 feet 4 inches. Diameter of smoke pipe, 68 inches; height, above grates, 50 feet. The boiler possesses a grate surface of 93 square feet, and a heating surface of 2,600 square feet; consumption of coal, per hour, 1,680 pounds, maximum pressure of steam, 30 pounds, cut-off at one-half stroke; maximum revolutions at this pressure, 18; weight of engines, 190,000 pounds; weight of boiler with water, 102,690 pounds.

In addition to these essential features, the following deserve attention:—Bunkers are of wood and iron; the vessel is fitted with three anchors, weight, respectively, 2,000, 1,300, and 400 pounds; water ways are of wood; she has three bulkheads, iron braced with angle iron; the water wheels, have gunwale bearings; she has one independent steam fire and bilge pump, two bilge pumps, two fire pumps, one bilge injection, and five bottom valves or cocks, arranged as follows:—Two for fire pumps, two for injection pump, and one for steam pump. Ample protection against communication from fire has been made, in the shape of iron, tin, &c.

Troy and Greenfield Railroad.

The annual meeting of the stockholders was held February 28, at Greenfield. The old board of Directors was unanimously re-elected.

Mr. Haupt having been called upon for explanation in reference to the condition and progress of the work, stated that last year was the only one in which the work had been prosecuted without financial embarrassment. The Legislature of last winter placed the company in a position to prosecute the work satisfactorily, and prepare to carry out plans which want of means alone retarded. Much credit was given to Amos B. Merrill, Esq., and Hon. Moses Kimball of Boston for the admirable financial arrangement by which, in purchasing the Southern Vermont Railroad, the State security was greatly increased. The Troy and Greenfield Railroad Company would in time, by the operation of a sinking fund, become the owners of the road without either the company or the State having paid a dollar for it, and the contractors furnished with $200,000 of ready cash with which to discharge all floating debts and drive the work vigorously.

The length of the road graded between Greenfield and the tunnel is about seventeen miles. It will be open to Shelburne Falls in July, and to the tunnel within a year. The length of tunnel excavated is 2,700 feet. The shaft, half a mile from the west end, is down 275 feet, and will be finished in April. It works unusually well, and the rock is the same as at the east end. Very little water flows in the shaft at this wet season. When the shaft is finished, work will be carried on at four faces, instead of one, as at present. Work and machinery is progressing satisfactorily; its use will at first be on a very small scale, to be extended as means can be procured. In shop experiments the drills have penetrated the hardest granite at the rate of one inch per minute. Several months of progress were lost by the fire at South Boston, which destroyed five drills, and the tools required to construct them. But for this, the drills would be now at work. No application will be made to Boston for aid, until it can be shown from reliable data that with it the tunnel can be finished in five years.—*North Adams Transcript.*

Railroad Legislation in Indiana.

The Cincinnati *Enquirer* says the Legislature of this State has passed the bill known as the Pittsburg, Fort Wayne and Chicago Railroad Bill, providing that railroads may let their roads go to sale and organize new corporations, and giving the new corporations the right to re-instate the old bondholders, auditors and stockholders in the same order as before, as first, second, third preferred stock, and stock without any preferment. It passed both Houses, and will, probably, become a law.

Memphis and Louisville Railroad.

The Paris *Sentinel* informs us that the Memphis, Clarksville and Louisville Railroad is now completed to within less than three miles of the Tennessee river. In a few days the connection between Memphis and Louisville by this road will be established, and regular trains will pass Paris for both places daily.

Trade of Canada.

For the first time in the history of Canada the exports have exceeded the imports in value. The year 1860 will be remarkable as the first in which the balance of trade has been in favor of the Province. In the previous year the figures stood: Imports, $38,555,161; exports, $24,766,081. In 1858 the difference was as between $29,000 and $23,500 in round figures, and in 1857 the divergence was a great deal wider, the value of the imports being $39,430,598, and that of the exports, $27,007,624. Whatever may be the theory of the balances of trade, certain it is that every country feels at liberty to congratulate itself when it has a favorable trade balance sheet to show at the end of the year.

We were among those who were not without apprehensions that Mr. Galt's tariff might divert a large part of the trade of Toronto to Montreal. This question has ceased to be speculative, and we are now enabled to settle it by comparative facts. In 1858 the year before Mr. Galt's tariff was passed, the value of the imports of Toronto was $4,768,934, while those of Montreal reached $12,254,071. In 1860 we find the imports of Toronto sustaining nearly the same relation to those of Montreal, the former being $4,048,458, and those of Montreal, $15,334,101.

About three-fourths of the customs revenue is derived from articles which pay a duty of from 15 to 20 per cent; but of $34,447,935 of goods imported, $10,552,485 paid no duty at all.

	Value.	Duty.
Goods paying specific duty and 100 per cent, 40 per cent, and 30 per cent. ad valorem.	$241,072	$126,718 37
Goods at 30 per cent, 25 per cent, and 20 per cent. ad valorem	2,664,454	787,855 27
Goods at 25 per cent. ad valorem	246,599	61,649 01
Goods at 20 per cent. and 15 per cent. ad valo'm.	18,054,900	3,344,010 43
Goods at 10 per cent. and 5 per cent, and 2½ per cent. ad valorem.....	2,382,111	238,232 35
Free goods	10,552,485	.....
Foreign reprints of British copy-rights..	314	.....
Totals.	$34,447,935	$4,758,465 42

The increase in the revenue in 1860 over 1859 is $320,619 03, realizing the estimate of the Finance Minister, and proving the fallacy of those prophets of ill omen who asserted with great confidence that the revenue of 1860 would fall far below that of the previous year. On the whole, the returns show that our commerce and revenue are in a sound and satisfactory condition.—*Toronto Leader.*

Illinois State Debt.

The annexed law to provide for the interest of the State debt was enacted at the late session of the Legislature of Illinois:

SECTION 1. That it shall be the duty of the auditor of public accounts to assess annually upon the taxable property in this State, in addition to all other taxes, a sum sufficient and no more with the interest fund, if any in the State Treasury, to pay the interest on the State debt upon which interest is legally payable, which said sum shall be assessed and collected, said assessment not to exceed one and one-half mills on each dollar of taxable property.

SEC. 2. The fund thus collected shall be denominated the interest fund, and shall be applied to the payment of interest on the State debt, and for no other purpose whatsoever.

North Pennsylvania Railroad.

The following is a condensed statement of the financial condition of this company, at the close of its past fiscal year, November 30, 1860:

Capital stock	$3,149,000 00
Instalment account	6,820 00
Six per cent. bonds	2,500,000 00
" " " coupons	130,942 50
Ten " " " bonds	350,000 00
" " " coupons	325 00
Bills payable	89,805 01
Ground rents and mortgages	88,973 21
Unpaid accounts and loans.	30,935 11
	$6,346,800 83
Construction	$4,796,700 64
Equipment	393,976 88
Station houses and machine shops.	69,737 88
Right of way	204,214 03
Real estate	385,661 84
Telegraph	4,967 39
Trustees	6,354 00
North Pennsylvania Railroad stock	25,767 11
Sundry accounts	21,380 97
Stores on hand	18,039 58
Profit and loss. .,.	405,356 49
Cash	19,644 52
	$6,346,800 88

The earnings during the year from passengers, freight, mails, rent, etc., were $389,622 23

And the expenses were:

For maintenance of way ..	$25,893 26	
For motive power..	62,561 06	
For maintenance of cars ..	19,876 71	
For conducting transportation	51,471 32	
For general expenses, including rents, taxes, etc.	16,865 96	
		176,668 31
Leaving net earnings		$212,953 92

The interest account for the year was:—

Coupons 6 per cent. bonds.	$150,000 00	
" 10 " " " .	32,025 00	
Ground rents and interest on mortgages.	5,661 67	
Interest on floating debt ..	10,004 37	
		197,691 04
Leaving a balance of		$15,262 88

The permanent account has been increased as follows:

Equipment account	$26,979 34
Construction account	7,219 90
Total	$34,199 24

The increase in earnings over those of the preceding year was $42,320 27; and in expenses,

$17,764 37—making the increase in net earnings $24,555 90. Compared with 1858, the gross earnings show an increase $90,728 24, with an increase in net earnings of $50,876.

Bills payable have been reduced to $89,805 01—being a reduction of $48,417 47. The bonded debt has been increased $63,000, and now amounts to $2,850,000.

The equipment consists of 8 passenger and 9 freight locomotives; 15 first class passenger cars, 5 baggage and smoking cars, 100 eight-wheel and 228 four-wheel coal cars, and 176 cars for freight, stock, etc.

The number of miles run by engines with passenger trains has been 146,730; with freight trains, 85,920—total mileage, 232,650. The cost for repairs of engines was $15,204 66. Cost of fuel for do., $20,188 12; of stores, $2,017 01.

The number of passengers carried was 317,312; number carried one mile, 5,356,306—equal to 97,368 through passeng rs; the average rate per mile being 2.62 cents.

The freight transported consisted of 1,080,178 gallons of milk; 235,965 bushels of lime; 3,325,186 feet of lumber; 91,635 tons of coal; 15,256 tons of pig iron; and 82,968 tons of miscellaneous freight. The freight moved one mile in net tons was 8,343,907—producing an average of 2.92 cents per ton per mile.

The report states that there has been a gratifying growth in the local business of the road; and that the improvements going on in the towns and villages along its line, give evidence of the prosperity of the section of country through which it passes, and furnish reason for the belief that the business of the present year will be as profitable as that of the past.

The Patent Law Amendment.

By T. D. Stetson.

At the close of the late 36th Congress an amendment of the Patent Law was made with the haste and immaturity which usually characterizes important acts passed under such circumstances. The full effect of many of its provisions cannot be definitely known until they have been judicially construed in cases arising under them, but some of the obvious features are of great importance.

The act of 1836 was a complete substitution of a new for all former acts and parts of acts on the subject of Letters Patent for inventions. The present is not designed as a similarly general act covering the whole ground but only as an amendment. The act of 1836 which chanced to have been approved on an anniversary, (adding if possible still more to its interest) the 4th of July, was composed of 21 sections, all carefully matured and generally credited in great part to C. M. Keller, now an eminent patent attorney in this city. It was the initiation of the great system of scientific examinations previous to the granting of patents, which distinguishes American patent practice from that of all other countries. This law was amended slightly in 1837 and more radically in 1839, was added to by provisions for patenting "designs" In 1842, and was again slightly amended in 1848, besides various provisions at intervals for providing additional officers and salaries. The increase in the business has been enormous and the progress of the arts unexampled. In 1841, 847 applications for patents were made; in 1851, the number was 2,258; in 1860 it was 7,653.

Almost every one on his first introduction into Patent practice whether as a holder or alleged infringer of a patent finds provisions and rules which operate to his inconvenience and apparent disadvantage, but the opinion formed under such circumstances that the law is "all wrong" becomes materially modified with each subsequent experience. The great points considered by those best entitled to respect as requiring amendment were the discriminations against foreigners in regard to fees, and the feebleness of the provisions for obtaining testimony in questions before the Patent Office. Both these points are as far as the principal foreign countries are concerned, amply and satisfactorily provided for by the present amendment. All pay alike and all may with reasonable limitation compel the rendering of reluctant testimony.

There are 17 sections in the new amendment. The first empowers and requires the clerk of the U. S. District Court to issue subpœnas, with the usual penalties for contempt, compelling a witness to attend and testify before a Justice of the Peace, his testimony being subsequently sent to the Patent Office in writing by the Justice as had been previously practised. The difference in this respect is that whereas such testimony has heretofore been always voluntary and subpœnas if employed in such cases have been issued ignorantly and unlawfully and were of no legal force, the attendance of a witness can now be made compulsory so that the employees of a concern or any otherwise inaccessible parties can be called to testify in all cases of interference or extension. The second and third sections legally recognize what has been long employed in the patent office and known as the Board of Appeals.

Section fourth increases salaries.

Section fifth authorizes the return of models when an application is rejected and dispenses with models of "designs." It does *not* avoid the necessity for providing models in making an application exactly as heretofore. The general subject of models of all things really new to be stored in the United States Patent Office remains almost untouched. The building is in the form of a hollow square covering two squares or blocks of ground and already in the upper stories, three of the sides are filled with cases for models. The inventor will in a few instances be partially relieved of expense by the present amendment, as for example when the subject is an elaborate revolving pistol, bank lock, chronometer or microscope, and when the model may be presumed to possess some value as an article for sale or use.

Section sixth cancels an act long since practically defunct for forwarding models to Washington at government expense.

Section seventh empowers the appointment of additional officers.

Section eighth aims to ensure correct papers and to disqualify agents guilty of misconduct.

Sections ninth and tenth relate to fees and the details of caveats and additional improvements:

"On filing each caveat ten dollars" which is not counted as part of the fee for the patent.

"On filing each original application for patent except for a design fifteen dollars.

"On issuing each original patent twenty dollars.

"On every appeal from the Examiners in Chief [Appeal Board] to the Commissioner twenty dollars.

"On every application for the re-issue of a patent, thirty dollars.

"On every application for the extension of a patent, fifty dollars; and fifty dollars in addition on the granting of every extension."

It will be observed that the total fees for a patent instead of thirty dollars as at present are thirty-five, to wit: fifteen on the filing of the application and twenty more on the issue of the patent. There are many instances in which a certainty that a patent will be issued on call is as valuable for all practicable purposes for a long period as the possession of a patent. It does not appear on the face of the law that any obstacle is interposed to the leaving a case in this position for an indefinite period or until it becomes desirable to commence a suit against an infringer, neither does it appear that any means will exist by which the public may be informed of an application in such a position.

Section eleventh provides that designs may be patented for 3½, 7 or 14 years at will. Fee for the shortest term ten dollars, longest term thirty dollars. Extension of such patents may be granted for 7 years more, on showing cause and paying as in extension of patents for inventions, one hundred dollars.

Section twelfth provides "that all applications for patents shall be completed and prepared for examination within two years after the filing of the petition, and in default thereof they shall be regarded as abandoned by the parties thereto unless it be shown to the satisfaction of the Commissioner that such delay was unavoidable, and all applications now pending shall be treated as if filed after the passage of this act."

Section thirteenth relaxes the stringency of the law in regard to marking the date of patent upon patented articles.

Sections fourteenth and fifteenth authorize the Commissioner to print copies of patents in certain cases and makes such printed copies when certified and sealed, legal evidence of the contents of the patent.

Section sixteenth is the last with the exception of the usual provision, enumerated as seventeenth, that all acts or parts of acts inconsistent are hereby repealed. This sixteenth is anomalous in providing an unusual term [17 years] for the duration of patents hereafter to be granted and forbidding any extension of the same. The section is liable to misconception unless attention is specially invited to the fact that the extension of patents already issued remains unaffected. In short, the working of this section of the law will not be apparent until 1875. The term of seventeen years was adopted as a kind of compromise between the members of the joint committee of the two houses of Congress; one portion wished to leave the subject of extension to the discretion of the Commissioner as at present, while others were strennous in the effort to limit the extensions to cases when neither the inventor or assignee had received over one hundred thousand dollars from the patent. Lengthening the term of all patents to an extent equal to about half that effected by an extension was a simple mathematical problem, but the result is by no means free from objection.

Summary of Revenue for Feb., 1860 *and* 1861.

	1860.	1861.
Main stem	$267,607 44	$267,350 29
Washington Branch...	36,822 29	33,260 86
N. W. Virginia Railroad	22,851 18	27,240 62
Totals.....	$327,280 91	$327,851 75

Showing a net increase of $570 86.

The earnings of the Milwaukee and Prairie du Chien Railway, formerly the Milwaukee and Mississippi Railroad, for February, 1860-'61 were:

	1861.	1860.
Freight.....	$31,824 24	$18,037 97
Passengers.....	7,665 05	9,941 42
Mails and rents	3,305 51	4,335 41
Total.....	$41,854 80	$32,315 80
Increase.....		$9,539 00

The following is the Illinois Central Railroad Company's statement for February, 1861:

Land Department.

Acres Construction Lands sold.....	5,812.41 for	$87,875 20
Acres Interest Fund L'ds sold.....	399.38 "	5,383 66
Acres Free Lands sold ..	1,534.72 "	24,852 61
Total sales during the month	7,746.51 for	$118,111 47
To which add Town Lot sales		499 60
Total of all		$118,611 07
Acres land sold since Jan'y 1, 1861 ...	20,130.50 for	$301,149 41
Acres sold prev'sly (net sales).....	1,260,273.46 for	16,147,983 91
Total.....	1,280,403.96 for	16,449,133 32
Construction Bonds canceled in February, 1861		$24,600 00
Construction Bonds canceled previously.....		1,788,500 00
		$1,812,500 00
Total cash receipts in February ...		$51,422 81
Total receipts since Jan. 1, 1861 ...		123,696 35
Total cash and bonds received to February 31, 1861		4,319,094 37

NOTE.—Cash receipts in February, applicable to cancelation of Construction bonds, $23,974 64; applicable to Free Land fund, $4,386 38; applicable to Interest fund, $15,097 09. Miscellaneous accounts, $7,964 70. Total, $51,422 81.

Traffic Department.

Receipts from Passengers	$54,206 30
" Freight	210,961 85
" Mails	6,358 33
" Rent of road	5,533 33
" Other sources.....	1,716 49
Total receipts for February, 1861 ...	$278,776 30
Do. do. 1860 ...	185,925 60
Increase.....	$92,850 70
Total receipts since January 1, 1861 .	$598,800 47
Total receipts in corresponding period of 1860	371,182 60
Increase	$227,717 87

Original land grant, 2,595,000 acres; railway, 706 miles of main track, and 93 miles of sidings, 113 engines, 2,456 cars; funded debt, $15,573,500.

	1858.	1859.	1860.
Traffic.	$1,976,578.52	$2,114,448.98	$2,721,590.94
Working expenses ...	1,419,954.80	1,489,579.52	1,693,403.30
	$556,623.72	$624,869.46	$1,028,187.64

The net receipts of the New York and Harlem Railroad for the month of February are as follows:—

1860.....	$95,665 97
1861.....	73,813 02
Decrease.....	$21,852 95

One working day less than in 1860.

On account of the flood at Albany, no through freight or express matter was carried for seventeen days—it also interrupted the passenger business.

The following is a statement of the approximate earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of February, compared with the same period of last year, viz:

	1861.	1860.
From Freight	$130,153 96	$89,639 02
" Passengers	55,076 91	45,402 24
" Express	2,400 00	2,500 00
" Mails	7,825 00	7,825 00
" Rent of road.....	7,083 33	7,083 33
" Miscellaneous ...	180 00	124 69
	$202,719 20	$152,574 28
Increase.....		$50,144 92
Earnings January 1, to February 28	$419,647 24	$292,525 15
Increase.....		$127,122 09

The receipts of the Grand Trunk Railway of Canada for the week ending March 2, were..... $63,309 81

Week ending March 3, 1860 ..... 56,458 58

Increase in 1861..... $6,851 23

Total traffic from July 1st, 1860 ... $2,256,953 82

Corresponding period previous year 1,834,288 66

Increase..... $422,665 16

Columbus, Piqua and Indiana Railroad.

The following is the statement of the Receiver of this road for the year ending Nov. 30, 1860:

EARNINGS.		
Passenger receipts.....	$51,922 32	
Freight receipts.....	55,125 56	
Express receipts.....	1,292 60	
Mail service receipts....	4,435 68	
Total earnings.....		$112,776 16
Ordinary expenses		84,035 15
Net earnings.....		$28,741 01
Extraordinary expenses, viz:		
Construction of Western Div.	$4,200 03	
Rebuild'g and repair'g bridg's	5,329 49	
New water stations.....	454 48	
New engine-house at Colum.	293 65	
Repairs of bridges and platforms.....	252 27	
Taxes	2,601 35	
Right of way.....	1,201 35	
Cost of court in foreclosure suit.....	254 82	
Cash paid for note given by former Receiver (for work)	200 00	
Station house and passenger rooms at Columbus.....	687 38	
Total expenditures.....		$15,574 81
Net balance over all expenditures.....	$13,166 20	—13,166 20
Expenditures over earnings in 1859, as reported Nov. 1, 1859	4,702 07	
Balance on hand		$8,464 18

Charlton and Randolph Railroad.

We learn from the Huntsville *Citizen* that Mr. Kelly, one of the contractors, will commence operations on this road with a large force as soon as the weather will admit, and will push the work rapidly forward. They will begin laying the rails at once, so that in a few weeks we hope to be able to announce the completion of the road to that point. The financial affairs of the company are in a sound condition, and the means have been provided to obtain the iron for the whole road.

Missouri Bonds.

A bill has passed the Legislature of Missouri, and has received the approval of the Governor, to authorize, at the option of the holders, the conversion or exchange of dollar for dollar of the 7 per cent. indorsements of the State on the bonds of the South-west Pacific Company for the direct 6 per cent. obligation of the State.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, March 16, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The first two or three days of the week showed a considerable advance in the share market, from the rumored action of the Government in relation to the southern forts, the proposed abandonment of one or two of which being regarded as evidence of a pacific policy on the part of the new Administration. The advance has been barely maintained, as the moment one point seems to be gained, others, equally formidable, arise. There is no doubt that the policy of the Government is pacific and that it expects to find a solution for our difficulties in this direction. If successful, a long time may be required to restore the old regime. In the meantime, the Confederated States are about putting into operation a *revenue* tariff, which may interfere with the importation and consumption of northern merchandise. The trade of the country, however, is again assuming considerable activity, even that between the North and South. People must be fed and clothed, must produce and sell, quite independently of political complications, and as these have yet led to no collision of arms, a pretty active commerce is still carried on between the North and South. Throughout the greater part of the South, the crop of breadstuffs the past year was very short, to make up for which, very large importations of these and provisions are being made from the Western States. However much the two sections may differ in opinion, it seems plain that the commercial relations of the past must, in a great measure, remain. Every one is interested in preserving these intact, and while such is the case, they can hardly be interrupted for any length of time.

Money continues most abundant with every prospect of its remaining so. The influx of gold continues both from California and from Europe, while imports of merchandise are greatly reduced. An active demand for our produce still continues, leaving us largely on the credit side. The excess of exports, the past year, over imports was $38,000,000. The present year, it will, probably, show a much larger excess. With abundance of money, very few new enterprises will be set a-foot. There was never a time in this country, in which so much capital lay idle as at the present. Could our political difficulties be ended, a very large amount of money would go into securities of one kind or another, and would very likely bring considerable quantities from Europe for sale.

The Magnitude of the Trade of the Three Great New York Routes.

The Erie Canal, New York Central, and New York and Erie Railroads, brought to tide-water the past year, the produce of the West, 2,093,520 tons. It is so classified that its value can be very accurately estimated. The tonnage with the respective values brought over the two railroads the past year was as follows:

	Transported by Central Railroad.	
Articles.	Tons.	Value.
Products of forest	42,705	$846,100
Products of animals	223,362	44,672,400
Vegetable food	343,872	13,754,880
Other agricultural prod'ts.	39,167	587,520
Manufactures	77,256	19,314,000
Merchandise	201,587	100,793,500
Miscellaneous	100,632	1,006,320
Total	1,028,381	$180,974,720

	Transported by Erie Railroad.	
Articles.	Tons.	Value.
Products of forest	118,889	$2,377,780
Products of animals	201,823	40,364,600
Vegetable food	197,232	7,889,280
Other agricultural products.	19,909	298,635
Manufactures	113,948	27,487,000
Merchandise	198,610	99,205,000
Miscellaneous	289,140	2,891,400
Total	1,119,551	$180,613,695

In the above statement products of the forest are valued at $20 the ton; products of animals at $200; vegetable food at $50; other agricultural products at $15; manufactures at $250; merchandise at $500, and miscellaneous freight at $10 per ton. The total tonnage of both roads was 2,167,736, valued at $361,893,425. The number of tons carried on the New York Canals for 1859 was 3,781,684, valued at $132,560,758. We have received only a statement of freight coming to tide-water for 1860, which equaled 2,916,066 tons, valued at $80,458,685, against 2,121,672 tons for 1859, valued at $53,175,312. Assuming a rate of increase equal to that coming to tide-water, of freight moving in other directions, the total tonnage on the Canal the past year was 5,216,464 tons, equaling in value $182,932,800. The total tonnage of the three routes was 7,384,210, valued at $544,186,705.

Iron for the Manassas Gap Railroad.

This company have recently received at Alexandria 2,500 tons of rails, sufficient to complete the track to Harrisonburg, 139 miles from Alexandria, and 27 miles beyond its present terminus at Mt. Jackson. That point reached, but 23 miles remain to carry the road to its final terminus at Staunton,

Alleghany Valley Railroad.

The earnings of this road for the fiscal year ending January 31, 1861, were as follows:

From passengers	$50,850 44
" freight	38,103 28
" mails, rents, old materials, etc.	5,388 56
	$94,342 28

Expended as follows, viz:—

Conducting transportation	$15,232 42
Maintenance of way	9,088 81
" motive power	7,860 66
" cars	2,555 00
Repairs of bridges	4,911 23
Interest on mortgage bonds	26,750 00
" loans, discounts, etc.	2,036 65
All other expenses	25,907 51
	$94,342 28

Included in the above is $1,948 50 for legal expenses, which covers attorney's fees for five years. The annual salaries of president, secretary and treasurer, solicitor and messenger, amount in all to $2,660 per annum.

The ordinary operating expenses amount to 49,180 78, which is 53.40 per cent. of the gross earnings.

The floating debt per treasurer's report February 1. 1861, was	$29,544 29
Coupons due	13,125 00
Amount due on road	19,955 19
Total floating debt, February 1, 1861	$62,624 48

The funded debt of the company is $378,454 73.

The number of miles run by all the trains was 61,634; the number of passengers carried, 91,670; total tons freight and coal moved 62,827.

It is believed by the board that a connection of their road with the tracks of the other roads entering Pittsburg would be mutually advantageous for the transhipment of oils, coal, ore and other freight, and should be made at the joint expense of the several companies. A proposition had been received from parties largely engaged in railroad construction, with a view to the extension of the road to Brookville, but the terms were inadmissible. The board has had constantly in view the importance of extending the road to Mahoning; a plan was matured, and nearly half the necessary amount subscribed by holders of the first mortgage bonds, but a condition insisted on by some of them rendered success impracticable, and the plan was for the time abandoned. The board believe, however, that events are in progress which will render the extension of the road certain within a reasonable time after the recovery of the county from its financial difficulties. Upon the completion of the Sunbury and Erie Railroad, it will be found that a connection with Pittsburg will be an indispensable requisite to the success of that company. The inhabitants of the oil region are agitating the project of a branch from Franklin; and the proprietors of the Brady's Bend Iron Works are sufficiently interested to aid largely in the enterprise. It is believed that the road could be built at moderate cost, either by way of the Alleghany river, or by the route already surveyed to the Clarion river, and thence up Beaver Creek, down Six Mile, and up the Alleghany river to Franklin. In case the Clarion Branch route were adopted, the subscription of Clarion County would be properly applicable to its construction.

The office of the Company is at Pittsburg, Pa.

The officers and directors for the ensuing year are:

President and Superintendent—R. F. Morley.

Directors—Wm. F. Johnston, Joseph Baffington, W. Reynolds, Geo. Black, C. Yeager, P. Kerr.

Secretary and Treas'r—James Gibson.

Master of Transportation—H. Wertz.

Ohio Canals.

The amounts reported for tolls, water rents, etc., by the Auditor of the State for the quarters ending Feb. 15, 1860 and 1861, is as follows:

	1860.	1861.
Ohio canal	$9,485 34	$10,333 16
Miami and Erie Canal	17,331 76	20,095 52
Muskingum improvement.	3,612 32	3,347 54
Hocking Canal	1,500 82	2,048 41
Walhonding Canal	132 98	258 84
Total	$32,063 33	$36,083 47

Increase in first quarter 1861 over first quarter 1860, $4,020 25.

Eaton and Hamilton Railroad.

The earnings of this road for the past three years have been as follows:

	1858.	1859.	1860.
Passengers.	$61,485 31	$58,485 31	$61,640 44
Freight	89,380 91	80,016 35	90,688 28
Total	$151,866 22	$138,501 66	$152,328 72

The expenses for year ending Dec. 31, 1860, were	108,463 00
Leaving net earnings	$43,865 72

Peoria and Oquawka Railroad.

The name of this railroad has been changed to that of the "Logansport, Peoria and Burlington." The company is placing additional equipments on the road, ready for spring business.

Vermont Central Railroad.

The annual meeting of the stockholders of this company was held on the 5th inst. A disagreement arose as to the right of those present to vote as stockholders, and resulted in the choice of two boards of directors, as follows:

S. M. Felton, O. W. Davis, Philadelphia; E. R. Hard, Jeremiah French, Burlington; E. M. McPherson, Joseph H. Converse, Boston; G. G. Hubbard, Cambridge, Mass.

George M. Dexter, C. O. Whitmore, Boston; John G. Smith, Lawrence Brainard, St. Albans; Joseph Clark, Milton; Levi Underwood, John Wheeler, Burlington.

Rutland and Washington Railroad.

The annual meeting of the stockholders of this company was held at Rutland on the 4th inst., and the following gentlemen elected directors:—Merritt Clark, Poultney; D. A. Smalley, Geo. F. Edmunds, Thos. W. Canfield, Burlington; Wm. F. Hart, Boston; Chester Spencer, Castleton; T. H. Canfield, Arlington. The Board of Directors subsequently was organized by the election of Thomas W. Canfield, President; Merritt Clark, Vice-President; Chester Spencer, Clerk and Treasurer.

The Revenues of Cuba.

The official return of the revenues of Cuba for the year 1860, is published in the Havana papers. They amount in the aggregate to $18,922,260, which is only $170,784 more than the revenue of the previous year. This small increase is accounted for by the prostration of trade during the last month of the year, owing to the political troubles in this country, and a diminution of the excise on sales of real estate, slaves, mortgages, and auctions, which have been lessening every year since 1857. The abolition last year of the capitation or license tax on slaves, also reduces the annual income. Of the gross income, $11,731,859 was derived from the customs, $4,767,682 from taxes, duties on sales, &c., and $2,201,790 from lotteries.

Parkville and Grand River Railroad.

Since the completion of the Hannibal and St. Joseph Railroad across the State of Missouri, several projects, among others the present, have been started for the purpose of forming a more direct connection with the towns on the Kansas river. The Parkville and Grand River Railroad leaves the main trunk at Cameron and extends south-west to Parkville on the Missouri river, and will thence be continued to Lawrence under the title of the Kansas Valley Railroad, forming a central trunk line more direct than any other. The river at Parkville presents the most favorable point for bridging the Missouri for several hundred miles—the bluffs approaching nearer and the landings on both sides good and permanent. The length of the P. & G. R. R. R. is about 48 miles. The profile of the route is favorable, being for the first 20 miles over an open prairie and for the remainder through fertile valleys, producing large amounts of hemp, tobacco, wheat and corn. Parkville is the centre of the trade of this region. Under contract prices the road will cost $624,000, or $13,000 per mile, and the necessary rolling stock will cost $126,000. The subscription list is full, and includes $100,000 subscribed by Platt county in 10 per cent. bonds, and $50,000 subscribed by Parkville also in 10 per cent. bonds. The contractors for the work are Messrs. Mattoon, Weils & Co., who have already done a large portion of the grading and expect to complete the whole so as to have the road in operation by the 1st June of the present year. Such a road as this being very direct with the lines of east and west travel, must be of great advantage not only to its own locality, but to general travel and transportation.

Ohio State Debt.

The following bill, providing for the payment of the public debt of Ohio, has been introduced into the Senate of that State:

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio*, That for the sinking fund applicable to the payment of the interest upon the State debt, and the gradual reduction of the principal thereof there shall be levied annually, including the amount heretofore authorized by law to be levied for the same purpose, a tax of two mills on each dollar of taxable property, as the same shall be valued and entered on the grand list of the taxable property of the State, until and including the year 1870.

Sec. 2. That of the moneys raised by the tax authorized by the first section of this act, there shall be appropriated and used for the payment of the principal of the funded debt of the State, and for no other purpose whatever:

During the year of	1862,	the sum of.	$ 790,000 00
" "	1863,	" .	837,400 00
" "	1864,	" .	887,600 00
" "	1865,	" .	941,000 00
" "	1866,	" .	997,400 00
" "	1867,	" .	1,057,200 00
" "	1868,	" .	1,120,000 00
" "	1869,	" .	1,188,000 00
" "	1870,	" .	1,259,000 00
" "	1871,	" .	594,042 20
Making a total of.....			$9,671,242 20

Which with the sum of $225,000 applicable to the same purpose, from the revenues of 1861, will pay the funded debt of the State becoming payable before and on the 1st day of January, 1871.

The above is precisely the measure recommended by the Governor in his annual message to the Legislature in January last, and will of course receive his approval if passed. It is simply an addition of six-tenths of a mill on the dollar to the present authorized levy for the same purpose, and will provide a sufficient sum to meet the accruing interest, and those portions of the principal of the debt maturing prior to and on the first of January, 1871, amounting to $15,573,474 70, leaving then only $4,000,000 of the debt unpaid. This is $1,856,991 94 less than would have to be paid under the present system.

(From the Dubuque Times.)

Railroads in Iowa.

We have two roads running out of Dubuque, westward, and railroad projects without number. In 1858, we had the Dubuque and Bellevue Railroad scheme; course southerly along the Mississippi to Bellevue, in Jackson county; the Dubuque Western Railroad; course west and south-west to Anamosa, a point upon the Iowa Central Air Line Road; the Dubuque, St. Peters and St. Paul Railroad; course north-westerly to a point near the boundary line between Minnesota and Iowa, thence north to St. Paul, M. T., and westerly to the Great Bend of the St. Peters river in Central Minnesota; and the Dubuque and Turkey Valley Railroad; course northerly to the mouth of Turkey river, thence up the Turkey river.

Of these only the Dubuque and Pacific Railroad, now Dubuque and Sioux City Railroad, and the Dubuque Western, now Dubuque Marion and Western Railroad, are commenced. The former completed to Waterloo, 93 miles, and the latter to Anamosa, 53 miles.

The Dubuque and Bellevue road was once in a flourishing condition and in a fair way to be built, but the crash of 1857 and 1858 put a quietus to it.

The Dubuque, St. Peters and St. Paul road will be superseded by the Cedar Valley road which makes connection with the Dubuque and Sioux City road at Cedar Falls, 100 miles from Dubuque. This road is under contract and in the process of construction. Twenty miles of it is ready for the track in this State, and a large amount of grading done in Minnesota. There is a large and valuable tract of land appropriated to the use of this road in Minnesota, sufficient, if judiciously managed, to complete the road to St. Paul.

The Dubuque and Turkey Valley Railroad project has been revived again with great prospects of success. It is designed to run from Dubuque along the bank of the Mississippi to the mouth of the Turkey river, thence up the valley of the Turkey river to Elkader, in Clayton county, and as far northwest as possible. This will open a thoroughfare to one of the richest regions of Northern Iowa.

Below will be found a statement of the two roads in operation.

DUBUQUE AND SIOUX CITY RAILROAD.

The Dubuque and Pacific Railroad was projected by Platt Smith in the spring 1853. Articles of incorporation were entered into on the 28th of April, signed by the following named incorporators: J. P. Farley, F. V. Goodrich, R. C. Waples, H. W. Sanford, R. B. Mason, James Burt, L. H. Langworthy, G. R. West, Platt Smith, Ben M. Samuels, F. S. Jesup and Ed. Stimson. Of these gentlemen, however, only Farley, Mason, Smith, Jesup and Stimson, continued to take an active interest in the matter. The project was to build "a railroad from some point in the city of Dubuque thence westerly on the best route towards the Pacific Ocean." In the location of the road this policy was adhered to as far west as Waterloo, then a deviation was made from the best route, which would have been up the east side of the Cedar river to the Beaver river, and then along the Beaver valley with a view of increasing the stock subscription and procuring donations to the company, supposed to more than counterbalance the extra expense of a more southerly location.

For the first two years but little was done except to make surveys, and estimates of the cost of construction. In 1855, a contract was let to R. B. Mason & Co., to build the road to the west line of Dubuque county, and the work of construction commenced. By this time the city and county of Dubuque had each subscribed two hundred thousand dollars to the stock of the company, and issued their corporate bonds in payment.

On the 15th of May, 1856, Congress made grant of land to the State of Iowa, for the purpose of aiding in the construction of four roads across the State, from Dubuque and three other points on the Mississippi to Sioux City and three other points on the Missouri.

An extra session of the Legislature of Iowa was called, they passed an act to accept the grant from Congress, and to regrant the lands to the different roads. The Dubuque Western Railroad Company was a competitor for the grant from Dubuque to Sioux City, but the Dubuque and Pacific being, or supposed to be, the more worthy, got it.

The survey was immediately extended to the Missouri river, under the superintendence of the Chief Engineer, B. B. Provost. The land grant is six sections to the mile, making an estimated total of 1,251,040 acres. This addition to the property of the road drew increased attention to it in the East, and a financial plan was concocted similar to that of the Illinois Central Railroad by which money was to be raised to construct the whole road. This plan, however, from various causes has proved abortive. In accordance with that plan the railroad and land grant were mortgaged by the company to four trustees, to secure the payment of $12,000,000 of construction bonds to be issued, or if need be $15,000,000. Of these bonds the company executed the amount of $3,075,000, some of which, however, have been canceled without ever having been issued.

The company built forty miles of road, then offered part of their lands for sale, and with them redeemed a large amount of their bonds. This land sale was in 1859. The bondholders were then induced to purchase more lands at a cash price of $1 40 an acre, in order to raise funds to complete the second forty miles, the contractor to take the greater portion of his pay for grading and bridging in lands at even a lower price. He failed to carry out the contract, but his subcontractors and the trustees of the company took the contract off his hands, and the subcontractors finished the work, not, however, without inconveniencing themselves and their subs to a very great extent, and obliging them to force their lands to sale at ruinously low prices.

The road was thus built to Jesup, eighty miles, and all the lands belonging to one hundred miles sold, except about 29,000 acres. The financial difficulties of 1857, the great sacrifices which the company had to make in order to prosecute the building of the road so as to comply with the terms of the land grant act, and the failure of contractors making it necessary to use the earnings of the road in construction, so embarrassed the company that they had no means of paying the interest coupons on their outstanding bonds. The bondholders pressed a foreclosure and notified the trustees to proceed to foreclose; the company resisted, and for several months matters stood in a precarious and unsettled condition. At the election of directors in June, 1860, Hermann Gelpcke was elected a director; he proposed a compromise foreclosure; after considerable negotiation such a foreclosure was agreed on, and the decree was obtained at the August Term of the District Court, 1860, of Dubuque county, Iowa.

By this foreclosure the road, land grant and other properties of the Dubuque and Pacific Railroad Company passed into the hands of the Dubuque and Sioux City Railroad Company, which company is composed of the bondholders, stockholders and creditors of the former company. The bondholders getting preferred stock in the new company, and the stockholders and creditors getting common stock.

Certificates of preferred stock have already been issued to the amount of $1,391,000, and of common stock to the amount of $922,400. It is estimated that when the remaining liabilities of the Dubuque and Pacific are liquidated, there will be from $250,000 to $350,000 additional preferred

stock, and about the same of common stock. The company will then be without debt, except a portion of what has been incurred for the fifth twenty miles.

The country traversed by the road is principally rolling prairie of the finest quality. Timber is scarce except on the banks of the rivers. But this deficiency in timber is more than made up by the great coal field, which the road enters abont 140 miles from Dubuque, and traverses for forty or fifty miles. There is no country superior for agricultural purposes to the valley of the Cedar and Des Moines, and which are natural feeders to the road. The projected road is 320 miles in length, 93 miles of which are finished.

The following are the officers elected at a recent meeting of the stockholders for the ensuing year for the D. & S. C. R. R.

President—Hermann Gelpcke.

Vice President—Platt Smith.

Directors—R. B. Mason, Chicago; E. F. Bishop, Bridgeport, Con.; H. L. Stout, Ed. Stimson, Platt Smith, Dubuque; Hermann Gelpcke, M. K. Jesup, John Lord, Frederick Schuchardt, New York.

Secretary—James M. McKinlay.

Treasurer—C. H. Booth.

Attorney—Platt Smith.

The following table shows the gross passenger and freight earnings of the Dubuque and Pacific Railroad for the year 1860. During the last four months the affairs of the road were administered by the Dubuque and Sioux City R. R. Co. which has taken the place of the old Company.

	Number. Passengers.	Passenger Earnings.	Freight Earnings.
January	1,068	$1,794 35	$5,010 98
February	1,175	2,066 50	4,301 13
March	1,342	2,880 04	5,331 59
April	1,487	2,854 71	4,229 86
May	1,316	3,000 78	6.114 72
June	1,317	3,009 66	7,387 69
July	1,298	2,398 84	4,303 91
August	1,343	2,817 45	5,397 87
September	2,225	4,791 71	10,263 01
October	2,609	5,563 60	13,018 43
November	1,902	4,177 52	9,189 55
December	1,327	2,136 84	5,436 67
Total	18,400	$37,492 00	$79,985 41

Total for 1860, $117,477 41.

The freight received at the several stations on the Dubuque Western Railroad, and at Dubuque by Dubuque Western Trains in 1860, was:

		Tons.	
Received at	Dubuque	10,978,786	$3,291 46
"	Worthington	351,940	164 80
"	Sand Spring	600,928	306 08
"	Monticello	1,576,124	760 98
"	Langworthy	134,947	68 76
"	Anamosa	4,322,650	1,724 62
Total		17,965,375	$6,316 70

In the above the freight belonging to the Dubuque and Sioux City Railroad only is extended.

The Freight received at the several stations on the Dubuque and Sioux City Railroad for the year ending December 31, 1860, was.

		Tons.	
Received at	Dubuque	35,340,668	$39,913 20
"	Peosta	65,110	38 74
"	Epworth	152,732	125 00
"	Farley	758,732	354 62
"	Dyersville	1,669,329	1,735 07
"	Earlville	1,672,501	2,060 12
"	Delaware	146,800	272 48
"	Manchester	2,605,430	3,414 92
"	Masonville	230,482	311 28
"	Winthrop	296,751	548 70
"	Independence	7,122,703	12,483 14
"	Jesup	5,315,223	11,345 83
Total		55,376,461	$73,603 10

DUBUQUE, MARION AND WESTERN RAILROAD.

The Dubuque Western Railroad, was incorporated in 1855. It leased the Dubuque and Pacific Railroad from Dubuque to Farley, and was completed to Anamosa, in Jones county in March last. 53 miles from Dubuque. It is now being extended to Marion, the County Seat of Linn County, 72 miles from Dubuque, and will be completed to that point in the month of April, 1861. It opens one of the richest and best settled regions of Iowa, and gives the farmers of Jones and Linn counties an outlet for their produce to the Mississippi at Dubuque, from which point they can have a choice of markets, there being two routes to Chicago, one to Racine and Milwaukee, and a third, via Illinois Central Railroad, to St. Louis, Cairo and the South. The present officers of the Company are:

President—Edward Stimson.

Superintendent—A. Hoeppner.

Sec. and Treasurer—Louis Boisot.

A company has recently been incorporated in Benton Co., to construct what is to be called the "Cedar Valley Railroad." Shullsburg in Benton, and Palo in Linn Co., are named as points in the articles of incorporation. On the completion of the Dubuque, Marion and Western Railroad to Marion, the new company will probably be glad to form a connection with it, which will open to Dubuque trade a fine region of country. The following are the officers of the company: President, Hon. S. Douglass; Vice-President, A. Runyon; Secretary, John McCartney; Treasurer, H. D. Gay.

Journal of Railroad Law.

CARRIERS; OBLIGATION AS TO FORWARDING GOODS BY OTHER LINES; LIABILITY OF, AS AGENTS.

The business of transporting goods is not always completed when the goods have been transported and have arrived at their place of destination. The duty is constantly devolving on the carrier, to forward the articles he has transported, to still more distant places of destination. What then is the character which the carrier assumes when he undertakes this duty. Is he still liable for all the mishaps which may arise to them, or is his liability as a common carrier lightened. Manifestly his responsibility is in the character of an agent, merely, and the duties which this character imposes upon him is well considered in the case of Johnson *et al vs.* The New York Central Railroad Company, decided by the Supreme Court of New York.

The action was brought to recover the value of a quantity of tow lost on its passage from Albany to New York by the perils of navigation. The bales and sacks of tow were put into the defendants cars at Little Falls, with directions to forward it from Albany by the People's Line of Steamboats. On the arrival of the train of cars at Albany, that line of steamboats refused to take the frieght, upon the ground that they could not take it without violating an act of Congress. The navigation of the Hudson river was about closing, and the defendants shipped the property by the Eckford line of tow boats, a responsible line and in good reputation, which was the usual mode of conveyance of frieght of this kind.

The Circuit Court gave judgment for the plaintiffs, for the value of the freight with interest, and the defendants appealed. The following is the opinion of the Oneida General Term—the appellate tribunal.

W. F. ALLEN J. It is conceded that the liability of the defendants as carriers ceased with the arrival of the goods at Albany, and that from that time they occupied a different relation and were charged with different duties and responsibilities. The defendants then became merc warehousemen and forwarders, and liable only for a breach of duty growing out of those relations. They were in the situation of one receiving goods to forward, having no concern in the means of transportation, or interest in the freight, and were therefore mere warehousemen and agents of the plaintiffs. It can make no difference in their liability whether they became possessed of the property at Albany, by receiving it from their own cars, or by receiving it by some other channel. It is in their possession for a specific purpose which determines their character, and furnishes the rule of their liability. They were responsible only for ordinary care and skill and diligence. In the absence of specific directions as to the mode or route of conveyance, the duty of the defendants would have been well discharged by forwarding the goods in the accustomed and usual manner, according to the course of trade, by a responsible and reputable individual or association. Forwarders and warehousemen are, however, like other agents bound by the directions of their principles. The directions constitute a part of their authority, and operate as a limit upon it; any unnecessary deviation or departure from the instructions is at the peril of the agent, and renders him liable for any loss resulting from it. He becomes the insurer of the goods of his principal if, without authority or contrary to instruction, he causes them to be shipped or forwarded to their place of destination by a route or means of conveyance of his own choosing. But a deviation from the course marked out by the principal, which is rendered necessary by the circumstaces of the case, which were not foreseen by the principal, is justifyable if the agent exercises the care and skill which the character of his agency calls for. He may, if it becomes impossible to execute his agency, in the prcise manner directed, adopt the ordinary and usual method for accomplishing the same purpose, and if he does so with ordinary care, skill and diligence, he will not be responsible for the consequences, but his acts will be the acts of his principal; unless, indeed the instructions amount in substance to a prohibition of the act in any other than the prescribed method. This would be so especially in cases where the departure from instructions was circumstantial merely, and not substantial, compliance with the orders of the principal, and a deviation from the appropriate course will not vitiate his act if it be immaterial, or circumstantial only, and does not in substance exceed his right and duty.

There is no evidence, and no circumstance from which it can be inferred, that the intention of the plaintiff was that the goods should be sent from Albany to New York only by the "Peoples Line," and that if they could not be forwarded by that line they were to be detained at Albany and not sent forward. It was not so expressed in the direction, and no provision was made by the plaintiff for the goods at Albany, in that contingency. In the margin, or at the foot of the freight way-bill from Little Falls to Albany, not making a part of the way-bill, or the direction of the goods, are the words "via Peoples' Line," designated only as a memorandum by way of a direction to the railroad servants at Albany; and this is the only evidence in the case of any direction being given by the consignors.

The substantial thing to be accomplished was the sending of the goods forward to New York. The particular boat or vessel by which they should be forwarded was merely circumstantial; and if the directions in that respect could not be obeyed, the substantial thing to be done could be accomplished, and it devolved upon the agent in the exercise of ordinary diligence, to see that it was done. And had the defendants omitted to forward the goods in the usual manner, and according to the course of trade, and detained them in their warehouse at Albany, and harm had come to them there, or the plaintiffs had sustained damages by the delay, they would have been liable in damages. The established usage and course of business became the rule of duty binding upon the agent in order to carry out the substantial end and object of the agency, and evidence of this uniform usage was competent, and was controlling in the case.

It became impossible to comply with the directions of the principal, without the fault of the agent; and it was a case, therefore, for a departure from those directions; and within all the cases it is only an *unnecessary* departure that renders an agent liable, or avoids his acts.

The defendants really, as the result of the refusal, in consequence of the inability of the "Peoples' Line" to carry the freight, were in the possession of it as forwarders, without any directions as to the route or means of conveyance; and, therefore, bound to exercise their discretion, and select the best that presented. The Peoples' Line could not take it; but this was not known either to the plaintiffs or defendants at the time the direction was given, and it was as if no direction had been given. It was, as if there had been no Peoples' Line, or their means of transportation had been destroyed between the giving of the directions, and the arrival of the goods at Albany. The direction was given in good faith, but was impossible of execution; and what is the innocent forwarding merchant to do? He has to adopt a course without the aid of the property owners. They have intimated, by their consignment, a desire that the property shall be sent to New York, and the presumption is that the desire is that it shall be forwarded without delay or the expense and risk of intermediate storage. I think the duty was obvious, to carry out as near as might be, the plainly declared intentions of the principal. There was no time to be lost; the boat on which the freight was shipped was the last tow that went down the river, in the fall of 1854. A delay for instructions would have lost the opportunity. The freight by the river was 6 cents per hundred pounds; by railroad the charge would have been 25 cents per hundred pounds. The rule must be the same as to the duties and powers of the agent whether the owner and shipper of the goods resides within fifty or five hundred miles of the forwarding merchant, if he is not in fact present so as to be able to be counseled on the spot. The judgment is reversed and a new trial granted.

Railroad Iron at New Orleans.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

OIL! OIL!
PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable**, that will keep bearings **cool**, and

WILL NOT GUM.

In no case has it failed to meet the approval of the consumer.

The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor

F. S. PEASE, 61 Main st., BUFFALO.

Reliable orders filled for any part of the United States or Europe.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at Boonton, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an **upset solid head, perfectly true on all sides,** and of uniform size. The Iron used is of **our own manufacture,** and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish **SAMPLES** and **PRICE LIST** on application.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co, N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.		SHEET No		
1. General Table for all Bases and all Slopes.		13. for Base 18 ft. Slop.		1½ to 1
2. For Side Hill Cuts and Fills.		14. " 20 "		1½ to 1
3. Base 12 ft. Slopes	1½ to 1	15. " 24 "		¾ to 1
4. " 14 "	1½ to 1	16. " 25 "		1 to 1
5. " 15 "	¾ to 1	17. " 26 "		1½ to 1
6. " 15 "	1 to 1	18. " 28 "		¾ to 1
7. " 15 "	1½ to 1	19. " 30 "		1 to 1
8. " 16 "	¾ to 1	20. " 30 "		1¼ to 1
9 " 16 "	1 to 1	21. " 30 "		1½ to 1
10. " 18 "	¼ to 1	22. " 32 "		1 to 1
11. " 18 "	¾ to 1	23. " 32 "		1¼ to 1
12. " 18 "	1 to 1	24. " 32 "		1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, March 23, 1861.

Macon and Brunswick Railroad.

We have received the second annual report of this company for the fiscal year ending February 1, 1861. At the date of the previous report, the line had been located, and the grading, bridging and superstructure had been put under contract upon the northern division, 37½ miles from Macon; and on the southern division, from Hazlehurst's, (a point on the Brunswick and Florida Railroad, eleven miles from Brunswick) to the Atlantic and Gulf Railroad, a distance of 29 miles; and approximate estimates of the cost of construction presented. Since that time, the grading of the Northern division has been finished up continuously from Macon to Shellstone creek, a distance of nearly 29½ miles. The iron for the entire length of the northern division has been purchased upon favorable terms, about two-thirds of it delivered upon the line of the road, and the balance was being discharged at the port of Darien, to be shipped up the river by steamer. The iron had been laid, and a daily train running about 20 miles from Macon. Track-laying was also progressing, with a prospect of its reaching Buzzard Roost, 25 miles, by the 1st of March, and there form the boat connection to Hawkinsville and Savannah. It is thought that considerable through business will be secured by this route between Macon and Savannah. The remaining portion of the northern division, and the recently located Hawkinsville branch, all of which is under contract to responsible parties, will be completed during the coming summer. The entire southern division, except two miles of very light work, was also graded ready for the track. The total expenditures under the supervision of the Engineer's department, to the date of the report was:

Grading—Northern division	$93,608 84
" Southern "	48,568 39
Bridge masonry	6,490 00
Superstructure exclusive of iron	28,566 00
Bridging and trestle	19,403 48
Water stations	194 19
Engineering department	12,483 58
Rolling stock	11,000 00
Total	$220,314 48

The present estimated value of the grading, masonry, bridging and track-laying on the northern division is $191,009 65—of which, work to the amount of $129,402 32 has been done, leaving to be done $61,607 33. Upon the southern division the value of work done is $49,149; to be done, $21,863—total estimated value $71,012 39. The estimated value of work to be done upon the Hawkinsville branch is $74,850. The amount of stock embraced in the contract upon the northern division is $50,780; upon the southern division, $20,955; upon the Hawkinsville branch, $24,950. The difference between the original estimates and the contract prices is—upon the northern division, $13,538 35; and upon the southern division, $12,520 61.

The total estimate of the northern division, ready for the rolling stock now stands, at $403,584 65 against $420,172 last year—a decrease of $16,587 35. To this should be added for right of way, $5,988 45; and for equipment $15,750—making the total cost $425,323 10. To the estimated cost of the Hawkinsville branch, ($74,850,) should be added for engineering, etc., $7,485; for superstructure (10½ miles, embracing side tracks) $57,500; and for buildings and fixtures $2,000—making a total of $141,835. The total estimated cost of the road from Macon to Hawkinsville is, therefore, $567,158 10. The following is a recapitulation:

Total cost of Northern division	$425,323 10
Total estimate of Hawkinsville branch	141,835 00
" Middle division	1,084,800 00
" Southern "	231,640 00
Buildings and fixtures	49,000 00
Furniture	341,100 00
Five miles of side track	50,000 00
Total estimated cost of road and branch	$2,323,698 10

The total amount of stock subscribed and interest collected thereon is $711,200—including the stock taken in contracts. The total amount expended thus far, on account of grading 57 miles, purchase of iron for 37 miles, materials, rolling stock, bridging, masonry, laying down superstructure, etc., $318,000 17—leaving a balance of $397,200 83 yet to be expended. The stock subscribed in the counties of Appling, Telfair and Montgomery is not included in the above, its use being deferred till the work reaches these counties. The subscription of $121,675 by the people of Hawkinsville is conditional upon the construction of the branch to that point. This subscription is paid in stock notes, which they propose to turn over and merge into the capital stock of the company. The contractors for the grading, masonry and bridging take one-third in the stock of the company, and the balance in the stock notes so turned over, in payment, which, it is thought, will leave a sufficient sum to buy the iron. If the amount can be raised on said notes, the iron will be bought and laid down on the whole line continuously from Macon to Hawkinsville, a distance of 47½ miles, in time for the shipment of the next cotton crop.

The company have no bonded or mortgage debt; and it is the settled policy of the present direction to have none, until by so doing they can raise a sum sufficient to finish the work, based upon the part of the road completed and paid for. The floating debt amounts to $88,700, being chiefly the balance due on the purchase of iron and rolling stock, and which the company has ample assets to meet when due, but upon which, under the present pressure in the money market, they find it difficult to realize at once. The assets consist of—

Bills receivable	$192,280 10
Bonds of Macon	140,000 00
" Brunswick	25,000 00
Subscription of contractors	24,500 00
Cash, balance on hand	4,447 43
	$886,227 53

The equipment of the road consists of one locomotive; one baggage, one house and four platform cars—valued at $10,700.

The financial condition of the company at the date of the report is thus stated:

Capital stock		$712,150 00
Paid for engineering, construction, iron, equipment, etc.	$325,922 47	
Assets as above	386,227 53	
		$712,150 00

The office of the Company is at Macon, Ga. The officers and directors are:

President—A. E. COCHRAN.

Directors—B. F. Ross, T. R. Bloom, H. Bunn, L. N. Whittle, Geo. Walker, James T. Blain.

Secretary and Treasurer—ARTHUR DICKINSON.

Chief Engineer—A. N. ROGERS.

Tomlinson's Improved Truss for Suspension Bridges.

A great objection to the use of Suspension Bridges for railway traffic is the difficulty of adjusting the ordinary truss to the contraction and expansion of the cables. To obviate this difficulty, Mr. Tomlinson, a well known bridge builder, proposes to construct chords of the trusses of different materials, and so combined that their differential construction should act upon the truss, increasing or diminishing its camber, so that it shall always be in proper relations to the cables—in other words always rigid, allowing the passage of trains at high rates of speed. Below we give a detailed description of the improvement.

In a suspension bridge of from 400 to 500 feet span, as ordinarily constructed, the platform at the middle of the bridge is raised from 18 to 24 inches by the contraction of the cables, occasioned by a low temperature—say 130 degrees below that at which the cables allow the platform to be horizontal or level. Under such conditions, the more rigid the ordinary trusses, the greater the danger of a dislocation of their parts, or actual fracture; hence the difficulty of using trusses of sufficient strength to effectively distribute a load along the bridge. For this reason eminent engineers have condemned suspension bridges for railway traffic.

My improvement consists in the employment of different materials in the top and bottom chords, so that their expansion or contraction from changes of temperature shall be different, and so combined that such changes will produce a curve or camber in the trusses exactly equal to the changes effected in the deflection of the cables from the same cause. The expansion of bar iron, for instance, under a given increase of temperature, is about three times as great as that of pine. A truss, therefore, with a top chord of pine and a bottom chord of wrought iron, will vary its curvature according to temperature; and if supported at the ends only, its curve or camber will be increased or diminished in proportion to the diminished or increased temperature to which it may be subjected—the exact proportion of the rise or fall being determined by the length of the truss, and the distance apart of the top and bottom chords.

A truss being divided into panels, the relative lengths of the tops and bottoms of these panels control its curvature; and if the bottom chord becomes shorter than the top chord, the radius of the curve becomes less, and the versed sine or camber greater. By varying the height of the trusses, or the distance between the chords, any required amount of camber may be obtained from the differential contraction of the materials of which the top and bottom chords are composed. The greater the distance between the chords, the less the camber given to the truss, and *vice versa*.

With my improved truss, variations of temperature will not affect the relative position or bearing of any portion of the trusses or the cables. The two systems disconnected, will rise or fall equally with the changes or variations in the length of their respective parts; and when connected, they will rise and fall through the whole range of their deflections, without any change being made in the proportion of the strain carried by each member of the structure—the two systems, trusses and cables, being in perfect adjustment under all conditions of temperature.

The degree of change, by temperature, in the elevation or depression of the cables of a suspension bridge, depends upon the degree of their curvature—the greater the curvature the less the change. With the same distance between the towers, therefore, by increasing or decreasing the versed sine of the catenary, the absolute rise and fall in the centre, due to temperature, may be made to suit the requirements of the situation or the arrangement of the truss.

It is, therefore, perfectly practicable so to proportion the trusses and the cables that, under all variations of temperature, they will be in as perfect adjustment as any other description of suspension bridge when in its normal position.

The following calculations show the effect of temperature on my improved suspension bridge, of 1,000 feet span, between the centre of the towers. The deflection in the cable at the highest assumed temperature is 90 feet, and its total length, including backstays, 1,600 feet. The length of the cables between the centre of the towers will be 1021·303 feet. The length of the truss is 950 feet, which is level from end to end. The height 27 feet; the number of panels, 63; and the length of each panel, top and bottom, 15 feet. The towers, of cast iron, are 95 feet high. By a decrease of 150 degrees of temperature, all these dimensions are varied. The contraction of the cables being equal to 1·6467 feet, the length between the towers is now 1019·7 feet. The deflection being reduced to 86·273 feet, the platform is raised at the middle 3·627 feet, and in corresponding proportions along its entire length. From the same cause the truss has undergone similar changes, the top chord (pine) having contracted altogether ·3233 of a foot, and the bottom chord (wrought-iron) ·9953 of a foot. The length of each top panel is now reduced ·0051 of a foot, whilst the length of each bottom panel is diminished 0·157 of a foot, the length of the top and bottom of each pannel being now 14·995 and 14·984 feet respectively.

The effect of this is to give a camber or curve upwards, the radius of which is 31105 feet, and the versed sine 3·627 feet, equal to the rise previously shown as taking place in the middle of the platform;—the two systems having been raised, from the nature of their materials, exactly the same distance, and remaining consequently in exactly the same relative positions to each other as when placed in adjustment. The ends of the trusses are slightly raised by the contraction of the cables. The contraction of the long suspenders would be about the same as that of the cast iron towers, and, in practice, all these changes have to be taken into consideration.

The durability of the most important parts of the improved trusses over other kinds is also a great advantage. The floor girts, bottom chords, lateral bracing, the diagonal braces in each panel, and all the essential parts, are of wrought iron. The longitudinal timbers that support the ties and rails can, at any time, be renewed without difficulty, as they will be fastened only to the friction plates which rest upon the girder to allow of the free expansion and contraction of the whole of the wrought-iron. The top chords can be so protected as to be prevented from decay; when, however, they may need renewal, there will be no difficulty in doing it, without stopping the traffic over the bridge, as they can be relieved of all strain on a part of their length at a time by screwing up the suspenders, thus raising the part of the truss needing renewal.

The trusses also admit of economical construction, because of the similarity of the parts of the chords, braces, etc., throughout.

By the open nature of the framing of the trusses, the wind will have no injurious effect, and a great amount of strength can be given by the top and bottom lateral bracing, all the chords being so constructed that they admit of either compressive or tensile strains; also the additional lateral stiffness given to the whole by the inclination of the cables, as well as the introduction of lateral braces to the cables themselves; the ends of the trusses, being also secured against motion sideways, would render all lateral guys and understays wholly unnecessary.

The cables and trusses, when once correctly adjusted, will, through all variations of temperature, act harmoniously, neither having any tendency to produce any undue strain between the different parts of the whole structure.

Richmond and Danville Railroad.

This road is 140½ miles in length, extending from Richmond, Va., to the North Carolina State line. Its earnings for the fiscal year ending September 30, 1860, were:

From passengers		$152,589 93
" freight		884,472 72
" mail and express		23,841 78
		$560,904 43

The expenses for same time were:

Salaries and office expe'es.	$14,215 44	
Maintenance of road	113,281 52	
" motive pow'r.	47,893 28	
" cars	20,633 46	
Train expenses	11,778 53	
Station expenses	56,030 75	
All other ordinary expens's	14,742 98	
Relaying track	40,761 92	
New buildings, culverts, turntables, tools, etc., etc.	23,307 72	
Telegraph line	4,318 86	
Increase of rolling stock	19,994 59	
Excess of inventory over previous year	19,783 77	
Total expenses	$386,742 82	
Deduct extraordinary expenses	108,166 86	
		278,575 96
Net earnings		$282,328 47

—being 50.33 per cent. of the gross receipts, or a fraction over 14 per cent. on the capital stock of the company. The gross receipts were $6,701 87 in excess of those of the previous year. The number of passengers carried was 81,330—of which 58,104 were way, and 23,226 through passengers. The total mileage of local passengers was 2,777,100; of through passengers 1,266,577—total of both, 4,043,677.

The resources of the company at the close of the last fiscal year were as follows:

Due on subscriptions to capital stock	$18,802 50
Cash on hand and debts due the comp'y.	80,137 34
English insurance due on iron lost	16,807 81
	$115,747 65
Less debts due by the company	73,607 88
	$42,139 77

The equipment of the road consists of 23 locomotives; 11 first class and 6 second class passenger cars, 3 smoking cars, 10 mail and baggage cars, and 418 cars for freight, etc.

The number of miles run by passenger trains was 96,458; by freight trains, 128,556; by coal

trains, 10,065; by gravel and material trains 23,750—total miles run, 257,829.

The number of tons of freight and coal carried in the cars was 136,698; the number carried one mile, 8,686,544.

The following is a statement of the receipts, disbursements and liabilities of this company from the date of its organization, November 20, 1847, to September 30, 1860, the date of its last annual report:

RECEIPTS.

Cash	57,677 39
	80,137 34
	$6,753,654 73

During the year 9½ miles of heavy rail was substituted for the flat bar, making 92¾ miles of heavy rail track on the main line of the road, and leaving 47¾ miles of flat bar track—most of which is between the Junction and Staunton river. Since the close of the year, 2½ miles more have been laid—leaving but 8¾ miles of flat bar track between Richmond and the Junction. The company have now on hand about $9,000 worth of flat bar rail, which they propose to sell to assist in defraying the expenses of the new iron. In reference to the indebtedness of the company, the report says:

Since the last annual report, of the $1,000 remaining unpaid, because uncalled for, of the debt of $250,000 due 1st August, 1859, $500 has been paid, leaving only $500 of that debt outstanding. Of the debt of $150,000 due the 1st November, 1860, the sum of $149,700 has been paid, leaving only $300 outstanding of the original debt. But the directors have been compelled to issue new bonds of the company to the amount of $65,400, payable at various periods from May, 1861, to November, 1863, which will be promptly met by the accruing revenues of the company.

In order to give the stockholders a full exhibit of the funded debts of the company, it may be proper to state that those debts consisted of $400,000 due to private bondholders, of $600,000 due to the State of Virginia, and of $200,000 guaranteed by the State, making a total debt of $1,200,000. Of the $400,000 due to private bondholders, the whole amount has been paid except the $800 above referred to, and the new issue of $65,400. Of the debt due to the State 7 per cent. thereon has been annually paid, which will, in thirty-four years from the date, discharge both principal and interest. These are the terms upon which the loan was contracted, and no further provision for its payment will ever become necessary. This debt is, in fact, rather an annual charge upon the resources of the company of $42,000 per annum than a permanent funded debt, inasmuch as the 7 per cent. has been paid for eight years, or about one-fourth of the time, which is equivalent to a discharge of one-fourth of the debt. The guaranteed debt of $200,000 will not fall due until 1875, and cannot be demanded until that time. The company having punctually paid the interest on that debt, and continuing to do so, need make no further provision for it. So that the sum of $66,200 referred to as due to private bondholders, and the regular payment of $42,000 towards the extinction of the debt of $600,000, with the annual interest upon the $200,000, is all the charge upon the revennes of the company growing out of its indebtedness prior to the year 1875.

A second wire has been placed upon the poles of the telegraph line from Richmond to the Junction, and since the close of the year the line has been extended to the Western terminus of the road. The entire cost to the company of this line from Richmond to Danville amounts to $7,402 96. In reference to the branch roads and extensions, the report says:

The surveys of the State line to meet the North Carolina Coalfield Road, and of the Western extension, as it is called, of the Danville Railroad, have been made; and the engineer is now locating the common stem of the two roads, in order that it may be ready whenever the money is raised to build these two lines. The committee appointed under a resolution of the last meeting by the chairman thereof, "to memorialize the General Assembly of Virginia to increase the capital stock of the Richmond and Danville Railroad Company, a sufficient sum to enable that company to connect with the North Carolina Dan River Coalfield Road at the Virginia and North Carolina line," discharged the duties devolved upon them by that resolution, and an act was passed by the General Assembly in accordance with the request in the memorial.

Upon the line of the Coalfield Railroad, subscriptions have been raised to such an amount as to encourage the hope that this company will soon be ready to fulfill their obligations; and as soon as they shall have exhibited their ability to do so, the Directors of this company will use the most prompt and energetic measures to hasten the joint completion of the work in which this company is so deeply interested.

The Legislature of Virginia, at its last annual session, appropriated $350,000, being three-fifths of the sum of $583,333⅓ which was voted to build the Western extension; and active measures have been taken to procure the full amount of private subscription, and have been so far successful that the directors may safely congratulate the company on the speedy commencement of this valuable feeder to their road.

President—LEWIS E. HARVIE.
Directors on the part of the State of Virginia—J. B. Stovall, Vincent Witcher, E. G. Lehigh.
Directors on the part of the Stockholders—R. O. Haskins, Wm. Palmer.
Superintendent—CHAS. G. TALCOTT.
Sec. and Auditor—THOS. W. BROCKENBROUGH
Treasurer—JOHN S. VAUGHAN.

Journal of Railroad Law.

RAILROAD EMPLOYEES; DUTIES AND OBLIGATIONS OF DAY LABORERS AFTER WORKING HOURS: LIABILITY OF COMPANY.

The case of *Chapman vs. The New York Central Railroad Company*, involved the consideration of the duty which a day laborer employed by a foreman of the company, to construct and repair the fences along the line of road, and if at any time after he had performed his day's labor he saw anything amiss, he should without being specially required to do so, give it all necessary attention; and the liability of the company in case he failed to perform this part of the agreement. We reported an English decision bearing upon the question of the company's obligation on a similar case in this Journal Dec. 29, 1860.

This action was brought to recover the value of a span of horses belonging to the plaintiff, which were killed by a locomotive, on the defendant's road. The horses escaped from the pasture of the plaintiff, adjoining the railroad in the town of Palmyra, and came upon the track through a bar-way in the defendants' fence; while the bars were down and while upon the track, they were struck by a locomotive running on the road and killed.

The bars were taken and left down by one Ryan, who was at the time, and had been for more than a year previous, in the employment of the defendants as a day laborer, continuously, at a fixed rate of wages, per day, of about twelve hours, payable once a month, up to the first day of the month. It was understood between him and the defendants, that in virtue of that employment the defendants were at liberty, after the expiration of his regular hours for labor for any day, to require his services in case of any accident, or the occurrence of anything endangering the running of the road, when he was to be allowed for extra time, and paid accordingly; and further if that at any time after he had performed his day's labor he saw anything amiss, he should without specially being required to do so, give all necessary attention to it.

The case was tried before a referee who found as a conclusion of law, that it was the duty of Ryan as the servant of the defendants, which he thereby became for the purpose, to replace the bars, and his omission to do so was negligence of the defendants, for which, and the killing of the horses in consequence of it, they were liable on this action, that the plaintiff was entitled to recover of the defendants as the damages sustained by him in the premises, the sum of $310 and interest; for which he ordered judgment in the plaintiff's favor, and the defendants appealed.

The following is the opinion of the Monroe General Term of the New York Supreme Court, to which the case was carried.

E. D. SMITH J. The plaintiff in this case has lost his span of horses without any negligence or fault on his part, but through the negligence of

the witness Ryan, a servant or laborer in the employment of the defendants. Ryan was a day laborer, employed upon the track of the defendants' railroad, and in building and repairing fences under a foreman having the charge or oversight of a particular section of the road. Each foreman employed his own hands, and they were paid at a fixed rate of wages per day, monthly. The referee finds as a matter of fact that it was understood between Ryan and the defendants, that in virtue of his employment the defendants were at liberty, at the expiration of his regular hours for labor, to require his services in case of any accident or the occurrence of anything endangering the running of the road when he was to be allowed for extra time, and paid accordingly; and further, that if at any time after *he saw anything amiss, he should, without being specially required to do so, give all necessary attention to it.* Upon this finding on the facts, the conclusion of the referee in respect to the law, that "it was the duty of Ryan, as the servant of the defendants, to replace the bars in the defendant's fence," the taking and leaving down of which was the cause of the escape of the plaintiff's horses from his lot and of their loss, "and that his omission to do so was the negligence of the defendants, for which, and the killing of the horses in consequence of it, they are liable," is clearly legitimate and proper.

As an original question I should have found some difficulty in coming to the same conclusion upon the facts, with the referee, upon the evidence. It seems to me that the duty of Ryan was one of imperfect obligation than a fixed certain duty, arising from his contract of employment. But the witness swears unqualifiedly that his day's work commenced at 7 A. M., and ended at 6¼ P. M.; and he further says, "and if I saw anything amiss, after that, I had to do it." It was certainly amiss for him not to put up the bars in question, which he took out and left out himself. He also said, "It was part of my business, when I saw a fence down, to put it up; and in case a bar was broken to put in another one." Upon this and the other evidence in the case we cannot say, I think, that the referee was not warranted in finding on the facts as he has done; or, at least, I do not think we are at liberty to reverse this judgment on the ground that the finding is entirely without, or against evidence, even though we might have come to a different conclusion on the facts.

I am not sure that this judgment is not sustainable on the ground that the defendants employed, and kept and continued this man Ryan in their employment under the circumstances of the case; the foreman in particular, under whom he worked, being well acquainted with the fact that he was addicted to habits of intoxication. With such habits he was put and kept in a position on the defendants' road which enabled him to commit the gross act of negligence in question. As the defendants have thereby caused the loss of the plaintiff's horses, I am not clear that this judgment cannot be sustained on this express ground. At least it is quite apparent that they ought to suffer the consequences resulting from the negligence of their servants, rather than the plaintiff, who is without fault; and in this view of the equities of the parties, I can hardly think it our duty to interfere with this judgment. The judgment should, therefore, be affirmed.

Important Decisions in the Suits against the La Crosse and Milwaukee Railroad Company.

A Correspondent of the New York *Times*, under date, "Milwaukee, March 15, 1861," gives the following synopsis of the decisions of Judge Miller in the United States District Court in Wisconsin, in the cases of Bronson, Soulter and Knapp, Trustees, against the La Crosse Railroad Company, and Bronson and Soulter, Trustees, against the same:

The first is known as the Land Grant case, being a suit to foreclose the Land Grant mortgage. This mortgage covered the Western Division of the Lacrosse Railroad, from Portage City to La Crosse, and the lands granted by Congress to aid in the construction of a railroad from Madison to Portage City and the St. Croix River or Lake. It was in evidence that some one million nine hundred and ninety-one thousand dollars of the bonds, from No. 1 to 1,991, were issued under this mortgage prior to Oct. 1, 1857, when the La Crosse Railroad Company leased its road to Selah Chamberlain, and confessed a judgment in his favor for a large sum. That a further issue of five hundred and nine thousand dollars of the bonds was subsequently made, prior to January 28, 1858, being together what is known as the first two and a-half million issue of Land Grant bonds. On the 28th of January, 1858, a supplemental deed of trust or mortgage was made, changing the remedy for default and limiting the issue thereunder to one and a-half millions, or four millions in all.

About the date of the lease and judgment in favor of Chamberlain, a second mortgage was made upon the road from Portage City to La Crosse, to one Helfenstein, under which some three hundred and sixty thousand dollars in bonds were issued.

It was in evidence that the Bonds had become depreciated at the time of the issue of the $509,000 Land Grant Bonds, and that the second issue of the same bonds to the amount of $1,500,000 was distributed among the Directors, at Albany, or their friends, realizing to the Company only thirty cents on the dollar. No evidence was exhibited as to what the Helfenstein Bonds sold for, or were worth.

The holders of the first issue of Land Grants, $2,500,000, defended against the subsequent issue, claiming a priority, and showing that they had paid eighty cents on the dollar, for their bonds. Upon this state of facts shown, the Judge decides that the first two millions and a-half shall have the preference in the following proportion, viz: The nineteen hundred and ninety-one thousand *at par*, and the five hundred and nine thousand at *forty per cent.* of their par value. He then allows the Helfenstein Bonds to come in at *forty per cent.*, and then, last of all the one and a-half millions of Land Grant Bonds, numbered above 2,500 to come in at *forty per cent.* This decision practically destroys the value of all these bonds, except the first two and a-half millions, as the value of the road and lands (none of the latter having yet been obtained from the United States) will hardly meet the amount of the principal and interest due on this class.

The second case, Bronson and Soulter, Trustees, against the La Crosse Railroad Company and others, was a suit to foreclose the second mortgage upon the Eastern Division, from Milwaukee to Portage City, for $1,000,000. Answers were made by judgment creditors and stockholders in the Milwaukee and Minnesota Railroad Company—the latter a paper corporation, formed under the third or Barnes mortgage—setting up that the Bonds under this second mortgage were issued for part cash and part stock and other Bonds of the Company, and in fraud of the rights of creditors. It was shown that some $590,000 of the Bonds were paid for, part in cash and part in stock and in other Bonds, and that many were hypothecated some sold for cash, and some paid to the contractor. No evidence was in the case that any creditor was hindered or defrauded by the mortgage, or that any such intention existed. It was shown by the complainants that the laws of the State authorized the issue and sale of the Bonds at *any rate of interest*, and at *any price* which might be agreed upon between the Company and the purchasers. The Judge decided that, as the Bonds were issued at a time when all securities were depressed, (September 1857,) and sold at low rates, he should allow only *fifty per cent.*, without distinction or discrimination. He denied to these securities the character of negotiating to the extent heretofore claimed, and which has been conceded to them and confirmed by numerous decisions of the Supreme Court of the United States. It is understood here that the second case, if not the land grant case, will be taken to the Supreme Court, as this decision affects the value of hundreds of millions of like securities which have heretofore circulated, unchallenged, in all the money markets of the world.

The Judge and our State Legislature seem to act in concert—while one strikes at the value of railroad bonds, the other has just passed the famous—(ought we not rather to say *in* famous)—Farm Mortgage Law, of which I inclose a synopsis. This law, if sustained by the State Courts, most effectually prevents the collection of the farm mortgages issued by our farmers in aid of railroads. Of these securities, some *three or four millions* are held in the Eastern States.

Railroad Earnings.

The earnings of the New York and Erie Railroad for the month of February, were as follows:

February, 1861	$391,100 97
February, 1860	303,279 16
Increase	$87,821 81

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of February, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$107,680 29	$102,795 91
" " merch'dise	30,602 20	42,807 88
" " travel, etc.	22,255 97	26,237 68

Philadelphia and Erie Railroad.

An Act to change the name of the Sunbury and Erie Railroad Company, and to facilitate the completion of a railroad from Sunbury to Erie.

Whereas, The Sunbury and Erie Railroad Company have made application to this General Assembly, for the passage of an act to change the name of the said corporation, so that the same shall hereafter be called and known as the Philadelphia and Erie Railroad Company; and whereas the said Company have been unable to dispose of their bonds, for three million five hundred thousand dollars, made by authority of the "act for the sale of the State Canals," approved the 21st of April, 1858, for the purpose of raising money to complete the construction of their railroad, the payment of which said bonds, as well as their bonds for the same amount now in the sinking fund and owned by the Commonwealth, was intended to be secured by the mortgage for seven millions of dollars executed in trust for that purpose, recorded in the office for the recording of deeds for the city and county of Philadelphia, and deposited for safe keeping in the office of the State Treasurer, and by reason of the fact that the said bonds cannot be disposed of, the work on the said railroad has been suspended, and the said Company are unable further to prosecute the same, or to pay the interest on their said debt to the Commonwealth; and whereas, in case of a foreclosure of the said mortgage and a judicial sale of the said work in its present condition, an incumbrance of $600,000 existing thereon being a lien for work, labor and materials, will take precedence of the claim of the State, and is required by law to be paid prior to and in preference thereof, and will be likely to absorb the entire proceeds of such sale, whereby the said indebtedness to the State represented by the said bonds for $3,500,000 would be wholly lost, and it is important to the public interests that this Legislature should adopt such measures as will prevent the sale and sacrifice of the said work, and secure the ultimate payment of the said debt; and whereas, the completion and equipment of the said railroad are necessary for the purposes last aforesaid, and to that end, and for the purpose of paying and discharging the said lien for $600,000, it is necessary that the said mortgage for $7,000,000 shall be canceled, and that the said Company be authorized to issue other bonds and secure the payment of the same by a first mortgage, and it is expedient that such authority be conferred on said Company upon the terms expressed in the provisions of this act:

Therefore, for the purposes aforesaid, and to secure the completion and equipment of the said railroad, and the ultimate payment of the said debt of $3,500,000 to the State.

Section 1. *Be it enacted* by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met and is hereby enacted by the authority of the same, That the corporate name and title of the Sunbury and Erie Railroad Company be and the same is hereby changed to the Philadelphia and Erie Railroad Company, by which name and title the business of said Company shall hereafter be managed and conducted, with the same effect as if the name thereof had not been changed.

Sec. 2. That the said the Philadelphia and Erie Railroad Company be and it is hereby authorized to execute and issue, under its corporate seal, five thousand bonds not exceeding in amount the aggregate sum of £1,000,000 sterling money of Great Britain, or $5,000,000 lawful money of the United States, any number or all of which may be issued for £200 each, sterling money aforesaid, and any number or all of which for $1,000 each, payable in 20 years from the date thereof, the said bonds shall bear interest at the rate of six per cent. per annum, payable semi-annually, and shall not be subject to taxation; and the said bonds, or the proceeds thereof, shall be used by the said Company for the purpose of completing and equipping the said railroad, and for the payment of debts contracted concerning the same, and of the scrip issued by the said Company under the act of April 13th, 1860; and as security for the payment of the principal and interest of the said bonds the said Company is hereby authorized to execute in trust, under its corporate seal, a mortgage of the whole line of its railroad, finished, unfinished, and to be finished, from Sunbury to the harbor of Erie, and its appurtenances, including all locomotives and cars which may at any time be placed thereon, together with all its real estate, rights, liberties, privileges and franchises, which said mortgage shall be delivered to the trustee or trustees therein named, and recorded in the several counties in which the property therein described, or any part thereof, may be situate; and shall thereupon be and remain the first mortgage on all the property therein described, until fully satisfied, except as to that part of the road of the said Company which extends from Sunbury to Williamsport on which a mortgage for $1,000,000 now exists.

Sec. 3. That the said company be and is hereby authorized to execute under its corporate seal, forty bonds for $100,000 each, payable in forty years from the date thereof, bearing interest at the rate of six per cent. per annum, from and after the first day of January, 1872, and secure the payment of the same by a mortgage to the Commonwealth of all the railroad of the said company finished, unfinished and to be finished, and all the property, rights, privileges and franchises, including locomotives, cars and rolling stock of the said company, which said mortgage shall be subject to the mortgage authorized by the second section of this act, and to the mortgage for $1,000,000 on that part of the said road which extends from Sunbury to Williamsport; and the said company shall deliver the said forty bonds, together with the said mortgage to secure the payment of the same, to the commissioners of the sinking fund, and the said commissioners shall receive the same as collateral security for the payment of the said five per cent. bonds for $3,500,000 now in the sinking fund, and the Treasurer of the Commonwealth shall thereupon cancel and surrender all the bonds belonging to the said company and deposited in his office for safe keeping, under the provisions of the act for the sale of the State Canals,

Sec. 4. That the time for the payment of the principal and interest of the said bonds for $3,500,000, now in the sinking fund, be and the same is hereby extended till the maturity of the bonds for $4,000,000 to be given as collateral security aforesaid, and the payment of the said collateral bonds, with the interest thereon, as the same shall become due and payable, shall be full satisfaction of the said bonds for $3,500,000, and of the conditions thereof; Provided, that the whole amount of principal and interest so to be paid by the said company shall not be less than the debt now owing by the said company to the Commonwealth, with the stipulated interest thereon till the time of payment.

Sec. 5. That on the surrender and cancellation of all the five per centum bonds of the said company made by authority of the "act for the sale of the State Canals," approved the 21st of April, 1858, except those belonging to the State for $3,500,000, and now in the sinking fund, it shall be the duty of the trustees of the mortgage for $7,000,000, executed by the said company to secure the payment of the said bonds, forthwith to enter satisfaction on the record thereof, and the lien of the said mortgage shall thereupon be discharged and forever extinguished.

Sec. 6. That all the bonds authorized by the second section of this act, shall be deposited in the office of the State Treasurer for safe keeping, and shall be delivered to the said campany for issue as hereinafter provided, that is to say, that, when satisfaction is entered on the record of the mortgage mentioned in the fifth section of this act the Governor shall, by his warrant, authorized the State Treasurer to deliver to the said company one thousand of the said bonds, which, or the proceeds of which, shall be appropriated by the company to the purposes mentioned in the second section of this act, and upon notice to the Governor that such appropriation has been made, he shall forthwith appoint a competent person to examine and report, at the expense of the said company, the indebtedness liquidated and work done, and on being satisfied of the faithful application of the said bonds, or the proceeds thereof, the Governor shall then, in the manner aforesaid, authorize the delivery of another thousand of the said bonds to the said company, for the purposes aforesaid; and the remainder thereof, from time to time, and on the same conditions, pari passu with the progress of the said work and the equipment thereof, but before any of the said bonds are delivered to the said company for issue, there shall be endorsed on each of them the words: Issued by authority of an act of Assembly, entitled, "An Act to change the name of the Sunbury and Erie Railroad Company, and to facilitate the completion of a railroad from Sunbury to Erie," over the signature and official seal of the Secretary of the Commonwealth, who is hereby authorized to sign and seal the said certificate as aforesaid; Provided, however, that such endorsement shall not render the Commonwealth liable for the payment of the same in any contingency.

Elisha W. Davis, Speaker of the House of Representatives.

Robert M. Palmer, Speaker of the Senate.

A. G. Curtin, (Governor.)

Approved March 7, 1861.

Old Colony and Fall River Railroad.

The Boston *Post* states that it is now nearly certain that the Old Colony and Fall River Railroad will be extended from Fall River to Newport, R. I., about 18 miles. The General Assembly of Rhode Island granted a charter for the same a year ago; the stockholders in the Old Colony and Fall River Railroad are almost unanimously in favor of the extension. Routes have been surveyed, a company has been formed at Newport to construct the road, and all that remains is to obtain a charter from Massachusetts to authorize the building of a short section within the bounds of that State.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, March 23, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The stock market the past week has been inactive with a slight yielding of prices, owing to the uncertainty which still prevails as to our political future. Everything turns upon this, and in the absence of any startling event, the market has been pretty uniform. The earnings of our railroads continue to show well, and there is a prospect of a very good business season ahead, in spite of political complications. In money matters, we are getting a plethora of gold which is still increasing. There is but little demand, and no business engagements or improvements are geing on likely to create any considerable use for money.

Missouri Bank Bill.

This bill, which passed the Legislature of Missouri more than a week since, has received the signature of the Governor and thus become law. Section 4 of the bill, which makes provision for the July interest on the State debt, reads as follows:

That in order to provide the means for the redemption of the revenue bonds due 1st June, 1861, and for paying the interest due on the 1st July, 1861, the Governor of this State is hereby authorized and empowered to sell 3,253 shares of the stock owned by the State in the Bank of the State of Missouri, and deposit the proceeds thereof in the State Treasury, to the credit of the Fund Commissioners. The President and Directors of each and every bank incorporated in this State, shall, within three months from the date of the passage of this act, pay into the State Treasury, to the credit of the Fund Commissioners, their *pro rata* share of $500,000, to be apportioned according to the capital stock of said banks paid in; *Provided*, That for the amount paid by each bank,

as aforesaid, the Governor is hereby authorized to issue revenue bonds, payable in three and five years, bearing interest at the rate of 9 per centum per annum, with coupons attached; and for the payment of the principal and interest on said bonds the revenues of the State are hereby pledged.

Interest and Dividends.

The Baltimore and Ohio Railroad Company has declared a dividend of three per cent. on the stock of the Main Stem, and four and a-half per cent. on the Washington Branch, for the half year ending 31st inst., payable on and after April 15th.

The Philadelphia, Germantown and Norristown Railroad Company has declared a dividend of four per cent. on the capital stock, payable on and after the first day of April next.

Scarcity of Storage Room in Chicago.

The immense crops of last year are testing the storage capacity of Chicago pretty thoroughly. Of wheat and corn alone there are stored in the various warehouses of the city upwards of 3,200,000 bushels, while of oats, rye and barley there are over one million bushels. Some of the houses—bins, floors and passages—are entirely filled; and the balance will be able to receive only, about ten days longer. To relieve the warehouses, about a dozen vessels have been chartered, and will be loaded immediately. The Illinois Central Railroad Company have instructed their agents to ship no more grain in bulk till further notice.

Railroads in Missouri.

The following statement of the earnings, expenses and net earnings of the three following roads is from the Report of the Board of Public Works of Missouri:

NORTH MISSOURI RAILROAD.

Gross earnings for 13 months	$400,008 75
Expenses for 13 months	303,276 96
Net earnings	$96,731 79

IRON MOUNTAIN RAILROAD.

Gross earnings for 14 months	$276,931 05
Expenses for 14 months	206,914 76
Net earnings	$70,016 29

PACIFIC RAILROAD—MAIN LINE.

Gross earnings for 12 months	$672,181 25
Expenses for 12 months	368,553 64
Net earnings	$303,627 61

Losses on the Lakes in 1859-60.

The following statement of the loss of life and property on the lakes in these years, is taken from the report recently issued by the Board of Underwriters:

1860.

Loss on steam hulls	$336,808
Loss on cargoes	160,575
Total loss by steam vessels	$497,383
Loss on sail hulls	$327,773
Loss on cargoes	330,859
Total loss by sail vessels	658,632
Total loss by steam and sail vessels	$1,156,015

1859.

Loss on steam hulls	$169,455
Loss on cargoes	182,130
Total loss by steam vessels	$351,585
Loss on sail hulls	$331,238
Loss on cargoes	337,327
Total loss by sail vessels	668,565
Total loss by steam and sail vessels	$1,020,100
Increase in losses	135,915

Loss of life in 1860....578
Loss of life in 1859....105—Increase....473

Hannibal and St. Joseph Railroad Company.

This company propose to fund the three next maturing coupons of the Land Grant and convertible sinking fund bonds, and the four next maturing coupons of the second mortgage income bonds, as follows: for the coupons of the land-grant and convertibles—income bonds, running three, four, five, six and seven years, bearing 7 per cent. interest; and for the second mortgage coupons—income bonds running eight and nine years, bearing the same rate of interest; the surrendered coupons to be held by Ignatius Sargent, Trustee, as collateral security to the income bonds thus issued. The Directors feel confident that this measure will place the company upon a sound basis.

Erie Railroad.

The earnings of this road for February were larger by $87,821 than the same month last year, and $24,000 ahead of the heaviest February traffic ever before realized. The following are the comparative figures:

Febr'y, 1853..	$287,011	Febr'y, 1858..	$328,048
" 1854..	357,629	" 1859..	300,999
" 1855..	340,751	" 1860..	303,279
" 1856..	367,915	" 1861..	391,100
" 1857..	270,073		
Increase			$87,821

Railroad Legislation in Pennsylvania.

We give in another part of our paper to day a copy of the bill recently passed by the Legislature of Pennsylvania, affording relief to, and changing the name of, the Sunbury and Erie Railroad Company. This road will hereafter be known as the Philadelphia and Sunbury Railroad. Also the bill for the Commutation of the tonnage tax on the Pennsylvania Railroad. By the passage of this bill, the litigation pending between the Pennsylvania Railroad Company and the Commonwealth is at an end, the company being relieved not only of further charges on account of tonnage, but also of the judgments of $255,000 which had been recovered against it by the State. It will be seen that both bills have received the approval of the Governor.

Cleveland and Erie Railroad.

The earnings of this road for the year ending December 31, 1860, were:

From passengers		$468,974 76
" freight		565,830 47
" mail, etc.		28,600 00
		$1,063,405 23
Operating expenses	$225,006 09	
Repairing road	165,750 93	
" rolling stock.	39,001 47	
		429,758 49
Net earnings		$633,646 74

—or nearly 17 per cent. on the entire cost of road and equipment. The cost of the road is as follows:

Construction of main line	$3,188,157 66
" branch	33,477 44
Cost of equipment	549,593 17
	$3,771,228 27

The company has no floating debt. The capital stock of the company is $3,000,000. The funded debt, $1,602,000. Surplus carried to sinking fund, $57,469. A dividend of 5 per cent. in cash and 5 per cent. in scrip was paid Jan. 1, 1860. Also a dividend of 5 per cent. in cash, July 1, 1860. The number of through passengers carried was 162,172; and of way passengers, 88,199. We shall give a more extended notice when we receive a copy of the report.

New Orleans, Opelousas and Great Western Railroad.

We have been favored with a copy of the Ninth Annual Report of the President and Directors of this Company, for the fiscal year ending December 31, 1860, embracing also the Reports of the Vice-President, Treasurer and Chief Engineer of the Company. The length of road in operation is 80.2 miles extending from Algiers, opposite New Orleans to Brashear, or Berwick's Bay, at which point a connection is made with steamers for Galveston and Indianola, Texas. The earnings during the past and preceding years have been as follows:

	1859.	1860.
From local passengers	$91,859 10	$115,601 69
" Texas "	35,503 90	54,724 25
" local freight	189,851 11	216,436 17
" Texas "	31,524 81	73,688 49
" mail and express	21,323 76	21,471 27
	$370,062 68	$481,921 87

The expenses for 1860 were:

Conducting transportation	$116,723 92	
Maintenance of engines	10,654 08	
" cars	12,886 81	
Ferriage	45,680 42	
Maintenance of way	72,327 63	
		258,272 86
Net earnings		$223,649 01

—or 46.4 per cent. of the gross earnings. Deducting the ferriage, for a fair comparison with the expenses of other roads, and the amount would be $212,592 44, and the per centage of net earnings 55.9.

The items not chargeable to current expenses are as follows:

Purchase, repairs, etc., of steamboats and barges	$36,674 73
Four new passenger cars	10,600 00
Repairing wharves, etc.	5,826 28
Raising track	38,667 64
Ditching	21,571 87
Ballasting, etc.	19,158 97
Renewals of rails and cross-ties, rebuilding culverts, etc.	89,329 44
Repairing Lafourche bridge	9,660 57
Building and repairing depots and stations	26,873 52
	$208,263 02

The regular transit of passengers and mails, and the transportation and delivery of freight has been uninterrupted. But few accidents have occurred. The damage to property has been trifling; and no injury has happened to either passenger or employee. Numerous culverts and bridges have been filled up. Large ditches have been excavated, and the earth taken therefrom deposited upon the track whenever it was found too low to insure proper drainage. The Lafourche Bridge has been changed from a sliding draw to a swinging bridge. The track has been greatly improved. It is believed that its present condition will tend materially to lessen the cost of maintenance of way, and other expenses generally during the coming year, while the expenses for renewal will be comparatively small. During the past four years, 13,740 lineal yards of rails, and 62,577 cross-ties have been removed.

The road was opened for business from Algiers to Lafourche crossing, 52 miles, November 8,

1854; to Tigerville, 66 miles, October 15, 1855; to Bayou Bœuf, 73 miles, March 1, 1856; and to Berwick's Bay, 80 miles, April 12, 1857—making the average time the whole has been in use about 5 years and 8 months. From this it appears that but 4.87 per cent. of the rails were removed; and that they became defective at the rate of about 0.86 per cent. per annum. The cross-ties replaced amounted to 39.09 per cent. of the whole, or about 6.9 per cent. per annum.

The distance run by all trains from the beginning amounts to 909,984 miles—equal to the passage of 11,374 trains the length of the road. Assuming the weight of each to have been 200 tons, the traffic has been equivalent to at least 2,750,960 tons over every portion of the track at an estimated average speed of about 17 miles an hour.

The equipment of the road consists of 8 first class, 3 second class and 1 switching engine; 8 first class, 4 second class, 5 baggage, 2 express, and 209 freight and stock cars—valued at $289,700. All the rolling stock is in excellent order—the repairs at all times having been equal to the wear.

The number of miles run by passenger trains during the year was 71,750; by freight trains, 108,454; by other trains, 13,040—total miles run, 193,244: an increase over the previous year of 23,212 miles. The number of local passengers carried was 44,679; of through Texas passengers, 28,783—total, 73,463: an increase of 22,162.

The second division of the road extends up through the sugar plantations of St. Mary, along the Bayou Teche, to New Iberia, a distance of 44¼ miles. In view of the extension of the road, a contract has been made for the construction of a boat for the transportation of passengers and freight over Berwick's Bay, in lieu of a bridge which would require a long time for its construction. The embanking of the tidal overflowed swamps and sea marsh west of Berwick's Bay, about three miles wide, was to have been completed on the 1st ult. It averages four feet in height. Between this and New Iberia, the line has been divided into three sections; several miles have been graded on each, and the work on all was progressing rapidly. Abont 24½ miles of roadway embankment was done, leaving to be done about twenty miles, all but two miles of which is light work, through plantations. All but the Bisland swamp, 1½ miles wide, may be completed by the 1st of April.

The third division, extending to Opelousas, is 29¾ miles in length—making the entire distance from Algiers to Opelousas 164½ miles. About 18 miles of roadway on this division, extending from New Iberia to and beyond the Bayou Vermillion, have been completed in a very satisfactory manner. With the exception of the culvert and bridge masonry, which is in progress, this section is ready for track-laying. The heavy embankment, 13 feet in height across Vermillion Valley, is well advanced. The draw-bridge for the Vermillion, including two spans of 40 feet each, one at each end of the draw, has been ordered; it will be constructed wholly of iron, and when erected, will be a beautiful, substantial and durable structure. After passing the Bayou Vermillion, the country is very level for about 10 miles, and this section can be graded very rapidly. Thence to Opelousas the crossings of four bayous—the Carroncro, Bourbeau, Callahan and Tessoo will necessitate some heavy work.

About 61 miles of roadway will be ready for track-laying by the 1st of April; and by the 1st of July, near 75 miles.

The fourth division traverses a prairie country for 25 miles beyond Opelousas; thence it passes through the pine woods, 68 miles, to the Sabine river, or 93 miles in all—the total distance from New Orleans to the Sabine being 258 miles.

The floating debt at the date of the report was $399,297 18—a reduction since the previous year of $59,552 18. About $20,000 is due to the contractors for work done from the Bay to New Iberia, being one-fifth of estimates retained as security, and payable upon the completion of the work; and the company has on hand city bonds, bills receivable, mail service dues, and cash to the amount of $17,845 05. The earnings of the road have exceeded the estimate made at the commencement of the year $31,921 87. The extension of the track to New Iberia will proportionately increase the revenue, without adding materially to the expenses. There is yet due some $70,000 of tax subscription, as well as a considerable amount from individual subscribers. The total sales of bonds has amounted to $566,000—leaving on hand $1,434,000. The Gretna mortgage debt of $25,000 has been paid in full; and provision made, monthly in advance, for the interest on the bonds sold, agreeably to contract with the Louisiana State Bank.

The quantity of land enuring to the road is 719,193 acres, none of which has been sold. The sales will probably net an amount equal to the whole paid up capital of the company.

The resources of the company are considered ample for paying off its whole debt, and for completing and equiping the road to the Texas line.

The road thus built and equipped, will have cost, and be worth to the stockholders, $6,000,000—although the actual outlay by them will but little exceed one-half that amount,

Reading and Columbia Railroad.

The contract for the construction of this road has been taken by Messrs. Moore & Co., of Philadelphia, at $600,000. It is to be ready for the iron in 15 months.

Pennsylvania Railroad.

An Act for the Commutation of the Tonnage Tax.

Whereas, By a provision of the Act to incorporate the Pennsylvania Railroad Company, approved April 13, 1846, and a supplement thereto, approved March 27, 1848, a tax or duty was imposed on all tonnage loaded or received at Harrisburg, Pittsburg, and intermediate points, and carried or conveyed on the railroad of the said Company more than 20 miles, which said tax was intended to compensate for any probable diminution in the receipts of the Main Line of the Public Works, (then owned by the State,) by reason of the construction and operation of the said railroad; *and whereas*, It was provided in the third section of the Act for the sale of the Main Line of the Public Works, approved May 16, 1857, that if the Pennsylvania Railroad Company should become the purchasers of the said works, the said Company, in addition to the sum of $7,500,000, the price limited by the said Act, should pay the sum of $1,500,000, in 5 per cent. bonds of the Company, and that thereupon the said Company, and the Harrisburg, Portsmouth, Mount Joy and Lancaster Railroad Company should, in consideration thereof, be discharged by the Commonwealth forever from the payment of all taxes upon tonnage or freight carried over said railroads, and the said the Pennsylvania Railroad Company should be released from the payment of all other taxes or duties on its capital stock, bonds, dividends, or property; *and whereas*, It was subsequently decided by the Supreme Court of this Commonwealth, that while the Legislature had full authority to repeal the provisions of the said Acts, by which the said tonnage tax was imposed, yet, inasmuch as part of the said last mentioned section in the Act for the sale of the Main Line placed all the property of the said Company beyond the reach of the taxing power, it was therefore, to that extent, unconstitutional and void; *and whereas*, It was the clear intention of the Legislature, by the said Act for the sale of the Main Line, in case the Pennsylvania Railroad Company should become the purchaser of the same to exonerate and release the said Company from further liability for the payment of the said tonnage tax, and for the additional consideration therein named, all other taxes; and as the said tonnage tax now falls indirectly on flour, grain, cattle, iron, minerals, and other domestic products, transported on one line of improvements, while similar products transported on other lines are exempt from the same; and as the reason for the imposition thereof ceased to exist on the sale of the works it was intended to protect, the right of the State any longer to demand the payment of the said tax is denied, and said demand has led to litigation between the State and the Company, and will probably involve the parties in litigation with citizens of other States, to the injury of our internal trade and commerce, which it is the duty of the government to encourage and protect, by all lawful means; *and whereas*, The said Company has proposed a compromise and final settlement of the question, by paying into into the treasury, in commutation of the said tonnage tax and in discharge thereof, such additional sum semi-annually, over and above the instalments of principal and the interest on its debt to the State, as may be required to make said payments amount to $460,000 annually, until the year 1890, at which time the entire balance of the principal and interest shall be paid in full; and by paying, also, in addition to the said semi-annual instalments, all other taxes on their property to which they may hereafter be made liable under the general revenue laws of the State, and agree to make reductions for transportation of local trade, as hereinafter provided, and to aid also, in the construction of certain lateral rail-

roads, the completion of which is essential as a means of facilitating the settlement and improvement of valuable districts of the Commonwealth yet undeveloped; *and whereas*, In the opinion of this Legislature it is expedient to accept the said proposition, and to relieve all agricultural, mineral, and industrial products, and other property passing over any railroad, canal, or slackwater navigation in this Commonwealth, from the payment of tonnage tax or duty to the State; therefore,

SECTION 1. *Be it enacted* by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the same: That if a majority of the Directors of the Pennsylvania Railroad Company, who, for the purposes of this Act are hereby vested with all needful authority, shall, at a meeting called for that purpose, resolve to accept the provisions of this Act, and shall authorize the execution of a written contract, under its corporate seal, with the Commonwealth of Pennsylvania, to pay into the State Treasury, on account of its indebtedness to the Commonwealth, by reason of the purchase of the Main Line of the Public Works on the 31st days of January and July in every year, until the 31st of July, 1890, inclusive, such sum, in addition to the interest on its bonds owned by the State, and in addition to its annual liability to the State on account of purchase money for said line of improvements, as will increase each semi-annual payment on account of said debt and interest to the sum of $230,000, and the aggregate of all such payments to the sum of $13,570,000, and shall agree to pay, on the said 31st day of July, 1890, into the treasury the balance then unpaid of the principal and interest of said bonds and shall further agree to reduce its local charges for the transportation of grain, flour, cattle, iron, minerals, and other property, as hereinafter provided; and if the said Company shall in the manner aforesaid, on or before the 1st day of July next, make and enter into with the Commonwealth of Pennsylvania a written contract to that effect, and shall on or before said day deliver the same in the Commonwealth, by depositing the same in the office of the Auditor General, then and in such case, and in consideration thereof, the Commonwealth of Pennsylvania shall not at any time hereafter lay, impose, levy, or collect any tax or duty upon, or in respect to freight or tonnage passing over the said Pennsylvania Railroad, or the Harrisburg, Portsmouth, Mount Joy and Lancaster Railroads or any part of them, or either of them, unless a like tax shall at the same time be imposed, laid or levied upon all other railroads or railroad companies of this Commonwealth; and all laws imposing taxes or duties upon freight or tonnage upon the railroads, canals, or slackwater navigation companies, for the use of the Commonwealth, be and they are hereby repealed, and no further or other proceedings shall be had or taken on the part of the Commonwealth to enforce the collection of any tax or duty, or obligation given therefor, or judgment recovered, or obtained in pursuance of any existing laws on tonnage carried or conveyed on the railroad of said Pennsylvania Railroad Company, or on that of any other Company incorporated by this State; and the said Companies shall be, by the proper officers of the Commonwealth, exonerated, released and relieved from every lien and liability to the State on account thereof.

SEC. 2. That from and after the passage of this Act, all Railroad, Canal and Slackwater Navigation Companies incorporated by this State, and liable for the payment of taxes or duties on tonnage, imposed by any laws heretofore enacted, shall make a reduction of their charges for transportation on their local freight, as fixed by their respective toll sheets, on the 1st day of February, 1861, equal to the full amount of the tax or duty chargeable upon such freight or tonnage by the laws aforesaid; the present winter rates between 1st day of December and the 1st day of May, shall be considered as fixed at 90 cents per 100 lbs. for first-class, 75 cts. per 100 lbs. for second class, 60 cents per 100 lbs. for third-class, and 40 cents per 100 lbs. for fourth class; summer rates between the 1st day of May and 1st day of December in each year, shall be 75 cents per 100 lbs. for first-class, 60 cents per 100 lbs. for second-class, 50 cents per 100 lbs. for third-class, and 40 cents per 100 lbs. for fourth-class, on all trade carried between Philadelphia and Pittsburg, and a failure on the part of either of said Companies to make such reduction, shall render the company so neglecting liable to the Commonwealth for double the amount of the tonnage tax heretofore chargeable against them—and every such company shall, within thirty days after the passage of this Act, under a like penalty, file in the office of the Auditor-General, under the oath of the President or other proper officer, a toll sheet of their rates of charges for transportation of local freights, upon the 1st day of February, 1861, accompanied by a statement of the reduction to be made in pursuance of this act, and the said rates as so reduced shall be the highest rates that can be charged for the transportation of such freight and tonnage by any company accepting the provisions of this Act. *Further*, the Pennsylvania Railroad Company shall not at any time charge or collect rates on any description of freights from any Eastern or seaboard cities to Pittsburg, higher than the gross rates charged or collected from same points to any point west of Pittsburg. Nor shall the said Pennsylvania Railroad Company at any time charge or collect rates on any description of freights from Pittsburg to Philadelphia, Baltimore, New York or other seaboard cities, higher than the gross rates that may be charged from any point west of Pittsburg to the same points on the same description of property. The local rates from Pittsburg or Philadelphia to stations on the line of the Pennsylvania Railroad shall at no time exceed the gross rates charged through between Philadelphia and Pittsburg; nor shall local rates between any two stations on the road between Philadelphia and Pittsburg exceed the through rates as made from time to time under the provisions of this Act, nor shall the rates charged to any local points exceed those charged to any point of greater distance in the same direction from the place of shipment. *And further*, all shippers of western products, under through bills of lading, from any point west of Pittsburg, by river to Pittsburg, to the seaboard cities, shall have the privilege of disposing of their property at Pittsburg, by giving timely notice, before its arrival at that point, to the transfer agents of the Pennsylvania Railroad Company, and by delivering up their through bills of lading, thus releasing the Pennsylvania Railroad Company from all liability on account thereof. If the property is not sold at Pittsburg, the owner, consignee or shipper of said property shall have the right to deliver the same to the transfer agency of the Pennsylvania Railroad Company at Pittsburg, and forward the same within ten days after its arrival at Pittsburg, under the conditions and rates of the original through bill of lading.

SEC. 3. That the Pennsylvania Railroad Company shall be liable to taxation for all State purposes, and the said company shall pay the same rate of taxation which is now, or may hereafter, be imposed by any general law operating upon all other railroad companies incorporated by this Commonwealth. The semi-annual instalments of the sum of $13,570,000, and the balance of the said debt and interest so to be paid into the State Treasury as is herein provided, are hereby pledged to, and the same shall be applied only to the payment and extinguishment of the principal and interest of the funded debt of this Commonwealth, and to no other purpose whatsoever.

SEC. 4. That for the purpose of developing the resources of the State, the Pennsylvania Railroad Company is hereby authorized and required to expend the sum of $850,000 in aid of the Chartiers Valley Railroad Company; the Pittsburg and Steubenville Railroad Company; the Fayette County Railroad Company, (between Greensburg and the Youghiogheny River;) the West Pennsylvania Railroad Company, (between Blairsville and Butler;) the Ebensburg and Cresson Railroad Company; the Bedford Railroad Company, (between Hopewell and Bedford;) the Tyrone and Clearfield Railroad Company, and the Phillipsburg and Waterford Railroad Company, (between Phillipsburg and Brookfield;) the Tyrone and Lock Haven Railroad Company; the Mifflin and Centre County Railroad Company, (between Lewiston and Milroy;) the Chambersburg and Alleghany Railroad Company, (between Chambersburg and the point of connection with the Bedford Railroad, near Hopewell;) or their sucessors or assigns, in sums proportioned to their respective lengths between the above designated points, by purchasing their bonds respectively from said Companies, at par, payable in twenty years, with interest, payable semi-annually, secured by a first mortgage created for the purpose on their property, real and personal, and franchises acquired and to be acquired, and the said Companies are hereby respectively authorized and empowered to create and issue such bonds, and secure the payment thereof by such mortgages, by and with the consent of a majority of their respective stockholders present at a meeting to be called for that purpose, of which notice shall be given, as provided by their charters or by-laws, respectively; aid bonds, and the mortgages given to secure the same shall not exceed in amount the sum required for the cost of the superstructure of bridges, the rails, cross-ties, chairs and spikes, and laying the track of the said roads respectively—and the proceeds of all the said bonds so secured, shall be exclusively applied to the said purposes—and the said purchases of bonds shall be required to be made of each of the said Companies, in instalments after sections of said roads, respectively of the length of five miles from each end as herein-before designated, shall have been duly and properly graded and the masonry completed, and after the said grading and masonry shall have been approved by a competent Civil Engineer appointed by the Governor for that purpose—and who shall be paid for his services by the said Companies receiving aid under the provisions of this Act—and when each section of five miles so graded from each such end of the said roads respectively, shall have been so completed and such certificate so given, then the pro rata proportion of the said bonds shall be purchased, and so continued from time to time until the amount payable to the said Companies shall be exhausted—and the sum paid upon the completion of the said sections as aforesaid respectively, shall be exclusively appropriated and be used for the purposes above mentioned upon the section for and in respect to which the purchase is made—and for no other purpose or portion of said road whatsoever—*provided, however*, that if either of the said Companies shall fail to grade, and prepare for bridges, superstructure, and laying of track at least one section of five miles at each of such end of its road within one year—or the whole of their respective roads within three years from the passage of this Act, any such Company so in default shall no longer have any right to demand or require any further purchase of their bonds as aforesaid, and the sums which any such defaulting Companies would have been entitled to demand in payment of their bonds, shall be added pro rata to the purchases to be made of such of the said Companies as shall comply with the provisions of this section; provided that said Companies be required to use none but American iron for rails, chairs and spikes, in the construction of their roads.

SEC. 5. That if any Stockholder or Stockholders of any Railroad, Canal, or Slackwater Navigation Companies shall be dissatisfied with, or object to any of the provisions of this Act, then it shall and may be lawful for any such Stockholder or Stockholders, within six months after the passage of this Act, to apply by petition to the Court of Common Pleas of the county in which the chief office of the said Companies may respectively be held—to appoint three disinterested persons to estimate and appraise the damage, if any, done to such Stockholder or Stockholders,

and whose award, or that of a majority of them, when confirmed by the said Court, shall be final and conclusive. And the person so appointed shall also appraise the share or shares of said Stockholders in said Company at the full market value thereof, without regard to any depreciation in consequence of the passage of this Act, and the said Company may, at its election, either pay to the said holders the amount of damages so found, or the value of the stock so ascertained and upon payment of the value of the stock as aforesaid, the said stockholders shall transfer the stock so held by him to said Company, to be disposed of by the Directors of said Company, or be retained by them for the benefit of the remaining Stockholders. And all the laws inconsistant with the provisions of this Act, be and the same are hereby repealed.

ELISHA W. DAVIS, Speaker of the House of Representatives.
ROBERT M. PALMER, Speaker of the Senate.
Approved March 7, 1861.
A. G. CURTIN, (Governor.)

Population of Ohio.

The following is a true copy of the figures of the population by counties as certified to the Ohio Legislature by the Superintendent of the census.

The population of Cincinnati is 161,044, the townships of the whole county 55,367—the whole county being 216,411.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

OIL! OIL!
PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable**, that will keep bearings **cool**, and

WILL NOT GUM.

In no case has it failed to meet the approval of the consumer.

The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor

F. S. PEASE, 61 Main st., BUFFALO.

Reliable orders filled for any part of the United States or Europe.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the **"Double Punch,"** viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish **SAMPLES** and **PRICE LIST** on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD.
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description eve issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

LYONS' TABLES.

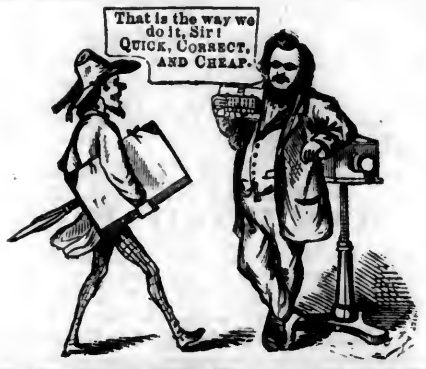
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24	"	¾ to 1
4.	" 14	"	1½ to 1	16.	" 24	"	1½ to 1
5.	" 15	"	¾ to 1	17.	" 25	"	1½ to 1
6.	" 15	"	1 to 1	18.	" 26	"	1½ to 1
7.	" 15	"	1½ to 1	19.	" 28	"	¾ to 1
8.	" 16	"	¾ to 1	20.	" 30	"	1 to 1
9	" 16	"	1 to 1	21.	" 30	"	1¼ to 1
10.	" 18	"	¾ to 1	22.	" 30	"	1½ to 1
11.	" 18	"	¾ to 1	23.	" 32	"	1 to 1
12.	" 18	"	1 to 1	24.	" 32	"	1¼ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**



ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, March 30, 1861.

Madison and Indianapolis Railroad.

The earnings of this road for the fiscal year ending December 31, 1860, were:

From freight	$124,040 00
" passengers	58,644 10
" Jeffersonville Railroad	36,546 37
" express, mail, etc	11,333 01
	$230,563 48

And the expenditures were:

Running road	$27,856 06	
Repairs of road	30,923 03	
Repairs of cars and machinery	33,310 78	
All other expenses	39,393 23	
		131,483 10
Net earnings, 42.98 per cent.		$99,080 38

Compared with 1859, there is an increase in receipts of $29,909 04
And in expenses of 10,207 83

Increase in net earnings $19,701 21

—being an increase in earnings of 14.90 per cent; and in expenses of 8.41 per cent. The receipts of the company from all sources during the year were:

From transportation as above	$230,563 48
" nine income bonds, as par	9,000 00
" first mortgage interest bonds	2,240 00
" income " " "	140 00
" sales of old iron, etc	7,388 83
" other sources	1,919 57
	$251,251 88

And the disbursements:

Current expenditures as above	$131,483 10
Taxes, $3,973 39; commissions $381 26	4,254 65
Interest, $69,936 23—less $776 23 received	69,160 00
Bills receivable	12,773 45
" payable	10,734 47
Dividend scrip, paid by conversion into income bonds	6,354 60
Columbus and Shelby Railroad construction	2,881 50
Loss in operating do	1,978 37
Miscellaneous	6,281 11
Balance in Treasury Dec. 31, 1860	5,350 63
	$251,251 88

The following is a comparative statement of the earnings and expenditures for six years:

	Earnings.	Expenses.	Net Earnings.
1855	$268,103 33	$199,351 33	$68,852 00
1856	270,317 66	194,369 09	75,948 57
1857	212,664 40	149,249 96	63,414 44
1858	206,114 16	123,481 78	82,632 38
1859	200,654 44	121,275 27	79,379 17
1860	230,563 48	131,483 10	99,080 38
Total.	$1,388,417 47	$919,210 53	$469,306 94
Av'ge.	231,402 91	153,201 75	78,217 82

It will be seen that the gross earnings exceed those of the three preceding years, and are but little below the general average of the whole six. The expenses, although above those of the two preceding years, are nearly $22,000 below the general average. The net earnings considerably exceed those of any previous year, and are nearly $21,000 better than the average. The company notwithstanding have been unable to pay the bonds issued for the coupons falling due for the years 1858 and 1859, as was anticipated; a portion of the *net* earnings having been absorbed by obligations contracted before 1856, the payment of which could not be avoided.

The first mortgage bonds to the amount of $600,000 fall due in May next. The company do not expect to be able to pay them in cash. They will probably be extended for a term of years, as the company is now in a position to pay the interest as it falls due. The report says:

During the last year we have built and enclosed a new Howe bridge 161 feet long over the north fork of the Muscatatac, with a new track sill—cost $4,000; built new, four pair of passenger car trucks—cost $500 per pair; four hog caboose cars, two stock and three lever cars, five locomotive tender frames and three cabs, and rebuilt, one baggage car (nearly all new,) fourteen box freight, four lumber, seven hog and nine coal cars, in addition to the works ordinarily necessary upon the cars; made extensive repairs upon several of the locomotives, renewed 23,000 crossties, relaid three miles of the track, built two new water stations with stone basements, 14 by 20 feet, 10 feet high, and nine tubs for use at the various water stations, which we think will account, in part at least, for the increase in our current expenses the last year.

The expenses of the Columbus & Shelby Railroad have been largely increased from the necessity of having to build and enclose a new Howe bridge, 161 feet long, over Flat Rock Creek, with stone abutments for the same (the old being of wood) to make considerable repairs to the other bridges on the road, costing about $6,000, and in addition renewed extensively the cross-ties; the cost of the labor for all of which is included in the statement of the amount of the service rolls.

During the last year the Shelby & Rush Railroad Company have relaid their track with a T, rail from Shelbyville to Rushville, twenty miles. Our company was extensively employed in freighting materials used in its reconstruction and other services, and by that arrangement has the running of that road and the keeping of it in repair, paying themselves therefor out of the receipts of that road; the additional labor necessary for the performance of which service is also included in the amount of the service rolls of last year.

The trains have been run with the usual care and regularity, and with freedom from accident.

The company have had 25 locomotives, two of which have been broken up, one laid up, and one too light for general service. The number of miles run by locomotives has been 201,402, at a total cost for repairs of $13,034 62 or $6 19.5 per 100 miles run. Including all expenses the average cost per 100 miles run has been $19 58.2. In 1859, the number of miles run was 186,895, at a cost for repairs of $8,804 73, or $4 71.1 per 100 miles. Including all expenses, the average cost per 100 miles run was $18 15·9.

GENERAL STATEMENT.

Construction road	$2,613,967 36
Columbus & Shelbyville construc'n.	53,737 24
Jeffersonville Railroad Co	8,608 56
Indianapolis & Bellefontaine R.R. Co	16,680 45
Rushville & Shelbyville R. R. Co..	3,741 68
Madison & Indianap. Telegraph Co.	3,329 41
Union passenger depot	23,005 73
Bills receivable	14,476 00
Mad. & Ind. Telegraph Co. stock..	4,515 25
Peru & Indianapolis Railroad..	35,243 47
Columbus & Shelbyville R. R. stock	274,750 00
Peru & Indianapolis judgment	1,045 89
Appropriated to pay interest	1,676 35
Balance in treasury	5,350 63
	$3,060,128 02
Capital stock	$1,648,050 00
Mad. & Ind. 1st mortgage bonds...	600,000 00
Madison & Indianap. income bonds	546,000 00
Winslow, Lanier, & Co.	627 50
Scrip dividend	81,878 04
Construction bonds	600 00
Profit and loss	86,299 60
Bills payable	4,864 49
Columbus & Shelbyville transport'n.	2,508 39
Mortgage interests bonds	75,740 00
Income interest bonds	63,560 00
	$3,060,128 02

The office of this Company is at Madison, Ind. The officers and directors for the ensuing year are:

President—F. H. SMITH.

Directors—Nathan Powell, Wm. M. Dunn, Jacob B. McChesney, Peter McMartin, Edmund H. Miller, John Ferguson, F. H. Smith.

Secretary—THOMAS POLLOCK.

Treasurer—T. P. MATTHEWS.

Superintendent—D. C. BRANHAM.

Chicago and its Railroads.

The total earnings of the railroads belonging to the Chicago system for the year 1860, exhibit a very gratifying increase over the earnings of 1859, as follows:

Earnings, 1860	$17,690,314
Earnings, 1859	14,978,300
Increase in 1860	$2,712,014

If we confine the comparison to the earnings of the ten trunk lines, the result is as follows:

Earnings, 1860	$15,289,199
Earnings, 1859	12,659,115
Increase in 1860	$2,630,084

The earnings of these trunk lines for a series of years have been as follows:

1856	$17,812,957	1859	$12,659,115
1857	16,428,228	1860	15,289,199
1858	13,191,736		

The revulsion setting in in 1857 it will be seen, caused a falling off in the earnings of nearly one million and a half of dollars—the decrease continuing in a more marked degree in 1858 and reaching its lowest point in 1859. The rebound in 1860 is as remarkable as it is gratifying.

The general passenger movement for the year just closed, while showing a considerable falling off in the aggregate as above stated, nevertheless brings to light the fact that the West received larger additions to its population in 1860 than in the previous year.—The total movement, for example, on the three great trunk lines leading east from Chicago, during 1860, was 1,004,227, as follows:

Westward movement	583,705
Eastward movement	550,437
Excess of Westward movement	33,268

The excess of Westward movement over these roads for a series of years has been as follows:

1856	106,950	1859	17,574
1857	94,978	1860	33,268
1858	42,516		

If we take the five roads leading westward from this city for a comparison, we obtain the following results for 1860:

Westward movement	567,035
Eastward movement	542,647
Excess of Westward movement	24,388

Taking all these facts into consideration, it is entirely safe to say, that the West reached the lowest point of depression in 1859; that 1860 has been a year of rapid recovery; and that she is again starting upon an era of prosperity.—*Chicago Tribune.*

Augusta and Savannah Railroad.

The earnings of this road for the fiscal year ending December 31, 1860, were:

From passengers		$65,424 85
Freight		93,747 85
Mail		9,816 00
Total earnings		$168,988 70
The expenses were—		
Transportation	$24,112 42	
Motive power	18,712 00	
Maintenance of cars	4,090 62	
Do. way	25,860 10	
Total expenditures		73,375 74
Net earnings		$95,612 96
Add interest received		2,086 04
Total net income		$97,699 00
Deduct interest on bonds		15,279 25
Balance		$82,319 75

The expenses were about 43 per cent. on the total receipts. The net receipts show a profit of 13 per cent. on the capital stock. The bonded debt on the 1st of January was $129,500, being a reduction of $74,000 during the year. The company has no floating debt.

Finances of Louisiana.

The whole debt on the first day of January last was composed of the following items:

Bonds for Citizens' Bank		$4,297,333 33
" Consolidated Association.		1,101,200 00
		$5,393,533 33
Railroad subscriptions:		
Jackson Railroad	$884,000	
Opelousas Railroad	641,000	
Vicksburg and Shreveport	260,000	
Grosse Tete	70,000	$1,355,000 00
The Railroad Debts:		
Old Nashville Bonds	$483,000	
Mexican Gulf Railroad	100,000	
Port Hudson and Clinton.	9,000	—$592,000 00
Old second Municipality..	198,240	
Charity Hospital	125,000	—323,240 00
Juvenile School fund	529,000	
Seminary fund	136,000	—665,000 00
For relief of Treasury		750,000 00
Whole bond debt		$9,535,773 33
There are trust funds, for which the State is liable, payable on demand, amounting to		575,300 99
Making the whole State debt about		$10,099,074 30

Among these trust funds, stated as payable on demand, are the old United States deposits of 1836, which amount to $479,919 14. It is not likely to be a very heavy or sudden demand on the State revenues, but may be allowed as a set-off on some future settlement with the old Government.

The annual interest payable and paid during the last year amounted to $341,405 14. This includes interest on the United States deposit, which was appropriated to the annual school fund.

The total receipts into the Treasury last year, including receipts on account of trust funds, were $2,378,793 44; the expenditures, $2,224,702 10.

Added to the balance remaining in the Treasury July 1, 1860, there remained a balance, on the 1st of January last, of $1,331,402 57 belonging to the various funds. The general fund, $1,073,-217 42; paid out, $980,801 12; apparent surplus, $193,416 30.

But the general fund report $150,000 borrowed of the Louisiana State Bank in 1859, so that the actual excess of receipts over ordinary expenditures was $242,416; and added to the balance in the treasury at the beginning of the year, made a surplus of resources over expenditures during last year of $376,112 39.

The debts and liabilities of the State were, in 1840, $23,309,346 43; they are now $10,099,-074 32, showing a reduction of $13,210,172 11.—*New Orleans Picayune.*

Northern Central Railway.

The revenue of this company for the fiscal year ending December 31, 1860, was from—

	Wrightsville, Y. & G. R. R.	Sunbury & Erie R. R.	Northern Central.
Passengers	$10,364 86	$15,348 74	$242,819 28
Freight	14,514 64	10,502 73	674,142 31
Mail	650 00	1,831 24	25,450 00
Express, etc.		269 20	22,209 71

Total Northern Central Railway		$964,621 30
Wrightsville, York and Gettysburg		25,529 50
Sunbury and Erie		27,951 91
Total revenue		$1,018,102 71
The expenses were—		
Conducting transportation	$291,501 18	
Repairs of machinery	168,183 41	
" railway	239,531 15	
General expenses	35,259 80	
		734,475 54
Net revenue, 27.86 per cent.		$283,627 17
Add interest on $52,000 bonds; do. on $30,995 88 debt; and dividend on 3,173 shares of stock of W., Y. & G. R. R. Co.		10,190 94
Total net revenue		$293,818 11
Less interest on loans	$298,293 00	
Dividend of $1 25 per share on 6,341 shares W., Y. & G. R. R. Co. for 15 months	7,726 25	
Interest on bonds of said company $52,000 for 15 months	3,900 00	
Do. on $30,995 88 debt	2,324 69	
Interest, discount, exchange, etc.	45,636 90	
		358,080 84
Deficiency of revenue in 1860		$64,262 73
Balance unappropriated in 1859	$41,914 23	
1858	89,313 88	
1857	26,482 79	
1856	92,965 39	
1855	161,587 72	
		412,164 01
Balance, Jan. 1, 1861		$347,901 28

Compared with the previous year the earnings show an increase of $88,574 76

With an increase in expenses of 145,463 83

The decrease in net earnings is therefore $56,589 07

The expenses of transportation department have been increased $18,720 06; of machinery de-

partment, $31,758 74; of road department, $80,497 74. The general expenses have also increased $14,487 29.

The working expenses have been 72.14 per cent. of the revenue—an increase over 1859 of 8.78 per cent.

The large expenditures in 1860 were rendered necessary by the general bad condition of the track between Baltimore and Bridgeport, and also the worn down condition of the engines, freight and passenger cars. The policy adopted by the management in 1859, was carried out during the year in regard to rebuilding and improving the track, road-bed and superstructures, as well as improving the condition of the motive power and rolling stock. In order that the road might be worked with economy and regularity, and dispatch given to the business offering, it became necessary to expend the sum of $145,000 over and above a fair allowance for regularly working and maintaining the property in a condition to meet the requirements of the public, as well as the expectation of those interested in its success.

The total number of passengers carried during the year was 363,076; the total number of tons of paying freight was 592,769; in addition to which there were transported for the company's use some 75,000 tons of materials and supplies—making the entire tonnage 667,769—an increase of 60,000 tons over the previous year.

The company own 41 locomotives, which have run during the year 785,560 miles at a cost of 9.9. Six of the freight engines have been altered to burn anthracite coal—which caused considerable saving in the cost of fuel.

The company have 1,754 cars—of which, 31 are passenger, 8 baggage, 785 coal, and the balance are lumber, lime, wood, stock and ore cars. Total value of rolling stock, $444,741 37. Total number rebuilt, 223; to be rebuilt, 57.

The company have 138 miles of main road and 16.4 of side track between Baltimore and Sunbury; and 1⅓ miles of side track, and 12 miles of main track, on the Wrightsville road—making the whole road owned and leased by the company 168 miles.

We give the report of the president of the company entire. It is as follows:

When we submitted our last annual report we entertained the hope of being able at this time to make one more gratifying than we fear this will be, although from that report it was not to have been expected that the Company could at an early period be extricated from their difficulties.

By a careful examination of the report made by the President and Directors who preceded us, it will be seen that there was a floating debt of $642,129—after adding the coupons due the next day, and after giving credit for the cash assets. A part of this debt was secured by the bonds of the Company, of which the market value may have been $320,000, leaving, to be provided for, the sum of $322,000; there were also suits and claims for a very large amount, which have been for the most part paid and settled by the present Board.

Such was the condition of the bed of the road from Baltimore to Bridgeport that we had to relay with new iron twenty-one miles; and upon the balance, between the points named, to expend large sums, as you will find by reference to the report of the General Superintendent.

The machinery of the road was in as bad a condition as the track. In the first year we had to expend $58,000 in repairs of machinery, and to purchase $121,279 37 of machinery and cars. Had the revenue of the Company not exceeded our expectations, we could not have overcome the difficulties which we have enumerated, even at the heavy rate of interest we have been compelled to submit to. The large increase in our business alone justified the paying of this interest to sustain our credit.

To meet our engagements with the State of Maryland, pay the interest on our bonded debt, meet the floating debt, pay for the material, rolling stock and cars absolutely required, was impossible, notwithstanding our large increase of revenue.

Under these circumstances it was difficult to decide which was to be left unpaid. To suffer protest upon our floating debt was to put an end to any purchases upon credit; if we failed to pay the interest upon our bonds, the parties with whom they were hypothecated having a right to sell upon defalcation in payment, would sacrifice them immediately for any balance they might have against us, and the only thing left us was to trust to the forbearance of the State of Maryland.

The State had a deep interest in this road, which was helping to build up her metropolis, and although she did not receive her interest promptly, yet she received a large increase of revenue annually by her taxable property being enhanced in value, and she did not require the money in her treasury unless it was for the Eastern Shore Railroad.

In trusting to the State we have been mistaken. The Comptroller of the State, by his counsel, has harrassed us by every possible and uncalled-for proceeding.

Had the State of Maryland not sued the Company, it is more than probable that we should have been able to have borrowed an amount which would have paid the interest in January, and in the present State of the money market, could have borrowed enough to have paid the State the amount sued for, especially as the stock of the Company is likely to get into the hands of such holders as could be relied upon for relief.

When the State commenced proceedings against the Company, the first of November last, it was almost impossible to borrow money even upon undoubted securities. To sustain the Company, John S. Gittings & Co. had then advanced us $120,000 and upwards; raised in part by them upon pledge of their own assets and those of their senior partner.

Of the $2,500,000 loan (1885 bonds,) a large part of the avails actually went into the treasury of the State, and had it not been for them, it is doubtful whether the State would have received any part of the annuity stipulated to be paid, and this should have entitled those bondholders to the consideration and forbearance of the State. The parties most entitled to the sympathy of the stockholders are the holders of those bonds of 1885 and the holders of the contractors' bonds, and it is the duty of the stockholders to make some arrangement to satisfy them. We would propose to fund the interest now due, and the interest due in July, by which means the Company will be able to meet the demands of the State, and the floating debt; after which there can be no doubt of the Company's ability to pay demands as they accrue, even should the revenue not increase to the extent reasonably to be expected. The interest can then be paid on the 1st of January, 1862, and under such an arrangement the bonds will, as soon as public confidence is restored, command the prices at which they were sold, and probably more.

The quantity of coal transported over the road during the year amounted to 239,817 tons, viz: from Sunbury, 95,121 tons; from Trevorton, 51,569 tons; from Millersburg, 69,452 tons; from Dauphin, 10,559 tons; from Wrightsville, 1,302 tons; and from the Lackawanna and Bloomsburg Railroad, 11,814 tons—an increase of 17,286 tons over 1859. Of the above amount, 14,997 tons were carried north over the Sunbury and Erie Railroad, which was worked by this Company up to July last. The quantity carried to Baltimore was 114,382 tons, an increase of 14,382 tons over 1859. The balance, 110,438 tons, was delivered at way stations, as follows: at Woodbury, 1,223 tons; at Ashland, 16,954 tons; at York, 19,032 tons; at Bridgeport, 24,781 tons; at Dauphin, 14,585 tons; and the remainder at various unimportant points upon the line of the road.

The amount of revenue derived from the transportation of coal during the year was $440,803 85.

The quantity of coal used by the company was 16,823 tons costing $49,883 07; of wood, 20,455 cords, costing prepared, $40,227 61; of oil, 20,903 galls., costing $12,960 18.

CONDENSED BALANCE SHEET.

Construction of railway from Baltimore to Bridgeport		$3,780,702 39
Do., from Bridgeport to Sunbury		3,138,952 40
Do., Canton Extension (unfinished)		317,378 68
Total cost of road		$7,237,033 47
Real estate		316,582 52
Rolling stock		855,889 21
Cash and cash items		77,278 85
Bonds, debt and stock of Wrightsville, York and Gettysburg Railroad Company	$208,761 25	
Bonds and stock of other Companies	6,237 00	
		214,998 25
Sinking funds:—same as last report		277,639 99
Materials, tools, etc., on hand		62,429 06
		$9,041,851 35
Capital stock, 45,200 shares (50 shares in scrip)		$2,260,000 00
Loans secured by mortgage		5,040,300 00
Debt to City of Baltimore, which, upon the completion of the road, reverts to the city		850,000 00
Bills payable	$230,614 65	
Coupon account	90,771 00	
Loan "	6,925 00	
Monthly bills	98,500 22	
Dividend account—W., Y. & G. Railroad Co.	4,431 41	
State of Maryland	92,500 00	
Individuals and corporations	14,184 18	
		537,926 46
Private Switch grants		3,223 61
Bonds for right of way		2,500 00
Surplus profits		347,901 28
		$9,041,851 35

A comparison of the above balance sheet with that of the preceding year shows an *increase* in construction account of $158,352; in real estate, of $960; and in rolling stock, of $5,546; a *decrease* in cash and cash items of $88,774; in investments, of $36,700; and in materials and tools, of $5,151. The sinking funds remain the same. The outstanding liabilities have decreased $213,576. The following is a comparative statement of the account for the two years:

	1859.	1860.
Bills payable	$485,549	$230,615
Coupon account	81,881	90,771
Loan "	41,450	6,925
Monthly bills	92,165	98,500
Dividend account	4,355	4,431
State of Maryland	22,500	92,500
Individuals and corporations	23,602	14,184
	$751,502	$537,926

The loans secured by mortgage remain the same as per last report with the exception of the cou-

struction bonds, which have increased from $2,086,500 to $2,398,000. The following is the present condition of the debt:

Coupon bonds of the late Baltimore and Susquehanna R. R. Co., issued for rolling stock, redeemable 1st October, 1866. Interest payable quarterly—1st January, April, July and October	$150,000 00
Loan from the State of Maryland, in lieu of previous loans to the Baltimore and Susquehanna R. R. Co. See Laws of Maryland, 1854, ch. 260. Interest payable quarterly—27th Jan., April, July and Oct	1,500,000 00
1st mortgage coupon bonds of the late York & Cumb. R. R. Co., issued for the completion of the road, redeemable 1st May, 1870. Interest payable semi-annually—1st May and November	175,000 00
2d mortgage conpon bonds of the late York & Cumberland R.R. Co., issued to contractors for the completion of the road, redeemable 7th Jannary, 1871. Interest payable semi-annually—7th Jan. and July.	25,000 00
Bonds of the late York & Cumberland R. R. Co., issued in aid of the late Susquehanna R. R. Co., and gnaranteed by the City of Baltimore, redeemable 1st January, 1877. Interest payable semi-annually—1st January and July	500,000 00
Contract bonds of the Nor. Cen. Railway. Co., issued "for work done for the Susq. R. R. Co., prior to 9th Dec. 1854," redeemable 15th Jan. 1875. Interest payable quarterly—15th Jan., April, July and Oct. Total loan $300,000. Issued	292,300 00
Bonds of the Nor. Cen. Railway Co. issued for construction of the road from Bridgeport to Sunbury and Tide-Water, Canton, redeemable 1st July, 1885. Interest payable semi-annually—1st Jan. and July. Total loan $2,500,000. Issued	2,398,000 00
	$5,040,300 00

The office of the company is at Baltimore, Md. The officers and directors for the ensuing year are as follows:

President—ANTHONY B. WARFORD.

Vice-President—JOHN D. CAMERON.

Directors on the part of the City—Peter Mowell, Peter Sauerwein.

Directors on the part of the Stockholders—Simon Cameron, John S. Gittings, E. C. Biddle, William T. Walters, William Colder, Jr., A. E. Kapp, Alexander Small, J. S. Haldeman, John D. Cameron, John A. Wright, William J. Palmer, J. R. Eby.

Secretary—ROBERT S. HOLLINS.

Treasurer—JOHN S. LEIB.

Superintendent—JAMES. C. CLARKE.

North Carolina Railroads.

The Legislature of North Carolina, at its late session, granted charters for two railroads, either of which would make a connection between the North Carolina Central and the Richmond and Danville Railroads. One charter authorizes a line from company shops, a depot on the North Carolina Central, in Alamance County, to Milton, in Caswell county, looking to a connection with the Richmond and Danville Railroad, at Barksdale depot; the other provides for a line from Greensboro' to Leaksville, North Carolina, at which point a connection could be made with the Dan River Coalfield Railroad. No money was appropriated to either route; and hence, to insure success to either scheme, the people interested must come forward and raise the necessary amount by private or corporate subscription.—*Danville Register.*

New London Northern Railroad Company.

The stockholders of this Company will meet on the 30th inst. at the office of the Trustees of the New London, Willimantic and Palmer Railroad Company, to consider the subject of forming one corporation, under the name of the New London Northern Railroad Company.

Minnesota Mining Company.

The annual meeting of this company was held on the 20th inst., a semi-annual dividend of 10 per cent. or $5 per share, was announced, payable 1st of July next. The following is a synopsis of the Director's Report for the year 1860:

Rough copper produced	2,150½ tons.
Yield of pure metal	73¾ per cent.
Market value of product	$656,000
Mining cost	446,000
Net earnings, about	210,000
Dividend declared for July 1	100,000

Showing an increase of 32 per cent. in the production of the mine, and of 60 per cent. in net earnings over the previous year (1859). The present appearance of the mine, and its prospects for the current year, are reported to be most favorable. The old officers of the Company were unanimously re-elected.

Immigration into the United States.

During the past year 179,691 immigrants came to the United States. Their nationality was as follows: England, 13,001; Ireland, 48,637; Great Britain and Ireland, 14,513; British America, 4,514; France, 3,961; Germany, 50,746; Prussia, 3,745; China, 5,467; United States (return passengers) 26,051; all others, 9,056. Their ages and sexes were as follows:

Ages.	Males.	Females.	Sex not stated.	Total.
Under 5 years	5,739	5,743	—	11,482
Between 5 & 10	4,535	4,259	—	8,794
" 10 & 15	4,575	3,769	—	8,344
" 15 & 20	18,402	17,166	—	35,568
" 20 & 25	23,879	15,638	—	39,517
" 25 & 30	20,123	9,664	—	29,787
" 30 & 35	11,500	4,764	—	16,264
" 35 & 40	8,543	4,240	—	12,783
Forty and upwards	11,198	5,597	..	16,795
Age not stated	177	94	86	357
Total	108,671	70,934	89	179,691

The number and occupation of the immigrants for four years past has been as follows:—

Occupations.	1857.	1858.	1859.	1860.
Merchants	12,114	10,217	12,495	11,207
Mechanics	18,074	11,995	13,092	13,033
Mariners	990	1,109	826	1,007
Miners	5,660	4,254	9,510	3,834
Farmers	34,702	20,506	16,323	21,742

Pennsylvania Railroad Coal Trade for 1860.

The amount of coal moved on the Pennsylvania Railroad during the fiscal year ending December 31, 1860, was 606,660 tons—of which 122,281 tons were delivered at Philadelphia, 138,989 at Pittsburg, 261,952 at way stations, and 83,438 used by the company. The amount of coal moved by the Baltimore and Ohio Railroad during the official year ending September 30, 1860, was 502,303, of which 74,510 tons were for the company's use. The Pennsylvania Railroad Company is therefore a larger coal consumer by 8,928 tons, and a larger coal carrier by 95,429 tons, than the Baltimore and Ohio Railroad Company.

December ..	33,156,608	679,602	69,158 38

Making a total of 196,153,709 pounds received, on which the freight amounted to $430,780 18.

During last January there were received 63,906,126 lbs., being an excess of 47,401,318 lbs. over the receipts for the same month last year. The freight on this amounted to $171,535 72, being an excess of $130,649 96 over the amount for the same month last year.

The receipts during February last were 61,129,352 lbs., being an excess of 34,492,128 lbs. over the receipts for the same month last year. The freight on this amounted to $141,804 09, being an increase of $97,855 45 over the amount for February, 1860.

Railroad Earnings.

The earnings of the Little Miami and Columbus and Xenia Railroad for February, 1860, were $91,436 96
February, 1861 ..... 73,505 59

Decrease $17,931 37

The earnings of the Cincinnati, Hamilton and Dayton Railroad for Feb'y, 1861, were. $47,267 83
February, 1860 ..... 41,911 35

Increase. $5,356 48

The earnings of the Housatonic Railroad for the month of February, 1860, were .. $17,492 05
February, 1861 ..... 11,781 49

Decrease $5,710 56

Of this $47,868 was in freight.

The traffic of the Great Western Railway of Canada for the week ending March 15, 1861, was as follows:

Passengers	$18,314 35
Freight and live stock	30,807 97
Mails and sundries	1,315 08
Total	$50,437 40
Corresponding week last year	44,934 32
Increase	$5,503 08

The following are the earnings of the Great Western Railway of Canada for the week ending March 8, 1860:

Passengers	$17,590 58
Freight and live stock	26,889 57
Mails and sundries	1,316 58
Total	$45,796 72
Corresponding week of last year.....	42,497 43
Increase	$3,299 29

The receipts of the Grand Trunk Railway of Canada for the week ending March 16th, 1861, were $72,795 03
Corresponding week, 1860 ..... 70,915 67

Increase $1,879 35
Tot. traffic from July 1, 1860, to date, $2,398,976 03
Corresponding period, 1859 ..... 1,969,391 10

Increase $429,584 93

The earnings of the Hannibal and St. Joseph Railroad for the months of January and February were as follows:

	1860.	1861.
January	$43,021 00	$35,808 00
February	54,071 00	34,472 00
Total	$97,092 00	$70,280 00
Decrease		$26,812 00

The earnings of the Cincinnati, Wilmington and Zanesville Railroad for February were $12,601 57, and the expenses $10,326 61—net earnings $2,275 91. The balance on hand with the Receiver, February 1, was $19,411 31. Received during the month of February, from back balances and current business, $17,326 83. Total, $36,738 14.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterisk* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, March 30, 1861.

Share and Money Market.

The share market the past week has shown very little change. Everything waits upon political events. Although nothing of importance has taken place during the week, a most uneasy feeling prevails in all business circles, and an entire indisposition on the part of business men and capitalists to take any step till the future is more assured.

We are getting a plethora of gold, the banks of this city now having something over $40,000,000. This, commercially, is one of the worst signs of the times. When we are getting an unusually large amount of gold from foreign countries, we must look for a speedy decline in the demand for our products, which will in the end bring us in debt, and send our importations of the precious metals back again, from an inability to pay with the regular products of our industry. England is now our debtor and ships us gold to make good the balance against herself. As soon as she squares the account, she will curtail her purchases to the amount of the products of her manufactures she can sell us. She will purchase less bread, less cotton, and less provisions. Nor will she increase her purchases to the ordinary volume till she gets back her gold; or in other words, till we take more of her products than she takes of ours.

The same law holds good in the domestic or internal commerce of a people. The country is always debtor to the city; the merchant and manufacturer to the capitalist. When a crop fails, or a commercial revulsion or crisis happens, gold or silver as far as they can be had, must pay the debts or the balances that may exist. For this reason the gold in our banks increased very rapidly, and to an unprecedented amount after the collapse of 1857. The debtors paid up as far as

they could in specie; business revived, and as the country grew stronger, it commenced drawing from the banks, and their specie was steadily reduced till something like the normal standard was reached. Continued prosperity would have enabled the industry of the country to have taken from them every dollar not needed to pay the balances in the weekly settlements among themselves, or to meet emergencies that might arise. But the unexpected crisis of 1860 came, paralyzing business, and calling upon debtors to pay. The specie previously drawn out, and as capital, made the basis of business operations, was returned, which our banks are again hoarding, and it lies unavailing in their hands, because the business of the country has nothing to offer in exchange for it.

What is the remedy for such a state of things? None but the natural one. When there is a lack of capital for the payment of debts, it must be created. Where the market is overstocked, production must be diminished. When people find they can no longer sell, they must no longer buy. Here is the only panacea. Industry and economy must work the cure. All that legislation can do is to guarantee uniformity and stability, and the removal of all restrictions not necessary for our revenue, or a reasonable protection to our industries. Time will scatter our excessive accumulations of specie. With the accomplishment of this, matters will gradually be restored to a healthy condition, both at home and abroad, creating a market for our products, and setting industry everywhere in motion, giving employment to our capital and securing to it an ample return.

Sacramento Valley Railroad Company.

The annual meeting of this company was held in Sacramento on the 12th February. The following is an abstract of the report of the trustee for the year terminating December 31, 1860:

Balance on hand January 1, 1860	$13,650
Net earnings of the road, 1860	103,469
Total	$117,119
Of which amount there has been paid:	
For interest on first mortgage	$40,950
" " second "	32,400
" redemption of 21 bonds	18,544—91,894
Balance January 1, 1861	$25,225
Which has been appropriated and paid:	
In redemption of eight bonds	$7,144
And interest on second mort., Feb. 1. 15,000	—22,144
Leaving a balance on hand of earnings of 1860	$3,081

The total redemption of bonds to date has been $68,000.

The present represented cost of road is as follows, to wit:

Capital stock issued	$793,850
First mortgage 10 per cent. bonds	400,000
Second mortgage 10 per cent. bonds	300,000
Total	$1,493,850

The comparative cash surplus earnings for the five past years is as follows:

1856	$65,368	1859	$80,359
1857	79,813	1860	106,284
1858	90,136		

The trustee reports the completion of six miles of the California Central Railroad; but in consequence of the absence of C. L. Wilson, the principal manager, he has been unable to consummate any arrangement for working it, but expresses a hope that he will be able at the next annual meeting to report an active traffic on the whole route. He recommends that the stockholders and bondholders of the Sacramento Valley Railroad, in their individual capacity, aid the roads proposed as connecting at Folsom, where such are in the hands of parties who may be relied on to complete their project. The Superintendent's report shows a large year's business:

Total passenger earnings		$108,167 98
Freight		115,285 22
Sundry		6,797 60
Gross earnings—Total		$230,250 80
Total expenses in maintenance and operating	$106,549 92	
In additional construction and material on shipboard	19,106 33	—125,656 25
Total net receipts		$104,594 55
Number of tons of freight transported, of which 13,000 was stone, downward		48,000
Number of passengers transported		75,000
Number of miles traveled by this numb'r.		1,500,000

President—GEORGE F. BRAGG.

Directors—Georgo F. Bragg, J. Mora Moss, W. C. Ralston, G. Touchard, H. W. Harkness, N. D. Thayer, J. P. Robinson.

Lehigh Valley Railroad.

This company is the successor of the Delaware, Lehigh, Schuylkill and Susquehanna Railroad Company, which was incorporated April 23, 1846. Its name was changed to that of the Lehigh Valley Railroad Company January 7, 1853. The construction of the road was commenced in December, 1852, and completed and opened for business in October, 1855. The road is 45.50 miles in length, commencing at Easton, and running via Bethlehem and Allentown, to Mauch Chunk, Pa. At Mauch Chunk it connects with the Beaver Meadow Railroad, from which it receives its coal and miscellaneous tonnage; at Allentown with the East Pennsylvania Railroad, which also serves as a feeder to it; at Bethlehem with the North Pennsylvania Railroad, upon the cars of which it passes off the coal, etc., destined for Philadelphia. At Easton its connections are the Belvidere Delaware, and the Central New Jersey Railroads.

The receipts of the Lehigh Valley Railroad for the fiscal year ending November 30, 1860, were:

From coal transportation		$514,530 40
" passengers, express and mail		78,537 79
" freight		86,840 40
		$679,908 59
The expenditures were:		
For coal transportation	$258,408 68	
" passeng's, express, etc.	41,523 09	
" freight	37,937 28	
		337,869 05
Net receipts		$342,039 54

Compared with the previous year the receipts show an increase of $154,042 11—of which $122,763 is from coal; $10,376 09 from passengers, mail and express; and $20,902 43 from freight.

Included in the above ordinary expenses is the sum of $38,206 15 for the purchase of railroad iron; $8,008 52 for iron bridge at Easton; $8,000 for loss of locomotive; $5,175 62 for damages to persons and property; and $16,264 25 for improvements at Easton, Coplay and Mauch Chunk. The sum of $60,247 79 has also been expended for permanent improvements, and charged to construction. Included in this sum is $20,962 23 for new shops, etc., at South Easton; $11,420 40 for railroad iron; $12,201 15 for second track and sidings; and the balance for depots, car-house, cross-ties, etc. The cost of the road, including the equipment now stands at $3,687,533 38. A dividend of 5 per cent. in cash has been declared out of the earnings of the past year; also an interest dividend of 7 per cent. in stock.

The number of miles run by coal and freight trains was 183,500, and receipts per mile run $3 27. The number of miles run by passenger trains was 89,490, and the receipts per mile run 87.7 cents. Total mileage of all trains, including gravel and construction trains, 329,630; receipts from all sources per mile run $2 06.

There has been 2.6 miles of second track and one mile of siding laid, and there is now in use (including the Belvidere Delaware connection) 15.6 miles of second track and 6.7 miles of sidings; 3.2 miles of second track have been graded, and there is now 10.6 miles ready for the ballast and track. The report says:

"The business of the Quakake and East Pennsylvania Railroads show a handsome increase and will no doubt continue to improve. From the former we have received about $14,800, and from the latter about $2,500."

"Two routes have been examined for connecting the Great Mahanoy Coal Field with our road, thence to Trenton and New York by the Belvidere Delaware and Central Railroads. The first by way of Mahanoy Valley to Tamaqua, thence by Little Schuylkill and East Mahanoy Railroad requiring 17 miles of new road at a cost of say $600,000. The second by way of Beaver Meadow and Quakake Railroads, thence into the eastern end of Mahanoy Valley, requiring 4 or 5 miles of new road at a cost of say $75,000. The first named route will give us a good connection with the Schuylkill Valley, and with the Sunbury and Erie via the East Mahanoy and Mt. Carmel Railroads to Sunbury. The completion of the several links spoken of, forming the connection between the rich valleys of the Schuylkill and Susquehanna and the cities of Philadelphia and New York, will have the effect of placing the Lehigh Valley Railroad foremost in the great carrying lines of the country."

"The track is now in better condition than at any former period. Almost the entire length of it has been thoroughly ballasted with broken stone or gravel. 1,900 tons of new iron has been used in repairs together with 10,643 new chairs, and 34,668 cross-ties."

The officers and managers elected on the 14th of January last are as follows:

President—J. G. FELL.

Managers—Asa Packer, William H. Gatzmer, John T. Johnston, R. F. Stockton, Elisha A. Packer, David Barnet.

Sec. and Treasurer—JOHN N. HUTCHINSON.

Engineer and Sup't—R. N. SAYRE.

☞ Dwight W. Pardee, Esq., has been chosen Treasurer of the Hartford and New Haven Railroad Company.

☞ Mr. HENRY COFFIN, formerly Superintendent of the Memphis and Ohio Railroad, has been appointed Superintendent of the Eastern Division of the Memphis and Charleston Railroad.

☞ Col. R. B. MASON, well known as the Chief Engineer and General Superintendent of the Alton and Chicago Railroad, has been appointed General Manager of the Logansport, Peoria and Burlington Railroad, in place of WM. H. CRUGER, resigned. Col. M. still retains his connection with the former road.

Pittsburg, Fort Wayne and Chicago R. R.

The following is the monthly statement of the earnings of the Pittsburg, Fort Wayne and Chicago Railroad for the year ending December 31, 1860:

	Earnings.	Expenses.	No. of Passeng's.	Tonnage.
Jan'y.	$139,950.87	$108,674.87	25,360	27,114
Feb ..	152,574.28	112,017.42	26,104	36,128
March.	192,578.63	121,496.75	33,940	40,212
April..	182,565.72	115,653.81	33,088	23,746
May..	188,830.66	141,542.96	33,739	35,435
June .	165,795.59	170,051.98	34,223	34,350
July..	154,031.99	138,894.85	36,298	35,627
August	203,853.28	137,211.47	41.756	44,831
Sept ..	245,937.94	129,939.31	43,279	41,620
Oct...	286,844.02	158,487.22	51,546	50,625
Nov ..	231,252.76	134,896.21	41,366	42,477
Dec...	191,180.73	148,760.77	36,023	43,069
Tot'ls.	$2,335,396,53	1,617,627.26	436,722	465,204
In '59.	1,965,987.80	1,291,332.95	413,317	362,606
Inc	$369,408.73	$326,204.67	23,405	102,598

Finances of Alabama.

The bonded debt of Alabama State is $3,445,000; annual interest, $185,820. The domestic debt is $2,582,178, most of which draws interest, being the 16th section and University fund, etc. The Legislature has just authorized the issue of $2,000,000 in bonds, the issue of $1,000,000 in Treasury notes, and has loaned the Southern Congress $500,000. The balance in the Treasury on the 1st of January last was $298,668; net revenue during the present year estimated at $847,000; total of means, $1,172,660. Past appropriations due, $600,650; due educational fund, $285,000; State expenses, $200,000; total, $1,058,650. Total balance estimated to be in the Treasury at the close of the present year, $266,274. The expenses of the present military preparations of the State are not taken into the above estimates. They are expected to be met out of the new issue of State bonds and the issue of Treasury notes. There was no increase of taxes by the last Legislature, although the expenditures were largely increased.

Shipments of Copper for 1860.

The following is a statement of the amounts of copper shipped by the various companies in this district during the past season:

Minnesota	Mine	2,178 tons
National	"	727 "
Rockland	"	566 "
Ev. Bluff	"	42½ "
Adventure	"	38 "
Ridge	"	29¼ "
Nebraska	"	25¼ "
Carp Lake	"	20½ "
Superior	"	14 "
Hamilton	"	8 "
Aztec	"	5 "
Victoria	"	3½ "
Bohemian	"	3¼ "
Knowlton	"	2 "
Ogima	"	¼ "
Total amount of shipments		3,664¼ "

—*Ontonagon Miner.*

Chicago and Cincinnati Railroad.

At a recent meeting of this company at Logansport, Ills., the following gentlemen were elected Directors for the ensuing year: W. D. Judson, of New York; John Brandt, Jr., of Richmond; J. M. Warren, of Logansport; G. B. Ripley, of New York; Oren Sherman, of Chicago; J. W. Eldridge, of Winnemac; A. Tenney, of New York.

Albemarle and Chesapeake Canal.

This important work has so far progressed towards completion, as to be navigable for steamboats and the smaller class of coasting vessels. Since the opening for navigation, upwards of four thousand sailing vessels, steamboats and canal barges have passed through it, carrying to the markets of Norfolk, Richmond, Baltimore, Philadelphia, New York, Alexandria and the West India Islands nearly 100,000 tons of the productions of the State. Though the work is unfinished and improvements are to be made in the rivers leading to it, yet it is fair to presume *its tonnage exceeds already any other work of internal improvement in the State.*

Albemarle, Pamlico and Currituck Sounds receive the waters of the principal rivers of the State, and with them many branches are navigable for steamboats and other craft for 1,800 miles. When it is considered the vast extent of territory watered by these rivers, all bringing down the varied productions of the State, seeking an outlet to the markets of the world, then the importance of this improvement may be justly estimated.

North Carolina may also be proud of inaugurating a *new era* in canal navigation! The Albemarle and Chesapeake Canal is the *first* and *only* work in the world, perhaps, where steam is the *only motive power used.*

Then again, it is the first and largest work of the kind where steam and gunpowder are exclusively used in excavating the canals. Not a day's work was done by the "pick axe or spade" or the "shovel and the hoe."

In its capacity for navigation, it exceeds any other on the Atlantic coast, and is *four times* that of the Great Erie Canal of New York.—*Raleigh, N. C., State Journal.*

Toledo and Wabash Railroad.

The following table exhibits the revenue of the Toledo and Wabash Railway for the first half of the present fiscal year, as compared with the corresponding period of the last fiscal year:

	1859–60.	1860–61.
September	$75,788 88	$106,270 32
October	74,420 98	125,026 86
November	81,838 99	77,499 32
December	46,339 64	51,205 40
January	43,866 64	29,839 33
February	43,003 40	66,842 61
	$365,258 52	$465,373 84
Increase for six months		$100,115 91

Sale of the Attica and Hornellsville Railroad.

We learn that the sale of that part of the Buffalo & New York City Railroad between Attica and Hornellsville, occurred yesterday, at Batavia, pursuant to the decree of foreclosure of the first mortgage, and was bid off by A. Mann, Jr., Esq., at $113,000, for account of the Erie Railroad Company, which thus becomes the sole owner. We learn, also, that it is the intention of that Company to put the line into good repair and immediate use, thus securing a permanent termination at this city, with traffic arrangements with the State Line and Buffalo & Lake Huron Railroad Companies, crossing the Niagara at this city by the boat now used, until the International Bridge shall be constructed. A more convenient passenger depot for the city of Buffalo is contemplated. This new arrangement is of much importance to the city of Buffalo, as well as to the Erie Railroad Company.—*Buffalo Commercial, March* 22.

Debt of Mexico.

Annexed is what is said to be a correct statement of the liabilities of Mexico:

British bondholders' debt	$60,621,842 00
Spanish Convention	7,270,600 75
English-Spanish Convention	5,000,000 00
French Convention	263,490 00
American claims	3,000,000 00
Total of foreign gold	$76,156,183 75

(From the United States Railroad and Mining Register.)

East Brandywine Railroad.

The contractors on this road are rapidly progressing with the grading—and that part of the work is now nearly completed between Downingtown and Waynesburg. The company has purchased the rails and ties, and a large part of the rails is already delivered at Downingtown. The laying of the track will be commenced as soon as the frost is sufficiently out of the ground. It is expected that the cars will run the whole distance 17 miles, by the 4th of July.—*West Chester Record.*

Chester county, which contains 738 square miles of territory, and 74,749 inhabitants, is destined to be abundantly supplied with railroads. The *Pennsylvania Railroad* runs through the centre of the county for more than thirty miles, with a branch deflecting from it from near Paoli to West Chester 9 miles, and the East Brandywine Railroad, referred to in the above paragraph, 17 miles. About sixteen miles of the *Chester Valley* Railroad, which connects with the Pennsylvania Railroad at Downingtown and with the Philadelphia and Reading Railroad near Norristown, are in Chester county.

Through the southern portion of Chester county the *Philadelphia and Baltimore Central Railroad* passes a distance of about 30 miles, and will soon be extended farther. Of the *West Chester* direct railroad some eight miles are in Chester county, as also are about ten miles of the *Philadelphia and Reading* Railroad. Here, then, are seven roads in Chester county, comprising within the county more than 120 miles of iron road.

Hog Trade of the West.

The Cincinnati *Price Current* presents its usual annual statistics of Pork Packing in the Western States for the past and preceding season. The statement is published just three weeks earlier than last year; but as a general thing packing was two weeks later this year than last. The returns are made by counties, but we have only space for the following recapitulation:

	1859-60.	1860-1.
Ohio	681,908	624,798
Indiana	406,595	368,031
Illinois	503,735	512,991
Kentucky	322,487	251,896
Missouri	190,660	180,972
Tennessee	26,800	400
Iowa	166,623	162,204
Wisconsin	55,837	54,410
Grand totals	2,354,645	2,155,702
	2,155,702	
Deficiency, about 8½ per cent.	199,943	

The following is a comparative statement of the average weight, and yield of lard per hog:

	Average weight.		Yield of lard.	
	1859-'60.	1860-'1.	1859-'60.	1860-'1.
Ohio, lbs.	191 6-19	226	26	30½
Indiana, lbs.	192¼	213¾	27	30
Illinois, lbs.	191	224⅓	30	34
Kentucky, lbs.	197	212	31	30⅔
Missouri, lbs.	194 2-9	206 6-7	26	30 5-12
Tennessee, lbs.	189	....	26	....
Iowa, lbs.	191½	233⅔	29	30 2-5
Wisconsin, lbs.	207	229	29	31

The aggregate weight for both seasons is as follows:

1860-'61	479,312,630 lbs.
1859-'60	410,654,361 "
Increase this year	60,658,249 "

This is equal to exactly 14¾ per cent. so that by deducting the decrease in number, 8½ per

cent., from this, we have a net increase of 5¾ per cent. as compared with the previous season. This increase is equal to 135,392 hogs; but a portion of the increase, equal to four pounds per hog, is in lard. The weight compares with the two previous years, as follows:

5¾ per cent. greater than 1859-'60.
3⅝ do. do. do. 1858-'59.
3⅞ do. do. do. 1857-'58.

The following is a comparative statement of the yield of lard, being the aggregate yield for each season:

1860-'61..... 68,947,264 lbs.
1859-'60..... 66,406,738 lbs.

Increase in lbs..... 3,540,526 lbs.

The average yield per hog, this year, was 32 lbs. and last year 28¼ lbs.

Interest and Dividends.

The Hartford and New Haven Railroad have declared a quarterly dividend of 3 per cent., payable on the 1st of April to the New York stockholders, at the Union Bank in this city.

The Philadelphia, Wilmington and Baltimore Railroad Company has declared a dividend of 3 per cent. payable April 1.

The interest due April 1st on the Bonds of the City of Vincennes, issued to the Illinois Southern Railroad Company, will be paid on presentation of coupons at the office of Gilead A. Smith, 207 Broadway, N. Y.

The coupons on Wabash County Bonds issued to same road, are paid as presented at the office of the County Treasurer.

Arrangements are contemplated however to pay all the interest on securities of this road hereafter in New York.

Holders of the St. Louis County Coupons, maturing in the City of New York in June or July next, are notified that the County is now willing to pay them in bankable funds on presentation at the Treasury in the City of St. Louis.

The interest on the first mortgage bonds of the Cedar Falls and Minnesota Railroad Company, due April 1, will be paid on and after that date on presentation at the office of Erastus Edgerton & Co., No. 112 Broadway.

The interest warrants on the Bonds of Marion County, Ohio, maturing April 1, will be paid at the Irving Bank.

Days of Grace in the State of New York.

The bill adding Washington's birthday to the list of legal holidays, and providing that when these fall on Sunday the next Monday may be observed instead, has become a law. The following is a copy.

SECTION 1. Whenever the third day of Grace for the acceptance or payment of any bill of exchange, bank check or promissory note hereafter made, shall fall on Sunday, on the first day of January, commonly called New Year's day, the fourth day of July, the 25th day of December, commonly called Christmas, the 22d day of February, known as Washington's birthday, any day appointed or recommended by the Governor of this State, or by the President of the United States, as a day of fasting or thanksgiven, or any general election day in this State, the presentment and demand for acceptance or payment of such bill, check or note, and protest for non-acceptance or non-payment thereof, shall (except as provided in the next section of this act) be made on the day next succeeding such third day of grace.

SEC. 2. Whenever the first day of January, fourth day of July, twenty-fifth day of December or twenty-second day of February shall be Sunday, and the third day of grace for the acceptance or payment of any such bill, check or note as is mentioned in the first section of this act, shall fall on such Sunday, the day for the presentment and demand for acceptance or payment of such bill, check or note, and for protest for non-acceptance or non-payment thereof, shall be the Tuesday next after such Sunday.

SEC. 3. All laws of this State in consistent with the provisions of this act are repealed.

Journal of Railroad Law.

CONTRACT OF AFFREIGHTMENT: ENTIRETY OF: WHEN BROKEN FREIGHT IS NOT RECOVERABLE.

There are certain contracts which from their nature, demand a complete fulfilment, in order to be of any advantage to the parties entering into them. Such are contracts to transport goods from one place to another. If the carrier failed to carry goods to the place of destination, but deposited them at an intermediate station, it is evident that the end or object of the contract would not be accomplished, and the carrier could recover no proportion of freight for the distance he had carried the goods. These contracts are distinguished from others by the term entire contracts. There are many arguments, in which, although the parties may have contemplated an entire and complete performance of the conditions, still, although there has been a failure in some respect, where one party has given to another a substantial service or benefit, the Court, if it cannot give effect to the original contract, will, in order to promote ustice, raise an implied contract, and compel the party receiving the benefit to pay a fair equivalent.

The contract of affreightment, is an entire contract, and to entitle the carrier to recover for his freight must be wholly performed; and where it is not wholly performed the right to a recovery for freight *pro rata iteneris* is entirely dependant upon the acceptance by the shipper of his goods at an intermediate port.

These principles are enforced in the case of John G. Richardson et al *vs.* Stephen Tory et al, recently decided by the Supreme Court of Pennsylvania, where the case came up on appeal from *Nisi Prius*. The defendants who were ship owners undertook to carry the plaintiffs' corn from Philadelphia to Liverpool. A few days out of port the vessel was stranded without fault of master or crew. The corn was taken out, transferred to lighters, brought damaged to Philadelphia, surveyed and sold by the master for account of all concerned, without consultation with, or notice to the plaintiffs.

Upon this statement of facts the following is the opinion of the Court.

WOODWARD J. At the argument of this case I was not sure but that some peculiarity attached itself to the contract of affreightment, whereby a ship-owner, who had undertaken the conveyance of merchandise and been prevented by the perils of the sea, from delivering it according to the consignment, would be entitled to recover from the shipper either full freight, or freight *pro rata itineris*. But upon looking into the authorities, I am satisfied that no peculiarity distinguishes the contract of affreightment from that class of contracts which the law treats as executory and entire contracts. The settled doctrine of the English and American cases, is, that entire contracts must be fully performed, and cannot be apportioned, although a new contract may be implied from the voluntary acceptances of services or performance different from that for which the original contract provided. That this doctrine is as applicable to freight as to other things, may be seen from the cases collected and commented on by Judge Story, in his edition of Abbot on shipping, and in the note to the case of Wherboom *vs.* Chapman.

But the best cases I have found, are in our own books. In Hustin *vs.* The Union Insurance Co., Judge Washington laid down the law in these few and simple words; "If the cargo is not conveyed to its place of destination, no freight can be demanded. If voluntarily accepted at any other port by the owner or his supercargo, freight *pro rata itineris* is due.

Ch. J. Tilghman, after discussing Lord Mansfields celebrated case of Leek *vs.* Lyde, says, "It seems to have been understood that *pro rata* freight is not due unless the consent of the merchants, either by words or actions, has been expressly given, or may be fairly deduced, to accept his goods at an intermediate port; and such consent being given the original contract is dissolved, and a new one arises."

In the case of Gray *vs.* Waln, the same doctrine was applied, and a *pro rata* freight allowed, because, upon the whole evidence, it was impossible to entertain a doubt that the cargo was voluntarily received by the supercargo at a port short of the ship's destination. These Pennsylvania cases contain a very full discussion, both at the bar and on the bench of all the learning on the subject.

Now, upon these principles it is perfectly plain that the defendants were entitled to no set off, either for full or partial freight. They undertook to carry plaintiffs' corn from Philadelphia to Liverpool, aboard the ship Tigress. A few hours out of port whilst passing down the Delaware, the vessel was stranded, without fault of the master or crew. The plaintiffs' corn was taken out, transferred to lighters, brought back to Philadelphia in a wet and damaged condition—was surveyed, condemned to be sold, and was sold by the master of the Tigress, for account of all concerned. All this occurred without notice to the plaintiffs, and without assent or action of any sort on their part. Not a declaration or circumstance was alleged or shown, from which a new contract could be supposed to arise. And this distinguishes the case from that of Jordan *vs.* The Warren Insurance Company, in which the dictum of Judge Story, so much relied on by the learned counsel of the plaintiff in error, was founded; for that in reality was a case of "mutual voluntary agreement on the part of the master and the shippers, that the damaged cargo should be sold." But here, so far from their being any such agreement, there was not even a notice by the master to the shippers, of damage to the corn, or of the condemnation and sale of it. The case is bare of any circumstance from which an acceptance of the plaintiffs' can be inferred.

But it is said the master is the agent of the shippers. For some purposes he is. He may, under stress of weather, remove the cargo into another vessel that may chance to be at hand, and if done

in good faith, he will not be liable, though his own ship outride the storm, and the other perish. He may in some circumstances, hypothecate the cargo or sell part of it, or after condemnation, the whole of it as in this case. But in the language of Judge Strong, "he is not the agent of the owners of the cargo, with power to relieve the ship-owners from their obligation to convey according to the contract of affreightment. Wherboom *vs.* Chapman, asserts that he is not pointedly and directly." I may add, that to treat him as the agent for the shippers for such a purpose, would confound all our ideas of contracts; for how is a man to contract with himself? As agent of the ship-owners, he may enter into the contract of affreightment with the shippers, and then if, as agent of the shippers, he may modify or annul that contract, or make a new one, it is self-evident that his mere will is substituted for the contract of affreightment.

The learned judge was right in ruling that the receipt by the plaintiffs of a portion of the proceeds of the sale of the corn amounted to no voluntary acceptance of the cargo at Philadelphia. A similar implication of a new contract was attempted to be set up in Armoyd *vs.* The Insurance Co., before referred to; "But," said Judge Tilghman, "it is no answer to the defendant's objection, to say that they have ratified the sale of the goods by accepting the proceeds. What else could they do? If they had refused the proceeds they might have got nothing. They never were consulted about the sale." These observations apply with decisive force to this point of the plaintiffs' case.

The plaintiffs were not consulted about the sale. They had no part in adjusting the general average account, nor did they receive the thousand and odd dollars on the foot of it. I do not mean that this sum did not result from that account, but there was no evidence to show that the plaintiffs had ever seen the account or meant to ratify it by receiving what was apportioned them. They received it as a drowning man catches at straws, as the best that can be got; but under the circumstances we are not to imply from their receipt of it a new contract, in virtue of which alone they would be liable for freight. The judgment is affirmed.

Georgia and Florida Railroad Connection.

The long pending negotiations for a connection between the Railroads of Georgia and Florida, have at last been brought to a successful close. It has been agreed between the Atlantic and Gulf Company, of this State, and the Pensacola and Georgia Company, of Florida, to construct, by their joint efforts, a connecting line of road, the Northern terminus being Lawton, or Station No. 12, on the Atlantic & Gulf Road, situated about the centre of Clinch county, and the Southern or Florida terminus, being at Houston, in Columbia county, a station 28½ miles west of Lake City. The entire length of the line will be 47 miles, 25½ of which are in Georgia and 21½ are in Florida—each company to build to the line. The entire line has been located and placed under contract, with obligations to complete it by the 1st July, 1862.

This result should be hailed with satisfaction by the citizens of both Georgia and Florida. It identifies the commercial interests of the two States, and will open up new sources of prosperity to each. Whatever may have been the prejudices against a connection among our Florida friends, we feel sure they will all disappear when they come to realize the vast advantages to be reaped from the practical operation of the measure of union. Some local interests, which have never grown into vast proportions, and probably never would, may suffer to a more or less extent, but these are of but trifling consideration when weighed in the balance with the prospective facilities to be enjoyed by the people generally, and the greatly augmented receipts of their railway, which must now become a great link in the chain that is to connect the Atlantic and the Gulf—*Savannah Republican.*

RAILROAD IRON AT CARDIFF, WALES.

1,000 TONS 56 lbs., Erie pattern, ready for immediate shipment from above port.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at Boonton, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut SUPERIOR TO ANY made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish SAMPLES and PRICE LIST on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.			SHEET No		
1. General Table for all Bases and all Slopes.			13. for Base 18 ft. Slop.		1¼ to 1
2. For Side Hill Cuts and Fills.			14. " 20 "		1½ to 1
3. Base 12 ft. Slopes		1¼ to 1	15. " 24 "		¼ to 1
4. " 14 "		1½ to 1	16. " 24 "		1¼ to 1
5. " 12 "		¼ to 1	17. " 25 "		1½ to 1
6. " 15 "		1 to 1	18. " 26 "		1¾ to 1
7. " 15 "		1¼ to 1	19. " 28 "		¼ to 1
8. " 16 "		¼ to 1	20. " 30 "		1 to 1
9. " 16 "		1 to 1	21. " 30 "		1¼ to 1
10. " 18 "		¼ to 1	22. " 30 "		1½ to 1
11. " 18 "		¾ to 1	23. " 32 "		1 to 1
12. " 18 "		1 to 1	24. " 32 "		1¼ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

Treasury notes issued under act, Dec. 23, 1857			1 y. after date.	4,876,700 00
Treasury notes issued Dec. 17, 1860			do.	10,010,900 00
Total				$74,985,299 28

North Missouri Railroad.

We have received the report of this company for the fiscal year ending April 1, 1861, from which we learn that the receipts for the ten months ending February 1, were:

From passengers	$144,826 39
" freight	132,181 18
" mails	14,166 66
" rents	1,253 80
Total earnings for 10 months	$292,428 03

And the expenditures were:

Repairs of road	$34,136 07	
" bridges, buildings, etc.	2,749 09	
" engines & tenders	19,183 47	
" cars	13,424 42	
" tools and machinery	1,523 43	
Ferriage	9,367 51	
Fuel	21,644 46	
Hauling freight & baggage	11,282 37	
Loss and damage	4,114 77	
Oil and waste	4,480 52	
Agents and clerks	19,534 31	
Conductors, enginemen, etc.	34,449 04	
All other expenses	37,563 61	
		213,453 07
Net receipts for 10 months		$78,974 96
Add uncollected freight bills for Jan'y		2,862 55
Add net earnings for February and March, same ratio ($8,137 75 per month)		16,367 50
Add increase in mail earnings for February and March		1,416 66
Approximate net earnings for the year.		$99,621 67

The report was prepared thus early, in order to have it in print at the time of the annual election for directors on the 1st inst.

The net revenue has been applied in construction, in the purchase of rolling stock, and in the payment of floating debt, consisting of land damages, interest to the city of St. Louis, fencing, and many other items of indebtedness incurred by the preceding administration.

The gross receipts show an increase over those of last year. Of the net earnings the report says:

The report submitted to the stockholders April 1, 1859, shows the net earnings of the road from August, 1855, to that date—a period of three years and seven months—to be $38,062 30. During this time the road was in progress of construction to Hudson, a distance of 168 miles, until February, 1858; and in the report submitted to the Board of Public Works, which was by them reported to the State authorities in the fall of 1859, the net earnings of this road for the year are set down at about $8,000.

In the report to the Board of Public Works, published in the fall of 1860, the net earnings for thirteen months up to November, 1860, are shown to be $96,731 79. This report to the stockholders shows the gross receipts for the year 1860, ending April 1, to be $332,918 09; expenditures, $275,336 90; leaving the net earnings $57,581 19.

For the year ending April 1, 1861, (February and March being estimated at the same ratio as the average for the ten months previous,) is $99,621 67.

Thus, in three years, the net profits have been $8,000 for the first year, $57,581 19 for the second year, and $99,621 67 for the third year.

The cost of the road and equipment, to the date of the report, as stated in the annexed balance sheet, exclusive of interest and discount and commissions, amounts to $5,521,503 15, or $32,747 04 per mile. Including discount, etc., on bonds, it is $37,682 70 per mile.

The equipment of the road now consists of 22 engines and tenders; 19 passenger, 5 baggage, 271 freight, and 115 gravel and hand cars. In reference to the purchase of new equipment, etc., the report says:—

The Board of Directors, at a meeting in April last year, authorized the purchase of four new locomotives, and as many as eighty freight and stock cars. The lack of sufficient rolling stock to do the business of the road in the winter of 1859 and '60 was greatly felt, and it was deemed actually necessary to purchase these additions; but owing to the greatly diminished amount of business done in the west, and the almost entire failure of the crops, the want of rolling stock has not been so greatly felt during the past winter. The four locomotives were contracted for with the Schenectady Locomotive Works, by J. B. Moulton, Esq., Chief Engineer and Superintendent, and have been delivered and paid for, and are of a quality not excelled by any west of the Mississippi river, having given entire satisfaction.

Of the eighty cars, Messrs. S. B. Lowe & Co. of St. Louis, contracted to build forty, twenty of which can be used as close box, or stock cars, and twenty flat cars, that can also be used in the transportation of hogs. These were delivered last fall, and are of the first quality; for which there is at present owing only $2,900. After this contract was made, it was thought best by the President

and Superintendent to postpone contracting for the other forty for the present. Besides these, seventy-five freight cars that had been re-roofed and repaired at considerable expense, have greatly increased the quantity and value of the rolling stock.

Several new station houses, switches, and water stations have been built, additions to machine shops, car, engine, and freight houses have been made, and other necessary structures have been built. These extraordinary expenditures have consumed the net earnings, and left the floating debt about what it was at the commencement of the year.

The number of passengers carried has been 85,632—equal to 28,019 through passengers. The number of miles traveled by all passengers was 4,626,337. The average distance traveled by passengers was 54 miles. The local through passengers were 4,257; and the through passengers west of Hudson, 4,513. The average fare charged per mile was 3 5.7; average fare charged each passenger $1 98.

The road is completed and in running order to the crossing of the Hannibal and St. Joseph Railroad, 168 miles. In reference to its extension north, the report says:

Nothing has been done towards the construction of the road north of the crossing, further than was noticed in the previous annual report up to that time. A contract was entered into with Messrs. J. & J. Kelly to construct 57¾ miles, beginning at the crossing, for *the low* price of $15,000 per mile, payable in State bonds at par (if granted), and the subscriptions of Adair and Schuyler counties. Under that contract they went to work in the fall of 1859, and graded 12½ miles ready for the superstructure; by the terms of an agreement between the company, the counties and the contractors, they were to do no more work than what the amount the company had power to call on the counties of Adair and Schuyler for in any one year would pay for; they, however, went on and did work to the amount of $80,400, under the contract, for which the counties issued to them their bonds for $29,500, and the company the equivalent of State bonds to the amount of $22,554, leaving a balance of $28,346, for which they have no claim on the company until they have as much as five miles more finished, and then the per centage retained would cover this balance. If the company could possibly raise the means to iron this 12½ miles of graded road during the present year, it would be of great benefit to the road, as it reaches nearly to the town of Atlanta, the northern boundary of Macon county; far enough north of the crossing to give your road all the business of *North Missouri*, without competition.

The directors are also interested in the construction of the Missouri River Valley railroad; and having a just appreciation of its value to their road when built, have done all in their power to to assist in its construction.

In regard to the non-payment of interest on the State bonds by the company, the president says:—

The present administration has been unable to pay any part of the interest on State bonds the past year, notwithstanding the net receipts amount to nearly $100,000. It will be remembered, that the failure to pay State interest, January 1st, 1859, forfeited not only the right to draw the $1,000,000 State bonds, applicable to the construction of the road north of the Hannibal and St. Joseph Railroad, but also forfeited $150,000, applicable, south of the crossing, which is needed to fully equip and ballast that portion of the road. It should also be known, that when the road was opened to the crossing that an insufficient amount of rolling stock had been provided, and that very poor accommodations in the way depot buildings, station houses, water stations, and provisions for offices, car and engine houses, built in the city and along the line of road have been made, that were really necessary for the successful operation of the road and the comfort of its patrons,—all of which it has been the policy of the present Board to remedy so far as it was possible, from the net income of the road, believing it to be for the best interest of the State, the stockholders, and the public.

The expenditures, assets and liabilities of the Company to February 1, 1861 were as follows:

LIABILITIES.

Capital stock	$2,594,100 00
State of Missouri	4,350,000 00
Forfeited stock	16,178 62
Bills payable	34,962 13

Covington and Lexington Railroad Mortgage Bonds.

W. A. Dudley, Esq., the Commissioner who sold the Kentucky Central Railroad by order of Court, gives notice that holders of coupons of the second mortgage bonds due September 1, 1858, March 1, 1859, and September 1, 1859, and the coupons on the preferred third mortgage bonds, due June 1, 1858, December 1, 1858, and June 1, 1859, and yet unpaid, must present them to him for payment on or before the 1st day of June next. Such as are not presented at that date will be barred, and no payment will be made.

The coupons on the second mortgage bonds, due September 1, 1859, and those on the preferred third mortgage due June 1, 1859, can not be paid before the 5th of April next, on which day the third instalment of the purchase money of the road becomes due. The other coupons named above will be paid at any time on presentation to Mr. Dudley, at Lexington Ky., on or before June 1.

Wrought-Iron Cannon.

The Phœnix Iron Company, at this place, intend making next week a number of Mr. Griffin's patented wrought-iron cannon for the Government. We have spoken previously of the durability and the superiority these cannon have over all others. The same works have for some time been engaged in making iron girders or beams for new buildings, fifteen inches high and of any length required. In this, this Company have been able to exceed the British works, they not being able to make more than nine inches high. The Phœnix Iron Company have orders to make iron girders twenty-four inches high, and are now making a new set of rollers to execute the order. They are also making railroad iron for different railroad companies, and merchant iron of every description.—*Phœnix.*

The Brighton Iron Girder Bridge.

We copy from the *Journal of the Franklin Institute* for March the following description of the Iron Girder Bridge over Watertown road in Brighton, built by Messrs. Wm. Adams & Co., of Boston, for the Boston and Worcester Railroad Company. The paper was prepared by Edward S. Philbrick, Esq., C. E., from whose designs and under whose supervision, we are informed, the work was carried out:

Though this structure differs in many of its details from any bridge of the kind hitherto constructed, the same ratio was used in the proportioning of the metal to the strains incurred as in other similar English and American structures, viz: a maximum tensile strain of four and one half tons, and a compressive strain of four tons per square inch of section, incurred by a live load of one ton per lineal foot of track.

It consists substantially of three girders of the **I** form, supporting on their tops a floor and double track railway, the girders being braced against each other in a thorough and rather peculiar manner.

The span is eighty-six feet and ten inches between bearings, approaching the limit where a tubular form would be preferable to a series of separate girders, and therefore requiring a degree of strength unusual in the **I** form of girder. The middle girder, having sometimes to support two trains at one, should they chance to meet on the bridge, is made proportionally strong and rigid, as fully proved by the test load, described below.

The great obliquity of the bridge (there being an angle of only 21° 30′ between the tracks and the abutments), while largely increasing the length and cost of both masonry and superstructure, is an advantage when compared with right angled bridges of similar span, because each girder is here supported laterally by the abutment itself throughout one third of its length.

The horizontal members at the top and bottom of the girders, devoted to resisting the compressive and tensile forces respectively, are all two feet in width, varying in thickness to conform to the strains to which they are subject. Their joints are spliced with plates of the same width, on both sides. They are attached to the vertical sheets or *web* by a four by four inch (4″ × 4″) angle iron on each side of the latter, passing along the centre of the horizontal plates. The joints of these angle irons are also spliced with a patch of aimilar form. All abutting joints are accurately planed, as well as all sides of the sheets forming the *web*.

The sheets of the web of each girder are 3-8ths and 7-16ths of an inch thick, seven and a half feet high, and six feet three inches in width between joints. These vertical joints are abutted and covered by a batten, 8 inches wide on each side, and secured by a double row of rivets. Outside of these battens, on each side, is a vertical angle iron with a base of three inches, and a projecting flanch of six inches width, secured by the same rivets with the battens. Each end of these angle irons is bent out like a knee and attached by two rivets to the top and bottom members of the girder. In the middle of each sheet, or midway between these

kneed ribs, is another vertical angle iron on each side, of the same dimensions, to check the vibration of the sheets, the ends of these being off-set and riveted through the horizontal angle irons which form the connections between the vertical member or *web* and the horizontal plates at top and bottom.

The method usually adopted for joining these web plates to each other in other plate iron bridges, is to place a T iron on each side of the joint, the head of the T forming the batten, and the stem forming the rib. Having found these T irons beginning to split in a number of English bridges, owing to the weakness of the iron along the junction of the head and stem of the T, and finding no T iron of sufficient strength rolled in this country or to be obtained from England at a moderate cost, I preferred the arrangement described above, which the event has proved to be a decidedly stronger joint than the English one, and, at the same time, a cheaper one in our market.

As the tracks lie above the girders, ample opportunity is afforded for diagonal bracing between them, to maintain their perpendicularity and check vibration.

The ordinary mode of applying this bracing and that practised by English and Canadian engineers, is to attach at intervals of about 10 feet diagonal strips of plate iron to the vertical ribs, crossing each other like the letter X, and riveted together at their intersection. But the height of our girders being unusually great (7 1-2 feet), as well as the horizontal distance between them (11 feet), these braces might flap and vibrate under express trains to such an extent as to bring undue strain upon their attachments and render them nearly useless. To obviate this, I formed each brace of two pieces of plate iron, six inches wide and three-eights of an inch thick, connected at right angles to each other by a 1 1-2 inch angle iron riveted to each, giving a section similar to an angle iron, six inches wide on each side of the angle. As the two members of the X are placed back to back, they are riveted together at their intersection. In order to get the strongest available attachment between these braces and the vertical ribs of the girders, that half of each brace which does not lie in a vertical plane was heated at the ends and each end twisted 90°, allowing it to be attached to the ribs alongside the other strip, with the plane of which it here coincided. The result has been fully satisfactory, for the passage of heavy trains at high speed produces far less vibration than in many similar bridges which I have had the opportunity to examine, in this country, and in England and France.

The rivets are, with a few exceptions, all of one inch diameter, being heated and headed in the usual manner.

The rivet holes were all *drilled*, being, as I believe, the first case of the kind in a work of this size. It can hardly be doubted that drilling secures a cleanness of cut, if not an accuracy of position, unattainable by punching. The drill neither disturbs the fibre of the iron near the hole, nor bends or stretches the plates like a punch; circumstances which often render it difficult for punched plates to be accurately fitted to each other, or to have that exact correspondence of holes which is indispensable to a first rate joint.

This bridge is to be subject to a traffic of some forty-five trains daily, many of which trains weigh 400 tons. Previous to opening it to the traffic, it was tested as follows:

A large pile of iron rails was distributed over the floor, and a train placed on each track, weighing in all 159.3 gross tons. The deflections were carefully observed at the centre of each girder, the load then removed and a second observation taken, after which the load was replaced and again removed, with two more observations. The first loading produced a permanent set of 0.26 inches, a considerable portion of which may doubtless be attributed to the bearings on the abutments, where a white oak cushion, four inches thick, was interposed between the iron and masonry. The second loading of the bridge brought the girders down to exactly the same point as the first, the deflections being given below with the loads upon each girder. On removing the load, these deflections disappeared entirely.

	Tons load.	Deflection.
North girder	37.15	0.39 inches,
Centre girder	79.65	0.33 "
South girder	42.50	0.45 "

The unequal distribution of the load upon the north and south girders was due to the different weight of the engines placed on the two tracks, a difference which was not intended, but which served to show how nearly the deflections vary with the weights producing them, proving the great uniformity of the workmanship in the three girders, while the rigidity of the centre girder is shown to be fully equal to its double duty.

The materials used in this bridge were entirely of American manufacture. Before determining on the kind of plate iron to be used, I availed myself of the kindness of Capt. Rodman of the U. S. Arsenal at Watertown, and the excellent apparatus under his charge, to test a variety of samples of boiler plate, with a view of comparing both their ultimate tensile strength and their extensibility when subjected to tension increased by certain known degrees at will. I give the description of the kind of iron of which each sample was composed. The great uniformity of the lower grade of iron (3d experiment), together with its great tensile strength, authorized its use in our bridge whenever it could be introduced without change of form. Wherever such change is required, however, I could not recommend it, as in the case of steam boilers, &c.

FIRST EXPERIMENT.—THREE PIECES FROM SAME SHEET.

Tensions per square inch.	First piece. Elongations. While under tension.	First piece. Elongations. After tension was removed.	Second piece. Elongations. While under tension.	Second piece. Elongations. After tension was removed.	Third piece. Elongations. While under tension.	Third piece. Elongations. After tension was removed.
5,000 lbs...	.00034	.00013	.00020	.00001	.00028	.00008
10,000 " ...	.00060	.00015	.00033	.00002	.00046	.00002
15,000 " ...	.00079	.00018	.00058	.00003	.00078	.00006
20,000 " ...	.00091	.00020	.00087	.00019	.00113	.00020
25,000 " ...	.00119	.00036	.00196	.00097	.00226	.00126
30,000 " ...	.00161	.00066	.01269	.01132	.01234	.01126
35,000 " ...	.00974	.00846	.03942	.03742	.02856	.02732
40,000 " ...	.08694	did not recover.	.10942	broke.	.05060	.05060
43,580 " ...	.10800	and broke.	broke at 42,800 lb. p. in.			

NOTE.—The elongations in all these tables are expressed in terms of the part measured, which was a strip of the plate 10 inches long, planed to a uniform section of about half a square inch; *i. e.*, the first piece in the above experiment stretched about .1 of its length before breaking, and bore a tension of 30,000 lbs. per inch, with a permanent elongation of only two-thirds of .001 of its own length, &c., while the second piece stretched .01 of its length by the same tension. A great part of the differences in the initial elongations may be attributed to the imperfection of the bearings by which the specimens were attached—a difficult thing to avoid.

The iron used in this first experiment was from charcoal blooms entirely, known in the market as "best flanch iron," being warranted to turn flanches for boiler heads &c., without cracking. The elasticity and strength under direct tension did not appear to be sufficiently superior to the iron used in the third experiment to warrant the difference in price, when used for purposes where no change of form was required. The specifications for our bridge called for this kind of iron, however, in cases where the form of plates was changed, the inferior grades not being able to endure such change without prejudice.

SECOND EXPERIMENT.—THREE PIECES FROM SAME SHEET.

Tensions per square inch.	First piece. Elongations. While under tension.	First piece. Elongations. After tension was removed.	Second piece. Elongations. While under tension.	Second piece. Elongations. After tension was removed.	Third piece. Elongations. While under tension.	Third piece. Elongations. After tension was removed.
5,000 lbs...	.00016	.00001	.00016	.00002	.00023	.00001
10,000 " ...	.00038	.00002	.00035	.00004	.00047	.00003
15,000 " ...	.00059	.00003	.00054	.00004	.00063	.00004
20,000 " ...	.00084	.00007	.00076	.00004	.00082	.00005
25,000 " ...	.00112	.00016	.00101	.00011	.00123	.00017
30,000 " ...	.00317	.00209	.00216	.00110	.00211	.00089
35,000 " ...	.01920	.01791	.02746	.02646	.01965	.01801
40,000 " ...	.02488	.02346	broke at 40,100 lb. pr in.		at 39,900 lb. pr in.	
43,444 " ...	broke.					

The iron in this experiment was made from a mixture of charcoal blooms and blooms puddled with bituminous coal from charcoal pig.

From the uncertainty of the amount of each kind used in the mixture, and a reputation of want of uniformity, it was not considered worth the price charged as compared with the iron of the third experiment.

THIRD EXPERIMENT.—THREE PIECES FROM SAME SHEET.

Tensions per square inch.	First piece. Elongations. While under tension.	First piece. Elongations. After tension was removed.	Second piece. Elongations. While under tension.	Second piece. Elongations. After tension was removed.	Third piece. Elongations. While under tension.	Third piece. Elongations. After tension was removed.
5,000 lbs...	.00014	zero.	.00028	.00008	.00020	zero.
10,000 " ...	.00032	zero.	.00051	.00012	.00038	.00001
15,000 " ...	.00053	zero.	.00071	.00015	.00065	.00003
20,000 " ...	.00079	zero.	.00113	.00027	.00086	.00006
25,000 " ...	.00113	.00008	.00178	.00082	.00116	.00012
30,000 " ...	.00178	.00056	.00974	.00836	.00153	.00080
35,000 " ...	.01698	.01542	.02954	.02869	.00287	.00105
40,000 " ...	.04750	.04650	broke at 38,000 lb. p. in.		.01184	.00997
40,450 " ...	broke.				broke at 44,700 lb. p. in.	

NOTE.—A fourth piece from this iron bore 45,100 lbs. per inch.

The iron tested in this experiment was from "charcoal pig," puddled with bituminous coal

and worked twice. Finding it possessed a high degree of elasticity, we adopted it for the bridge-work wherever the plates required no change of form.

The Erie Railroad.

The following is a synopsis of the bill which has passed the Legislature for the re-organization of the Erie Railroad:

SEC. 1. Provides that Dudley S. Gregory and J. C. Bancroft Davis, Trustees between the creditors and shareholders of the New York and Erie Railroad Company, and such persons as may associate with them, shall become a body corporate upon filing with the Secretary of State articles of association, in which the capital stock of the company shall be stated at an amount not exceeding that of the New York and Erie Railroad Company; and the preferred stock shall be equal to the total unsecured and judgment debt of said company, with the interest thereon.

SEC. 2. The holders and owners of unsecured and judgment debts against the company, entitled to receive the preferred stock for their respective debts and interest, shall present the same before July 29, and in payment of the *pro rata* assessments as levied thereon by the Trustees, shall be entitled to receive said stock. In case of dispute as to any claims or the amount thereof, final adjudication shall be made by the referee as ordered by the Supreme Court under the fifth mortgage, or by such other reference as the Court may order.

SEC. 3. Upon the final report of the referee the Erie Railway Company shall file a further certificate with the Secretary of State, stating the whole amount of the preferred stock to be issued, which shall not exceed the amount settled by the trustees or adjudicated by the referee, and the amount of the preferred and unpreferred stock shall be as declared in said certificate.

SEC. 4. The preferred stock to be entitled to dividends out of the net earnings if earned in the current year, but not otherwise, not to exceed 7 per cent. per annum, payable semi-annually after payment of mortgage interest and delayed coupons in full. Holders of the preferred to have the same vote as the holders of the common stock.

SEC. 5. We cite in full: No suit or proceeding shall be commenced against the Receiver of the New York and Erie Railroad Company, (unless founded on wilful misconduct or fraud in his trust,) except such as shall be commenced before the expiration of 60 days from the time of the discharge of such Receiver; but it is further provided that, after the expiration of the said 60 days, the corporation that shall own or operate said railroad shall be liable in any action that may be commenced against said company, and founded on any act or omission of such Receiver, (for which he may not as aforesaid be sued,) and to the same extent as said Receiver, but for this act, would be or remain liable, or the same extent that such corporation would be, had it done or omitted the acts complained of against such Receiver.

SEC. 6. The act to take immediate effect.

Scinde and Punjaub (India) Railway.

The agent reports that the last arch of the Bahrum viaduct on the Scinde, the principal engineering work on the line, had been keyed in on Christmas Eve, that the roadway was to have been completed before the night of December 31, and that by the middle of March they would be in a position to commence traffic. The works along the whole course of the Punjaub are also rapidly progressing towards completion. The embankments are in a forward state, the cost of which ready for the reception of the permanent way was stated to average under 200*l.* per mile. Large quantities of rails, chairs, and other materials had been deposited along the line at a moderate rate of charge. Above 36,000 tons of permanent way material and rolling stock had been shipped to India, while about 5,000 tons remain to be forwarded.

New Railroad Time Tables.

The Railway Convention held at Cleveland last week, adopted the following time tables for the summer of 1861. It goes into effect on the 15th of April:

GOING WEST.

TRAINS WEST FROM NEW YORK.

Leave New York.	7.00 a.m.	11.00 a.m.	5.00 p.m.
Leave Albany...	12.20 a.m.	5.00 p.m.	11.15 p.m.
Arrive at Buffalo.	10.30 p.m.	5.30 a.m.	10.00 a.m.
Leave Buffalo...	10.30 p.m.	6.30 a.m.	10.00 a.m.
Arrive at Clevel'd	5.30 a.m.		5.20 p.m.
Leave Cleveland.	6.00 a.m.		5.50 p.m.
Arrive at Toledo.	10.20 a.m.		10.15 p.m.
Leave Toledo...	10.25 a.m.		10.25 p.m.
Arrive at Chicago	8.00 p.m.	5.00 a.m.	8.00 a.m.

CANADA SHORE.

Leave Suspension Bridge	10.40 p.m.	5.45 a.m.	10.30 a.m.
Leave Detroit ...	7.30 a.m.	4.15 p.m.	7.45 p.m.
Arrive at Chicago	8.00 p.m.	5.00 a.m.	8.00 a.m.

SOUTH FROM CLEVELAND.

Leave Cleveland.	6.10 a.m.	2.30 p.m.	6.00 p.m.
Arr. at Columbus.	11.10 a.m.	9.00 p.m.	11.45 p.m.
Arr. at Indianap.	6.30 p.m.		6.00 a.m.
Arr. at Cincinnati	3.30 p.m.		5.00 a.m.
Leave Cincinnati	4.50 p.m.		5.20 p.m.
Arrive at Odin ..	5.10 a.m.		5.10 p.m.
Arrive at St. Louis	7.50 a.m.		7.50 p.m.

SOUTH FROM INDIANAPOLIS.

Leave Indianapol.	6.30 p.m.		6.30 a.m.
Leave Louisville.	12 night.		12.00 m.
Leave Nashville.	9.30 a.m.		9.00 p.m.
Leave Clarksville	9.00 a.m.		9.50 p.m.
Leave Humboldt.	4.30 p.m.		4.30 a.m.
Arr. at Memphis.	9.00 p.m.		9.30 a.m.
Leave Nashville.	6.00 a.m.		6.30 p.m.
Arr. at Memphis.	9.00 p.m.		9.30 a.m.

SOUTH FROM CHICAGO.

Leave Chicago ..	6.40 p.m.		6.40 a.m.
Arrive at Odin ..	5.10 a.m.		5.10 p.m.
Arrive at Cairo..	10.40 a.m.		10.40 p.m.
Arrive at Columbus, Ky.	12.45 p.m.		12.45 a.m.
Arr. at Jackson, Tenn.	5.15 p.m.		5.15 a.m.
Arrive at Canton, Miss.	7.15 a.m.		7.15 p.m.
Arr. at N. Orleans	6.15 p.m.		6.15 a.m.

WEST FROM CHICAGO.

Leave Chicago ..	9.30 p.m.		9.30 a.m.
Arrive at Prairie du Chien	10.30 a.m.		7.30 p.m.
Arrive at St. Paul			5.30 p.m.

GOING EAST.

TRAINS NORTH FROM NEW ORLEANS.

Leave N. Orleans	6.30 a.m.	6.30 p.m.	
Leave Canton, Miss.....	5.30 p.m.	5.30 a.m.	
Leave Jackson, Tenn.	7.30 a.m.	7.30 p.m.	
Leave Columbus, Ky.....	12.45 p.m.	12.45 a.m.	
Leave Cairo.	4.00 p.m.	4.00 a.m.	
Leave Odin	9.40 p.m.	9.40 a.m.	
Arrive at Chicago	8.50 a.m.	8.50 p.m.	

EAST FROM MEMPHIS.

Leave Memphis..		4.00 p.m.	5.00 a.m.
Leave Humboldt.		8.45 p.m.	8.45 a.m.
Leave Clarksville		5.00 a.m.	4.00 p.m.
Leave Nashville .	5.00 a.m.	4.00 p.m.	
Leave Louisville.		1.30 p.m.	11.20 p.m.
Leave Jeffersonv.		2.20 p.m.	12.20 a.m.
Arr. at Indianap.		8.00 p.m.	5.20 a.m.
Leave Memphis .	4.00 p.m.	5.00 a.m.	
Arr. at Nashville	8.00 a.m.	7.00 p.m.	

EAST FROM ST. LOUIS.

Leave St. Louis..		7.00 a.m.	4.30 p.m.
Leave Odin		9.40 a.m.	7.10 p.m.
Arr. at Cincinnati		10.00 p.m.	6.00 a.m.
Leave Cincinnati.	10.00 a.m.	10.20 p.m.	7.00 a.m.
Leave Indianapol.		8.00 p.m.	5.30 a.m.
Leave Columbus.	3.15 p.m.	3.20 a.m.	11.30 a.m.
Arr. at Cleveland	8.50 p.m.	9.20 a.m.	4.00 p.m.

EAST FROM CHICAGO.

Leave Chicago ..	7.30 a.m.	8.00 p.m.	5.00 a.m.
Leave Toledo ...	5.00 p.m.	5.30 a.m.	
Arr. at Cleveland	9.00 p.m.	9.30 a.m.	
Leave Cleveland.	9.20 p.m.	10.00 a.m.	4.30 p.m.
Arrive at Buffalo	4.20 a.m.	5.25 p.m.	10.25 p.m.

CANADA SHORE.

Arrive at Detroit.	6.30 p.m.	7.15 a.m.	
Leave Windsor ..	7.30 p.m.	8.15 a.m.	
Arrive at Suspension Bridge ...	4.00 a.m.	5.00 p.m.	

EAST FROM BUFFALO.

Leave Buffalo ...	5.00 a.m.	6.00 p.m.	10.55 p.m.
Leave Suspension Bridge	4.45 a.m.	5.45 p.m.	
Arrive at Albany	3.30 p.m.	5.00 a.m.	8.45 a.m.
Arrive at N. York	9.30 p.m.	10.30 a.m.	2.30 p.m.
Arrive at Boston.	11.45 p.m.	2.20 p.m.	4.40 p.m.

Cincinnati was chosen as the next place of meeting, Boston and Indianapolis being proposed and rejected. The Convention adjourned to Wednesday, the 16th of October, at 9 a. m.

Population of Michigan, by Counties, in 1840, 1850, and 1860.

Railroad Earnings.

The Receiver's report of the operations of the Ohio and Mississippi Railroad Company, for February, 1860, is as follows:

Balance from January account		$2,143 30
RECEIPTS.		
From express freight of January		$1,715 29
" passengers prior to February		13,072 33
" freight " "		7,265 84
" passengers on February account		20,031 24
" freight " "		27,578 86
Other sources		207 91
		$72,014 77
DISBURSEMENTS.		
Paid on account of 1st mortgage bonds, due July 1, 1858, January 1, 1859, July 1, 1859—$175 each	$525 00	
Balance of charge with other roads	6,386 00	
Discount and interest	1,373 29	
Sundry office expenses	249 45	
On account of arrearages	9,823 74	
On account of January current expenses and construction	44,009 64	
On account of February current expenses	5,679 12	
		68,047 24
Balance carried to March account		$3,967 53

The earnings of the Hudson River Railroad for March were as follows:

March, 1861	$167,559 96
" 1860	161,047 88
Increase	$6,512 03

The receipts of the Grand Trunk Railway of Canada for the week ending March 23rd, 1861, were $80,651 74

Corresponding week, 1860 71,417 34

Increase $9,234 40

Tot. traffic from July 1, 1860, to date, $2,479,627 77

Corresponding period, 1859 2,040,808 44

Increase $438,819 33

The Atlantic Telegraph Company.

The directors of this Company have prepared a report from which it appears that the disbursements of 1860 amount to £5,156 4s. 1d. Of this sum £4,402 9s. 1d. is composed of old accounts incurred previous to the last annual balance-sheet, and of the expenses of the expedition to recover the cable. The balance of £753 15s. is the cost of conducting the Company's business during that year. There are now no outstanding liabilities against the Company, except the amount of £875 advanced by the directors at their own risk, in order to meet for a short period the current expenses of carrying on the affairs of the Company, until it is thought desirable to recommend further proceedings to the shareholders. The whole of the loans advanced by the shareholders for the purpose of attempting to repair the cable have been repaid to the lenders with interest. In the month of April last the directors sent out Capt. Kell to Newfoundland, in order to make an attempt to repair, or failing that to recover for sale, as much as possible of the cable in Trinity Bay. Mr. C. F. Varley also went out, to take charge of the electrical arrangements. The weather, however, was so bad, and the cable so weak in various parts of its external covering, that it was found impracticable to raise it along a sufficient distance so as to reach and repair the chief defect on that side. It was only possible to recover and bring away in detached lengths about five miles of cable altogether. The directors nevertheless, can fully appreciate the difficulties with which Capt. Kell and Mr. Varley had to contend, and it is just that they should state their entire belief that every possible effort was made on their part to insure a better result. It was found that owing to insufficient survey of the bay, the cable had been laid—not in the deep muddy channel which is believed to exist along nearly the whole of its course, but over rocky strata and irregular depths, the rock being in parts metallic. At these points the external coating of iron having becoming chemically decomposed had broken away, and as jagged surface was thereby presented to the water the friction in lifting it was greatly increased. The directors consider that in future, before submarine cables are laid, it will be necessary to examine much more accurately than has hitherto been done into the nature and configuration of the bottom in all situations near shore, and within a depth of 300 fathoms. The cable recovered and brought home by Capt. Kell has been stripped and overhauled, every portion of the core having been carefully examined and passed through the hand. It is satisfactory to find that there is not the slightest symptom of deterioration or decay in any part of the gutta percha. It has further been subjected to a severe electrical test, and a comparison between its present state of insulation and the records of original tests of the most perfect portions of the cable, when it first left the Gutta Percha Works three years ago, show that an actual improvement has taken place in its condition since it was laid down. This is probably due to the compression of its particles, and to the suitability of the sea water to its preservation. The directors consider, therefore, that the failure of the cable must be attributed to the hasty manner in which it was manufactured, to the strain brought on it by machinery, and to the repeated coilings and uncoilings it has undergone, rather than to any defect arising naturally in the gutta percha. In addition to the operations in Newfoundland, the directors, during the Autumn of last year, entered into an agreement for the recovery of cable at the Valentia end, but the proceedings not having been carried out and the season being too far advanced, they determined to abandon the attempt for that year, and they intend, if possible, to adopt some plan for raising the shore end in the course of the ensuing Spring. As to the future position of the Company, the directors consider it advisable, unless the wish of the shareholders be otherwise, to continue it—at all events for some time to come—upon its present economical footing. To wind up its affairs would be to sacrifice without any adequate object the valuable privileges of the Company—its agreements with the American Companies, and its direct connection with the Governments of England and the United States. The directors are convinced that telegraph communication between Europe and America having been so clearly demonstrated in practice by the efforts of this Company is a fact which must ere long be realized. They believe that the experience now gained, in addition to some well conducted experiments with different kinds of cable, in order to determine the proper weight and material for its external protecting sheath, would render it easy to lay with lasting security a well-working cable across the Atlantic between Ireland and Newfoundland. The directors have no desire to speak invidiously of any plan for establishing a trans-atlantic telegraph by another route, still less do they feel even the wish to obstruct the progress of any reasonable association proposing to accomplish an object so grand and useful. As regards the commercial position of this Company, a cable can be constructed without difficulty which can be worked between Ireland and Newfoundland at the rate of 15 to 20 words per minute; and even the original cable, which, imperfect as were both itself and the apparatus applied to it, was worked at the rate of three words per minute, and would have yielded a dividend of over 15 per cent., at the very low tariff proposed by the Company. This Newfoundland route, under an agreement involving many important facilities and arrangements with the entire telegraphic system of America, is secured to the Atlantic Company; they have also a valuable act of Parliament, a guarantee of 8 per cent. on £600,000, and subsidies of £20,000 from the English Government, and £14,000 from that of the United States. The guarantee and subsidies are it is true, conditional upon success; but the Board cannot avoid believing that ere long the Government will find it advisable to come forward more substantially in support of the zealous and costly exertions that have been made by this Company in practically carrying out a work so necessary to commerce, and so unprecedented in the annals of science. They would, therefore, deem it highly imprudent to wind up or dissolve the undertaking, since by so doing they would forego all hope of securing for the labors and sacrifices of this undertaking their best and most righteous reward, namely, the power of carrrying out its objects to a legitimate and successful conclusion. The directors, on the contrary, consider that it will be necessary to make energetic efforts to bring before the public, at the proper time, the importance of the Atlantic telegraph; and they trust that by such means, and by presenting the matter in its true light before Government and the members of the House of Commons, they may be enabled to attain ultimately a successful result. To give effect to this proposal, however, it will be necessary to create a fund of about £3,000, and the directors hope that, having themselves contributed nearly £900 towards it, the shareholders will assist in completing the sum required, by voluntary contributions of moderate amount. The retiring directors are Mr. Francis Le Breton, Mr. J. W. Brett, and Mr. George Peabody, who are eligible, and offer themselves for re-election. The retiring auditor is Mr. Blackburn, who also offers himself for re-election.

American Railroad Journal.

Saturday, April 6, 1861.

Share and Money Market.

The share market is in a very unsettled condition from the general conviction that we are on the eve of important events involving perhaps hostilities at some of the Southern Forts. The market, consequently, shows a decidedly downward tendency. Should the present warlike aspect of matters be realized, *panic* prices may be looked for.

Money, of course, in the absence of any employment for it, is very abundant. The New Government Loan was taken at 94 and a fraction, for six per cent. This is about 4 per cent. better than the last loan. The biddings exceeded four times the amount called for.

Minnesota Mining Company.

The annual report of this company gives an interesting and satisfactory statement of the progress of one of the oldest and most successful enterprises in the country. The product for the year has been 2,150½ tons of copper, and the gross value $656,594, while the price of copper has averaged 20 92-100 cents per lb. The net earnings have been $210,766, or more than $10 per share. The following table, compiled from the report, gives a comparative statement of the business and results of three years:

	1858.	1859.	1860.
Yearly prod't.	1,834 tons.	1,626 tons.	1,150½ tons.
Ave. per m'th.	153 "	153½ "	179½ "
Per ct. of cop'r	70 1 10	71	73½
Ave. price per lb.	22½ cts.	22 cts.	20.92 cts.
Gross value	$595,000	$515,886	$656,694
Cost of mining	273,748	279,229	312,308
Transportation	43,184	37,137	46,472
Smelting	38,278	32,004	40,289
All other expenses.	29,624	35,974	46,759
Total cost	384,827	284,894	445,828
Net earnings	210,176	231,891	210,766

The product of the mine, it will be observed,

has increased from 1,834 tons in 1858 to 2,150 tons in 1860, while the net earnings are but slightly larger—a result entirely owing to the diminished market value of copper. The following statement of resources and liabilities for the fiscal year ending March 1, 1860, and March 1, 1861, will show the general condition of the company's affairs, and its available surplus assets for the two periods named:

RESOURCES.

	1860.	1861.
Mineral on hand	$189,130.00	$171,261.00
Supplies on hand	97,768.33	112,208.19
Ingot copper on hand	43,303.82	133,931.60
Bills & debts receivable	47,757.57	44,568.71
Cash in Treasurer's h'ds.	12,987.97	32,094.50
Cash in agent's hands	14,032.32	6,857.14
Total	$404,980.01	$500,931.14

LIABILITIES.

	1860.	1861.
Bills and debts payable	$114,155.77	$134,246.49
Debts at mine Jan. 1	67,150.70	78,395.42
Mining cost Jan. & Feb.	52,000.00	54,000.00
Total	$233,306.47	$266,641.91
Average surplus	171,673.54	235,289.23

Interest and Dividends.

The semi-annual interest, due April 1, 1861, on the second mortgage bonds of the Cleveland, Painesville and Ashtabula Railroad Company, will be paid on presentation at the Ocean Bank.

The interest due April 1, on the first mortgage bonds, of the New York and New Haven Railroad Company will be paid on presentation of the coupons at the office of the Treasurer or at the bank of the Republic, in this city.

The interest on the first mortgage bonds of the Cedar Falls and Minnesota Railroad Company, due April, 1, 1861, will be paid on and after that date on presentation at the office of Erastus Edgerton & Co., No. 112 Broadway.

The coupons due 1st April on bonds of Syracuse, Binghamton, and New York Railroad Company will be paid at the Continental Bank.

Incrustation of Steam Boilers.—A Remedy.

The formation of scale within the boiler is one of the greatest evils in the whole science and use of steam, and any positively harmless means for preventing the same should meet with every encouragement.

It is a well known fact, that the least possible coating of this non-conducting stone-lining, or crust, compels the use of larger quantities of fuel to generate steam, than when the boiler was new and clean. Standard English authority states the loss of fuel to one-sixteenth inch of the crust, at 14.7 per cent., and while we are suffering this waste of fuel (10 to 60 per cent. and even greater) we are overheating and burning the iron with this very excess of heat, so that, the thicker the scale the more heat necessary to penetrate it, and a new fire box, a patch, or a new set of flues is the early result. The item of repairs from this source alone, varies from 5 to 30 per cent. A remedy exists which fulfills the requirements of the case; and its continued use for the past five years by our most reliable railroad men, is sufficient guarantee of this fact. The material we refer to, is the Anti-Incrustation Powder made by the inventor H. N. Winans, Esq., of this city. See his advertisement on last page. From our personal knowledge of the inventor and his sound common sense and practical chemical explanations of its operations, we are satisfied, it is safe to use, efficient and cheap. This is supported by the opinions of such men as Ashabel Welsh and W. S. Congdon, Bel. Del. R. R.; A. S. Sweet, jr., Mich. Central R. R.; Col. Hammond, Chicago, B. & Quincy R. R., and Preserved Smith, Treas. Dayton and Michigan R. R., who writes, "it has become a fixed institution with us."

Finances of St. Louis.

The total bonded debt of the city of St. Louis, March 31, 1861, was as follows:

For railroads	$1,599,000
" past indebtedness	711,500
" municipal purposes	525,700
" water works	490,000
" to purchase real estate	437,000
" public sewers	425,000
" old limit improvements	259,000
" harbor	239,000
" wharf	166,000
" district sewers	62,500
Amounting together to the sum of	$4,914,700

During the present fiscal year, the bonded debt has been reduced $145,200. No new bonds have been issued this year. It is estimated that before the end of the year, the Fund Commissioner will retire seventy-five more bonds, which will make the bonded debt on the 6th day of April, the end of the present fiscal year $4,829,700.

The floating debt will be about $100,000; total debt therefore, $4,929,700. On the 12th of April, 1858, the bonded debt of the city was $5,207,296; and the floating debt $248,000, making the total $5,455,296. The reduction of the debt during these three years has been, therefore, $525,596.

The receipts into the city Treasury from April 8th, 1860, to March 1st, 1861, were $1,300,240, to which add cash on hand, $89,128, making $1,389,368.

The expenditures during the same time were $1,356,486, leaving cash on hand $32,882.

The greater portion of the receipts were from real estate taxes, amounting to $871,936. Licenses produced $125,340; market rents $29,478; fines and fees $13,528; wharfage $54,707; water licenses $104,322; sewer taxes $31,772.

Of the expenditures, $303,791 was for interest on the city debt; $126,041 for the water works; $90,000 for streets in the new limits; $84,367 for public sewers; $62,954 for repairing streets; $70,503 for grading streets; $60,962 for the Fire Department; $98,725 for the Police Department; $38,692 for lighting the city; $42,853 for the Hospital and Quarantine; $21,216 for cleaning streets, and smaller amounts for other purposes.

Cleveland and Toledo Railroad.

The Sinking Fund Bonds of this Company are offered in exchange for the various issues of the Junction and Toledo and Norwalk divisions, and the Cleveland and Toledo Income and Dividend Bonds. The Sinking Fund Bonds are secured on the main line of the Company's road, subject only to about $820,000 of the Cleveland, Toledo and Norwalk 1st and 2d mortgages, and also by a sinking fund of 1 per cent. per annum on the funded debt of the Company. The absorption of the various bonds above named renders the Sinking Fund Bonds a first mortgage upon the entire property. Messrs. Carpenter & Vermilye, No. 44 Wall street, are agents for the Company, and will make the exchanges.

Delaware and Hudson Canal Company.

The business of this company for the year ending March 1, 1861, was as follows:

Sales of coal to March 1, 1861		$2,051,442 20
Canal and railroad tolls collected		397,041 55
Profits of barges, etc.		16,910 69
Coal on hand at Honesdale, Rondout, and New York, and on line of canal		248,321 40
		$2,713,715 92
Coal on hand March 1, 1861, and purchased since	$459,616 17	
Mining coal	448,611 87	
Railroad transportation and repairs	289,932 42	
Canal repairs and superintendence	239,426 66	
Freight of coal on canal	413,012 04	
Labor and expenses at Rondout	59,370 36	
Rent, salaries, current expenses, etc., N. Y. office	37,154 67	
Coal yard and harbor expenses, taxes, interest, etc.	234,845 28	
		2,181,969 47
Net profits		$531,746 45

—or a little over 7 per cent. on the capital stock of the company. The report says:

This result, while it is far from being what was hoped for at the opening of the season, cannot be justly regarded as discouraging; nor, when all the circumstances are considered, will it be likely in any degree to impair the confidence of the stockholders in the intrinsic value of their investment.

Preparations had been made for a large increase of production, and the operations of the Company were moving on steadily and satisfactorily until the 18th of June, when the work of mining was suddenly arrested by a general strike of the operatives. This strike continued for a longer or shorter period at the several openings, averaging, however for the whole work a duration of sixty-eight days, in that portion of the season best adapted for full and economical work.

The loss thus sustained, it will be readily seen, must have been very serious; but, large as it was, and great as must be the disappointment occasioned thereby, the Board can feel no doubt, that it was a wiser policy to submit to the present sacrifice, rather than by concessions to unreasonable demands, to lose that command of their own work which is essential to the permanent success of the Company. And while the Company, under its present management, will always aim to deal, not only justly, but generously with those in its employ, it will resist to the end and at any cost, every attempt, by combinations of workmen, to dictate the manner in which its business shall be conducted.

The canal was opened for navigation on the 1st day of May, and closed by ice on the 13th of December. Not a single break occurred during the season; and the regular movement of boats was not at any time seriously interrupted. An extraordinary freshet occurred in the month of February, causing the destruction of one of the Reservoir dams near Honesdale. The injury to the Company's works was small, and the accident will in no degree interfere with the resumption of work on the Canal at the usual time.

A statement of miscellaneous traffic is appended to this report. The whole amount of tolls received, it will be seen by reference to the statement, was $397,041 55.

The Board regret that they cannot yet announce the termination of the suit against the Pennsylvania Coal Company, for the sum claimed to be due for additional tolls in consequence of the enlargement of the Canal. By an order of the Court, the time for the taking of testimony has been limited; and it is believed that the case will be closed on both sides within a very short

time, and that a decision will be had in the course of the present season. The amount now claimed by this Company for "additional tolls," and exclusive of other demands, exceeds $1,100,000.

The extension and other alterations in the Company's railroad, which have been in progress for some years, were completed and brought into use during the past season; and in the month of October, a committee appointed at the last annual meeting, visited the works, for the purpose of inspecting the improvements, and of observing generally the condition and management of the Company's property. They were accompanied by the President, and several of the managers, and on their return made a very gratifying report, a copy of which was sent to each of the stockholders.

The Weehawken Dock is now ready for partial use, and during the coming season it will no doubt afford very valuable facilities, in enabling the Company to meet the demands of its customers in New York, and in the Eastern States. A considerable outlay is still required for the completion of this work; and it must be expected, that there will be annually larger or smaller sums needed for construction purposes, so long as it is deemed advisable to provide for an increase of productive capacity. The Board, however, believe that in future the sums required may be kept within the current income from the Company's business, and yet at the same time permitting a satisfactory return in dividends to the stockholders.

It will be seen that there is now in the Sinking Fund the sum of $157,134 16, which will be increased, in accordance with the policy adopted by the Board, by a yearly contribution of one per cent. on the capital stock of the Company.

Arrangements have been made to bring to tidewater not less than 700,000 tons; and if only the very low prices which have obtained for the last few years, shall be realized in 1861, the result will not be likely to disappoint the reasonable expectations of the stockholders.

From a table appended to the report it appears that the receipts from tolls have increased from $16,422 44, in 1830, to $397,677 99 in 1860—the aggregate receipts in these years, or since the completion of the works, have been, $4,901,294 23.

GENERAL BALANCE SHEET.

Canal	$6,212,381 41
Railroad and equipment	1,978,067 13

Journal of Railroad Law.

CORPORATE FRANCHISE; CHARTER OF THE BLACK ROCK BRIDGE COMPANY; COMPENSATION REQUIRED FOR INJURIOUS CONSEQUENCES OF ERECTION.

In the charter of the Black Rock Bridge Company, incorporated for the purpose of building a bridge across the Schuylkill, there were two sections providing for compensation to be made for injuries that third parties might suffer by reason of the building of the bridge. The sixth section authorizes the company in general terms to take property necessary in the erection of their bridge, and provides a mode for making compensation. In the thirteenth section there is a special provision for damages that might be occasioned to one David R. Buckwalter, who owned a ferry in the neighborhood of the place where the company purposed to build the bridge.

Damages were assessed by referees under this provision, who allowed not only the immediate but the consequent damages, arising from the building of the bridge to the ferry property.

Upon motion of the Bridge Company the Common Pleas of Montgomery County, Pennsylvania, set aside the execution issued to compel the payment of the award; and Buckwalter, the plaintiff, appealed to the Supreme Court. The following is the opinion of the appellate tribunal.

Thompson, J. It would be a difficult proposition to maintain that the legislature, on granting corporate franchises to the defendants, could not do so upon the terms that they should pay and satisfy the plaintiff for any injury they might occasion to his ferry, because the damage might be in its nature consequential. That such damages may be claimed from and assessed against a company, if their organic law require it, has often been decided. This is not upon the ground that the constitution requires compensation to be made for such injuries. It does not. It is only for taking property under the right of eminent domain, that compensation is required by the constitution, to be made. Here the terms upon which the privilege was granted and accepted, that compensation beyond this should be made, became a contract, and the company should be willing to observe it; if not, the law will compel them to do so.

The matter first to be ascertained is, whether the terms of this charter require the payment of such damages as are claimed by the plaintiff. That settled, everything else is of easy solution.

The sixth section of the act authorizes the company to take property necessary in the erection of their bridge, and provides a mode for assessing damages consequent upon such taking. These provisions do not extend to the allowance of consequential damages; they provide only for the taking and making compensation for property within the meaning of the constitution, and for this they are ample.

In section thirteen, there is a special provision for the contingency of damages occurring to the plaintiff. In order that this section shall have any effect, it is to be presumed that these damages were not such as might arise from the taking of property, for that was provided for already.

What damage was in the contemplation of the Legislature? They chose to take notice of the fact, and declared that David R. Buckwalter "now owns and maintains a ferry" across the Schuylkill and prohibited the location of the bridge within a half mile of it, unless upon his consent first had for that purpose. But if this could not be had, still the company might, if they deemed it expedient, first having the damages ascertained as provided for, locate within the interdicted distance, their bridge. It is hardly to be doubted that all this was to protect or compensate any injury to the ferry. It is impossible to discover any other object in these provisions.

The damages to be assessed seem to be pretty well defined in the section. After providing that they were to be ascertained by referees mutually to be chosen by the company and the plaintiff, and who were to be sworn, were to "go upon the premises and view and receive such other testimony as they may desire, and assess the damages, *if any*, which the said David R. Buckwalter may and shall sustain by reason of the erection of the bridge."

The requirement to pay *any* damages which may or shall have been sustained, has been holden to cover a claim for consequential damages; so has the expression all damages.

The words here require the payment of damages, "if any," by reason of the erection of the bridge. This last expression, in the connection in which it stands, is the same thing as "on account of," or "because of," the erection of the bridge. In this sense, the paragraph means any damage on account of its erection. The subjunctive or contingent form, if it does not lessen the import of the word "any," which means indefinite results or amounts, and, consequently, means *all* damages.

In this aspect, all injurious consequences or consequential damages, would be included.

I cannot for a moment doubt, that the Legislature had this in view, in introducing this special provision. Why should they have reorganized the existence of the ferry, attempted its protection, and in the same section in which the company are authorized to locate their bridge within a half mile of it, require them to obtain the owner's consent, or if not, to pay such damages as he might sustain, unless injury to the ferry was to be the basis of the assessment present and prospective? This was what they meant, or nothing; and it is our duty so to interpret the language used so as to give effect to every provision of the act. It was the duty, therefore, of the referees, to assess all damages, direct or consequential, which had or should be sustained by the plaintiff on account of injury to his ferry, and it is apparent they did so. It does not appear from anything before us, that merely speculative damages were at all allowed. Consequential damages are always in appearance, somewhat so. But there was no more necessity that they should be so here, than in case of injury by flooding or overflowing land, or for backing water on a mill wheel, so as to interrupt its workings occasionally. These have often been compensated as between individuals, and sometimes in cases of companies and individuals.

When the law allows such damages, it, of course, authorizes their assessment upon facts, opinions and approximate estimates. Because these are not demonstrably certain tests, it is no reason for disallowing them altogether, when

otherwise there is a duty to compensate those who have or shall suffer them.

The corporators here accepted the terms upon which the legislature were willing they should build a bridge. There was nothing unlawful in them, and they were not obliged to accept them; but having done so, they ought to be willing to live up to them, and we do not see that more has been required of them here.

It has been suggested that a ferry is not property within the constitutional meaning of the term. Grant that this is so, both the Legislature and corporators here, however, have treated it as property, and the latter have agreed to pay any damage which they may do to it. It was certainly competent for the legislature to grant the privilege to the company upon these terms, without regard to the precise nature of the property. They were supreme in this respect, and the company, in accepting their charter, engaged to observe all the conditions contained in it, and they cannot now escape from any of them by questioning their propriety or expediency; there being nothing unlawful contained in them.

The agreement for the reference, and the provision that a majority of the referees should make an award, it now appearing that all viewed the premises, dispenses with any necessity of inquiring as to their power to do so under the act of Assembly. The parties could regulate that if the act did not. For these reasons we think the court erred in setting aside the *fi. fa.* and striking off the award, and their action thereon must be reversed.

The order of the court is reversed, and the award directed to be re-instated: and the order setting aside the *fi. fa.* is also reversed.

Council Bluffs and St. Joseph Railroad.

This road will be, when finished, fifty miles in length, including all side tracks. It is designed to connect at the State line with the "Platte County Railroad," which is now finished to Savannah, north of St. Joseph, Mo., and soon will be finished to Forest City, about fifty miles north of St. Joseph. From Forest City the road will be constructed upon the Missouri River bottom—a level plain, where the grading will not cost over $250 per mile and the road will be completed during the present season, (if money matters are not seriously disturbed by our national difficulties) to the north line of the State of Missouri, where the two roads will connect, and give to the citizens of Council Bluffs a railroad connection *via* the Hannibal and St. Joseph Railroad, with all the cities of the South and East.

The Council Bluffs and St. Joseph Railroad has a subscription to its stock amounting to over $160,000, besides it has a large amount of lands which will be made valuable by its completion—one-third of the road is graded and timber and ties for tying one-half of the road is now upon the line—the contract for building the road is let to Mr. CHARLES HENDRIE, who is to complete the road in twelve months from the first day of January, 1861.

The road is now in such a situation, that with the aid of the citizens *immediately* interested in its construction, it could be finished during the present season. Nearly one-third of the grading is finished, and ties and timber for ties have been placed upon the line of the road, sufficient to tie it more than half of its length. All this has been done without the aid of Eastern capital, or creating one dollar of indebtedness—the company have paid as they went, and with a little aid from the citizens of Fremont, Mills and Pottawattamie Counties, the work will go steadily on to completion.—*Council Bluffs Bugle.*

Railways in Prussia.

Some official statistics have just appeared with regard to the development of railways in Prussia to the close of 1859. The facts stated are of considerable interest. It appears that the length of railway opened was 3,162 miles, of which 973½ miles were laid with double rails; and the capital employed was altogether £44,080,000, or £13,940 per mile. The number of passengers in 1859, exclusive of soldiers, was 19,279,668; and the quantity of merchandise conveyed was 11,904,761,012 tons. The total receipts amounted to £5,399,440, or £1,707 per mile, while the working expenses amounted to £811 per mile, or 46 per cent. The average of the dividends paid in 1859 was 5.36 per cent. as compared with 5.88 per cent. in 1858, a diminution ascribed to the dullness of trade and the fact that the new "sections" opened yielded but a comparatively small return. Thus the receipts per mile were £2,009 in 1857, £1,841 in 1858, and £1,707 in 1859. The falling off is principally apparent in the diminution of passengers traveling long distances, the proportion of such passengers to those making short trips having been 1 to 2. 1 in 1859, as compared with 1 to 1.9 in 1858. Of the 19,278,688 passengers conveyed in 1859, 346,567, or 1.8 per cent. were first class; 3,324,299, or 17.2 per cent. second class; 9,807,454, or 51.3 per cent., third class; and 5,911,348, or 29.7 per cent., fourth class (although fourth class tickets are only partially issued and have only been recently introduced). The average distance traveled by the fourth class passengers was 17 miles, while the third class traveled 21 miles, the second class 35 miles, and the first class 40 miles.—*Herapath.*

Trade with the Seceded States.

The Secretary of the Treasury of the seven seceded States has issued a pamphlet of instructions for regulating the introduction of goods into the Confederate States of America from foreign and contiguous territory over railway routes, of which the following is a synopsis:

It first provides that "Revenue Stations," at which shall reside an officer of the customs, shall be established at certain points nearest to the line of the Conferate States, the presiding officer to discharge all the duties now exercised by collectors of customs over importations by sea. Immediately upon the arrival of any train, the conductor is to produce to the Revenue Guard a manifest of all goods brought into the Confederate States, which manifest is to give a description of the packages and contents, where taken on board, by whom forwarded, to whom consigned, and the place of destination. The Revenue Guard is to board all trains, and see that the goods are placed in separate cars from those in which the mails or passengers are conveyed, and to place on such cars locks of the Conferate States, a duplicate manifest of such cars to be forwarded to the revenue officer at the first depot to which the cars are destined.

On the arrival of the train at the point designated, the original manifest, with the goods, must be delivered to the Revenue Guard, under the regulations governing bonded warehouses, and such officer is to give a permit for the merchandise to proceed to a further destination. Goods not subject to duty, to be landed at interior places on such railroad, or its connections, are to be permitted to remain on board the train, and to proceed to such destination, on the conductor furnishing a schedule in detail to the revenue officer. Dutiable goods also may be immediately forwarded to their destination on permits from the revenue officers.

The baggage of passengers passing over the railroad routes is to be subject to the inspection of the revenue officer, and if containing no article subject to duty, shall be landed at the places for which it is destined, the revenue officer to paste on the valise, carpet-bag, or trunk, a permit to deliver. Baggage containing dutiable goods is to be placed in the car with the merchandise, under the revenue lock, and handed over to the revenue officer at the point of destination.

Goods subject to duty may be bonded and transferred to other parts of the Confederate States, where they are to be delivered to the collector. Packages not required for samples may be delivered to the importer on his paying the duty estimated on the entry, and executing a bond in the manner and form now required by law and the treasury regulations of the Confederate States.

All railroad companies over whose lines goods are intended to be introduced, from foreign or contiguous territory, are authorized to do so on filing in the treasury department a bond executed to the Confederate States, obligating themselves to the faithful execution of the revenue laws, so far as relates to the correctness of the manifest and their custody of the merchandise, under which they are to be responsible for all frauds committed or attempted by conductors, or others in their employ.

Buffalo and New York City Railroad.

The purchasers of this road announce to the bondholders that they are prepared, without waiting for the time allowed by their bid, to purchase the bonds and detached coupons secured by the mortgage, at their office, No. 11 Pine st., N. Y., at the following rates, being the proportionate amounts of the bid:

For each bond, with coupons from July, 1854, to January, 1859, inclusive, 10 coupons	$140 00
For each bond with—	
9 coupons of above dates	126 00
8 " " "	112 00
7 " " "	98 00
6 " " "	84 00
5 " " "	70 00
For each detached coupon	14 00

"Holders of bonds with ten matured coupons of above dates attached may receive, at their option, in lieu of cash, scrip for a new bond for 20 per cent. of the par value of the principal, secured by a mortgage of the property purchased, and a lease to the Erie Railway Company upon its organization, to be issued upon the reorganization of the Company.

"The bondholders are requested to present their bonds and coupons immediately, as the option to take bonds must expire on the 20th May, when the balance of the bid not paid by us in cash or scrip, becomes payable to the Referee."

The bid of the purchasers was $98,000 and the legal expenses, which gives the above amount when distributed.

Southern Pacific Railroad.

We learn from the Louisville *Journal* that a meeting of the stockholders in this road was held in that city on the 15th ult., at which V. K. Stevenson, Esq., the President of the road, gave an account of his recent visit to Europe with a view to closing a contract with a French Company to construct the road across Texas, and possibly to California, but the negotiations were suspended until the political differences in this country were settled.

Mr. Stevenson purchased one thousand tons of iron, on his own account, of Mr. George Peabody, which the company could take or not, as the Directors saw proper.

He also alluded to the work that had been done upon the road, by which twenty miles of the fifty necessary to be finished before the company could avail itself of the guarantied assistance of Texas, had been graded and only required the iron work to be finished, when the company would have a paying line of 93 miles and 800,000 acres of land as a basis of credit.

Mr. Stevenson urged the payment of $1 per share—half cash and half in six months—on the part of the stockholders, to save the company from being crushed out and destroyed. By this means a fund of $500,000 could be realized. The matter was referred to a committee, to report upon the method of raising the subscription.

Illinois Central Railroad.

The following is a comparative statement of the business of this road for the first three months in each of the following years:

	1859.	1860.	1861.
Land sales...	$141,013 47	$98,919 57	$479,900 58
Cash collected	126,185 40	122,439 46	184,826 82
Traffic.....	417,380 64	581,176 80	831,688 30
Total.....	$684,579 51	802,535 83	1,496,415 70

The sale of lands by the Company has already assumed larger figures than in the Winter months of any previous year. Since the 1st of October the sales exceed one million of dollars, and chiefly to small farmers, averaging between sixty to seventy acres to each purchaser. The letters of inquiries from all sections of the country are increasing, and the emigration to Illinois promises to be immense this Spring.

Memphis and El Paso Railroad Company.

At a meeting of the directors of this company, recently held at Clarksville, Red River Co., Col. Bennett was elected President, to succeed Mr. S. H. Morgan, resigned. The *Standard* says:

The freight on the iron was provided for, and in four weeks probably, there will be a commencement of track laying from Moore's Landing westward. The twenty-five miles advertised for grading from Robinsville to five miles west of Paris, were let on satisfactory terms to Capt. J. H. Pratt; large claims against the company were adjusted by land scrip, at fifty cents per acre. The company is almost entirely out of debt, and in a condition to move onward, notwithstanding the hard times. One hundred and forty-six miles are now under contract. Fifty miles from Moore's towarda Clarksville are ready for the iron, which will be put down immediately. Twenty-five miles of it are now purchased, and at Alexandria and New Orleans, will be first put up.

Railways in Australasia.

There are eight railways radiating from Melbourne in different directions, from three stations. The Suburban, a competing line with part of the Brighton, has been opened to Prahran and East St. Kilda. This railway has another branch to Hawthorne. The following is a list of those now in operation:—Melbourne, St. Kilda, and Brighton, 8 miles; Melbourne and Sandridge, 2½; Melbourne and Williamstown, 9; Melbourne and Geelong, 47; Melbourne and Sunbury, 24; Melbourne and Essenden, 4½; the Suburban two branches, 7—total 102 miles. The Sandhurst will be opened to Woodend, about 22 miles beyond Sunbury, in March, or April. The practicability of street tramways is under discussion in the City Council, and locomotives on common roads are actually in use in new South Wales.

Atlantic and Gulf Railroad.

We take pleasure in announcing that the contractor is now laying the iron on this road within the corporate limits of Thomasville. The cars are expected to make regular trips from this place to Savannah early in next month.—*Thomasville Reporter.*

Lumber Trade of Sandusky.

The receipts of lumber, etc., at Sandusky, dur the year 1860 were as follows;

Lumber, feet.....	21,644,670
Shingles, M.....	17,262,789
Lath, M.....	3,844,250
Cedar Posts, number.....	13,808

☞A suspension bridge is now being constructed by Mr. J. A. Roebling over the Kentucky River, on the Lexington and Danville Railroad, which will have a span of 1,224 feet from centre to centre of the towers, over a chasm 300 feet deep. When completed, it will be the longest single span in the world.

☞At the annual election for Directors of the Pittsburg, Fort Wayne and Chicago Road, held on the 27th ult., there were 56,527 votes polled, and the old Board were elected without opposition.

☞The Wilmington *Republican* states that a route is being surveyed for a branch of the Marietta and Cincinnati Railroad from New Viena to Dayton. It would doubtless be of great utility.

RAILROAD IRON AT CARDIFF, WALES.

1,000 TONS 56 lbs., Erie pattern, ready for immediate shipment from above port.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish **SAMPLES** and **PRICE LIST** on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **200 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

LYONS' TABLES.

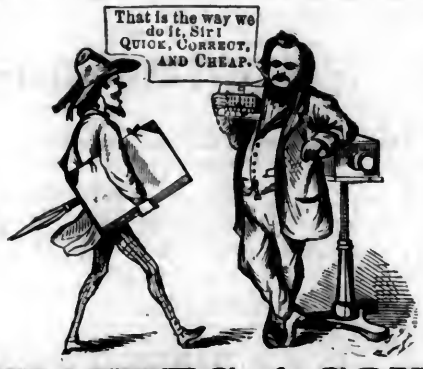
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24	"	¾ to 1
4.	" 14	"	1½ to 1	16.	" 24	"	1½ to 1
5.	" 15	"	¾ to 1	17.	" 25	"	1½ to 1
6.	" 15	"	1 to 1	18.	" 26	"	1½ to 1
7.	" 15	"	1½ to 1	19.	" 28	"	¾ to 1
8.	" 16	"	¾ to 1	20.	" 30	"	1 to 1
9	" 16	"	1 to 1	21.	" 30	"	1¼ to 1
10.	" 18	"	¾ to 1	22.	" 30	"	1½ to 1
11.	" 18	"	¾ to 1	23.	" 32	"	1 to 1
12.	" 18	"	1 to 1	24.	" 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**



ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

New York, Saturday, April 13, 1861.

Finances of Indiana.

The funded debt of the State of Indiana is as follows: 5 per cents, $5,322,000; 2½ per cents, $2,054,498. The State Bank debt is not included, as the same is otherwise provided for than by taxation, and will soon be paid off. Under the existing revenue laws of that State there will be annually, hereafter, a surplus arising from taxation of about $500,000, after paying the entire expenses of the State Government, exclusively applicable by law to the redemption of the funded debt. By a late amendment of Free Banking law in Indiana, none other than Indiana stocks can be received as the basis of circulation, and the banks now in operation having other stocks on hand as such basis are required to place Indianas in their stead within a given time. This will soon absorb a large amount of the funded debt. Article 10, section 5, of the Constitution of Indiana has the following clause:

"No law shall authorize *any debt* to be contracted on behalf of the State, except in the following cases: To meet casual deficits in the revenue, to pay interest on the State debt, to repel invasion, suppress insurrection, or, if hostilities be threatened, provide for the public defence."

Southern Michigan and Northern Indiana Railroad.

We have received the annual report of this company for the fiscal year ending March 1, 1861. The earnings from operations of the road during the year were:

From freight		$1,236,568 71
" passengers		749,237 24
" mails		53,966 00
" express		20,071 53

The following bonds are on hand, or pledged as security for obligations of the company:

General second mortgage bonds unissued	$535,000
Detroit, Monroe and Toledo	389,000
Plain bonds, received for D., M. & T. bonds	215,000
	$1,139,000

The entire funded debt of the company March 1, 1861, was as follows:

Michigan Southern 1st mortgage bonds due Nov. 1860		$991,000 00
Northern Indiana do., due Aug. 1861		985,000 00
Erie & Kalamazoo, due March 1861		300,000 00
Jackson branch, due Aug. 1863		130,000 00
Goshen Line, due Aug. 1868		1,168,000 00
Detroit, Monroe and Toledo, due Feb. 1876		611,000 00
Second general Mort. bonds, due Nov. 1877		2,465,000 00
Sinking fund bonds, 1st. general Mort., due May 1855	$3,120,000	
Less held by Co's S. F.	270,000	
		2,850,000 00
Total funded mortgage debt		$9,500,000 00
Unsecured funded debt, (convertible into D. M. & T. bonds:)		
M. S. bonds due March 1863	$67,000	
N. I. " " Feb. 1863	123,000	
		190,000 00
Total funded debt		$9,690,000 00
Scrip issued for funded coupons outstanding		29,704 18
Total funded debt		$9,719,704 18
Total amount reported last year		9,531,000 00
Increase		$188,704 18

This increase consists of: Second mortgage bonds, $203,000; D. M. & T. bonds, $251,000; and sinking fund bonds, $106,000—total $560,000—diminished by the conversion into sinking fund bonds of $2,000 M. S. 1st mortgage bonds, $65,000 Jackson Branch bonds, and $119,000 Goshen Line bonds; and into the D. M. & T. bonds of $94,000 M. S. and $121,000 N. I. plain bonds—total $401,000, making the increase with the scrip outstanding, $29,704 18, as above $188,704 18.

The mortgage to secure the Michigan Southern Railroad bonds, due Nov. 1, 1860, covers the line of the old road in Michigan, from Monroe Pier to near the line of Indiana.

The Northern Indiana bonds, due August 1, 1861, are secured by the first mortgage, dated in 1851, upon the road of the company, from Goshen to the line of Illinois.

The Erie and Kalamazoo bonds, due March 1, 1862, are secured by a mortgage upon the road between Toledo and Adrian.

The Jackson Branch bonds are secured by a first mortgage upon that branch extending from the main line at Palmyra to Jackson.

The Goshen Line bonds are secured by a first mortgage on the road in Ohio and Indiana, between Toledo and Goshen.

The Detroit, Monroe and Toledo Company's bonds are secured by a first and only mortgage upon the road of that company, between Detroit and the Ohio State Line—about 51 miles.

The sinking fund bonds, dated May 1, 1855, are secured by the *only* first mortgage that covers the *entire* road, rolling stock, and property of the company.

The second general mortgage to secure the bonds of that issue is dated Nov. 1, 1857, and covers the entire road, but is subject to all other mortgages.

We give in connection herewith the following extracts from the report of the President:

Judgments against the company, thirty-three in number, and amounting in the aggregate to $22,017 30, have during the past year, been promptly settled by payments or extensions; and existing attachments, which locked up balances due from other roads and other cash means, have been promptly removed.

Among other pressing liabilities, that for $55,188 30 on bonds given for duties on iron rails at Detroit, with sureties, has been liquidated, and the bonds held by the United States Government cancelled, and the sureties released.

The floating debt, which by the last annual report was stated at $1,086,783 60, is now reduced, after deducting available assets, as per statement annexed, to $437,886 22, exclusive of the over-due coupons of the second mortgage and plain bonds.

Payments on the monthly pay-rolls are now met promptly as they accrue. For the Bills payable which constitute the greater portion of the balance of the floating debt, renewals of old over due paper have been effected, extending over a period of two years, and falling due at intervals properly distributed for convenient liquidation.

It is apparent, therefore, that when the holders of the second mortgage and plain bonds shall have funded the balance of their coupons, whose funding has been requested, the floating debt will be brought within such manageable proportions as to offer no longer any bar to the prompt application of all the net earnings to the payment of all classes of interest as it falls due.

This policy, adopted in October last, and now progressing satisfactorily, of funding the two over due second mortgage coupons, and those of November, 1860, and May, 1861, has been accepted to the extent of a majority by that class of bondholders, and has not only aided materially in reducing the floating debt as it would have stood at this time, but, anticipating a large item of the obligations that would have matured in May, 1861, and been payable out of our earnings during the fiscal year now opening, relieves the company of the necessity for providing cash payments to that extent.

A majority likewise of the plain bonds, and the coupons thereon that matured in 1860, have been exchanged for, and funded into the Detroit, Monroe and Toledo R. R. bonds, with a like effect.

This indorsement by a majority of the holders of the second mortgage and plain bonds, has justified the soundness of this policy of funding coupons.

Notwithstanding the large payments made in liquidation of the floating debt, the present direction has increased the contribution to the sinking fund since August last, by the addition of $89,000 of sinking fund bonds.

The last annual report enumerated as assets, second mortgage bonds of this company, and Detroit, Monroe and Toledo R. R. bonds, amounting to $1,378,000. Upon our assuming control of the company's affairs, $66,000 of these bonds were missing. A discrepancy also existed between the sinking fund bonds acknowledged by the late commissioners of the sinking fund to be held by them, and the amount stated to be in the sinking fund in the report.

In the last annual report of assets were reported bills receivable amounting to $232,605 07. This item of assets has been reduced $100,000 by the payment to the Detroit and Milwaukee R. R. Co., of their paper, in a general settlement made with that company for depot grounds, tracks, &c., at Detroit. This amount has been charged over to the Detroit, Monroe and Toledo R. R. Company.

This settlement concludes in a modified and more advantageous form, an agreement entered into between said two companies, in December, 1855, and secures valuable privileges and accommodations to the Detroit, Monroe and Toledo Company, affording it a perpetual lease of the roadway and track of the Detroit and Milwaukee Company for three miles in the city of Detroit, extending from the junction of said two roads to their depot grounds on the Detroit river, and confers the right, under lease, to the occupancy of 200 feet of dock, with a convenient freight house erected thereupon, for our exclusive use, and also the conveyance in fee of a valuable portion of the depot grounds necessary for the proper accommodation of the business of the company.

The first mortgage bonds of the Michigan Southern Road which fell due November, 1860, are still unpaid. The policy of this company, adopted in 1855, provided for a sinking fund first general mortgage bond, into which should be absorbed, by conversion, all the first mortgage bonds on fractional parts of the road.

This sinking fund first mortgage covered sections of the road, and those the most valuable, not covered by the other first mortgages, add was, and is, the only first mortgage upon such portions. The sinking fund is the only first mortgage that covers the entire road and property of the company.

To increase the attraction for making the conversion, and make such conversion the interest of holders of the several classes of bonds on fractional parts of the road, the sinking fund bonds were strengthened by additional security of a first mortgage on all the rolling stock, equipment, and real estate of the company; and still further to enhance their value, a sinking fund of one per cent. upon the amount of the bonds was created, which, by calculation, would, at the maturity of the bonds, liquidate the entire issue.

Such a consolidated security, little exceeding in amount $6,500,000, so secured and strengthened, is unsurpassed in value by any railroad security known to this market, and clearly possesses a decided superiority over the first mortgages upon detached portions of the road.

No other disposition of the bonds due on 1st November last, has been proposed, than their conversion into the sinking fund bonds, with the understanding that as long as they are held unconverted and in their present form, the semi-annual interest will be paid as it falls due, on presentation of the bonds, at this office.

Towards the conversion of these bonds due in November last, of the Michigan Southern first mortgage issue, arrangements have been made for the exchange of a large amount for sinking fund bonds on the terms originally fixed for such conversion, that is, bond for bond.

The provisions made and reasons adduced for exchanging the first bonds past due of the Michigan Southern portion of the road into the consolidated first sinking fund bonds of the company, will apply with equal force to the Northern Indiana bonds on that portion of the road, which mature 1st August next, and the holders of both classes will strengthen their respective interests, and enhance the value of the entire property by making the proposed conversion.

From what has been herein stated, and from the exposition made in the accompanying tables and statements of the business of the road, and the economy practised in its working, during the past year, it is apparent that the holders of our securities may confidently anticipate an early liquidation of the balance of the floating debt. It is also apparent that the second mortgage bondholders may expect to receive the interest falling due in November next, and hereafter, as it matures. The

stockholders may also hope for the resumption of dividends after the abolition of the floating debt. The policy that has governed the management of the company's affairs during the past year will achieve these results for our security holders and stockholders if the funding of coupons, now in progress, is carried out by the bondholders to completion, and the business of the coming year equals that of the past year.

The following is an apportionment of freight and passenger earnings of Main line and branches for the year ending February 28, 1861:

	Passengers.	Freight.
Main line	$597,633 33	$962,687 58
Air line	47,166 43	167,435 45
Detr't Monroe & Tole'o	61,311 73	58,741 31
Jackson Branch	26,965 37	27,181 83
Adrian and Monroe	13,192 47	23,544 39
Three rivers	2,967 91	4,281 23
Total	$749,237 24	$1,241,871 79
Storage, etc., on freight		19,612 40
		$1,261,484 19
Less drawbacks and over-charges	$20,729 91	
Less freight on supplies for company	4,185 87	
		24,915 48
Total freight		$1,236,568 81
Total passengers as above		749,237 24
Total freight and passengers		$1,985,805 95

The number of tons of freight moved eastward was 290,424, (of which 103,190 was through,) yielding a revenue of $838,540 12; westward, 108,255 tons, (of which 34,500 was through,) yielding $403,331 67—the total tonnage being 398,679, and the revenue as above, $1,261,484 19. The number of tons carried one mile eastward was 43,034,943, (of which 25,869,709 was through); westward, 13,388,804 (of which 8,373,909 was through)—total, 56,423,747—yielding as above, exclusive of storage, etc., $1,241,871 79. The charge per ton per mile on *through* freight eastward was 1.259 cent; westward, 1,883 cent. Do., *local* freight eastward, 2.987 cents; westward, 4.840 cents.

The number of through passengers was 64,147½; of which, 44,678½ were 1st class; 11,030½, 2d class; and 8,438½, 3d class—yielding $359,500.88. Do., way passengers, 304,652; of which 301,434½ were 1st class; 1,100, 2d class; and 2,117½, 3d class—yielding $389,736 36. The number of miles traveled by through passengers was 15,663,978; by way passengers, 12,312,051. The average miles traveled by each through passenger was 244; by each way passenger, 40 miles. The average amount received from each through passenger was $5 60.4; from each way passenger, $1 27.9. The average amount received from each through passenger per mile was 2.2; from each way passenger 3.1.

The whole number of locomotives owned by the company is 83; of which 36 are on the Western, and 47 on the Eastern and Northern divisions of the road, of the whole number, but 62 are in good order, 4 are being rebuilt, 3 are not in use, 3 require rebuilding, and the remainder to be repaired. The total number of miles run by engines has been 1,592,377, viz: with passenger trains, 571,314, with freight trains, 881,818, with other trains, 139,245. Average number of miles run to one pint of oil 20.86; to one cord of wood 51.84; average cost of repairs per mile in cents 5.88; do. wood do., 5.31; or, cost of wood, oil, waste, and repairs, per mile, in cents, 11.75.

The rolling stock consists of 2 twelve-wheel and 63 eight-wheel passenger cars, 9 second class, 7 emigrant, 21 mail, baggage and express, 6 drovers', 1 paymaster's, 2 wrecking, 30 gravel, and 932 freight and stock cars.

The total value of materials on hand, March 1, 1861, was $194,223 82. Value of engines $601,608. Value of rolling stock $527,135.

The business of this road the first quarter of this year compares as follows:

	1860.	1861.
January	$31,519 76	$53,414 15
February	32,301 23	42,354 80
March	39,501 04	41,742 91
Total	$109,322 03	$138,011 86
Increase		$28,689 83

Smyrna and Aidin (Ottoman) Railway.

A communication has been received by the directors, through the Turkish Embassy in London, announcing the completion of a supplementary concession, authorizing the company to issue 250,000*l.* in debentures, and granting a prolongation of time for completing the works to Aidin, the period fixed under the original concession having expired on the 23d of September last. The extension is for three years, and the debentures are to bear 6 per cent. interest, redeemable in five years.

Bridge over the Rhine.

The Bridge over the Rhine at Kehl, on the line of the Eastern Railway of France being nearly completed, experiments to test its strength were made on it a few days back. First of all, the two turning parts of the bridge were manœuvred and were found to work admirably. That of the French side, which weighs not less than 350 tons, was moved with the greatest facility by eight men, then by four, and then only by two. Afterwards a train, consisting of five locomotives and their tenders, the locomotives alone weighing 175 tons, and the whole forming a weight of nearly 3½ tons per meter, passed over the line, and then remained stationary on the first part of the bridge on the French side; next, a locomotive and 15 wagons filled with stones, weighing about 1¾ tons per meter, was driven over, and was subsequently stationed for a time on the middle of the bridge; in the third place, the two trains passed over side by side, and were made to stand on different fixed parts of the structure; next, two other trains, each consisting of five locomotives, were also driven over the bridge side by side, and were made to remain together some time on the turning bridges and on other portions of the structure; lastly these two trains crossed each other at full speed. During the experiments the different parts of the bridge scarcely yielded, proving the correctness of the engineer's calculations and the great care with which the bridge has been constructed. The cost of this bridge is estimated at 280,000*l.*, one-half of which is to be borne by the Grand Duchy of Baden.—*London Railway Times.*

New York Canals.

The work necessary for preparing the enlarged Canal for seven feet water, at the opening of navigation, seems, from all accounts, to be vigorously prosecuted.

On the Eastern Division, Com. Skinner is leaving nothing undone to put the Canals in the most complete order. The following comprises a portion of the work now in progress:

Bottoming out 3 miles from West Troy toward Albany; 2 miles below upper Mohawk Aqueduct; ¾ of a mile below lock 33, near St. Johnsville; 1⅛ mile below lock 42 at Mohawk; 2 miles through city of Utica and eastward. The bottoming out, in all these places, is being done in a more thorough manner than ever before.

The 16 locks above West Troy to Cohoes, where so much delay was experienced last season, are being put in complete condition.

The banks between Little Falls and Jacksonburg, three miles, are being raised so as to obtain the full depth of seven feet. This improvement will cost from $10,000 to $12,000. All the lock gates and structures are being put in the best possible order.

This division of the Erie Canal will be in thorough readiness for seven feet depth of water. The full capacity of the enlargement will be obtained in every respect.

The Champlain Canal will be in as good condition this spring as ever it was. The large sum of $35,000 having been expended on it last season, in deepening and widening it, precludes the necessity of a large expenditure this spring.

Section 1, of the Black River Canal, which is the worst part of it, is not under contract for repairs, and will be put in readiness by the Superintendent. The entire Canal will be put in good condition. The South Branch Reservoir, completed last season, will be brought into use this spring, which will make the third reservoir completed at the head waters of the Black River.

The amount of work going forward and necessary to be done on this division for seven feet of water, cannot be performed so as to insure good navigation before the 1st of May. Over 1,000 laborers are now at work.

On the Middle Division a large amount of repair work is going forward. Over 2,000 laborers are employed daily.

A large amount is being done on the Jordon Level and in the vicinity of Syracuse.

We are informed that the full depth of seven feet will be secured, not only upon this division of the Erie, but also upon the Oswego and Cayuga and Seneca. It is doubtful, also, whether this result can be reached upon this division before the 1st of May.

The Western Division, like the others, will be in better condition than ever before and will be ready for seven feet. The principal enlargement work remaining to be done, and in progress, is between Lockport and Buffalo. There is no doubt, however, of its being so far completed as to meet the wants of trade.

We may expect, then, this spring, a new era in canal navigation. For the first time, the full benefits of the enlargement will be realized the entire length of the Erie, Oswego, and Cayuga and Seneca canals. Whatever doubts may have been entertained on the subject, we are assured from the most reliable sources that seven feet depth of water will be realized this season.—*Albany Argus.*

Persons Employed on Railways.

It appears from a return of the Board of Trade that the total number of persons employed on railways open and in course of construction in the United Kingdom at the end of June, 1860, was 181,373 on 10,201 miles open for traffic, and 1,051 miles in course of construction, against 156,245 persons employed at the end of June, 1859, on 9,796 miles open for traffic and on 993 miles in course of construction, showing an increase of 25,128 of persons, 405 miles open for traffic, and of 51 miles in course of construction.

Of the 181,373 persons employed in June, 1860, 72,182 were laborers, 32,182 artificers, 19,523 porters and messengers, 10,243 clerks, 9,902 plate-layers, 5,491 miscellaneous employment, 4,451 guards and breaksmen, 4,042 assistant engine-drivers and firemen, 3,969 engine-drivers, 3,334 switchmen, 3,019 station-masters, 2,988 foremen, 2,782 police and watchmen, 2,689 gate-keepers, 1,439 inspectors and time keepers, 586 superintendents, 490 ticket collectors, 361 engineers, 360 secretaries and managers, 328 store-keepers, 311 accountants and cashiers, 281 draughtsmen, and 56 treasurers.

Of the 181,373 persons employed 134,177 were employed on 7,417 miles open and 631 miles constructing in England, 23,980 were employed on 1,466 miles open and 189 miles construncting in Scotland, and 23,216 were employed on 1,318 miles open and 231 miles constructing in Ireland.

The number of persons employed on the 1,051 miles in course of construction in the United Kingdom was 53,923, including 42,126 laborers, and 7,381 artificers. The number employed in June, 1859, on 993 miles was 39,975, including 31,483 laborers, and 5,694 artificers. Of the 53,923 persons employed on lines in course of construction, 30,303 were employed in England on 631 miles, 9,499 on 189 miles in Scotland, and 14,121 on 231 miles in Ireland.

The number of persons employed on the 10,201 miles of railway open for traffic, and at 3,601 stations in the United Kingdom was 127,450, of these 30,056 were laborers, 25,165 artificers, 19,342 porters or messengers, 10,086 clerks, 9,902 plate-layers, 4,451 guards or breaksmen, 4,078 of miscellaneous employment, 4,042 assistant engine-drivers or firemen, 3,969 engine-drivers, 3,334 switchmen, 3,019 station masters, 2,689 gate-keepers, 2,526 policemen or watchmen, 1,778 foremen, and 1,044 inspectors or time-keepers.

Of the 127,450 persons employed 103,874 were employed on 7,417 miles of railway, and at 2,814 stations in England, 14,481 persons on 1,466 miles and at 486 stations in Scotland; and, 9,095 on 1,318 miles, and at 301 stations in Ireland.—*Herapath.*

Commerce of Great Britain for 1860.

The total declared value of exportations was £135,842,817, being an increase over 1859 of £5,431,288, or rather more than 4 per cent., and over 1858, a year of depression caused by the crisis of 1857, of £19,234,061, or nearly 15 per cent. The business of 1859 and 1860 compares as follows:

	1859.	1860.
Exports to the U. S.	£22,533,405	£21,613,111
Other foreign	61,715,128	70,557,449
To British possessions.	46,143,996	40,672,257
Total	£130,411,529	£135,842,817

The declared value of the imports for the year are given in the tables before us, the publication in that department being always a month behind that of the exports. For the eleven months ending with the 30th of November they were:

Eleven months, 1860	£144,887,078
" " 1859	122,538,694
Excess in 1860	£22,348,384

From this it appears that while the exports during the whole year showed an increase over 1859 of only £5,431,288, thus showing a balance £16,917,096, or about $84,000,000 against the trade of the country, without taking the December imports into account, which would increase the deficiency. In these facts the *Economist* finds a sufficient solution of the present stringency of the London money market. It says:

When we remember that two months and a half have elapsed since the 30th November, and consider that these months have unquestionably been months of great activity in our import trade, we shall be able quite to understand why capital is scarce with us now; it would be a matter of surprise if it were still plentiful.

The following are the largest items in the account for the eleven months ending Nov. 30, in each year:

	1858.	1859.	1860.
Wheat	£8,576,628	£8,064,614	£14,010,570
Cotton	26,340,402	28,762,560	31,567,120
Barley	1,924,856	1,961,761	3,060,801
Oats	1,865,824	1,667,398	2,494,671
Tea	4,597,787	4,509,645	5,931,346
Timber	2,228,455	3,264,789	3,940,137
Wool	7,474,584	8,538,910	9,472,810
Wine	1,799,003	2,320,479	3,882,651
Butter	1,603,018	1,812,114	2,119,812

These figures speak for themselves and need no comment. We read in them that we have had a bad harvest; that we have imported grain largely to feed our people; that there has been an American revolution, for no less a name is sufficient; that the first effect of this revolution is to make every holder of American produce anxious to ship it to Europe, while the old track is still open, and before the possible, though not, as we think the inevitable consequences of disruption should have intervened. We cannot wonder that in such a state of commerce the rate of interest is higher, for it is evident that our available resources must be largely absorbed.

Nor is this the whole of the instruction which these tables afford us. It is not only necessary for our trade that we should have capital; we must likewise have money, and our imports of bullion were seriously less in 1860, than in 1859. The figures are these:

	1860.	1859.
Importations of bullion from United States	£4,792,582	£9,672,981
Ditto from Australia	6,716,857	8,627,854
Total	£11,512,439	£18,300,835

And, in addition to this diminution of the supply, we have had a new demand to supply. We have sent £1,727,220 of gold to America, a coun-

try which, in all ordinary times, takes none from us, but, on the contrary, sends us much. Not only, therefore, is the loanable capital of the country largely absorbed in our extended imports, but the supply of that kind of capital which is most available for foreign payments, and which must effectually and rapidly tell on the rate of interest, is for the present diminished.—*London Economist.*

Railways in Austria.

Official statistics supply details with regard to the earnings of Austrian railways in the course of 1860. The State lines in Venetia and the Tyrol, altogether 738 miles in length, carried last year 4,378,663 passengers, and earned 1,661,492*l.*; the lines conceded to French proprietors, extending over 799 miles, carried 2,020,200 passengers, and earned 1,965,117*l.*; the Ferdinand, Theiss, Gallicia, Pardubitz and Reichenberg, Aussig and Toplitz, and Graz and Kossac lines, carried, over 1,054 miles. 2,865,360 passengers, and earned altogether 2,178,588*l.*; making a total of 9,264,233 passengers carried over 2,594 miles, and a nominal total receipt of 5,806,637*l.* As, however, the receipts of Austrian railways are derived from notes of which the value is variable, a deduction of 30 per cent. must be made to arrive at the mean actual receipts, reducing the amount to 4,064,003*l.*, or about 1,567*l.* per mile. This amount is 9.6 per cent. below the earnings on the Prussian lines. The totals given above do not comprise the Western line, the line from Mohacz to Funfkirchen, from Brunn to Rositz, and from Wolfsegg to Traunthal (the last is only a coal traffic). The receipts of these lines, when ascertained, will, of course, affect the mileage total given above. On the Southern lines the goods traffic amounted to 63.1 per cent. of the whole receipts; on the Lombardian lines it amounted to only 33 per cent.; on the lines ceded to French proprietors it reached 75 per cent.; and taking the whole of the lines of which particulars have been given, the mean goods traffic was 70.1 per cent. in excess of that carried on the Prussian lines.—*London Railway Times.*

Northern Railroad of Canada.

The annual meeting of this Company was held at Toronto on the 13th of February. The report of the directors shows that the assistance given by the province and the steps taken to re-organize the company had been attended with the most satisfactory results. The freight carried during the past year was 125,345 tons, against 91,402 the previous year; and the number of passengers 91,582, against 78,072. The gross earnings increased in the same period from $240,044 to $332,967; and the net profit from $42,844 to $72,500. The directors have been able to pay the interest on the first and second preference bonds, leaving a balance of 6,634*l.* in the treasury available for interest. The contract for the restoration of the line is in progress, and will be completed early next year, when the directors anticipate that they will be able to do a large business at a less proportionate expenditure. The floating debt of the company, with the exception of a small amount unadjusted, has been liquidated. The steam connections on Lake Ontario and the river St. Lawrence have been efficient and satisfactory, and have relieved the company from the embarrassments of unfavorable traffic relations with the Grand Trunk, whose recent policy of close combinations seemed especially dirrcted against this as a through route, notwithstanding that it has unsually contributed to that company during the seasons of navigation an average of 12,000 tons of freight free of all commissions and charges, an amount that during the past year might have been doubled, had not this company been necessarily driven to other though scarcely less favorable outlets. But the directors have preferred to await the abandonjment of a system more injurious to Grand Trunk than to Northern interests, rather than engage in an active traffic hostility or rash competition, and they have reason to believe that the issue will ustify their course.

Chesapeake and Ohio Canal.

This canal has commenced business this year more favorably than in any previous season, and it might be added, with good hope of continuance. During the month just closed, the arrivals of boats at the tide-water collection office at Georgetown were two hundred and twenty-five. The tolls collected there last week amounted to little more than $5,000, and during the month to between $10,000 and $11,000. It is unsual to estimate one-third of the Georgetown tolls for the tolls collected at the offices above, which is to be added to the foregoing. These receipts are unprecedented thus early in the season. Of course the largest proportion of tonnage downward was Cumberland coal, but no less than 17,890 barrels of flour have been received during the month. Besides this heavy business in coal and flour, there have been considerable arrivals of corn, wheat, wood, limestone and the usual articles of canal trade.—*National Intelligencer.*

Railroad Earnings.

The following are the earnings of the Great Western Railway of Canada for the week ending March 29, 1860:

Passengers	$18,369 21
Freight and live stock	31,158 81
Mails and sundries	1,329 54
Total	$50,857 56
Corresponding week of last year	46,383 01
Increase	$4,474 55

The earnings of the Chicago, Burlington and Quincy Railroad Line in March were:

	1860.	1861.
Freight	$106,435 00	$115,062 20
Passengers	46,470 70	39,664 86
Mails	8,363 11	4,065 46
Total	$161,268 81	$158,792 52
Decrease		$2,476 39

The earnings of the Panama Railroad in February, 1860, were $163,558 20
1861 111,132 05
Decrease $52,426 15

The earnings of the Rock Island Railroad in March, 1860, were $76,124
1861 75,274
Decrease $850

The earnings of the St. Louis, Alton and Chicago Railroad in March were $79,597 47
Corresponding period in 1860 77,192 77
Increase in 1861 $2,404 70

The earnings of the Galena and Chicago Railroad for March, 1861, were $100,767 26
Same month, 1860 80,793 07
Increase in 1861 $19,974 19

The earnings of the Cleveland and Toledo Railroad in March, 1861, were $85,873
March, 1860 85,802
Increase $71

The earnings of the Buffalo, New York and Erie Railroad in March, 1861, were $50,736 44
March, 1860 49,989 73
Increase $746 71

The earnings of the Michigan Central Railroad in March, 1860, were $160,311
March, 1861 151,670
Decrease $8,641

The earnings of the Chicago and Northwestern Railroad for March, 1861, were $64,542 28
March, 1860 45 979 19
Increase $18,563 09

The earnings of the Toledo and Wabash Railroad in March, 1860, were $64,414 37
March, 1861 61,050 77
Decrease $3,363 60

The earnings of the Milwaukee and Prairie du Chien Railroad, for March, 1861, were $41,742 91
March, 1860 39,501 04
Increase $2,241 87

The receipts of the Grand Trunk Railway of Canada for the week ending March 30th, 1861, were $88,392 67
Corresponding week, 1860 77,308 98
Increase $11,083 69
Tot. traffic from July 1, 1860, to date, $2,568,020 44
Corresponding period, 1859 2,118,117 42
Increase $449,903 02

The following is the Illinois Central Railroad Company's statement for March, 1861:

Land Department.

Acres Construction Lands sold	8,037.26	for	$134,566 63
Acres Interest Fund L'ds sold	814.54	"	11,160 34
Acres Free Lands sold	2,169.64	"	33,164 40
Total sales during the month	11,021.46	for	$178,891 37
To which add Town Lot sales			742 20
Total of all			$179,633 57
Acres land sold since Jan'y 1, 1861	31,151.96	for	$480,782 98
Acres sold prev'sly (net sales)	1,260,273.46	for	16,147,983 91
Total	1,291,425.42	for	16,628,766 89

Construction Bonds canceled in March, 1861 $22,000 00
Construction Bonds canceled previously 1,812,000 00
$2,824,000 00
Total cash receipts in March $61,183 32
Total receipts since Jan. 1, 1861 184,378 67
Total cash and bonds received to March 31, 1861 4,380,277 69

Traffic Department.

American Railroad Journal.

Saturday, April 13, 1861.

Share and Money Market.

The extensive military and naval forces fitted out from this port and dispatched South, are regarded as almost the same thing as actual hostilities, and have caused a very heavy fall in all kinds of securities. Prices have given way from 5 to 10 per cent., under the idea that an actual collision between the forces of the United and Confederated States is now inevitable. It would be idle to speculate upon the future either as to political events, or the future condition of the Share Market.

Money continues most abundant, with very little use or call for it. It is probable that there may be more demand upon the opening of Lake and canal navigation. There is a vast amount of produce still interior to move which will require a large sum. Our railroads are still doing a good business, with the prospect of a prosperous year. The season has opened very favorably for farmers. We have yet to hear the first complaint of the effect of the winter upon the *wheat* crop. This is looking remarkably well and has escaped one of its great perils. Were it not for our political troubles, the country now would be in a better position than during any previous period.

Madras Railway.

The receipts on the open portion of the south-west line, for the half-year ending Dec. 31, amounted to 36,849*l.*, on 137 miles (or 269*l.* per mile), against 31,835*l.* on 96 miles (or 331*l.* 12*s.* per mile) in the same period of the previous year. The directors have received accounts of the opening of a further section of 70 miles of this line, westward, from Tripatoor, on the first of February, making the entire length now open 207 miles, from Madras to Salem.

Montreal and Champlain Railway.

The report of this company for the year 1860 was presented at the annual meeting held in Montreal on the 13th of February. The gross earnings were $232,803 (being $8,373 in excess of 1859); the gross working expenditures were $136,349, but of this sum $9,255 must be classed as extraordinary outlay, leaving for the ordinary working expenses $127,094 (being 54 6-10 per cent. of the gross receipts), which deducted from the earnings, leaves a balance of $105,668, of which $92,451 have been applied to the payment of interest, and the balance to the liquidation of floating debt. The increase in the gross revenue has been derived from the legitimate business of the company. The casual revenue formerly arising from the works of the Victoria-bridge having altogether ceased, it is gratifying, notwithstanding, to find that there has been a progressive improvement in the general traffic.

"Oil Well" Mania.

Thousands of barrels of what is known as "Well Oil" is being distributed throughout this country, and recently large shipments have been made to Europe.

This oil is sold at from twenty to thirty cents per gallon at the "Wells" in its crude state, the many exaggerations as to the immense profits arising from its manufacture and sale, have so raised the fever of speculation that lands in Pennsylvania and Ohio which have been heretofore almost valueless, have been sold recently as high as $1,500 per acre, and that too without the positive knowledge that a single gallon of oil could be obtained on the premises, the purchase being based entirely on the fact that "Oil Wells" had been discovered in the immediate neighborhood.

As an illuminator, this oil when properly prepared and purified has no superior, while as a lubricator it is and must be valueless.

The best description of crude "Well Oil" we have examined, is the "Mecca or Rock Oil"; it is of a greenish color, but when heated, precipitates a large per centage of gritty material, which when analyzed proves to be of the nature of fine "pulverized Rottenstone," and when this is extracted the oil left is comparatively clear, but without sufficient body to render it at all suitable for any other than burning purposes, renewing the conclusions so often heretofore arrived at by parties trying coal oils for lubricators.

We understand that the crude "Mecca or Rock Oil" has been used upon a number of railroads in Pennsylvania and Ohio in order to test its merits as a lubricator, but that upon nearly all it has been abandoned, after becoming evident from the extra wear upon the machinery occasioned by its use, that the saving in the first cost of this oil was more than counterbalanced by the extra cost of repairs to the machinery.

In the excepted cases it seems to have had secret and special influences, rendering its use for a while at any rate compulsory, in such quarters.

We give the above statement of facts because while the intrinsic value of this "Well Oil" under whatever name it may be known, is undoubted and a field for its almost unlimited use can be found, it will retard and damage its proper introduction if pressed for purposes for which it is not only unfit, but actually extremely detrimental, as several of our leading railway officers have found after careful trial. The discussion of the results of a really valuable article never injure it, and publicity given to its successes or failures are due to all concerned, producers as well as consumers.

Pittsburg, Fort Wayne and Chicago R. R.

At the annual election for directors held on the 27th ult., the old board were re-elected without opposition. The following is the list: G. W. Cass, Wm. Robinson, Jr., Spingler Harbaugh, Thomas A. Scott, Pennsylvania; Kent Jarvis, John Larwil, W. Merriman, R. McKeiley, Ohio; Samuel Hanna, Pliny Hoagland, J. L. Williams, A. L. Wheele, Indiana; Wm. B. Ogden, John Evans, Illinois; Gilead A. Smith, New York. At a subsequent meeting of the board, G. W. Cass, Esq., was re-elected President. Mr. Cass is also Superintendent of the road; J. P. Henderson, Treasurer; and T. D. Messler, Auditor. The office of the company is at Pittsburg, Pa. The financial agent in New York is Gilead A. Smith, 207 Broadway.

Locomotives Crossing the Susquehanna.

We learn that the passenger trains on the Philadelphia, Wilmington and Baltimore Railroad have commenced running through between Baltimore and Philadelphia. The engine, mail, baggage and passenger cars are all run on a boat recently constructed for that purpose, and thus transported across the river. Heretofore passengers have been obliged to leave the cars they commenced their journey in, upon reaching the Susquehanna, and after a long tramp on each side of the river, to and from the boat, resume their journey in another train. Hence two engines and two trains of cars were required to perform the work of only one; involving additional expense to the company, as well as loss of time, and no little inconvenience to the passengers.

English Railway Insurance.

The report of the Company for the Insurance of Passengers upon Railways in England, states that "the amount of premiums received and due for the half year ending the 31st of December last, amounted to £18,908, against £15,588 in the corresponding half of 1859. The total income for the year 1860 was £38,709, against £30,766 during the year 1859, showing an increase of 25 per cent. The commission and Government duty amounted to £2,713, and the working expenses to £4,171; the amount paid for compensation being £9,971. After payment of interest to the proprietors, and the usual charge for liquidating preliminary expenses, a balance of £8,329 remained, to which must be added £1,624, making a total available balance £10,954. From this sum interest at the rate of 4 per cent. per annum would be paid to the proprietors, and the remainder held as a fund to meet the risks upon the policies in force. The compensation paid during the year 1860 amounted to £21,056, or 54 per cent. of the premiums received. This sum had been paid for 12 fatal cases and 1,187 cases of personal injury. The number of casualties during the recent frost was quite unprecedented in the company's experience. Six claims for serious injuries arose from the accident at Wimbledon, in which the late lamented Dr. Baly lost his life. In a previous accident on the London and Northwestern Railway a gentleman named Kelly was killed. He was, however, insured in this office, and thus secured for his bereaved wife and large family the sum of £1,000, which they would have the consolation of soon receiving, and for which only 6d. had been paid. It appears that in the general accident department as many as 1 in 12 receive compensation for accidents.

Sale of the St. Louis, Alton and Chicago Railroad.

Mr. James Robb, special Master in Chancery, for that purpose appointed, advertises in the *Illinois State Register* that he will sell, under a decree entered in the Macoupin Circuit Court, the St. Louis, Alton and Chicago Railroad, and all appurtenances, fixtures, &c. Sale to take place May 22, 1861, in the city of Springfield.

Interest and Dividends.

The Central Railroad of New Jersey has declared a dividend of two and a half per cent. payable 15th instant.

The Macon and Western Railroad Company (Ga.) has declared a quarterly dividend of three per cent., payable to New York stockholders at the Bank of the Republic on and after the 15th instant.

Railways in Russia.

In order to complete the 1,070 miles of the Grand Russian railways early next year, a final 62½ silver roubles are called up for payment, between the 5th and 15th of April, one-half of which Messrs. Baring, Brothers, will advance for a period of six months, at 5 per cent. interest, for any Shareholders who desire it.

Steam Fire Engines.

The Baltimore *American*, of April 4th says: A trial was had at one o'clock yesterday, in Monument Square, of a superior *Steam Fire Engine*, constructed by Messrs. Poole & Hunt at the "Union Works," near Woodbury, for Georgetown, in Demerara, South America. The engine weighs about 4,500 lbs., without water and fuel, and with these 5,020 lbs. It has the tender permanently attached. The engine threw a body of water 229 feet through an inch nozzle, and 206 feet through a ⅞ inch nozzle. The engine has been named the "City of Baltimore," and under the charge of Mr. Michael Dunn, the present engineer of No. 4 Engine, who will go with and superintend it in the designated place, will fully sustain the high character of the well known builders for excellent workmanship. The cost of the engine was $2,800.

Mobile and Great Northern Railroad.

The Mobile *Register* says the work of tracklaying on the Mobile and Great Northern road has already commenced, and congratulates its readers on the expectation that by the 1st of October next, they can go to Montgomery, by railroad, in five hours.

Cincinnati, Cumberland Gap and Charleston Railroad.

The Knoxville *Whig* says this road is progressing beyond the most sanguine expectations of its friends. There are now 500 hands on the road between Morristown and Chucky river, a space of twelve or fifteen miles. The grading is almost completed on that section, and the track-laying will commence in about six weeks. The contractors are men of means, and of great energy, working their own hands for the most part, and going ahead as though they were driven by the application of steam power.

Junction and Breakwater Railroad.

This company was chartered in 1856 with authority to construct a railroad from the Delaware railroad to Lewes. The first division of the road from Harrington, on the Delaware railroad, to Milford, 8½ miles, was completed and opened for use September 7, 1859. It is operated, (in connection with the Delaware, and New Castle and Wilmington railroads,) by contract with the Philadelphia, Wilmington and Baltimore Railroad Company. The total length of the road when completed to Clews will be 29 miles. The amount of share capital authorized is $125,000. The amount subscribed to the close of the fiscal year, January 14, 1861, was: upon the first division $44,250; and upon the second division $21,025—making a total of $65,275. The amount paid in, in cash and bills receivable, was: upon the first division, $42,129; and upon the second division $15,578 93—making a total of $57,707 93, leaving the amount still due $7,567 07. From this should be deducted $890, being estimated loss by insolvency, and $850 for bills held by subscribers against stock—leaving a balance of $5,827.

The receipts from all sources during the year, including balance of $2,716 51 from previous account, has been $22,248 58; and the expenditures $21,503 19—leaving a balance of cash on hand of $745 39; to which add bills receivable $1,718 19—making a total of cash and bills receivable of $2,463 58.

Up to July last the cost of operating the road, with two daily trains each way, was $17 per day; since then, the number of trains have been reduced, and the expenses probably diminished, by dispensing with the morning train up and the night train down every alternate day. The increase in the receipts of the road during the last four months of 1860, as compared with the corresponding months of the previous year, when the road first went into operation was equal to about 30 per cent.

The work upon the second division was progressing. Previous to the commencement of the year surveys had been made between Milford and Georgetown; and in March, 1860, the line was located and proposals received for the graduation and track-laying, consisting, with the contemplated sidings, of 16 miles in length. The contracts were closed on the 31st of May, and work commenced on the 28th of June following, near Milford, since which time it has been prosecuted with efficiency and energy, and to the entire satisfaction of the board. The entire grading, bridging, ballasting, etc., has been completed on that portion of the division extending over ten miles of the track from Milman's 5½ miles south from Milford, to the depot grounds at Georgetown, and is now ready to receive the ties, rails and superstructure, while the graduation, bridging and ballasting has been done on about one-half of the residue of the road between Milman's and Milford. The amounts owing by subscribers, if promptly collected is considered ample to complete the graduation and masonry of the entire division between Milford and Georgetown. The report says:

The semi-annual appropriations for the road from the Treasury of the State under the provisions of the act for the encouragement of internal improvements, passed at the last session of the Legislature, have been promptly paid as they fell due, into the Treasury of the Company, amounting in the aggregate up to the first of the present month, to the sum of $27,600, which has been applied in payment of the balance due on the purchase of iron for the first division of the road, leaving a remaining and final balance of about $5,600 still due thereon, and which the board hopes to be able to discharge in a short time. I state this fact in the conclusion of my remarks, because I think it cannot fail to afford you some satisfaction to know that if the work has not proceeded with as much rapidity as some may have hoped and desired, we have been able thus far, to pay for it as it progressed, without being obliged to pledge our credit and discount our prospective resources at heavy and ruinous rates, as too many companies before us have been constrained to do, and without incurring as yet, any permanent lien or incumbrance whatever, on the corporate means and property of its stockholders; and that we have, therefore, good ground to believe that we shall be able at no remote day, to complete and pay for when finished, the whole of this valuable and important projected improvement, not only to Georgetown, but to its ultimate terminus the harbor of the Delaware Breakwater, if nothing should occur in the meanwhile to disappoint reasonable hopes and expectations of the public, in regard to the appropriations from the source above referred to, on which we must mainly rely for the final accomplishment of our great and durable object.

The president adds that the work upon the second division was let at a lower price per cubic yard, than upon the first division of the road between Harrington and Milford, although that was regarded at the time as remarkably low and moderate, and that the work upon it has cost less per mile, than the same work upon the first division, notwithstanding the embankments are two feet wider on their surface. We can, therefore, safely congratulate the stockholders and proprietors of it, on the possession of a railroad so far as it has now been built, well and substantially constructed in all respects, at a smaller cost per mile perhaps than any other railroad in the country.

The office of the company is at Milford, Del. The officers are:

President—John W. Houston.
Treasurer—H. W. McColley.
Chief Engineer—Tench F. Tilghman.

Pacific Railroad.

At a meeting of the new Board of Directors, George R. Taylor was re-elected President, and Daniel R. Garrison Vice President.—*St. Louis Republican.*

The citizens of this county will be glad to learn that Mr. Taylor has been re-elected President of the Company, for it is mainly by his indefatigable energy and indomitable will and determination to push the road forward that so much has been accomplished towards the completion of the road within the past year. Mr. Taylor is the right man in the right place, and by his labors and past experience, we may reasonably expect him to be equal to every emergency. If it be possible for the road to reach this point this summer, Mr. T. is the man to put it through.—*Warrensburg Union.*

Opening of a Swedish Railroad.

That portion of the eastern division of the great railroad which is to cross Sweden from Gothenburg to Stockholm, opened October 25th, extends from Stockholm to Sodertelge, and is the first line running from the capital. The king, the diet, and an immense multitude of people, participated in the celebration. The general superintendent of the whole Swedish railroad system is Mr. N. Ericsson, a brother of the inventor of the caloric engine.

Twin Creek Railroad.

The following gentlemen have been elected directors of this road: A. J. Hodder, J. E. Donnellan, S. S. L'Hommedieu, Daniel McLaren, Eden B. Reeder, John W. Owens, Esq., Geo. Carlisle.

President—Daniel McLaren, Superintendent C., H. and D. R. R.
Vice-President—John W. Owens, Esq.
Treasurer—Tunis V. Dubois.

Western Maryland Railroad.

We learn that this road which is now under contract and being built between Baltimore and Hagerstown, Md., will be completed to Westminister in a week or ten days. This is a local enterprise which promises to be of great advantage to both the City and State. Beyond Westminister, the grading is nearly completed for a distance of twelve miles. The Baltimore Correspondent of the Philadelphia *Inquirer* says of this road:—

When fully in working, it will bring us within eighty miles of Hagerstown in Washington county, one of the richest, most productive agricultural regions in the United States. We will be nearer to Chambersburg, Newville and Harrisburg by that route than Philadelphia is. In the region of country tributary to this railway are produced nearly six hundred thousand barrels of flour, besides vast amounts of wheat, corn, rye, oats, provisions, cattle, iron ore, lime and numerous other valuable products. Much of this trade has been going to Philadelphia over the Cumberland Valley and Pennsylvania Central routes, but, when the Western Maryland is in operation, only eighty miles in length, it will be difficult to compete with it in freights. Hence, Baltimore must reap the advantage of having added to her commerce a large trade legitimately, belonging to her. In a few weeks we expect to see hundreds of tons of iron ore, lime, grain, flour, provisions, &c., coming over this road from Carroll county to Baltimore, with considerable passenger travel. It promises to be one of the best and most profitable works of its kind in the country. Our city endorsed its bonds last year to the amount of a half million dollars, and they are now considered amongst the very best investments.

Railway Bills in 1861.

The report of the Board of Trade on railway and canal bills, states that the number of bills relating to railways in Great Britain and Ireland deposited this session amounts to 283. Of this number 240 authorize new works. The proposed new works to be authorized by the 240 bills are for 117 new companies to construct 2,015 miles of railway, viz., 1,446 miles in England, 220 miles in Scotland, and 349 miles in Ireland. The remaining 123 bills are promoted by existing companies for the construction of 1,002 miles of railway, viz., 814 miles in England, 67 miles in Scotland, and 12 miles in Ireland. The total length of proposed new lines was, therefore 3,017 miles, and there were in addition, 65 miles of deviation lines. There were 15 bills for new lines in the metropolis, and 8 bills for new lines in the suburbs. The report contains general observations on the various powers sought by the railway bills of the present session, together with quotations from the report of the select committee on railways and canals made in the year 1853. The report also adverts to the opinion expressed by the Royal Commissioners appointed in 1846 on the subject of metropolitan railways. Their Lordships observe with regard to these schemes that the best mode of diminishing the great pressure from street traffic which is now so frequently experienced in the metropolis would be, not to lead the traffic of several railways to a central station, but to provide railways for distributing the traffic intended for the metropolis at as many points in the metropolis as possible, and for rendering it unnecessary for the traffic which is intended to be carried

to places beyond the metropolis from entering the streets, at an average cost of £20,000 a mile, the 3,000 miles would involve a capital of £60,000,000. —*Herapath.*

Railways in Italy.

The Sardinian Government have now 354 miles in operation under their administration. The Victor-Emmanuel is working 170 miles, making an aggregate of 524 miles in the Sardinian dominions. To this total will shortly be added 37 miles for the Ossola, and 29 miles from Torreberetti to Pavia, the works having been commenced in both cases. In the Emilia a line from the old boundaries to the Sardinian States as far as Bologna (105½ miles), and a line between Plaisance and Bologna (89 miles), are worked by the Societe des Chemins de Fer Lombards et de l'Italie Centrale, and the rest (16 miles) by the State. Tuscany has now 222½ miles opened, 121 miles in course of construction, and 198 conceded. In the Neapolitan territory 125 miles are opened or nearly finished, and 20½ miles are in a less advanced state. In Lombardy, at the date of the peace of Villafranca, the Societe des Chemins de Fer Lombardo-Venitiens, Central-Italien, et Autriche Meridionale had opened the Magenta, Milan, and Peschiera (109 miles), and the Milan and Camerlata (27 miles), and had other concessions yet unexecuted. Taking the various Italian provinces, there are altogether 1,115 miles in operation and 411 miles in course of construction or about to be commenced under recognized concessions.—*London Railway Times.*

Journal of Railroad Law.

WRITTEN CONTRACTS: AGREEMENTS TO ENTER INTO, WHEN BINDING: AUTHORITY OF THE ENGINEER OF A RAILROAD.

It is one thing to agree to enter into a contract, and another thing to formally execute the contract itself. But if the agreement is perfect, the execution of the contract follows as a matter of necessity which the courts will enforce, and the damages which might result to a party from a breach in executing the terms of the contract, will follow as the measure of damages, where a party refuses after an agreement, to enter formally into the contract.

In June, 1850, the Hudson River Railroad Company advertised for proposals for grading, among others, section 67 of their railroad. The plaintiffs made proposals in writing, for performing the work and furnishing the requisite materials, at certain prices. Subsequently, the proposal of the plaintiffs was accepted, by resolution of the company, and section 67 awarded to them. Thereupon they proceeded to the performance of the work; purchased horses, cattle, carts, and all other things necessary for the completion thereof, according to the terms and within the time limited for its performance; but the defendants refused to allow them to proceed with the work.

It appears that the advertisement contained the following clause: "Contractors, whose bids may be accepted, will be required to *enter into a contract*, and commence the work without delay." This was signed by the chief engineer of the company. The plaintiffs' acceptance contained the following clause: "On the acceptance of this proposal for all or either of the said sections, we hereby bind ourselves *to enter into written contracts*, and give the required bond and security, to perform the said work for the consideration above mentioned. On the 6th of July, 1850, the defendants gave notice to the plaintiffs, that they accepted their proposition for number 67, and that they were required to come and execute the contract immediately. On the 15th of the same month, Frederick Pratt, Jr., one of the plaintiffs, called upon Mr. Jarvis, the resident engineer, whose business it was to attend to the execution of the contract. Mr. Jarvis thereupon took printed blanks, prepared for the purpose by the company, and filled them up for section No. 67, pursuant to the terms of the proposition which had been accepted; and the contracts were signed by the plaintiff, Frederick Pratt Jr., and witnessed by Mr. Jarvis. Pratt, Jr., proposed to take the contract with him to a point on the Ogdensburgh railroad, where his father, the other plaintiff, was, for the purpose of getting the signature of the latter to the contract; he stating that he would return with the contract, executed by his father, within three or four weeks, which, as he said, would be within the time to commence the work, Jarvis assented to his so doing, and Pratt, Jr., took the contract away with him.

On the 5th of August, 1850, the defendants' chief engineer made a written certificate that the plaintiffs had omitted to sign the written contract prepared for and delivered to them, and had violated its provisions by making a sub-contract with C. & H. De Graw, without the approbation of the company; wherefore, he recommended the defendants to declare the contract abandoned; which was done by resolutions passed the next day, and the work let to other parties.

The referee, before whom the cause was tried, found that Jarvis had authority to extend the time for the execution of the written contract; that he did so extend it, and that within the extended time, the contract was executed and tendered to the defendants, who refused to accept the same, or permit the plaintiffs to perform the work. A report was made in favor of the plaintiffs for $2,660 damages, for which with costs they had judgment. On appeal the judgment was reversed at general term of the New York Supreme Court in the third district, and the plaintiffs appealed to the Court of Appeals. The following is the opinion of the court of last resort.

SELDEN, J. It is very clear that the plaintiffs did not make out, upon the trial, the precise cause of action stated in their complaint; because that assumes that a contract by the defendants to let the work in question to the plaintiffs, was in all respects perfected, and the breach alleged is, that the defendants refused to permit the plaintiffs to go on with their work. But, as both the advertisement on the part of the company, and the proposition made by the plaintiffs expressly contemplated that the contract for the work should be reduced to writing, and executed by the parties; until that was done, the contract to let the work cannot be said to have been consummated.

In the aspect, therefore, in which the plaintiffs have presented their case, they clearly have no claim. The Supreme Court was no doubt right in holding that the defendants had never entered into an obligatory contract to let the work on section 67 to the plaintiffs; because it was an essential part of the agreement between the parties, that the evidence of their contract should not rest in parole, but should be in writing: and this became, therefore, a necessary preliminary to the completion of the contract. Hence the defendants were guilty of no violation of contract, in refusing to permit the plaintiffs to do the work. It does not follow, however, from this that *no contract* was made which was binding upon the defendants. A contract to make and execute a certain written agreement, the terms of which are specific, and mutually understood is in all respects as valid and as obligatory, where no statutory objection interposes, as the written contract itself could be, if executed. If, therefore, it should appear, from the evidence that the minds of the parties had met; that a proposition for a contract had been made by one party and accepted by the other; that the terms of this contract were in all respects definitely understood and agreed upon, and that a part of the mutual understanding was, that a written contract, embodying those terms should be drawn and executed by the respective parties, this is an obligatory contract, which neither party is at liberty to refuse to perform.

The question is whether the inevitable inference from the facts is not that the defendants impliedly undertook to execute on their part, the agreement thus prepared by their engineer. The question, as it seems to me, admits of but one answer. I cannot doubt that if the plaintiffs had both been present when the contract was drawn, and had both affixed their signatures to the writing, as prepared by him, the defendants would have been bound to execute on their part, and liable to an action if they refused. Indeed, the defendants' counsel does not deny that an action will lie for refusing to enter into a written contract, under such circumstances: but he insists that the defendants were justified in their refusal to execute, first, by delay on the part of the plaintiffs in returning the contract duly executed by them; and, secondly, by the violation, by the plaintiffs, of the provision in the agreement against sub-letting the work.

The question upon this point is whether Jarvis had authority to extend the time. He was the resident engineer upon that part of the defendants' road which embraced section 67, to which plaintiffs' contract related, and was charged according to the testimony of chief engineer Young, with making out the contracts, and procuring the signatures of the contractors. No precise time was fixed for the execution of this contract Under such circumstances, it is doubtful whether either party could take advantage of the lapse of time without first calling upon the other to execute or give some notice that the contract, if not executed by a given time would be abandoned. But, however, this may be when the agent employed for the express purpose of procuring the signature of one of the parties, consents to a delay, such party is, I think, justified in acting upon such consent. If the time for the execution was fixed by the contract, the agent would have no right to enlarge it. But where no time is fixed, nor any limitation imposed upon his powers, he is necessarily clothed with a discretion as to time The power is incident to the duty he has to perform.

It may be said that the law requires the party to execute within a reasonable time, and that although the agent may postpone within this limit, he cannot go beyond it. But the power of the agent cannot depend upon the reasonableness of its exercise. If he has a discretionary power to postpone for a day, there clearly can be no limit to this discretion, so long as it is exercised on

good faith. My conclusion, therefore, is, that the engineer Jarvis, in consenting that one of the plaintiffs might take the contract for the purpose of procuring the signature of the other, and return it within the time named, did not exceed the authority with which he was clothed by the very nature of his employment.

The second ground upon which the counsel contends that the defendants were warranted in refusing to execute the contract, is, that the plaintiffs had sub-let the work, contrary to an express provision of the written contract upon which they insist. It is perhaps a sufficient answer to this position to say that the referee has not found the facts upon which it purports to rest. If, however, the court should look into the evidence on that subject, it would not find the fact of sub-letting established. The proof goes no further than to show that some writings were executed between the plaintiffs and the De Graws, but the writings were not produced, nor were its contents proved. The certificate of the engineer upon which the resolution of the board of directors abrogating the contract with the plaintiffs, was based, was entirely without force. That provision of the contract which authorized the engineer to certify to the directors any delinquency on the part of the contractors, could not take effect until the contract itself was executed, so as to be come obligatory upon the parties, which as we have seen was never done. On neither of the grounds taken by the defendants, therefore, were they justified in abrogating or refusing to execute the written agreement.

* * * * * * * * *

The difference between the complaint as it is, and as it should be, being merely formal, and not effecting in any degree the merits of the case, the pleadings should be conformed pursuant to the code, to the facts proved.

The defendants have no reason to complain of the rule of damages adopted by the referee, it being quite as favorable to them as the law and the facts of the case would warrant. The judgment, at general term, should be reversed, and that on the referee's report affirmed.

Steam Passenger Cars.

A number of steam cars of a peculiar character have been built by Messrs. Grice & Long, Philadelphia. The editor of the Philadelphia *Inquirer* lately made a trip in one of them between Philadelphia and Trenton, N. J., and decribes its construction and objects as follows:

The cars are intended to take the place of the heavy locomotive and train, where the travel is not adequte to the expense of running them, and where it is desirable to establish lines running in quick succession, stopping at any point on the road where a passenger may desire to enter or leave, and thus afford accommodations to a large number who would not otherwise ride. To enable this to be done, however, a cheap and easily managed power, and one not liable to require repairing often (which is so great an item in locomotives) must be had, and this, it seems to us, Messrs. Grice & Long have found.

The car we rode in was built for a Southern road, and is 37 feet long; it has seats for 36 passengers; also, a baggage room 6 feet long, together with a saloon and mail room. The machinery is on the platform in front of the car, in a remarkably small space, and acts on the drivers by means of gearing, which runs so smoothly and noiselessly that no one would suspect the mode of applying the power. Coal is used for fuel, which is also on the platform in bunkers, and within arm's length of the engineer. The water is held in a tank under the baggage room, and coal and water are carried for 25 miles. The speed attained was at the rate of 28 miles per hour. The running time to Bristol was 45 minutes; to Trenton, 80 minutes, including stops. Time from Trenton to Kensington depot (30 miles), 68 minutes. The entire weight of car, with fuel and water for 25 miles, is only 11 tons. The economy of this arrangement is such that an engineer and conductor are only required to manage it; the conductor, when necessary, acting as brakesman; but a powerful brake is at the engineer's hand, to be operated the moment of shutting off steam, and the distance in which it can be stopped when running at full speed is very short. The reduced wear of the rail, compared with the lurching engine, is also an item of great importance; while the consumption of fuel will not exceed 7 lbs. of coal per mile run.

RAILROAD IRON AT CARDIFF, WALES.

1,000 TONS 56 lbs., Erie pattern, ready for immediate shipment from above port.

THEODORE DEHON,
10 Wall St.,
NEAR BROADWAY.

March 27, 1861. 5t13

Railroad Iron at New Orleans.

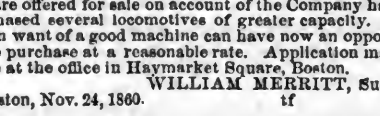
500 TONS light T rail, deliverable as above without delay. Apply to

THEODORE DEHON,
10 Wall st., near Broadway.

March 6th, 1861. 6t10

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.



They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

OIL! OIL!
PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable**, that will keep bearings **cool**, and

WILL NOT GUM.

In no case has it failed to meet the approval of the consumer.

The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor

F. S. PEASE, 61 Main st., BUFFALO.

Reliable orders filled for any part of the United States or Europe.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish **SAMPLES** and **PRICE LIST** on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

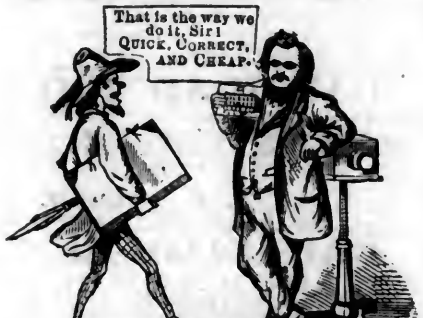
The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**



ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

New York, Saturday, April 20, 1861.

Sale of the Texas Central Railroad.

On the 2d inst. at Houston, the "Road-bed, track, franchises, chartered rights and privileges," and other apurtenances of the Houston and Texas Central Railroad Company were sold, under execution by the sheriff, and Messrs. W. J. Hutchinson and David H. Paige, who claim to be large stockholders and creditors, became the purchasers. The execution was on a judgment for $10,000 obtained at the last term of the District Court.

Interest and Dividends.

The Cincinnati, Hamilton and Dayton Railroad Company, has declared a semi-annual dividend of three and a-half per cent., payable on and after the 15th inst.

The interest due May 1, 1861, on the Sinking Fund Bonds of the Michigan Southern Company will be paid on presentation of the coupons at the Bank of North America, No. 44 Wall street. The interest due May 1, 1861, on such of the Michigan Southern First Mortgage Bonds as are not converted into Sinking Fund Bonds, will be paid on presentation of the Bonds at the office of the Company, and the payment thereof will be indorsed upon the Bond. The interest due May 1, 1861, on such of the Second Mortgage Bonds of this Company as are issued for the funded coupons of this class of Bonds, will be paid on presentation of the coupons at the Company's office.

The coupons due May 1st, of the Extension Bonds of the New Haven, New London and Stonington Railroad Company, will be paid at the office of M. Morgan & Sons, No. 37 William street, on and after that date.

South Carolina Railroad.

We have been favored with a copy of the annual report of the operations of this company for the fiscal year ending December 31, 1860, and of its financial condition at that date. The receipts have been as follows:

From freight		$968,672 76
" passage		461,083 74
" mails		51,000 00
" minor sources		18,879 86
		$1,499,636 35

And the expenses have been:

Bureau department	$17,929 30	
Transportation "	381,768 65	
Machinery "	165,950 16	
Road "	169,111 86	
Extraordinary current expenses	62,933 38	
		757,693 35
Leaving		$701,943 00

From which deduct:

Sterling interest	$119,666 28	
General "	37,191 11	
Damages, stock killed, etc.	16,541 53	
		173,398 92
Leaving a net income of		$528,544 08
Against which there has been charged two semi-annual dividends of 3½ per cent. each		407,358 00
And the balance carried to surplus income account		$121,186 08

Compared with 1859, the income from passage and down freight has fallen off $121,569 14
Reduced by a gain in up-freight and minor sources 24,509 77
Actual decrease $97,059 37

The following is a comparative statement of cotton, grain and live stock brought to Charleston in 1859 and 1860.

	1859.	1860.
Bales cotton	393,390	314,619
Barrels flour	73,529	23,616
Bushels grain	128,854	36,179
Bbls. naval stores	33,237	54,439
Bales merchandise	10,240	12,853
Live stock	14,049	15,213

It will be seen that the receipts of cotton have fallen off 78,771 bales; flour, 50,313 bbls.; grain, 92,675 bushels; while there has been an increase in naval stores of 21,202 bbls.; in merchandise 2,613 bales, and in live stock 1,174. The number of passengers carried up was 83,702; down, 80,498—total, 164,200: a decrease, compared with 1859, of 7,733. The operating expenses, ordinary and extraordinary, are about the same as those of last year—their rates to the income being 53.20 per cent.

In reference to the financial condition of the company the report says:

The debt of the company occasions the Board no feeling of anxiety or embarrassment. A comparatively small amount falls due during the next two years. For that which will mature in 1863, the Board have every reason to believe, that after paying dividends of seven per cent. per annum, the surplus that must accumulate, by that time, together with a portion of our assets, will easily and abundantly provide.

Nothing maturing from 1863 to 1866, a favorable opportunity will be afforded for providing for the sterling debt in such a manner as may be suggested by a proper appreciation of the then existing general business relations and circumstances of the times.

Under the present condition of things there is no probability of a call being made upon the new stock until after the year 1863, when it may become necessary in providing for the debt of 1866. That time is, however, too distant to even hazard a conjecture as to the influences that may then operate, but it is surely reasonable to indulge the hope that an early revival of business will open up for us the certain prospects of an increasing revenue, and confirm our anticipations of being able to control all of the debts of the company without inconvenience or embarrassment to our stockholders.

The equipment of the road consists of 15 passenger and 52 freight locomotives; 31 first class, 19 second class, 6 baggage, 3 mail and baggage, 1 second class negro, and 705 freight and stock cars.

The engines made 2,853 trips, running 729,715

miles, and burning 17,803 cords of wood. The total cost for repairs was $55,250 32.

The officers and directors for the ensuing year are:

President—JOHN CALDWELL.

Directors—Andrew Wallace, Alfred Huger, James Rose, C. M. Furman, C. J. Shannon, L. J. Petterson, C. R. Bryce, John Caldwell, G. A. Trenholm, Henry Gourdin, W. C. Dukes, W. C. Gatewood, B. H. Rice, C. T. Mitchell.

Superintendent—H. T. PEAKE.

Auditor—J. R. EMERY.

Railways in Canada.

The following is an extract from a paper read at a recent meeting of the London Institute of Civil Engineers:

The oldest railway in Canada, a short line called the Laprairie and St. John, was opened for traffic in July, 1836. From that period until the year 1849, little progress was made in the extension of railways. At the commencement of 1857, there were 1,402 miles of line in operation, and at the present time the mileage was 2,093, and the number of railways fifteen, all of which, with one exception, had been constructed between 1852 and 1860. The three principal lines were the Buffalo and Lake Huron, the Great Western, and the Grand Trunk. They ran longitudinally through separate divisions of Canada, and were constructed with a view to secure a share of the large traffic in passengers, goods, and agricultural produce, which found its way from the Western States to the Atlantic seaboard, and *vice versa*. The Welland railway (25 miles long) was constructed two years ago, mainly for the transportation of grain in bulk, and heavy goods, in opposition to the Welland canal, which had an ascent of upwards of 300 feet of lockage to overcome between Lakes Ontario and Erie. All the other lines depended chiefly upon local traffic. The Canadian railways had nearly all a uniform gauge of five feet six inches, and were all single lines. The average cost per mile of the main lines had been about £15,000, inclusive of rolling stock and other expenses. The cost of the branches had ranged from £6,000 to £10,000 a mile. The bridges were generally built of timber, which it was thought cheaper to renew every ten years than to build at first in stone or iron. But on the Grand Trunk, the bridges consisted chiefly of tubular iron girders, and on the Great Western main line there were also some wrought iron bridges. The capital embarked in Canadian railways amounted at present to about £26,000,000 sterling, of which £4,161,150 might be considered as the contribution of the province of Canada, inasmuch as the interest on that amount (£249,669) was an annual charge upon its revenue.

Little Miami and Columbus and Xenia R. R.

We have received a copy of the Fifth Joint Annual Report of the Directors of these companies—being the Eighteenth Annual Report of the *Little Miami*, and the Eleventh of the *Columbus and Xenia*. The gross income derived from the joint operations of both roads during the fiscal year ending November, 1860, compared with that of the preceding year, has been as follows:

	1859.	1860.
From passengers	$514,375 75	$523,570 46
" freight	613,672 59	615,145 57
" rents of track and depots	60,000 00	57,606 01
" mail & express	58,706 39	63,522 80
	$1,276,754 73	$1,289,844 84

The expenses in 1860 were:

Repairs of road	$144,351 87	
" locomotives	60,778 92	
" cars	73,482 53	
" bridges	2,122 36	
" depots, etc.	12,440 75	
Transportation expenses	252,163 29	
Fuel	79,897 33	
Oil, tallow and waste	15,485 03	
Loss and damage	11,927 64	
Stationery	8,375 67	
Lease of D., X. & B. R. R.	28,000 00	
Rent	4,387 90	
		693,313 29
Leaving as net earnings		$596,531 55
Add dividend on C. & X. stock		38,488 00
Total net income		$635,019 55
From which deduct:		
Taxes	$22,687 73	
Interest paid	97,911 96	
Expenses of previous year	16,497 34	
Dividend June 1	178,880 81	
" December 1	178,880 81	
		494,858 65
Leaving a surplus of		$140,160 90

—which is divided in the proportion of ⅔ to the Little Miami and ⅓ to the Columbus and Xenia Railroad Companies.

By comparing the business of the past with that of the preceding year, it appears that there has been an *increase* in income from

freight of	$31,472 98
In express and mail of	4,816 41
	$36,289 39
From which deduct *decrease* in passenger earnings of	$20,805 29
In rents of track, etc.	2,393 99
	23,199 28
The net increase being	$13,090 11
With an increase in expenses of	4,751 89
Making the increase in net earnings	$8,338 22

The earnings and expenses of the transportation department, for the past five years have been as follows:

	Earnings.	Expenses.
1856	$1,209,636 00	$562,675 61
1857	1,163,162 59	645,561 12
1858	1,200,499 29	759,235 34
1859	1,276,754 73	688,561 40
1860	1,289,844 84	693,313 29

The total income, as above stated, including dividend on D. & X. stock has been $1,328,332 84

And the total expenses	830,410 32
Making the net income	$497,922 52
Of which the Little Miami Railroad Company's share is	$331,948 35
And the Columbus and Xenia Railroad Company's share	165,974 17
	$497,922 52
The net profits in 1859 were	$458,303 57
In 1860 they were	497,922 52
Increase	$39,618 95

The assets and liabilities of the joint company are as follows:

ASSETS.

To discrepancy between C. & X. and Joint Co. books	1	
		119,264 01
		$132,957 90

The value of the entire equipment of the joint companies is $745,091 14. This company's proportion is therefore $248,363 71. The Little Miami Company's proportion is $496,727 42. Its decrease in value the past year has been $499 55.

We make the following extracts from the report of the directors:

The increase of the working expenses in 1859 and 1860, is mainly due the rent paid for the Dayton, Xenia and Belpre Railroad, amounting to $28,000 per annum, not before paid, and to the extensive repairs made to the machinery and track.

For portions of the year freights have been transported at low rates, and the unequal movement, causing at times the return of an undue proportion of empty cars, has produced its relative effect upon the cost of transportation.

Care has been taken to include in the accounts of the year, so far as it was possible to do so, all the outlays chargeable to the year, and no current obligations or claims that could be adjusted, have been left over, and none of any moment exist. The joint surplus is liable to some reductions by charging up losses occurring in former years, now standing charged upon the books against individuals and companies, but the amount is comparatively small and does not effect the finances of the company.

On the first of January, 1860, a change was made in the mode of keeping the accounts of the companies, and additional safeguards and checks were adopted, which cannot fail to have a beneficial influence. Careful attention has been and will continue to be given by the proper officers to the outlay of money required for materials and labor, and an effort will be made to secure such economical administration of the affairs of the companies as is consistent with a proper maintenance of the business of the roads, its track and equipments.

During the year an important contract has been consummated with the Cincinnati, Hamilton and Dayton Railroad Company, a copy of which is attached to this report. This contract took effect on the 2d day of April, and so far has worked satisfactorily and profitably to the companies and to the public, and no doubt is entertained that such will continue to be the case. In carrying out the provisions of this contract some changes in the direction of particular kinds of traffic are necessarily made, which for the time being diminished the revenue of this line; but experience and the convenience of shippers will enable the managers to restore a proper equilibrium, whenever the effects upon any portion are found to be burdensome.

The trains have been run, for the most part, with desirable regularity and entire freedom from serious accident.

Our relations with connecting roads have been of a friendly character, and an earnest effort will be made to maintain them, by consulting the mutual interests of the parties, and extending as heretofore the proper facilities for the transaction of the business brought to our line.

We have had an abundant crop in the section of country through which the road passes; and, in the absence of unusual disturbing causes, we may hope for a prosperous business during the coming year. To the south of us the grain crops were seriously damaged by the drought, which creates a demand for our products in that region, and deprives us to some extent of freights, which would otherwise seek an eastern market; but the foreign demand which seems likely to continue will still leave us a fair amount of business.

The lease of the Dayton, Xenia and Belpre Railroad was fully referred to in the report of last year. So far this road has failed to return in direct earnings, the outlay required for rent, operating expenses and repairs; but the business it has brought to the main line and the connection it furnishes with the Cincinnati, Hamilton and Dayton Road, and the system of roads radiating from Dayton, has doubtless counterbalanced the nominal deficit. Looking to the future, this road will be of great value, not only by connecting us with the net work of roads referred to, but also enabling us to secure a fair share of the large business which originates at Dayton and the fertile country surrounding it.

There has been expended in construction on the Little Miami Road, the sum of $18,565 19.

The amount expended on the Columbus and Xenia Road for construction is $13,363 04 which has been used mainly in the erection of a freight house at Columbus, and in fencing the road.

Should the recommendation of the Superintendent be carried out to erect a permanent bridge at Big Darby Creek, it will require an outlay of about $43,000. By the articles of permanent union it is required that a construction account should be kept against each company, and even if this reason did not exist it would be desirable to keep one as affording the only just rule for determining proper working expenses.

At the commencement of the year the floating debt of the Columbus and Xenia Railroad Company consisted of temporary bonds, covering earnings which had been applied to construction, as follows:

Bonds due December 1, 1861	$68,500
" " " 1, 1861	69,600
" " " 1, 1862	66,200
" " June 1, 1866	69,900
Total	$274,200

Of these bonds the Little Miami and Columbus and Xenia Companies own jointly, being a part of their surplus income, $96,000, and the Columbus and Xenia Company own individually $12,000.

Besides meeting these bonds at maturity, the company must rebuild the bridge over Darby Creek, which will require about $43,000, and a bridge over Deer Creek, which will cost about $1,200.

The company will be compelled to unite in building a passenger depot, at Columbus, at no very distant period.

The Board of Directors of the Columbus and Xenia Company, under these circumstances, deemed it for the true interests of the stockholders, not only to fund this floating debt, but also provide means, independent of the net earnings of the company, for permanent construction. Accordingly in November last the Board authorized the issue of seven per cent. bonds, secured by mortgage, payable September, 1890.

Notwithstanding the condition of the money market, $28,600 of the bonds have been sold at par for cash, $4,500 exchanged at par for the bonds due December 1, 1860, and $6,900 exchanged at par for the floating outstanding bonds of the company subsequently due. Besides these sales $15,000 have been negotiated at par to the Society of Savings at Cleveland, and are to be taken whenever that company makes an investment of its funds.

All the bonds in the hands of the public presented and due December 1, 1860, have been paid.

We may say generally that the track, station buildings, locomotives, and cars, are in a better condition than at the beginning of the year.

The equipment of the road consists of 42 locomotives; 36 passenger and 16 baggage, mail and express cars; 312 box, 49 box stock, 25 rack stock, 99 platform, 21 lime and 54 gravel cars.

The number of miles run by engines has been: with passenger trains, 375,789; with freight trains, 389,261; with wood and construction trains, 31,137—total miles run, 796,187, an increase over the previous year of 65,263 miles.

The following statement exhibits a comparison of mileage and cost of repairs of locomotives for four years:

	Miles run.	Cost of repairs.	Cost per mile.
1857	666,546	$65,479 46	9.82 cts.
1858	637,835	59,031 92	9.25
1859	732,924	54,507 41	7.43
1860	796,187	60,778 92	7.63

The following is a comparative statement of the mileage and cost of repairs of passenger cars for the past and preceding years:

	Miles run.	Cost of repairs.	Cost per mile
1860	1,868,009	$28,411 80	1.52 cts.
1859	1,686,715	22,650 74	1.34 "
Increase.	181,292	$5,761 06	0.18

The mileage, etc., of freight cars during the same time was:

	Miles run.	Cost of repairs.	Cost per mile.
1860	5,559,648	$45,070 73	0.81 ct.
1859	5,395,162	51,417 05	0.99 "
Increase.	164,486	Dec. $6,346 32	Dec. 0.18

The total number of passengers carried was 357,858, of which 112,958 passed over the entire line. The number ticketed to and from foreign points, carried over the whole road was 99,713; do. carried over portions of the road, 47,195—total, 146,908. The number of local passengers carried over the whole road, was 13,245; do., over portions of the road, 197,705—total 210,950. The number of passengers carried one mile was 20,953,739. Average income per capita without regard to distance $1 53; do. per capita per mile 2.61 cts. The average income per capita from local passengers was $1 04; do., through passengers, $2 29. The number of tons of freight transported over the road was 343,901, of which 200,471 tons were through, and 143,430 tons way. Of the through freight 95,657 tons were carried eastward, and 104,814 westward. The number of tons carried one mile was 30,532,575. Average income per ton of all classes without regard to distance $1 96; do., per ton per mile 2.2 cts. The average income per ton eastward, was $1 65; westward, $2 67.

The officers and directors for 1861 are as follows:

LITTLE MIAMI RAILROAD COMPANY.

President—W. H. CLEMENT.

Directors—Jos. C. Butler, John H. Grœsbeck, Nathaniel Wright, James Hicks, Jr., Larz Anderson, W. H. Clement, Alphonso Taft, Chas. H. Kilgour, Henry Hanna, John Bacon, Abraham Hivling, Jos. R. Swan.

Auditor—D. G. A. DAVENPORT.

Secretary—CHAS. H. KILGOUR.

Treasurer—S. E. WRIGHT.

Superintendent—E. W. WOODWARD.

COLUMBUS AND XENIA RAILROAD COMPANY.

President—Jos. R. SWAN.

Vice President—W. H. CLEMENT.

Directors—Wm. DENNISON, Jr., Robert Neil, D. W. Deshler, L. Goodale, Wm. B. Hubbard, Jos. R. Swan, Geo. M. Parsons, W. H. Clement, Larz Anderson, Henry Hanna, Abraham Hivling, Simon Gebhart.

Superintendent—E. W. WOODWARD.

Secretary and Treasurer—CYRUS FAY.

Public Credit of Missouri.

By comparing our condition with that of the other Border Slave States, we find Missouri in a better condition to meet her liabilities than any other. Even the increase of slave property in ten years has been 100 per cent. and leaving out of view the humanitary phase of the slave question, as a source of revenue readily convertible, it must be considered. This species of property now amounts to near $100,000,000, and as property, of course, strengthens the ability of the State to pay. Now, the entire taxable property of the State is about $800,000,000, and the revenue to be annually raised to support the Government, and meet the interest on the State debt, is some $1,500,000. Add to this the amount provided by the Legislature to be raised from poll tax, and some other small items which the Auditor foots up to $300,000, and it will be seen that our resources are ample to keep the credit of the State in a perfectly sound condition. The interest due on the 1st of July next is provided for, and if perfect solvency and prompt payment of interest on all indebtedness is an evidence of ability to carry liabilities, then Missouri stocks are as safe an investment as can be made, and there is no reason within the range of a pecuniary consideration why they should not be at par.

In regard to repudiation, as we have before intimated, that can only follow a dire necessity, and the known ability precludes such necessity. This brings us to an interesting point in connection with the subject, which is, that the three millions of the bonds of Missouri are a basis of the issues of Illinois banks, and that money is now being discredited in consequence of the depreciation of those stocks in the New York market. But the reason of the depreciation is certainly not in a want of financial soundness of the State.—*St. Louis Democrat.*

Journal of Railroad Law.

EASEMENTS INJURIOUS TO ANOTHER'S LAND: PRESUMTION AS TO A GRANT OF THE PRIVILEGE WHEN SUBMITTED TO FOR 20 YEARS.

Where a party has held possession of certain lands, under color of a title and adversely to all the world, for a period of twenty years, the law presumes the title to be good and valid; and all other parties will be estopped from disputing his title or right of possession. In analogy with this doctrine the law also declares that where a party has been in the uninterrupted enjoyment of a privilege or easement in another's lands for the period of twenty years, with the knowledge of such party a presumtion arises that such privilege has been conferred by grant; and the party will be estopped from disputing the privilege, or of maintaining an action for the injuries which he may receive therefrom. This principle is applied in the case of Hammond *vs.* Zehner recently decided by the New York Court of Appeals.

The action was brought in the Supreme Court to recover damages for flowing lands of the plaintiff, by means of a dam erected by the defendant across the Canaseraga creek, in the county of Livingston.

The defendant set up in his answer that the creek was a public highway, and that by the act of the Legislature passed April 11th, 1820, one Isaac Havens was authorized to construct a dam across the creek, not to exceed three feet high, and that Havens accordingly constructed the dam complained of, which had been ever since continued; and that Havens on the 5th of July, 1831, being the owner in fee of the land on which the dam was erected, conveyed to the defendant in fee, a grist mill which was supplied with water by means of the dam and its appurtenances, and leased him the land on which the dam and the race leading therefrom to the grist mill were constructed.

On the trial the defendant gave evidence tending to prove, in addition to the above mentioned facts, that the dam had been maintained and kept from the year 1826 to the commencement of the action in 1851; and that its effect during all that time was to flow the plaintiff's land, and render it unfit for cultivation. The plaintiff furnished no proof that the use of the dam, so far as his land was affected by it, was by his permission or favor, or was in subordination to him; neither did the defendant give any other proof of adverse possession than what was afforded by the uninterrupted use of the dam for more than twenty years.

The counsel for the plaintiff, when the defendant's counsel offered to prove the facts above stated, objected, on the grounds; first, that the continuance of the dam for more than twenty years conferred no right on the defendant to maintain it to the plaintiff's injury, and was no defence to the action; and, second, that the answer of the defendant did not state facts sufficient to constitute a defence, because it alleged no right to flow the plaintiff's lands, nor did it set up a title inconsistent with the title of the plaintiff, or hostile to it; but, on the contrary he maintained that the answer showed that the claim of the defendant was originally in subordination to the title of the plaintiff. But the justice overruled the objection.

After the testimony was closed, the counsel for the plaintiff requested the justice to charge the jury that if they were satisfied that the dam caused the water to overflow and injure the lands of the plaintiff, he was entitled to recover his damages, notwithstanding the claim of right to flow the lands. The justice declined to charge as requested, and instead, charged that if the defendant and his grantor had used and occupied the premises, as they were, for twenty years before the commencement of the action, the jury might presume a grant from some person authorized to make one, and should find a verdict for the defendant.

The defendant accordingly obtained a verdict and a judgment, which was affirmed at the general term in the seventh district. From this judgment the plaintiff carried the case to the Court of Appeals. The following is the opinion of the appellate court.

CLERKE, J.—The question is fairly presented, whether the uninterrupted use of the dam for twenty years was a sufficient defence, without any other manifestation of an adverse possession, than the effect it produced during that time on the plaintiff's land. In other words, will this uninterrupted use be presumptive proof of an adverse possession?

Undoubtedly, the object of the law in requiring that possession or user should be adverse, is that the person against whom claim is made or the right is exercised, should be made aware of the fact so as to give him an opportunity of legally resisting before the time for doing so, limited by the statute, expires. Generally, mere possession or use would not be sufficient to arrest his attention, or to put him on inquiry. To effect this it is necessary in many cases that the person in possession, or exercising the use should give some additional indication that it was hostile to another's claim. It is a well established rule, therefore, that the doctrine of adverse possession is to be taken strictly, and not to be made out by inference, but by clear and positive proof. Every presumption, it is said, is in favor of possession, in subordination of the title of the true owner. The possession must be under claim and color of title, and exclusion of any other right.

But on the other hand, it may be well asked, what manifestation of claim could the defendant employ other than the very fact of which the plaintiff complains—the overflowing of a portion of his land, so as to render it useless for cultivation or any other agricultural use. Or, if there were any other method in which his adverse claim could be indicated, other than the express verbal assertion of it, could any be more effectual

for the purpose of inducing the plaintiff to assert his rights than the continual overflow of his lands for three and twenty years? It was in its very nature hostile to the rights of the plaintiff; it was an open and constant injury to him. The user was plainly wrongful—an invasion of his rights, for which he was entitled, at any time within the twenty years, to recover damages. An action for this purpose would be a sufficient vindication of the plaintiff's title, even if he recovered only nominal damages, and would remove every pretext for presuming a grant. In Parker *vs.* Foote, which was an action for stopping lights in a dwelling house, it was held, and clearly upon authority, if the user is wrongful—if it is a usurpation to any extent upon the rights of another, it is of itself adverse, and if acquiesced in for twenty years, a reasonable foundation is laid for presuming a grant. This was the substance of the judge's charge in the present case; and, as the plaintiff adduced no proof to show that the use was by his leave and favor, it was not necessary that it should be left to the jury to find an express and positive adverse use. The judgment should be affirmed.

Railroad Earnings.

The revenue of the Baltimore and Ohio Railroad for March was as follows:

MAIN STEM.

From Passengers	$50,927 20	
" Mails	7,933 34	
" Express	4,484 95	
" Tonnage	301,993 90	
		$365,339 39

WASHINGTON BRANCH.

From Passengers	$42,192 31	
" Mails	900 00	
" Express	1,300 00	
" Tonnage	6,245 68	
		50,637 99

N. W. VIRGINIA BRANCH.

From Passengers	$7,738 55	
" Mails	866 66	
" Tonnage	26,846 92	
		35,452 13

Summary of Revenue for March, 1860 *and* 1861.

	1860.	1861.
Main stem	$344,196 78	$365,339 39
Washington Branch	40,222 56	50,637 99
N. W. Virginia Railroad	30,128 46	35,452 13
Totals	$414,547 80	$451,429 51

The earnings of the Macon and Western Road for March were:

From passengers	$7,579 86
" mails	866 45
" freight	32,131 66
Total	$40,577 97
1860	40,178 65
Increase	$399 32

The following is a statement of the approximate earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of March, compared with the same period of last year, viz:

	1861.	1860.
From Freight	$172,045 92	$108,201 78
" Passengers	73,628 06	66,586 55
" Express	2,600 00	2,700 00
" Mails	7,825 00	7,825 00
" Rent of road	7,083 33	7,083 33
" Miscellaneous	106 00	182 03
	$263,288 31	$192,578 69
Earnings January 1, to February 28	$682,606 29	$485,103 84
Increase		$197,502 45

The earnings of the Chicago, Burlington and Quincy Railroad Line in March were as follows:

	1860.	1861.
Freight	$73,468 01	$80,495 80
Passengers	28,974 50	25,976 73
Mails, etc.	6,189 13	2,864 89
Total	$108,641 64	$109,337 42
Between Chicago and Burlington—210 miles:		
Freight	$84,406 65	$91,768 85
Passengers	34,242 92	30,560 85
Mails, etc.	6,565 34	3,221 12
Total	$125,214 91	$125,550 82
Between Galesburg and Quincy—100 miles:		
Freight	$22,028 35	$23,293 35
Passengers	12,227 78	9,104 01
Mails, etc.	1,797 77	844 34
Total	$36,053 90	$33,241 70
Aggregate for 310 m.	$161,268 81	$158,792 52
Decrease		$2,476 29

The earnings of the Housatonic Railroad for the month of March, 1861, were | $15,779 82
March, 1860 | 23,145 99
Decrease | $7,366 17

Of this amount $6,411 69 is in freight business.

The earnings of the New York and Erie Railroad for March, 1861, were | $459,227 66
March, 1860 | 426,470 63
Increase | $32,767 03

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of March, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$128,340 00	$169,808 48
" " merch'dise	37,271 80	57,608 80
" " travel, etc.	25,654 95	29,992 29
Total	$191,266 25	$257,409 57
Transportation, roadway, dumpage, renewal fund, and all charges	108,933 37	134,043 71
Net profit for the m'th,	$82,332 88	$123,365 86
Profit for the previous 3 months	257,020 59	221,029 80
Total profit for 3 mos.	$339,353 47	$344,395 66

The following is a statement of the earnings of the New York Central Railroad for the months of January, February and March, 1861, compared with the earnings for the corresponding months of the previous year:—

1861, January	$489,065 04
1860, "	387,128 14
Increase	$101,936 90
1861, February	$420,792 98
1860, "	402,530 38
Increase	$18,262 60
1861, March	$631,290 20
1860, "	561,078 49
Increase	$70,211 71

The receipts of the Grand Trunk Railway of Canada for the week ending April 6th, 1861, were | $77,847 00
Corresponding week, 1860 | 70,160 70
Increase | $7,686 30
Tot. traffic from July 1, 1860, to date, | $2,645,867 44
Corresponding period, 1859 | 2,188,278 12
Increase | $457,589 32

The receipts of the Central Ohio Railroad in February from all sources were $63,380 08. The earnings were $47,975 77; and the expenses, $34,286 90. Balance on hand February 28th, $19,695 66.

The Moorabool Railway Bridge, Victoria Australia.

The down traveler by Great Western Railway may observe on his right, before entering Chippenham station, and on the extensive engineering works of Rowland Brotherhood, Esq., two long parallel lines of strong and tall timber staging, with four traveling cranes surmounting it. These have been employed in the construction of a wrought iron viaduct, intended to span the Moorabool river in Australia, and to carry the railway traffic over it. The viaduct comprises nine piers and ten spans. There are four continuous sets of girders parallel to each other, and 1,304 feet in length. The girders are ten feet in depth from the under side of the bottom member or tension chain to the upper side of top member or compression bar. They are braced together by a series of struts and ties ten feet apart, and are intended to carry a double line of rails, the gauge of which will be 5 feet 3 inches, the general gauge of the Victorian system of railways. The aggregate cross section of the lower member at the piers and abutments is 27 square inches, and this gradually increases towards the centre of each span, where the cross section gives 95 square inches. The top member at the piers has a cross section of 53 square inches, increasing towards the centre of span, where it is 68 square inches. The total weight of wrought iron in each pair of girders of 1,304 feet in length is 620 tons, or on an average of 9½ cwt. per foot in length for each single line of railway. The total weight of wrought iron in the whole viaduct is about 1,360 tons, and of cast iron in shoes for girders, bed plates for rollers, etc., etc., near 100 tons. There will also be a projecting footpath beyond the outer girders on either side, protected by a handsome balustrade, which constitutes an excellent finish to the whole work. On the completion of each span test loads were applied by the constructors to the girders in pairs, and the consequent deflection and permanent "set" were carefully noted. The general results of these tests we here append:

Two abutment spans, 132 feet each:
- Load, 70 tons on span of 8 feet at centre; deflection, ½ inch; permanent set, ¼ inch.
- Load, 270 tons distributed over whole length; deflection, 1⅛ inch; permanent set, ⅛ inch.
- Load, 100 tons on carriage 40 feet long, moved from end to end; deflection, 1⅛ inch; permanent set, ⅛ inch.

Total permanent set due to the three tests, ½ inch.

Eight intermediate spans, each 130 feet in length:
- 50 tons on 8 feet at centre; deflection, ⅝ inch; permanent set, ¼ inch.
- 210 tons distributed; deflection, 1⅛ inch; permanent set, ⅛ inch.
- 80 tons rolling load as above; deflection, 1¼ inch; permanent set, ⅛ inch.

Total permanent set due to the three tests, ½ inch.

These conclusions cannot but be satisfactory to those who have been entrusted with the construction of the viaduct, and are a guarantee for its stability when devoted to the purpose for which it is intended. There is an appearance of lightness about the whole structure which argues, in combination with its great strength, a well calculated arrangement of materials, and we feel assured that in all respects the denizens of Victoria will be pleased with the work. In a very short time the whole will be shipped for Australia; and we doubt not that for many generations it will stand there as a monument of British ingenuity and workmanship. The piers, we believe, will be of stone, and of a character worthy the superstructure they are destined to support.—*London Mechanics' Magazine.*

American Railroad Journal.

Saturday, April 20, 1861.

Share and Money Market.

The existence of actual hostilities between the two sections of the country, with our entire ignorance of the complications to which they may lead, has caused an excessive fall of all kinds of securities. The Bonds of the States of Virginia, Missouri and Tennessee have suffered most, as each one of these has contracted large debts, and great fears are entertained that they may fail in the next payment of interest. Railroad securities, with the exception of first class bonds have fallen off largely, and the whole market is one of excessive fluctuation and alarm.

Money continues very abundant, but immense sums will be immediately called for to sustain the force of 75,000 men recently called out, and which may be speedily increased. In business matters of all kinds, the whole future is full of uncertainty, and any speculation of to-day will very likely to be entirely upset to-morrow.

The Middle Route to the West.

The through express trains on the East Pennsylvania Road are arranged, and will commence running on the 6th of May. This will give New York direct communication with the West, by the middle route, without passing through Philadelphia. The trains will leave at 9 a. m. and 7½ p. m. The 9. a. m. train will connect at Harrisburg with the train which leaves this city via Philadelphia at 7 a. m.

☞ JAMES H. DOBBS, Esq., has commenced the purchase and sale of pig iron, bar iron, sheet iron, ingot and pig copper, copper sheets and sheathing, spelter, pig and block tin, tin plates, zinc, lead, and other metals on sale in this market. Office, 92 John st., New York. Any business that may be placed in his hands will meet with prompt attention.

Long Island Railroad.

The receipts of this company for the transportation of passengers, freight, mails, etc. over their road during the fiscal year ending March 31, 1861, has been as follows:

From regular passengers	$175,434 65
" commutation "	14,895 68
" freight	130,275 45
" mails, etc.	11,013 92
" rents and interest	8,091 12
" unloading freight	3,015 32
	$342,726 14

And the expenditures were:

Repairs of road	$37,263 57	
" engines	16,738 16	
" cars	14,141 54	
" buildings, etc.	4,012 00	
Oil and waste	5,135 10	
Damages	1,942 59	
Taxes	2,414 62	
Running expenses	60,824 05	
Fuel	22,862 47	
Paid for new iron	6,241 82	
Salaries and superintendence	6,999 96	
All other operating expenses	5,469 82	
Interest	32,628 00	
Rent	29,590 03	
Equipment	4,917 50	
Hempstead depot, etc.	3,075 50	
		254,256 73
Net surplus		$88,469 41
Balance from previous year		26,232 24
Received from loans paid		9,937 90
		$124,639 55

Disbursed as follows:

Paid sinking fund	$1,000 00	
Advanced on new road	13,914 75	
At Hunter's Point	59,806 08	
Loaned on good collateral	22,263 00	
	$96,983 83	
Deduct rent due	154 36	
		96,829 47
Balance of cash April 1, 1861		$27,810 08

In reference to the new terminus at Hunter's Point, the ferry connection with New York, dividends, etc., the report says:

In the last Annual Report, a full account was given of this proposed change, which it may be well to repeat here in part.

A new road between Jamaica and Hunter's Point was to be completed, with single track, built in the best manner, with first quality American rail.

For which the Company were to pay in 7 per cent. mortgage bonds, thirty years to run		$175,000 00
Cash		62,000 00
Making cost of new road		$237,000 00
Of this there has been paid of bonds	$143,500 00	
And the whole amount of cash	62,000 00	
The cost of depot lots at Hunter's Point was		41,000 00
Of this there is to be on mortgage for twenty years		31,000 00
Cash paid on account of purchase		$10,000 00
There has been expended during the past year, in filling lots, erecting buildings, depots, and piers, and dredging slips and laying tracks		59,806 08
For the same purpose the previous year		6,737 93
		$86,544 01

There yet remains some filling and fencing of the lots to be done, and some track to lay.

The party who had engaged to furnish the new road complete and ready for use on or before the 1st of August of last year, did not comply with his engagements, and the Company have been compelled to go on, under the agreement with him, to complete the road themselves, which is now being actively done with a full force of hands. About 200 perches of masonry are to be built, some ballasting and widening out of the banks, clearing out of cuts, yet remain to do, and one and a quarter miles of track to lay. No doubt is entertained of the whole being completed by the 1st of May, and of the passenger and freight business being transferred to the new route by the 10th of May.

The Company have in their hands sufficient securities, out of the avails of which to reimbnrse themselves for the outlay in completing the work.

Arrangements have been made with the East River Ferry Company to run a line of boats between Hunter's Point and James' Slip in connection with the trains. The same Company also operate a ferry between Hunter's Point and Thirty-fourth street, New York; thus a double connection will be made with the city of New York.

At James' Slip, the down-town landing of this ferry, the extension of Chambers street will strike the East River. This street passes along the north side of the City Hall Park, and by its extension, now nearly completed, will afford a direct connection between the James' Slip landing and Broadway.

The time has arrived, when the Board can speak upon this subject with some good degree of certainty. And judging from the results already secured, and the annual saving that will accrue by the change of terminus to Hunter's Point, the Board believe that they are safe in saying, that the road can earn yearly the clear sum of $90,000, sufficient to make a dividend of $1 50 per share—equal to 3 per cent. upon the par value of the stock.

The company now have a sufficient sum on hand to make such a dividend, but as there is some uncertainty as to the time of the re-payment of the State Loan, the same is deferred until that question is decided. This will probably be settled within sixty days, and the board have no doubt, but that the arrangement proposed in the Law of 1858, will be consumated, making the time of reimbursement the 1st of August, 1876, and changing the rate of interest from 6 to 5 per cent. interest.

The equipment of the road consists of 16 engines; 37 passenger, 4 mail, 3 horse, 27 house, 54 box, and 59 platform cars, and 8 snow ploughs, besides crates, hand cars, etc. The value of the company's property, exclusive of fuel, cross-ties and depot lots is as follows:

Buildings of all kinds	$32,386 87
Stock at Greenport, Brooklyn, and intermediate places	30,925 98
Engines	86,500 00
Passenger and freight cars, etc.	75,204 00
Hand cars, tools, etc.	779 75
Total valuation of buildings, stock, etc.	$225,796 60

The number of miles run by engines with passenger trains has been 171,303; with freight trains, 59,448; with extra freight trains, 26,402—total, 256,853.

Among the articles transported over the road are: 3,267,310 quarts of milk, 134,138 bushels of potatoes, 11,617 baskets of peaches, 91,514 quarts of blackberries, etc., etc.

The number of regular passengers carried to and from Brooklyn was 238,299; commuters 109,884; way passengers, 64,267—total 411,950. The number of passengers carried one mile was 9,332,053.

The financial condition of the company is as follows:

New York State loan, first lien, at 6 per cent., due at the pleasure of the Legislature after the 1st August, 1861, or 1st August, 1876, at 5 per cent., as per act passed 20th March, 1858		$100,000 00
The amount to the credit of the company, as per Comptroller's report to the Legislature made 1st January, 1861, was		29,367 82
		$70,632 18
Morris Canal Bank loan, with interest to 1st April, 1861, in suit between the estate of A. G. Thompson and Jesse Hoyt, amount of bonds, $25,035 36		45,647 78
Hempstead Branch loan bonds		300 00
Loan of 1850, mortgage bonds due in 1870, 6 per cent.		500,000 00
Loan of 1860, mortgage bonds on extension from Jamaica to Hunter's Point, due in 1890, 7 per cent.; whole amount of loan authorized, $175,000	issued.	143,500 00
Interest coupons, past due, not presented		1,389 00
Rent, payable in May and July, and engine account balance due		1,614 86
		$763,083 82
Stock account 60,000 shares, at $50 each		3,000,000 00
		$3,763,083 82
The company hold of mortgage loan of 1850		$53,000 00
The stock of the Syosset Branch Co.		1,000 00
Of their own stock, 2,000 shares par value, $50 each		100,000 00
Loan on good collateral		62,325 10
Other investments		39,410 00
Due from Post-Office Department, 1st April, 1861		2,056 37
Balance of cash, 1st April, 1861		$27,810 08

For the first time the new loan of $175,000 makes its appearance among the liabilities of this company. Its interest, $12,250, will be the amount hereafter to be paid annually by the company, for the use of the new road from Jamaica to Hunter's Point. It will be substituted for the rent of the Brooklyn and Jamaica Road, heretofore paid, viz $33,300.

The officers and directors of the company for 1861 are as follows:

President—Wm. E. Morris.

Directors—William E. Morris, C. H. Fisher, Coffin Colket, Chas. Emory, Henry L. Gaw, Geo. Neales, Jos. W. Ryerss, Chas. J. Smith, Matw. Morgan, Townsend Jones, Henry W. Titus, Joseph H. Trotter, George L. Willard.

Sec. and Treasurer—Wm. S. S. Russell.

Circular.—Dissolution of Copartnership.

The firm of A. & P. Roberts is dissolved by mutual consent this day. The business of the firm will be settled by either of the partners, at their Office, 410 Walnut, Philadelphia.

Philadelphia April 1, 1861.

Algernon Roberts, Percival Roberts.

Copartnership.—The undersigned, under the Copartnership title of A. & P. Roberts & Company will continue the business of manufacturing Car Axles, Bar Iron, and Whipple Iron Bridges, at the Pencoyd Iron Works; Office, 410 Walnut Street, Philadelphia.

Algernon Roberts. Percival Roberts.
Phila. April 1, 1861. George T. Roberts.

The Railroads of Iowa.

Less than five years ago there was not a mile of railroad in this State; now we have seven roads with an aggregate of 550 miles:

Dubuque to Cedar Falls	100
Farley to Anamosa	34
Clinton to Cedar Rapids	81
Davenport to Marengo, and to Muscatine and Washington	144
Burlington to Ottumwa	75
Keokuk to Eddyville	91
Keokuk to Fort Madison	25
Total	550

Eighteen miles will soon be added to the Dubuque, Marion and Western road, from Anamosa to Marion; the Mississippi and Missouri road will soon push on from Marengo to Grinnell, seven hundred men are at work on the road leading westward from Cedar Rapids, and grading is progressing on the most of the roads in the Southern part of the State. Considering what is and has been the condition of the times for nearly four years, Iowa has accomplished wonders in the line of railroads.—*Dubuque Times.*

Seaboard and Roanoke Railroad.

From the report of this company for the fiscal year ending January 31, 1861, we learn that the receipts during that time were:

From freight		$152,950 41
" passengers		94,505 17
" mail		8,000 00
		$255,455 58

And the expenses were:

Road and bridge repairs	$33,415 49	
Engine and car "	14,814 57	
Train expenses	25,115 55	
Depot "	25,439 05	
Salaries and office expenses	7,391 18	
Taxes	2,756 07	
Horses	1,125 99	
Insurance, damage, etc	2,175 49	
		112,233 39
Leaving as net revenue		$143,222 19
To which add dividends, interest, wharfage, rent, etc		25,426 52
Making the total net income		$168,648 71

There has also been received:—

From sale of steamer Philadelphia	$70,000 00
First mort. bonds extended and sold	25,100 00
From open accounts	46,687 78
Balance from previous year	19,021 59
Making the sum of	$329,458 08

Disbursed as follows:

Purchase of wharf in Portsmouth and gravel land at Meherring	$10,150 00	
Interest, discount, dividends, exchanges, etc	51,234 55	
First mortgage bonds	94,000 00	
Third " "	3,500 00	
Bills payable	42,144 91	
Purchase of share in Balt. S. P. Co	93,000 00	
Payment of open accounts	26,106 22	
		320,135 68
Leaving a cash balance of		$9,322 40

In addition to which there is due the company by open account, and otherwise, the sum of $35,551 70, the larger portion of which is immediately available. The net revenue from operations of the road affords a profit to the company of 13¼ per cent. on its capital stock, after paying the interest on its entire debt. The report says:

By the foregoing statement it will be seen, that the ratio of our operating expenses to road earnings has been largely diminished. This, to a great extent, is the result of a careful economy, which we have endeavored to secure in the management of every department of the company's service, and in which we have been most ably seconded by the General Superintendent and heads of departments, and is, in part, owing to the low rates of speed to which the movement of the trains have been limited—no expenditure has been spared which the efficiency of the road, and equipment and maintenance of the property required; and we believe that depreciation has been fully counterbalanced by repair. We refer to the report of the General Superintendent, made to the Board, and herewith presented, as showing, in detail, the condition of the road and property of the company, and the construction and repairs and transportation operations of the year.

At your last meeting, at the suggestion of the Board, you authorized an issue and sale of stock, should it become necessary, to meet any portion of the first mortgage bonds, which matured on the first of August last. A temporary loan, (which was paid off from the current receipts of the year,) with the means already on hand, enabled us to purchase all the bonds, which were not extended, save one bond for one thousand dollars, the holder of which we have not been able to ascertain. It was thus rendered unnecessary to take any action under your resolution authorizing an issue of stock. Of the entire mortgage for three hundred thousand dollars of bonds, two hundred and five thousand dollars have been extended, as to the time of payment, to the 1st of August, 1880, and ninety-four thousand dollars are now in the possession of the company; leaving outstanding, to be paid or extended, only the bond for one thousand dollars above mentioned.

In addition to the purchase of bonds, we have been enabled, from the receipts of the year, to liquidate our entire bills payable, amounting, at the beginning of the year, to the sum of $42,144.-91; and thus reduced the indebtedness of the company, allowance being made for the $94,000 of first mortgage bonds purchased and held by the company under the resolution of February 25th, 1858, to a bonded debt of $410,403 50, and the sum of $10,774 28, due the State of North Carolinia, and about $1,000, due by open account.

In view of the favorable financial condition of the affairs of the company, thus attained, the Board deemed it proper and expedient to make a cash dividend of three and a half per cent. for the last six months, payable on the 1st day of March proximo, which they accordingly have declared. It is the first that has been made on the common stock, and, we think, has been prudently postponed until fully warranted by the condition of the company. In our past and prospective business, we see nothing to create a doubt, that remunerative dividends may be continued in future.

At the date of our last report, we had just caused to be constructed the steamer Philadelphia, for the route between the terminus of our road, at Portsmouth, and that of the Delaware Road, at Seaford: but, before placing her on the line, it become manifest to the Board, that a better arrangement for the company, would be, to have the route between Portsmouth and Seaford run by the Baltimore Steam Packet Company, provided this company could become interested, as a stockholder in that. A negotiation was accordingly entered into, which resulted in the sale of the Philadelphia to that company, at cost, and this company becoming the purchaser of ninety-three shares (about one-third) of the stock of that company, at par value. The Baltimore Steam Packet Company subsequently placed the steamer on her contemplated route, and ran her until the approach of Winter, when she was withdrawn. With the opening of Spring the line to Seaford will be resumed by the Baltimore Steam Packet Company, running in connection with our road.

Our steamship connections with the cities of Baltimore, Philadelphia, New York and Boston, remain as at the date of our last report; and greatly exceed, both in expedition and frequency, those at any other port in the Southern States. To facilitate these connections, we found it desirable, during the year, to purchase the wharf adjoining our property on High street, in Portsmouth, owned by Dr. G. W. Peete, which was obtained at a reasonable price.

The business of the past year has been prosperous, the road and property of the Company are in good order, and competent to meet all probable requirements; the financial condition is excellent; the officers and agents are efficient, attentive and faithful; and our relations with all connecting lines are on a favorable footing—may we not hope that this gratifying state of the affairs of the Company will continue? We see nothing to cause distrust—even the political storm, that is sweeping over the country, and rending asunder the fabric of our Union, will, in all probability, leave the Company unscathed; for, into whatever political divisions the country may be severed, the lot of Virginia and North Carolina will be cast together, and this will secure, in political as well as business connection with us, the region whence whatever prosperity we may enjoy must be mainly derived.

Compared with the previous year there has been an increase in transportation receipts of		$24,919 11
And in receipts of other sources of		15,516 89
Making the increase		$40,436 00
With a reduction in operating expenses of	$7,159 95	
Excess of bills of previous years paid during the past over those of the preceding year	7,497 23	
Excess of materials on hand	221 09	
		14 878 27
Making the net result better than for the previous year		$55,314 27

The number of passengers carried was 36,375. The number of tons of up freight was 17,382; of down freight, 17,814. The number of bales of cotton carried was 19,329, an increase over the previous year 8,432 bales.

The equipment consists of 10 engines; 5 passenger, 1 passenger and baggage, 2 passenger and mail, 3 baggage and 163 house, platform, cattle and gravel cars.

The number of miles run by engines was 121,-306, at a cost per mile run of 2.98 cts. Miles run by passenger cars 50,240; cost per mile run 6.75 cts. Miles run by freight cars 71,066; cost per mile run 9.90 cts.

GENERAL STATEMENT.

Cost of road and property		$1,491,395 83
Bonds of Roanoke Valley railroad		1,200 00
Stock of Balt. Steam Packet Co		93,000 00
1st mort. bonds S. & R. R.R		94,000 00
3d " " "		3,500 00
Debts due the company		35,551 70
Cash		9,322 40
		$1,727,969 93
Capital stock		$643,200 00
Preferred—7 per cent guaranteed		225,000 00
1st mort. bonds, payable in 1880		300,000 00
3d " " " 1870		75,000 00
Convertible " " 1865		320 00
Do., issued for dividends, 1873		129,083 50
Debts due by the company		11,833 72
Profit and loss		343,532 72
		$1,727,969 93

The officers and directors of the company for the ensuing fiscal year are as follows:

President—SAMUEL M. WILSON.

Directors—Thomas Hume, D. A. Barnes, Richard Walke, M. Robinson, Geo. R. Vickers, Wm. L. Savage.

Treasurer—RICHARD WALKE.

General Superintendent—JOHN M. ROBINSON.

Covington and Lexington Railroad.

A decision of Judge Monroe, of the U. S. District Court, for the District of Kentucky, in session in this city a few days since, fixes the liability of the city of Covington for the $200,000 of Covington and Lexington R. R. bonds which were guaranteed by the city. This amount added to the city's subscription to the stock of the company makes the sum of $500,000 for which the city of Covington is liable on account of the railroad. We can stand it.—*Covington Journal.*

The Northern Central Railway Company.

The motion for the appointment of a Receiver in the case of the State against this Company has been withdrawn on terms. The State recovered judgment against the Company in the Superior Court for $70,000, the balance of the annuity of $90,000 due the State for the year 1860. Proceedings were instituted in the Circuit Court for the appointment of a Receiver, and an issue taken to the Court of Appeals by the Company, which was decided in favor of the State. The Company subsequently agreed to pay their indebtedness to the State in instalments, and the proceedings in the Circuit Court have been withdrawn by the State subject to the reinstatement of the action in case of the failure of the Company to comply with the terms of their agreement. This relieves the Company of a great impending embarrassment without detriment to the interests of the State.—*Baltimore Sun.*

Capitalization of Railroads in Ohio.

The act to regulate the sale of railroads in Ohio, and the re organization of the same, having become a law, we publish it entire as one of importance to both stock and bondholders of roads in that State.

Section 1. *Be it enacted by the General Assembly of the State of Ohio*, That in case two-thirds in interest of the creditors of a railroad company, and two-thirds in interest of the stockholders of such company shall agree, in writing, upon a plan for the re-adjustment or capitalization of the debt and stock thereof, then upon judicial proceedings for the sale of the road, under a mortgage or mortgages, or a deed or deeds of trust, the court before which such proceedings may be had shall proceed to rendor a judgment or decree against the company for the amount that may then be due and in arrear upon said securities, which judgment or decree shall, from its rendition, become a lien on all the property embraced in such securities, and upon all the franchises and powers of said company, including its franchises to be and act as a corporation, conferred by the charter and the amendments to the charter of such company; and, upon a sale had under such decree, and a purchase at such sale by trustees on behalf of the parties to such agreement, all the said property so bound by the judgment or decree, including all the said franchises, shall invest in said trustees, provided that every such agreement shall provide that the unsecured debts of the company incurred for repairs or running expenses shall be paid in money or bonds of the re-organized company as hereinafter provided, said bonds to be of the highest class issued; a copy of the terms of said agreement shall be filed in said court before the rendition of said decree.

Sec. 2. That the said trustees shall, as soon as may be after the sale, call a meeting of the parties to the aforesaid agreement, by a notice signed by a majority of said trustees or of their survivors, and publish not less than once a week, for four weeks, in a newspaper printed in the cities of New York and Philadelphia, and in another newspaper printed in each county on the line of the said railroad, specifying the day and place, and object of such meeting; that at such meeting each of the parties to the aforesaid agreement shall be entitled to vote according to the provisions thereof, but not exceeding one vote for every fifty dollars of the par value of the debt or stock of such party, according to a list of voters and of their respective interest, which shall be prepared by the said majority of the trustees, who are empowered to act as judges of the election; that such meeting, by a majority in interest of the persons present, in person or by proxy, shall be competent to retain or change the name of said corporation, to decide, for the time being the amount of its capital, and the number of shares into which such capital shall be divided, to fix the number of directors and their term of office, to elect such directors a majority of whom shall be residents of the State or States in which such railroad is situated, and to do all things necessary or proper to re-organize said corporation; provided, that any creditor, or stockholder shall be entitled to become a party to the agreement aforesaid, either at, or at any time before the meeting, in this section provided for.

Sec. 3. That a certificate, under the common seal of such corporation, specifying its name and the railroad which it is to hold, maintain and operate, shall be filed in the office of the secretary of State, and that a copy of such certificate, duly authenticated by him under the great seal of this State, shall, in all courts and places, be evidence of a compliance with all the conditions and provisions of this act, and of the due re-organization, and of the existence of the said corporation.

Sec. 4. Upon such re-organization, and a conveyance by the trustees of such of them as shall be vested with the legal title, or their survivors, all the railroad and other property and franchises and things purchased as aforesaid, and all the franchises, powers, faculties, privileges and immunities which were possessed or enjoyed by the original company, or by any company with which it had been consolidated, shall pass to and be vested in the said corporation as re-organized; and the same, and all property and things which the said re-organized corporation shall thereafter acquire, except as hereinafter provided, shall be taken, held and disposed of, for the use and benefit of the creditors and stockholders of the said corporation, who shall have become such upon and after such re-organization, according to their respective rights, but subject to the powers of the said corporation, and shall be in no wise chargeable in respect to any debt, liability or claim of any creditor or stockholder, which subsisted prior to the sale and re-organization herein provided for; but all property of the original corporation not embraced in the said sale shall, upon the re-organization, be vested in the said corporation as re-organized, in trust for all parties interested therein as creditors, stockholders or otherwise.

Sec. 5. The said corporation shall likewise have power at any time within six months after the re-organization, to assume such debt or liabilities of the original company, and to make such adjustments or exchanges with any stock or bondholders of the original company, as to the said corporation may seem expedient, and may use for such purpose any bonds or stock which it may be authorized to issue or create, and it shall have power to make and issue said bonds, payable at such times and places, and bearing such rates of interest as it may deem expedient, and to secure the payment of any bonds which it may issue or assume to pay, by mortgages or deeds of trust of its railroad, or any of its property real or personal, and to include therein with its road all its cars and other rolling stock and equipments, and any machinery, tools, implements, fuel, materials, and all other things then held or thereafter to be acquired, for the constructing, operating or repairing said road or for repairing or replacing any of its equipments or appurtenances, as part and parcel of said railroad, and as constituting with said road one property, and to include in such mortgages or deeds of trust all franchises held by said corporation, and connected with or relating to said road, and all other corporate franchises of said company, all which said franchises, including the franchise of being a corporation, in case of sale by virtue of any such mortgage or deed of trust, or of any judgment specified in section six, are hereby declared to pass to the purchasers, so as to enable them to re-organize the corporation in the manner herein provided, and shall also have power to issue capital stock to such aggregate amount as it may deem proper, not exceeding any limit which may be fixed by agreement with the trustees purchasing as aforesaid, and may establish preferences in respect to dividends, in favor of one or more classes of the said stock, in such order and manner as may deem expedient, not exceeding such limit as may be fixed by agreement as aforesaid; and may confer on holders of any bonds which it may issue or assume to pay, such rights to vote at all meetings of stockholders, not exceeding one vote for every fifty dollars of the par amount of the said bonds, as may have been provided for in the agreement mentioned in section one, which rights, when once fixed, shall attach to and pass with such bonds, under such regulations as the by-laws may prescribe to the successive holders thereof, but shall not subject any holder to any assessment by the said company, or to any liability for its debts, or entitle any holder to dividends; and the said corporation shall have capacity to hold meetings of stockholders, and directors and do all corporate acts, and all things without this State, as validly as it might do the same within this State.

Sec. 6. The lien of the mortgages and deeds of trust authorized to be made by this act, shall be postponed to the lien of judgments recovered against said corporation after its re-organization, for labor thereafter performed for it, or for materials or supplies thereafter furnished to it, or for damages, for losses, or injuries thereafter suffered or sustained by the misconduct of its agents, or in any action founded on its contracts or liability as a common carrier, thereafter made or incurred.

Sec. 7. The provisions of this act shall extend and apply also to corporations whose railroads are partly within and partly without this State; and a corporation of this State, possessing such a railroad, shall have capacity to exercise without this State all its powers, privileges faculties and franchises; and a corporation of another State possessing part of a railroad which is partly in such other State and partly within this State, may exercise and enjoy within this State all its powers, privileges, faculties and franchises, for the purpose of the said railroad and its business; and all mortgages and deeds of trust made by the said corporation upon its railroad, equipments or other property within this State, shall operate in the same manner and with the like effects as is hereinbefore provided with respect to those of corporations re-organized under this act: Provided, that such part of the said railroad as is within this State shall be subject to taxation, and shall be subject to all regulations of law in the same manner as railroads of this State in like cases, and the corporation owning the same shall be subject to all duties in respect thereto imposed by law, and to be sued and may sue in all cases, in the same manner as a corporation of this State might be sued, or might sue.

Sec. 8. In any judicial sale to be had as contemplated by this act, no appraisement of the road, either as to the real or personal property thereof, shall be necessary—but the court may, to avoid the sacrifice of the property, fix a minimum below which the same shall not be sold.

Sec. 9. That in regard to bonds or stock held by the State of Ohio, counties, townships, cities, villages or other municipal corporations, or otherwise held in a fiduciary capacity, the governor, commissioners, trustees, council, or other corporate body representing the State, municipal corporation, or persons holding in a fiduciary capacity, as executors, administrators, guardians, or otherwise, shall be and they are hereby authorized to become parties to such agreement, and to control, exchange or manage said bonds or stock according to the terms of the agreement, and to take and receive the new bonds or stock to be issued in lieu of the original bonds or stock, which shall be held on the same terms and subject to all liens which attached to said original bonds or stock.

Sec. 10. That any association or company of persons which has heretofore come into the possession of the road and other property of any railroad company within this State, by purchase under judicial proceedings, and in pursuance of any agreement for the capitalization of the debts and stock of such company (to which a majority in

interest of the creditors and of the stockholders of such railroad company were parties), and which may now be re-organized under any law of this State, may accept of the provisions of this act, by vote of a majority in interest of its stockholders under such re-organization, at any meeting convened upon notice for that purpose, and upon such acceptance, may re-organize, as provided in this act, and such re-organized company shall be invested with all the powers, privileges and immunities conferred, and subject to all the restrictions imposed by this act, to the same extent as if such re organization had been originally under this act, and a copy of the resolution of acceptance, as aforesaid, attested by the signature of the president and the seal of the corporation, shall be filed in the office of the Secretary of State, and a copy thereof duly authenticated by him under the great seal of this State, shall be due evidence of such acceptance, in judicature and thereout.

SEC. 11. This act to take effect from and after its passage.

Nebraska and Lake Superior Railway.

The Legislature of Minnesota passed an act, approved the 18th ult., which provides as follows:

"Section 1. That the act of the Territorial Legislature of Minnesota, entitled an act to incorporate 'The Nebraska and Lake Superior Railroad Company,' approved May 23d, 1857, be, and the same is hereby amended and continued so that it shall read as follows: That Lyman Dayton, John McKusick, Henry A. Swift, Richard Chute, Dwight Woodbury, C. T. Stearns, Thomas Clark, Levi Butler, Sidney Luce, E. O. Hamlin, A. F. Harding, and A. G. Chatfield, of the State of Minnesota, Anson Blake, Erastus Corning, Orville Clarke, of the State of New York, Eber B. Ward, and A. H. Hanchett, of Michigan, and their associates, successors and assigns, be, and they are hereby constitued a body corporate and polltic by the name and style of "The Lake Superior and Mississippi Railroad Company," and by that name and style shall be capable in law of taking, purchasing, holding, leasing, selling, mortgaging, and conveying real estate and property, whether real, personal, or mixed, so far as may be necessary or convenient for the purposes hereinafter mentioned, and in their corporate name may sue, and be sued, plead, and be impleaded, contract and be contracted with, and may have a common seal, which they may alter or renew at pleasure, and may have and exercise all powers, rights, privileges, and immunities which are or may be necessary or convenient to carry into effect the purposes and objects of this act, and of the said corporation.

"Sec. 2. That said corporation is hereby authorized and empowered to survey, locate, construct, maintain, use, and operate, and at pleasure, to alter the line thereof, a railroad with one or more tracks or lines of rails, to commence at some convenient point or place within the State of Minnesota, at the west end of Lake Superior, and running thence by the most feasable route within this State, to some point on the Mississippi, with the right to extend the same to the Minnesota river; and also with the right to construct a branch from the main line to the navigable waters of the St. Croix, together with all other stations, depots, turnouts, engines, cars, and other appurtenances and furniture of a railroad, *provided*, the said company shall commence the grading and construction of said road at Superior, and continue the construction thereof toward the Mississippi river, and shall first build their said main line to the said Mississippi river.

"Sec. 3. The capital of said corporation shall be five millions of dollars, and shall be divided into shares of one hundred dollars each, which shall be deemed personal property, and shall be transferable on the books of said corporation, and the directors may increase the capital stock thereof to such amount as may be necessary or convenient to carry into effect all the rights and privileges hereby granted, not exceeding the whole cost of the road and its appurtenances, and the shares of any increase of stock shall be the same, and transferable in the same manner as the shares of the orginal stock.

"Sec. 4. The above named persons, or any of them, are hereby authorized to open books for receiving subscriptions to the capital stock of said company, which books may be opened at such times and places as a majority of said corporators may determine, by giving twenty days' notice in two of the newspapers published in St. Paul, and also in the State paper at the city of Albany, New York, of the times and places where said books will be opened; said books will be kept open thirty days, or until the sum of one hundred and fifty thousand dollars of the capital stock of said company shall be subscribed. And as soon as said sum of one hundred and fifty thousand dollars shall have been subscribed to the capital stock of said company, and five per cent. of the amount so subscribed paid in to such person or persons as may have been appointed to receive the same by the persons named in the first section of this act, who are hereby authorized to make such appointment, the above named persons, or a majority of them, may give like notice of a meeting of the stockholders at such time and place as they may deem expedient, to choose directors; and if at such time and place, the holders of one half or more of the said stock, shall attend either by person or by lawful proxy, they shall proceed to choose from the stockholders, by ballot, seven directors, at least three of whom shall reside in the State of Minnesota, each share of the capital stock entitling the owner to one vote; and at such election, the persons named in the first section of this act, or those appointed by them (which power is hereby conferred upon them), or any three of them, if no more be present, shall be inspectors of such election, and shall certify in writing, signed by them, or a majority of them, what persons are elected directors; and such inspectors shall appoint the time and place of holding the first meeting of directors, at which meeting a majority of directors so chosen shall be competent to transact all business of the company; and thereafter, all elections of directors shall be made annually at such time and place, and in such manner as may be determined upon by the board.

* * * * * *

"Sec. 10. The said company is hereby authorized to borrow money to be expended in the construction and equipment of their said road and its appendages, and to issue bonds for the payment thereof, in the usual form, and may make and execute in the corporate name of said company, all necessary mortgages, writings, notes, bonds or other papers, for any liability that may be incured in the construction or equipment of said road.

"Sec. 11. The fee simple of all lands along the line of said route, or otherwise, granted by the Congress of the United States, for the purpose of aiding in the construction of said road, may be directly granted to said company, and said company is hereby empowered to receive title thereto, and to transfer said lands from time to time, and to convey in fee simple, or otherwise, as soon as, and as often as five miles of said road shall be constructed and completed, and the track thereof shall be put in running order, and the grant shall not become void, nor the company be dissolved by the non-completion of the entire extent of said road, but shall be good and valid to all intents and purposes, for the parts or portions of said road completed, and the said company shall continue to survive to that extent, *Provided*, That if any lands should be granted by the Congress of the United States, to the States of Minnesota, or the aforesaid company for the construction of the line of road contemplated in this charter, the Legislature shall have the right to make such restrictions as they may deem expedient concerning the time and the terms of sale of such lands.

* * * * * *

Sec. 18. If the company shall, within one year, organize and locate the line of their said road, and within two years, grade at least twenty continuous miles of the same from Lake Superior, and shall, within five years from the passage of this act, construct and complete a first class railroad from Lake Superior to the Mississippi river, with the necessary engines and cars running thereon for the transportation of passengers and freight, then, and in such case, the said company shall be entitled to have and own, in fee, all the swamp lands for seven miles on either side of the line of said road, and its extension to the Minnesota river and its branch, as provided in the second section of this act, as soon and as fast as each and every twenty consecutive miles thereof shall be located and completed. And for that purpose, as soon as the said line, its continuation and branch shall be located, the lands shall be withheld from market, and upon the completion of any twenty consecutive miles of said road, with cars running thereon, the lands within seven miles of either side thereof, shall be certified and conveyed to said company by the proper officers of the State: *Provided*, The whole of said road, extension, and branch, shall be completed in ten years. And the land shall not be subject to taxation so long as the fee thereof remains in the said company: *Provided*, That the said company shall sell and dispose of all said lands within ten years from the time the same shall be certified and duly transferred to said company from the State.

"And provided further, that when the said road shall be completed, as hereinbefore provided, from Lake Superior to the Mississippi river, or the branch, or continuation thereof, as aforesaid, if it shall be found that any portion of the said swamp lands have been sold, or otherwise disposed of, within the said seven miles, by the United States, the amount shall be made up of other swamp lands belonging to the State, outside of said seven miles. And if it shall be found that within the said seven miles on each side of said line, there shall not be an amount of swamp lands belonging to the State, to at least seven full sections per mile, then the said company shall have a right to select from the swamp lands belonging to the State, outside of said line, and between the Mississippi river, Lake Superior, and Rainy lake, other lands in an amount, in all, equal to seven full sections for each and every mile of such completed railroad, branch or continuation."

"Sec. 19. This act shall take effect from and after its passage."

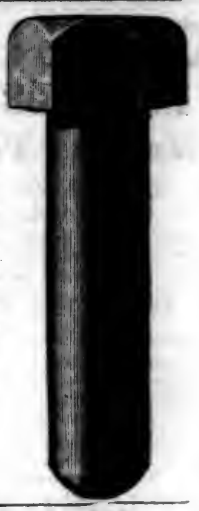
LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.



Boston, Nov. 24, 1860. tf

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at Boonton, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish **SAMPLES** and **PRICE LIST** on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.
PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning,** and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable,** that will keep bearings **cool,** and
WILL NOT GUM.
In no case has it failed to meet the approval of the consumer.
The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor
F. S. PEASE, 61 Main st., BUFFALO.

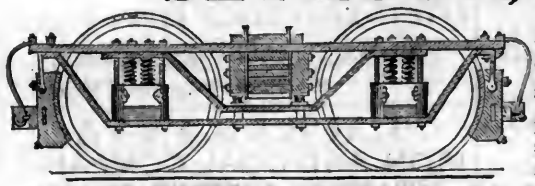
Will be happy to furnish a **SET OF SPRINGS** to such companies as may wish to **try** their **Durability** and **Elasticity,** by writing us the Length, Width, Curve over all, and the weight which they are to bear.

THE METALLIC CAR SPRING COMPANY
OF NEW YORK,

Manufacturers of PATENT CONICAL VOLUTE STEEL CAR SPRINGS.

OFFICE, 54 WILLIAM STREET, NEW YORK,

WITH increased capital and facilities, and ability to meet all orders promptly, this Company respectfully invite the attention of Railroad Managers, Car and Engine Builders, and others interested in Railroad Machinery and Economy, to these Springs, and the improvements in their application. Orders and correspondence solicited.



CHARLES D. GIBSON, Treasurer. **COURTLANDT PALMER, Pres't.**

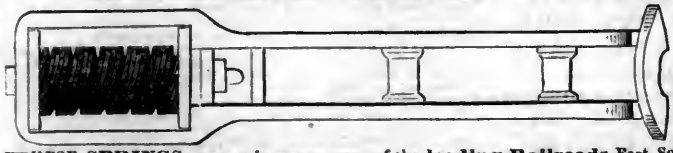
Jan. 14, 1860. **RICHARD VOSE, Secretary.**

THE HUMPHREYSVILLE MANUFACTURING COMPANY,

(SUCCESSORS TO DWIGHTS, FRENCH & CO.)

SEYMOUR, CONN.,

ARE prepared to fill, at short notice, of the best materials and workmanship, orders for **Wrought** and **Cast Iron Work,** fitted ready for use, for the building or repairs of **Passenger** and **Freight Cars,** complete or in part.



A sample wrought iron truck can be seen at our office. **No. 5 Gold st., NEW YORK.**

We also manufacture—

BEST FAGGOTTED CAR AXLES,
SALISBURY IRON CAR WHEELS,
WROUGHT IRON BOLTS, NUTS & WASHERS,
RAILROAD JACK SCREWS, ETC.

RAYMOND FRENCH, Pres't, Seymour, Conn. **WM. H. MARSHALL,** Treas'r, No. 5 Gold st., N. Y.

STEEL CAR SPRINGS,

MANUFACTURED
BY THE
PATENTEE,
Carlos French,
SEYMOUR, CONN,

THESE SPRINGS are now in use on many of the **leading Railroads** East, South and West. Samples can be examined and Price Lists obtained at **No. 5 Gold st., NEW YORK.**

BARD & WILSON'S PATENT

Angular Nib Gold Pens,

GOLD PENS REPAIRED OR EXCHANGED

Manufactory, BROOKLYN, Conn.

LAND AND SUBMARINE
BLASTING,

Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

ANALYTICAL AND
Manufacturing Chemistry,

No. 24 WILLIAM STREET,
Rooms Nos. 28 & 29. NEW YORK.

CAREFUL Analysis made of all Minerals and Commercial Articles. Surveys and Reports made upon Mines and Quarries. Coal Oil Works planned and erected and contracts made. The best modes furnished for manufacturing, purifying and deodorizing oils from coals, petroleum, and other bituminous substances. Coal Oils tested and purified. Superintendents and skilled workmen furnished to manage Coal Oil Works and Mines. The Kerosene patents from which originated the Coal Oil Business of the United States were granted to Dr. GESNER.

GESNER'S, Chemists & Engineers.

New York, Saturday, April 27, 1861.

Mobile and Great Northern Railroad.

The second annual meeting of the stockholders of this company was held in Mobile on the 12th inst. We copy from the Mobile *Advertiser* the following abstract of the reports of the President and Chief Engineer:

The company have encountered obstacles of a two-fold character; the first from litigation, in regard to the validity of the city bonds, which, however, was brought to a satisfactory termination in July last; the second from the financial derangements resulting from the unsettled state of political affairs. Previous to the Presidential election in November, a considerable number of the city bonds had been negotiated in New York at par, which was established at their market value, but after that event no further sales were practicable. A special meeting was called of the stockholders, who resolved to pay monthly instalments of 10 per cent. on their subscriptions. The Report says:

Calls for the payment of monthly instalments of 10 per cent. were accordingly made, and, in a short time, it being ascertained that they would, for the most part be punctually paid, the Directors decided upon continuing the construction of the road, notifying the contractors for the roadbed, however, that in so doing they (the Directors) could only promise that the usual monthly cash payments of eighty per cent. of the work done, promptly made heretofore, would, in future, be settled to the extent of the amounts realized from stockholders, that if the stockholders failed in their payments, the money collected would be divided *pro rata* among the contractors, and that the 20 per cent. reserved for payment on the completion of the contracts, would not probably be paid until some future period, when the bonds could be negotiated.

No contractor on the road expressing any dissent to this notice, the work of construction was continued, but not with the same vigor as previously. So far most of the stockholders have promptly paid up. In a few instances, where stockholders had positively refused to meet the calls, and were in default of the calls before made, legal measures for collection have been resorted to. Some of these delinquent stockholders have since settled.

The Treasurer reports receipts to date of last annual statement, April 2nd, 1860	$116,310 40
Receipts during the fiscal year, ending April 1st, 1861, from instalments on Stock, City Bonds, Interest, etc.	484,121 29
Total receipts up to April 1st, 1861	$600,431 69

The total expenditures during the same period have been as follows:

Total to date of First Annual Statement, April 2, 1860		$84,230 16
For engineering expenses, instruments and equipments, negroes, overseeing, subsistence, etc.	$121,267 89	
Road-bed	227,325 40	
Superstructure	107,554 18	
Rolling stock, depots, stations, real estate, right of way, etc.	48,828 76	
Expenditures for the fiscal year ending April 1st, 1861		504,986 13
Total expenditures up to April 1st, 1861		$590,216 29
Cash in hands of Treasurer, April 1st, 1861		11,215 40
		$600,431 69

The entire amount spent in the purchase of negroes has been $118,401 90; the force now consisting of 70 men, 11 women, and 4 boys. The average force during the year has been 54 hands, and their expenses per hand $170, while their earnings have been $23,856 61.

Of the city bonds 266 have been realized since the last report. Of these 15 became due on the 1st of January last, and were redeemed by the city; the remainder were sold at par, the company receiving the accruing interest to the date of sale. According to the last annual report, 79 bonds were sold up to its date. The Company now hold, therefore, 655 bonds. Of these 72 are to be paid to Messrs. John Rogerson & Co. for rails and fastenings, leaving in the hands of the Company 583 bonds, after paying for the rails, etc. These bonds and the unpaid stock, $167,393 52, constitute the present resources of the Company. The report says:

It can now be hardly doubted, from the progress heretofore made, that had the Directors been permitted to prosecute the enterprise from the beginning, without the embarrassments of litigation, all the bonds could have been negotiated last spring on terms favorable to the Company, all the rails and bridge materials would have been delivered in season, and the work of construction would have been so pressed forward that the road could have been running to the Tensas river early in this summer, and to the city by the latter part of 1862, or early in 1863.

The work of construction of the Eastern Division has been in the hands of responsible parties with two or three exceptions, in which instances it has been re-let, at some loss to the company, or carried on by the negro force. The two extreme ends of this division have been pressed rapidly, and are almost finished, while the middle ground has been worked so as to ensure its completion a little in advance of the track.

The cross-ties are being delivered rapidly, every section has been let to contract.

There are on the Division 1,200 feet of trestle and 2,221 feet of bridge work, 1,146 of the latter of iron.

On the 28th of last month, track laying was commenced near the East bank of the Tensas, and on the 1st of May the track at the junction with the Alabama and Florida Railroad will be put under way. This work is being done in a superior manner by the company forces, and can be carried forward at the rate of 10 miles per month, and finished by the first of September next.

The following stock of equipment it is believed will be sufficient till the road is complete to the city of Mobile: Four locomotives, four first-class

passenger cars, two second class passenger cars, fifty freight cars, five repair cars.

Contracts were made with Messrs. John Rogerson & Co. for iron rails and fishing pieces, and with Joseph R. Anderson & Co. for spikes. A sufficient number of the latter have been received to complete this division; and 1,564 tons of rails, fishing pieces and bolts have been received; 474 tons at Pensacola, and 1,090 tons at Tensas wharf. In the contract with Mr. Rogerson it was made a point that the rails should be manufactured under the inspection of an agent of this company; this duty was performed by Col. Lewis Troost, Chairman of the Executive Committee, who visited England for the purpose. In November last a contract was closed with the American Telegraph Company for building and working a line over the road. The work was immediately commenced, and a first rate line is now in successful operation.

From present indications, the Chief Engineer is of opinion that the estimate of last year for the completion of the Eastern Division, $1,004,200 00 may be reduced by the amount of $107,880 27.

In conclusion the President says:

Had the work been started upon any other than a most unparalleled basis, it could not have withstood the shock. In managing the work we have been without trouble or excitement. Three-fourths of the local work of construction has been done. Seventeen miles of rails and fastenings have been delivered. Track-laying has been commenced. A first rate locomotive has been put upon the road and another shipped, and I may say the cars are running, and a first class telegraph line is in full operation over the entire division. This much has been accomplished in one short year in the face of litigation, revolution and a financial crisis unsurpassed. If this has been done under past circumstances, I think there is little to fear for the future.

Texas and New Orleans Railroad.

The Texas and New Orleans Railroad will be running through from Houston to Sabin Bay in three or four weeks. The Central is finished to Millican's, and the branch to Bronham from Hompstead is probably completed to day. The Sugar road will, in twelve months from to day, beyond a doubt, be through to Wharton, with a bridge over the Brazos. The fact stands out plainly and unmistakably that Houston is inevitably the railroad centre of Texas, a position for a city to occupy, the importance of which it is difficult to over estimate. The laws of affinity and reciprocity indicate the propriety, if not necessity, of all roads in the vicinity of this city connecting with it. A union depot is now talked of, and it would be well if the Harrisburg Company would allow the mists of local prejudice, that obscure their mental vision, to clear off and view this matter in its proper light. A terminus here will be desirable in twelve months for their road, and now would be a proper time for the company to see what can be done, so as to secure certain privileges on easy terms, that as time is prolonged, will be more difficult and costly to obtain. The Trinity and Tyler Railroad Company will doubtless reconsider the initiatory step they have taken with their enterprise, and in place of beginning *near*, will begin *at* the railroad centre. The New Orleans road, in connection with the Central, will doubtless construct a bridge over Buffalo Bayou this summer, and bring their line into town, high up on Main street, or in the vicinity of the Brazoria and Galveston depots.

The erection of an union passenger depot, sufficiently extensive to meet the wants of all the roads that converge here, is essential to their interest, and to the convenience of the traveling community. Now is a good time to bring the matter forward, and the action of the companies be ascertained. The travel next season will be heavy, and facilities for meeting it should be put in progress early, to respond to it.

The change in ownership of the Central Road, will, without doubt, operate favorably to this idea; and we trust the railroad princes will all have due regard to the demands of the times; and putting down all minor considerations, at one step provide for their own best interests, as well as those of the public.—*Houston Telegraph, April 9.*

Memphis and Little Rock Railroad.

The Little Rock *Gazette* of the 23d ult., says: The work of track laying on the Memphis road has commenced opposite this place. Owing to the low stage of the river but a small amount of iron has yet been brought up. Soon as the river rises all of the iron will be brought, and the work prosecuted to completion.

New Orleans, Jackson and Great Northern Railroad.

The following is the report of the President and Directors, showing the operations of the company during the fiscal year ending February 28, 1861:

When the present Board of Directors first entered upon their duties, (on 17th April, 1860,) it was found that there was a large amount of liabilities matured, and maturing in a short time, for which the previous Board had made no provision, and to meet which the present Board were compelled to raise nearly $300,000 on the individual credit of the Directors and on that of some of their friends.

The amounts due and unprovided for on the 17th April, 1860, were as follows:

Accrued interest and sinking fund on first mortgage bonds	$94,000
Back pay rolls, for February and March	50,000
Due Cooke, Bradford & Co. to 1st April	15,300
Outstanding bills for materials, etc., estimated	50,000
Balances due foreign railroads, and other accounts, say	20,000
	$229,300

To this amount add items maturing to 1st July, 1860, as follows:

Bills payable, say	125,000
Earnings of Cocke, Bradford & Co., from 1st April to 1st July	20,500
Balance of interest and sinking fund, due on first mortgage bonds, on July 1st	60,000
Total due to July 1st, 1860	$440,800
We have also been compelled to receive seven locomotive engines (which had been contracted for by the previous Board) against our strong efforts to cancel the contract, as they were not required for the business of the road—and none of them have to this date been attached to a train. The cost of these engines, with two others delivered in November, 1859, but not settled for until April, 1860, is, say	80,000
Contracts for passenger and freight cars had also been made, many of which cars have not been used, costing	54,000
We have also settled with Cooke, Bradford & Co., for their final estimate for work done north of Canton, with the exception of a balance of some $7,000 still to their credit	32,500
Amounting in all to	$618,800

—The whole of which (with the exception of $125,000, bills payable included in the above figures) the present Board have had to provide for, over and above the general liabilities of the company, as reported by the former Board of Directors as liabilities, under the head of bills payable.

These items, with the disasters of October and November, alluded to hereafter, will, in a great measure, account for the present embarrassed condition of the company.

The mail earnings, for the balance of the year ending January 1st, 1861, we found, had been anticipated by their pledge as security for a loan obtained to the extent of $30,000.

By the Treasurer's report, the receipts from all sources during the year ending February 28, 1861, have been, incl. balance on hand... $1,878,609 36

Disbursed during the same period:

For operating the road	$747,461 28	
Graduation, mostly for the extension beyond Canton	100,297 08	
Iron rails and fastenings on hand at depot in New Orleans	120,118 37	
Locomotives, cars and tools	152,628 90	
Real estate, right of way, surveying, engineering, fencing, etc.	84,600 74	
Building way stations and improvements to depot, grounds, etc.	48,508 52	
Interest on first mortgage bonds and other interest accounts	213,881 09	
Expenses, contingencies, law charges, etc.	40,420 88	
		1,524,867 46
Balance on hand, chiefly in bills receivable for stock subscriptions in Mississippi and amounts to debit of sundry agents and others		$340,241 89

We redeemed on July 1st, 1860, after due public notice, from the lowest bidder, fifty-nine of our first mortgage bonds for the sum of $49,530—which reduces the mortgage by the amount of $59,000.

By the General Superintendent's Report, it will be seen that the earnings of the road during the twelve months were from

Freight	$649,59,9 04
Passengers	529,[illegible]24 00
Mails	62,400 00
	$1,23[illegible]2,023 04

The expenses during the same time have been—

For maintenance of way	$251,100 28	
Motive power	212,772 80	
Conducting transportation	187,873 47	
Steamers and other expenses during overflow of October and storm of November, 1860	27,327 80	
Stock killed in Mississippi	9,277 58	
Maintenance of cars	59,100 70	
Add outstanding and unpaid bills	28,106 60	
	$775,567 94	
From which must be deducted the amount paid during the present year for materials and labor for the previous year, as per bills	98,378 24	
Total cost of operating the road in 1861		677,189 70

This amount includes all the extraordinary expenses caused by the overflow in October and storm of November, 1860; also, the repair of damage from the floods of Pearl river and the Tangipahoa; also, the building of three division houses, [illegible]ear four miles of second track and sidings, and five miles of fencing, which ought properly to be charged to the construction of road, leaving the net earnings, $566,433 94

—or 45 per cent. of gross earnings, which will compare favorably with any road in the country.

The gross earnings, as shown by the Report for the year previous, during eleven months from April 1st, 1859, to February 29th, 1860, were	$999,510 92
The expenditures were	670,065 62
Showing the net earnings of the road during the 11 months ending Feb'y 29th, 1860, to have been	$329,445 30

By which, it will be seen that the actual expenses for the 11 months ending February 29th, 1860, wore ouly $7,124 08 short of those for the full year ending February 28th, 1861, while the increase of receipts for the corresponding time was $233,112 72.

The debt due and outstanding February 28th, 1861, was:

Loans received of the State of Mississippi maturing in 1863, 1864 and 1868	$215,000 00
Bills payable maturing in 1861, 1862, 1863, 1864 and 1865	665,237 35
Paymaster's bills payable maturing within 60 days	54,150 00
Amount due sundry persons on account of outstanding bills and balances due other railroads and other balances	39,126 63
Balances due on pay-roll account	67,203 06
Coupons on first mortgage bonds, due 1st January, 1861, say	110,000 00
The first mortgage bonds (due in 1886) now outstanding, amount to	2,665,000 00
Making the total liabilities of the Company	$3,815,717 04

Besides the above, the interest and sinking fund due on 1st July next, 1861, will amount to about $160,000.

The floating debt, as reported on the 29th February, 1860, (exclusive of the Mississippi loans,) under the head of bills payable, amounted to	$617,766 41
To which should be added for unsettled debts for graduation done, material and labor for construction and road expense accounts assumed by this Board	158,659 59
And liabilities for contracts made prior to the incoming of the present Board, for locomotives and for cars	140,712 49
Graduation, Cocke, Bradford & Co.'s contract	45,822 45
	$962,960 94
The floating debt on 1st March, 1861, exclusive of loans of the State of Mississippi, is	935,717 04
Showing a reduction of	$27,243 90
To which should be added the following items, to make up the amount of the net earnings of the road for the year ending March 1, 1861, say:	
Iron rails	126,118 37
Interest on first mortgage bonds, paid July, 1860	110,000 00
Interest paid on loans and renewals	82,780 07
Depot grounds, buildings and improvements	43,508 52
Real estate, right of way, fencing, bridging, etc.	18,443 35
Graduation between New Orleans and Canton, on line of road	33,653 22
Expense, advertising, law charges, contingencies, etc.	40,420 88
Engineering and surveying	16,157 39
Uncollected mails $20,800 / Do. freight 34,430	55,230 00
And other miscellaneous accounts	1,878 24
	$555,433 94

We have prepared, and have ready for issue a second series of construction bonds, secured by a first mortgage upon that portion of the road between Canton and Aberdeen, Mississippi, and a second mortgage upon the road and machinery between New Orleans and Canton, for the sum of $3,000,000, payable in thirty years from October 1st, 1860, bearing interest at the rate of eight per cent. per annum, with coupons attached, payable semi-annually on first of April and 1st of October of each year.

None of these bonds have been sold up to this time, but a portion of them have been pledged to secure the payment of notes issued for iron rails, machinery and renewals.

We have on hand

45 locomotives, (seven of which have never been attached to a train).
37 passenger cars, (11 never having been used).
10 baggage and express cars.
503 freight and hand cars.

The engines during the last nine months have run (no record having been kept for the previous three months) 405,650 miles.

The average cost for engines per mile run, has been—

For wood	5.9 cts.
For oil, tallow, and waste	1.1 "
For material and labor	5.3 "

The number of bales of cotton transported during the year, was 181,509.

The number of passengers (without a single injury of a serious nature), 165,677.

The road is in complete repair and equal to any first class road in America. The repairs rendered necessary from the storms of October and November, having all been completed in the most substantial and permanent manner, will prevent any interruption from the usual ordinary storms in future. The extraordinary storms and floods of October and November last (which only occur at long intervals of about fifteen years) have shown the necessity of raising the level of the road, for a distance of ten miles along the valley of the Tangipahoa about two feet, and the same height along the Pearl river, below Jackson, for a distance of two miles. The crib work along the lake shore must also be filled in, and the level of the road raised two and a half feet from bayou La Branche to Pass Manchac.

This work can be done in the next two years, by additional laborers being added to those necessary to make the general repairs, without interfering with the general traffic of the road. The cost of the whole of the above will be about $50,000. This will secure the road completely against all possible interruptions in future, from similar causes.

It was a mistaken policy of the engineers who had charge of the construction of the road, who, to save a small amount on the first cost of construction, fixed the levels on these portions of the road below high water mark, from which the road has suffered in loss of business, reputation, and extraordinary repairs, not less than $1,000,000 since its construction.

From a careful estimate, based upon the workings during the last nine months, there can be no doubt that the gross earnings of the road, from all sources, for the current year, will be $1,500,000. And the total expense of operating the road and keeping both the road and machinery in complete repair will not exceed $600,000.

This will leave (after paying the interest on the first mortgage bonds, amounting to $240,000, and $100,000 to the sinking fund) $560,000 to be applied to the payment of the floating debt of the company.

The road was completed to Canton, Miss., a distance of 206 miles, with a single track and the necessary turn-outs and sidings for transportation of freight and passengers, in the month of March, 1858.

The cost, up to February 28, 1861, has been for the 206 miles of road, with the bridges, depot buildings, division houses, iron rails, wood and water stations, real estate, right of way, graduation, labor and material of all kinds	$5,570,452 65
For locomotive engines, cars, tools and machinery	1,040,729 52
Expended for graduation, &c., north of Canton, say	418,392 18
For iron rails now on hand at the depot ready for laying on the extension, 17,242 bars, weighing 3,054½ tons, sufficient to lay 35 miles, cost say	126,118 37

The graduation of 26 miles immediately north of Canton, Miss., is complete and now ready for the rails; 14 miles more are under contract and being rapidly completed, the payments for which, by the terms of the contract, are made by the subscriptions obtained along the line from the property holders.

An additional section, nine miles in length, extending from the city of Aberdeen to the intersection of the Mobile and Ohio Railroad, is being graded, and the contract for laying the iron, has been made upon the same conditions.

There can, therefore, be no doubt that the road will be extended to Kosciusko within twelve months from this date, and Aberdeen connected by rail by the way of the Mobile and Ohio and the Southern Roads, with New Orleans, on or before January next, 1862.

We have built for the protection of the depot building and machine shops, at a cost of $9,000, an iron tank or reservoir of a capacity to hold 375,000 gallons of water, by which, with the connecting pipes and hose, the freight sheds and machine shops, can at any time be flooded with water in case of danger from fire. With a view to extend our cotton yards, we made two lines of embankment through our property below Claiborne street and laid the cross-ties and iron. It was absolutely necessary to the trade of the road, and will have to be extended. The machine shops must be removed as soon as practicable from their present situation, to the company's property beyond Claiborne street, and should be permanently built of fire proof materials. By this means the present cotton and freight yards will be sufficiently enlarged to amply accommodate the increasing business of the road.

We have been compelled to resurvey the whole line of road from the State line to Canton, in order to ascertain the lines of the various properties through which we pass, the right of way having been but partially obtained, and suits for heavy damages being constantly brought against the company for trespass. These surveys have been completed, the necessary maps and plans made out, and our attorneys are now ready to commence the necessary legal proceedings to obtain the titles to the land over which the road passes.

The necessary preliminary surveys have been made under the immediate charge of the Assistant Engineer, Mr. Miller, between Kosciusko and Aberdeen, to ascertain the best practicable route, and the necessary maps and profiles are being now made out.

To connect that portion of the road between Kosciusko and the Aberdeen division, at the crossing of the Mobile and Ohio Railroad, a distance of seventy-three miles, with the necessary sidings and turn-outs, will cost about one million five hundred thousand dollars. To meet this we shall have to rely upon the subscriptions obtained along the line of the road and its vicinity from the planters and resident property holders, and by the counties through which it passes, which are daily increasing; also the proceeds of the second series of bonds, already alluded to as now ready for negotiation. Should these resources be insufficient, it will be necessary to devote the net earnings of the road, after paying the floating debt of the company, to this purpose. Should the earnings of the road be thus applied to the construction of the road beyond Canton, it will require at least three years of its revenue for its completion to Aberdeen, say 1865, until which time no dividend can be declared.

A new and commodious depot should be built

at Canton for the accommodation of passengers, with sufficient platforms and sheds to enable us to exchange freights with the Mississippi Central Railroad. By this change we will save nearly all the amount paid for lost and damaged freight, under which head we paid last year $11,760 10. New depot buildings are required at Terry, Osyka and Kenner Stations, and the sidings extended still further, to accommodate the increasing business.

It will be to the interest of the company to encourage the building of manufacturing establishments and private dwellings along the line of the road; also, agricultural improvements, by so arranging the prices for freight and passage as to induce their location in the vicinity of the road. The local and way traffic already exceeds the through travel and freights.

Notwithstanding the resolution passed at the last annual meeting of the stockholders; prohibiting the issuing of any free passes, we have been constantly annoyed by applications for them, which are not confined to objects of charity. The most persistent in their demands are those who have the least claim.

The Legislature of the State of Louisiana has amended the charter of the company by repealing the tenth section of the act of incorporation, subject, however, to the approval of the stockholders. This amendment, to become a law, requires a vote of three-fourths of the whole number of shares subscribed—and the vote will be cast on this question on the 15th of April next, at the time of the election for Directors for the ensuing year.

This change in the charter does not deprive the stockholders of their voice in any contemplated amendment, now or at any future time, as may be seen by reference to the 11th section of the act of incorporation.

All of which is respectfully submitted.

H. J. RANNEY, President.

New Orleans, April 6th, 1861.

Philadelphia and Erie Railroad.

The following is an extract from the report of EDWARD F. GAY, Esq., Vice President and Superintendent of this road.

"It is estimated by those well acquinted with present operations in the oil region, and the arrangements now in progress for new works, that the amount to be sent to market during the ensuing spring and summer, will not fall short of *ten thousand* barrels per week! This oil is taken to Erie, and thence shipped to New York, Boston, &c., where it finds a ready market. Little, if any, is sent to Philadelphia, unless such as may be floated down the Alleghany river to Pittsburg, during the navigable season, and sent thence to Philadelphia by the Pennsylvania Central Railroad. When the Sunbury and Erie Railroad shall be finished, it will at once form the natural outlet for most, if not all, the oil sent eastward or southward—which, reaching Philadelphia, will constitute this the great oil mart, from whence it can be shipped wherever required."

If the estimate of those engaged in the oil business is correct, there would be carried over our road, if finished, this year, four hundred thousand barrels. The average rate charged on the Western Division is about forty-five cents per barrel, and if this oil was sent eastward over our road, it could not average less than one dollar per barrel. Admitting this to be the case, and the amount sent to be but one-half the amount estimated, we should immediately have a single article of transit paying for the first year $20,000, with an almost certain assurance of a regular if not rapid increase, as there appears to be little doubt that oil will be found at other points immediately contiguous to the line of our road. The extension of the Western Division twenty-five miles eastward from Warren, will reach the bituminous coal fields, and from that source greatly augment the business of the road thence to Erie.

Of the amount of business which will be done on the Sunbury and Erie railroad, when completed, it would be difficult to form a just estimate.

The resources of the immense tract of country bordering on the great lakes, Erie, Huron, Michigan and Superior, (to the trade of which this road cannot fail to form a highly favored outlet,) are so great and yet so comparatively undeveloped, as to fully justify the most sanguine estimate that could be made. Independent of these, however, the country through which this road passes, and which I have often heard designated as barren, wild, worthless, &c., presents, in its mineral oil, iron ore, coal of every variety, fire clay, kaolin, pine, hemlock, maple and cherry timber of unrivaled quality, as fair inducements for the investment of capital, and as certain assurance that the road when finished will have more of the elements calculated to make it a *paying road*, than are presented by any other now in the course of construction in this country; and I may add more than by a majority of the roads already finished and in use.

Many thousand tons of Lake Superior iron ore are annually delivered on the wharves in the harbor of Erie, for the supply of furnaces in the northwestern part of the State. A large amount of this material will doubtless be required along the line of our road, where iron ore is found in abundance, but which (I am assured,) when mixed with a small proportion of Lake Superior ore, will enable the manufacturer to produce a quality of iron inferior to none in this country.

Of the bituminous coal on the line of the road, it seems hardly necessary to say anything; its abundance and variety are well known, as also its adaptation to the uses of the manufacturer, and to the production of gas. It extends for a distance of one hundred miles along the road, and is found at points convenient for loading directly from the mines into the cars.

A glance at the map of our State will show that the Sunbury and Erie Railroad, (in its connections with the Shamokin and Pottsville Railroad,) is the only one extending *directly* from Lake Erie into the heart of our anthracite coal region.

This coal can be delivered at Erie, direct from the mines and without transhipment, for about five dollars per ton, and as it is an article which has already been introduced to a considerable extent in most, if not all the Lake cities, may be safely estimated that, within two or at most three years after the completion of the road, the amount of this coal to be carried over it will equal one hundred thousand tons per year, and annually thereafter increase.

Within the past year assurances have been given, by owners of lumber establishments along the waters of the upper Susquehanna, that many millions of feet of sawed lumber will be sent over the railroad to market, as soon as it is completed and opened to use.

In the vicinity of Ridway, large tracts of hemlock timber are found, which are so favorably situated as to offer great inducements for the establishment of tanneries in that vicinity. Contiguous to the waters of the Clarion are also found immense groves of cherry timber of large growth and superior quality.

The country through which the middle Division of this road passes, produces no agricultural products beyond the necessities of the present inhabitants. It follows, therefore, that, at least for some years to come, the tide of population which will naturally flow into it, as soon as the road is finished, must be supplied with breadstuffs, merchandise, &c., from either end of the line, and that these will form important items in the general business of the road.

Among the various railroads designed to form connections with the Sunbury and Erie, are the following, viz:

Oil Creek Railroad—(Projected from Garland Station to Titusville, in centre of oil region,) not commenced.

Venango Railroad.—(Projected,) not commenced.

McKeon and Elk Railroad.—Not commenced but will be built as soon as ours is finished.

Alleghany Valley Railroad.—Part finished, balance suspended.

Tangas cootuc Railroad.—finished and in use to west side of river.

Eagleton Railroad.—Finished and in use to west side of river.

(These two roads are about to be connected with ours at Queen's Run Bridge.)

And *Tyrone and Lock Haven Railroad.*

This latter is an important improvement, not only by reason of the connection it will form with the Pennsylvania Central Railroad, but from its extension into the heart of the iron and bituminous coal region of Centre County, through its connection with the Snow Shoe Railroad at Milesburg, near Bellefonte. A large proportion of the grading on this road is done, and it is to be hoped that means will not be wanting to secure its entire completion during the present year, in which case our road will immediately and unquestionably receive a valuable addition to its trade and travel.

Years of experience have taught most railroad men, especially those connected with long roads, that while *through trade* is always desirable and in fact important, the *profits* on it are small, and that from the *local* trade and travel are these mainly to be derived. It should form a prominent object, therefore, as it will doubtless be the interest of this company to offer every inducement and facility possible towards the development of the local business along the line, in which case there can be no doubt of a remunerative return.

Having already enumerated some of the prominent items which are expected to form part of the business of the road when finished, it would be no difficult task to present a statement of the probable amount of such business, with an estimate of its profits, &c.; but such statements are mere estimates after all, seldom accurate, never reliable, and often calculated to mislead even the friends of an improvement. I have therefore omitted them.

The simple fact of a perfect railroad communication, between the best harbor on Lake Erie and tide-water at the city of Philadelphia, passing directly and entirely through our own State, and abounding in resources already named, should be itself prove its importance, commercially and financially, and commend it to the fostering care of the Commonwealth, as well as the attention of capitalists in this and other countries."

Heavy Masses of Copper.

During the past two weeks the contractors who transport the Minnesota copper to the lake, have been taking down masses of extraordinary size. Since March 16th, they have hauled on sleds pieces weighing as follows, in pounds; 7,262, 7,100, 7,254, 7,280, 8,820, 9,450, 7,140, 7,284, 7,900, 11,150, 7,145, 9,600, 7,824, 7,850, 8,900, 9,725, 7,420, 7,400, 7,270. Each of these were drawn by a single pair of horses. They also brought down, but with a four horse team, four masses, weighing 12,300, 11,420, 10,800 and 12,650—the latter and several of the smaller ones were from the Rockland mine.

The mass of 11,150 pounds is the largest ever brought by a single span of horses over the road, according to our recollection.

The load with the mass of 10,800 pounds also contained three small masses, making in all seven tons—the largest load ever brought over the road.

We have here the weight of twenty-six masses brought down the past two weeks from two mines, the heaviest masses from the National having come forward some weeks since. The average weight of the masses is four tons, 1,312 pounds, and the aggregate weight over 122½ tons, including as will be seen, those only which weigh over 7,000 lbs., and less than a moiety of the entire amount of mineral received here during the time.—*Lake Superior (Ontonagon) Miner March 30.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, April 27, 1861.

Morris Canal and Banking Company.

From the report of this Company for the fiscal year ending February 28, 1861, we learn that the canal was opened on the Western division the 27th of March, and on the Eastern division the 5th of April; and closed at the west end on the 8th of December, and on the east end on the 12th of December; and that the navigation was maintained without serious interruption during the whole season.

The income of the company from current business of the canal was $350,710 63

And the expenses were:

Operating canal	$32,300 78	
Repairing "	81,748 09	
Salaries, interest, law and other expenses	25,316 66	
Transportation expenses	4,906 73	
		144,272 26
Profit		$206,438 37
Balance at credit February 29, 1860		6,737 12
		$213,175 49
Dividends, viz:		
On preferred stock	$117,500 00	
" consolidated "	41,000 00	
		$158,500 00
Interest on mortgage bonds		30,240 00
Accident in 1855		3,472 20
Depreciation of boats, horses, etc.		2,264 21
Discount on bonds sold		408 40
Balance—surplus		18,290 68
		$213,175 49

The increase in receipts over those of the previous year was $45,172 70

And the increase in expenses 6,637 26

Increase in net profit $38,535 44

There has been expended since the last annual report, for the permanent improvement of the canal and its works, in providing additional boats, and for real estate and land damages, the sum of $82,316 03. The president says:

At the date of the last annual report, it was stated, that upon the completion of certain improvements then in progress, the floating debt of the Company would be about $75,000, and that provision would be made for its payment, and to defray such other expenses as should be incurred from time to time in the further improvement or enlargement of the canal and its works. In pursuance of this object, a second mortgage has been laid upon the canal, to secure the payment of $300,000 of Bonds, of which $35,000 only have been sold.

The balance of this indebtedness, and the cost of permanent improvements made since that report, leaves a floating debt of $81,549 56 at the close of the last fiscal year—which will be provided for—together with such further expenditures for permanent improvements as the Board of Directors may authorize, by the issue and sale of so many of said bonds as may be required for that purpose.

In view of the present disturbed state of public affairs, and of the general business of the country, it will not be expected that an estimate of the trade and income of the current year should be attempted; but the preparations made to mine and send to market, anthracite coal from the Lehigh and Wyoming coal fields, the amount of sales already made, and the increased facilities for storing and re-shipping coal at Jersey City, would seem to justify the expectation of an active trade on the Morris Canal, producing results satisfactory to the stockholders.

The items of expense which fall below the corresponding items of last year are the "repairs of canal proper," and the "plane and lock tending and collecting." The items of expense which materially exceed the corresponding items of the previous year are "repairs of locks" and "repairs of planes." In reference to these the Superintendent says:

In order to explain the increase of the item of repairs of locks as compared with former years, it is necessary to state that the locks as originally constructed, were of stone masonry, laid with hydraulic cement mortar—that they were widened and lengthened in 1841—that all the new masonry was then laid with lime mortar washed out to such an extent as to endanger the stability of the walls.

The repairs consist principally in grouting the walls with hydraulic cement mortar, reflooring bottom of the lock, and making new gates and wickets. These repairs are necessarily made in the winter, and to prevent injury to the mortar by frost, each lock has to be housed and artificially heated night and day from four to six weeks. During the winter of 1859-60, five locks were so repaired, and eight more during the last winter.

The excess in the cost of "repairs of planes" over 1859, is accounted for by the fact, that the renewal of more of the principal parts, such as ropes and rails, were required last season than usually happens in any one year. The average of the last two years does not exceed the ordinary amount of such repairs.

All the inclined planes have worked well during the season, and the beneficial effects of removing the last of the old planes, was very apparent in the perceptible reduction of freights, and the increased speed and regularity in the movement of the boats.

The pumping apparatus at the Hackensack river, has removed all complaints of low water on the tide level between said river and Jersey City, at a cost of less than $300 for the whole season.

The usual winter repairs and spring cleaning of canal, will be completed in readiness to open the navigation on the 25th inst.

A table is given showing the annual fall of water at Lake Hopatcong Reservoir during the

past 15 years, beginning with the first day of December, 1845; from which it appears that the last has been the dryest year in the series—the fall of water being 18½ per cent. less than the average, and 29 per cent. less than the greatest fall. Notwithstanding this comparative drought, the canal closed with water enough in this one reservoir to have passed each way over the whole length of the canal more than 800,000 tons in addition to the trade that was carried.

A table is also given showing the trade and tonnage of the canal since 1845; in which year the tonnage was 58,259; in 1846, 109,505; in 1847, 155,559; in 1848, 204,682; in 1849, 234,305; in 1850, 239,682; in 1851, 281,707; in 1852, 358,797; in 1853, 467,288; in 1854, 543,269; in 1855, 553,204; in 1856, 563,413; in 1857, 563,362; in 1858, 554,034; in 1859, 638,019; and in 1860, 707,631.

GENERAL STATEMENT.

Cost of "canal and appurtenances"		$2,835,090 24
Assets:—		
Cash	$21,797 63	
Bills receivable	13,484 14	
Individual accounts	29,161 74	
Materials	11,995 65	
		76,439 16
		$2,911,529 40
Capital stock—		
Consolidated		$1,025,000 00
Preferred		1,175,000 00
		$2,200,000 00
Mortgage bonds		535,250 00
		$2,735,250 00
Liabilities—		
Bills payable	$153,676 44	
Individual accounts	1,413 84	
Dividends unclaimed	2,868 44	
Coupons	30 00	
		157,988 72
Profit and loss—surplus		18,290 68
		$2,911,529 40

The expenditures during the year chargeable to capital amount to $80,116 03. The shipping basin at Jersey City, commenced in 1859, has been enclosed on all sides by a substantial crib work, thereby securing still water for handling coal on the south side of the company's coal piers; increasing the storage room, and otherwise facilitating the trade of the canal.

Seven lift locks, one guard lock, and the tide lock at Jersey City, have been lengthened to 100 feet clear in the chamber. There yet remain to be lengtheneed 16 lift lock, four guard locks, and two tide locks, before the full benefit of this improvement will be realized.

Intimately connected with this subject is the question of changing the route of the canal at Dover, and substituting one inclined plane for the locks at that place. The advantages of the proposed improvement, and the cost of the work are thus stated in the Engineer's Report:

The question of altering the line of the canal at Dover, ought to be decided before lengthening the five locks at that place. According to a survey and estimate heretofore made, ·4 of a mile will be saved in distance, and one plane substituted for five locks, by the proposed change, at a total cost of abont $60,000. The new line will be comparatively straight, and easy to navigate, and will dispense with five locks, and half a mile of difficult and tedious navigation. It is estimated that this improvement will save to the boatmen one-third of a day in each round trip. With the present trade of the canal, this would amount to a saving of about $11,000 per season, and with a trade equal to the present capacity of the canal, the saving would be at least $25,000 per season.

Accompanying this report is an accurate profile of the canal in its present state, together with some historical and descriptive notes, referring to its first construction, and the subsequent alterations and improvements made to the canal and its appendages.

The following are the officers of the company:
President—EPHRAIM MARSH.
Eng'r and Superintendent—WM. H. TALCOTT.
Secretary—LEWIS N. CONDIT.

Grand Trunk Railway of Canada.

We give below a synopsis of the report of Mr. Walter Shanly, on the traffic and working of this line during the fiscal year ending June 30, 1860. It is dated "Montreal, Nov. 23, 1860," and addressed to T. R. Blackwell, Esq., Managing Director:

This road was opened its entire length November 21, 1859, and the number of miles worked since that date is comprised in the following divisions: Detroit to Port Huron, 59; Sarnia to Portland 794; Richmond to Quebec, 96; London branch, 21—total 970 miles. The extent of road opened at the date of the previous report was 880—showing an increase of 90 miles during the year. The average number of miles worked in the half year ending Dec. 31, 1859, was 895; in the second half year ending June 30, 1860, 970; and in the whole year ending June 30, 1860, 932½. The total receipts for the year were as follows:

From passengers		$1,077,008 39
" merchandise		1,682,620 50
" mails		99,273 84
" express		23,755 12
" rents, baggage, telegraph, etc		26,395 84
		$2,909,053 69
And the working expenses were:		
Locomotive department	$754,326 39	
Car "	289,335 89	
Maintenance of way	671,986 84	
Passenger expenses	153,889 04	
Freight expenses	285,747 45	
Telegraph	21,747 40	
Ferry	19,042 69	
Damages, etc.	12,612 51	
Agencies	43,976 16	
Salaries, rents, etc	61,217 43	
Carriage of goods, passengers, etc	19,763 69	
Loss on Detroit section	3,241 01	
Taxes	25,132 79	
General charges, law expenses, etc	51,754 24	
		2,413,773 55
Net earnings		$495,280 14

The receipts for the half year ending Dec. 31, 1859, were $1,387,200 18; and for the half year ending June 30, 1860, $1,521,853 51—an increase of $134,653 33. The expenditures in the first half year were $1,121,518 22; and in the second $1,292,255 33—an increase of $170,737 11.

A comparison of the receipts with those of the preceding year shows an increase of $627,732 94; with an increased expenditure of $334,644 26—the net increase being $293,088 68. The per centage of increase in receipts was 27½ per cent.; and in expenses of 16.09. The report says:

The general depression which had pervaded all branches of commerce on this continent, since 1857, still continued to be felt, and, of course, still continued to exercise an injurious influence on railway traffic, until the abundant harvest of this year began to be gathered in. In common with all other carriers we are *now* profiting largely from the bountiful crop with which the country has been blessed this season. The benefits accuring to us, however, from that source of general rejoicing have no bearing whatever on the increase in our receipts for the year ending 30th June last, as the products of the field did not begin to find their way to market until September. A comparison of the receipts under every denomination of our traffic for three years past, commencing 30th June, 1857, and ending June 30th, 1860, proves that our business is growing in a very much more rapid ratio than our expenses are increasing.

The local passengers carried numbered 587,637; in the previous year, 564,653—an increase of 22,984. The foreign passengers were 102,185, against 88,158—an increase of $14,027.

It has not unfrequently been charged upon us by a portion of the press of the country, that, for the sake of the present gain derivable from carrying the immigrant through over the whole length of the line, our agents endeavor to influence him to pass onward to the Western States, instead of encouraging him to remain in the province. The allegation has no foundation, in fact; simply because it happens that in this instance at all events, our patriotism and our interests are pleasingly in unison. The "Through" immigrant does not, as a general thing contribute a larger sum to our immediate traffic receipts, than the intending settler in the province going to Western Canada, for instance—does, and so far from influencing passengers to go beyond the province, all the company's efforts both here and in England, for years past, have been to induce the emigrant to remain in the province, and part of the labors of the London Office during the last five years has been the distribution of nearly a million of pamphlets, maps and circulars of information respecting Canada as the most desirable field for the emigrant.

The number of tons of local freight transported during the year was 529,285; and of foreign freight, 93,685. Mr. Shanly says:

The management of this railway is constantly charged by the public and the press of the country with grasping at and fostering the *foreign* business to the neglect of the *local*. In other words we stand charged with neglecting or not understanding our own interests; for every person at all conversant with railway business, knows, that its local traffic is the best paying traffic a road can have. In refutation of this charge, since self-interest will not be accepted as guarantee for our giving the people of the Province our best attention first, before going abroad to seek for business, I would point to the above figures, showing that our foreign tonnage for the year ending 30th June last did not amount to one sixth part of our total tonnage—that is to say, for every ton of merchandise carried for foreigners we carried upwards of five and a half tons for our own people; and when the accounts for the current half year come to be presented, it will be still more conclusively proved that the managers of the Grand Trunk Railway are not so blind to the interests of the company as to give an undue preference to that class of business which yields the smallest profit.

I have thought it advisable to allude to the foregoing question at length, because it is one that is attracting a great deal of attention in the country, and may, perhaps, yet be brought under the notice of the Legislature; so strong is the current of popular belief that the railway is used more to the benefit of foreigners than to that of the people of the Province. It is not easy to stay a popular prejudice, and if facts supported by figures will not do it, nothing else can.

The traffic of the Detroit and Port Huron section has not yet answered the expectation that were formed of it. You are aware from my former report on this subject of the several causes which, in my judgment, operate against the local traffic of that line. To the *through* traffic of the Grand

Trunk Railway the Detroit and Port Huron section is, however, an indispensible adjunct; but, for reasons hereinafter given, we are not now taking, of that class of business, one-third of what is offering, and, as a consequence, that portion of our road is not worked to anything like its full carrying capacity.

In point of alignment, gradients and completeness of construction generally, it stands first among the several sections of the Grand Trunk Railway, and when supplied with a proper equipment can be worked at a lower cost per mile than any other part of the line.

Previous to 30th June last, we had neither engines nor cars of our own on the Detroit section, but were wholly dependent for the working of the line on hired rolling stock, which, of course, added very much to our working expenses, as plant of that description cannot be hired at rates representing merely the interest on its value. Even now we do not own, in engines and cars suited to the 4 ft. 8½ in. gauge, more than one-third of a full equipment. So short are we of engines and freight cars, that though the foreign traffic from the West has for the last two months been all but abandoned, to the great injury of the Detroit and Port Huron section of the line, the local business in Canada is still very far from being properly served.

The equipment consists of 80 passenger and 132 freight engines; 92 first class, 49 second class, 2 composite, 58 baggage and mail, and 2,778 freight cars, 133 ballast wagons, and 34 snow ploughs. The gauge of the road is 5 ft. 6 inches. On the Detroit and Port Huron section there are 5 engines; 4 first class and 2 second class passenger, 2 baggage and mail and 40 freight cars. The gauge of this section is 4 ft. 8½ inches.

With a full equipment of the cars and engines, and with proper appliances for handling and storing grain, in bulk, at Toronto, Kingston, Montreal and Portland, there would now be scarcely any other limits to the business we could do than are imposed by the limited capacity of a single line road, and by the very small amount of shipping to be counted on at Portland.

The total tonnage for the year was 622,971; of this only 105,872 tons were westward bound freight, viz: from Boston and Portland, 72,212 tons; from Quebec 4,309 tons; and from Montreal, 29,351 tons. In 1859 the westward tonnage was 97,875; in 1858 it was 76,860. This shows that the company is gradually gaining ground in that direction. The total number of persons employed permanently in the traffic department, according to returns of June 30th was 1,086. The report concludes as follows:

I have an abiding faith in the ultimate ability of the road, to make a fair return on the capital absorbed in it. The cost per mile to share and bondholders is much below the average cost of the chief American lines east of the great lakes. And though I would not undertake to promise that for some years to come it can be worked at less than 60 per cent. of its gross earnings, I believe that its receipts may be swelled to an amount that will represent surplus sufficient to pay interest on the bonded debt, and, by-and-by, a dividend on the share capital. The working expenses of the year ending 30th June last are not to be taken as a criterion of the proportion that outlay is to bear to revenue for ever. For the first moiety of that year we had no Victoria Bridge, and we had unavoidably to do many things, arising out of shortcomings in original construction, which drew unfairly upon revenue. The latter half of the year saw us, for the first time, in the condition of an independent road, connecting directly with feeders in the Western States; but it also found us with upwards of one hundred miles of new road upon our hands werewith to effect that connection, with insufficient and already overworked rolling stock, and with incomplete and consequently expensive ferry arrangements at Sarnia. And all past experience goes to prove that, whatever forethought may have been devoted to its construction, a railway cannot be ushered into existence in such a state of perfect organization as will allow of a thoroughly economical system of working being administered from the outset.

There is one portion of the company's property to which I have as yet made no allusion, because it has not been included in the general working of the line for the last twelve months, namely—the portion east of Quebec—from Chaudiere Junction to Riviere du Loup; 118 miles.

Of that part of the Grand Trunk Railway scheme I will confine myself to observing that since December of last year it has been "farmed ont" to certain parties, but at a direct money loss to the company of 1,500 dollars per month, in the form of a subsidy to the lessees; and that we now have offers for leasing the road without any subsidy at all being looked for; thus showing an improvement in the prospects of that section of the line to the extent of 18,000 dollars a year. I would recommend that the leasing or "farming" principle, *without subsidy*, be adopted for the working of the Riviere du Loup extension for a year or two to come.

Missouri River Valley Railroad.

The directors of the North Missouri Railroad, in their recent report, say that while they feel that the best interests of the State demand the building of their road above the crossing of the Hannibal and St. Joseph Railroad, and that good faith requires it, they have a just appreciation of what value the Missouri River Valley Railroad will be to it when built, and have done all in their power to assist in that enterprise. They then add:

The organization of that road is divided into two companies: the one having the charter from the town of Moberly, or the junction with your road to Brunswick on the Missouri river, under the name of the Chariton and Randolph Railroad Company, and the other the Missouri River Valley Railroad Company, from Brunswick to the western border of the State on the Missouri river; the first has received liberal subscriptions of stock in the rich counties of Chariton and Randolph from individuals and the counties in their corporate capacity. The North Missouri Railroad Company had a disputed claim against the county of Randolph, for stock subscription, in suit for $22,000, which was considered doubtful, and the Directors, compromised the suit on the condition that the county and citizens would increase the amount to fifty thousand dollars and subscribe the same to the Chariton and Randolph Railroad, which was done.

In addition to this, a contract entered into by this company with these two roads, giving them such advantages in the transportation of freight and passengers, as well as material, &c., for construction of their roads, and the supplying when needed of such construction trains and rolling stock to operate with, as was believed would greatly enhance the building of those roads. When they are completed and in operation, it is almost impossible to calculate, now, the immense benefit they will be to your road, traversing as they do the wealthiest and most populous counties in the State, terminating on the western border, either at Weston or the great and growing city of the western border of the State, St. Joseph, almost on an air line from St. Louis, giving the North Missouri Railroad and the people of St. Louis a direct connection with St. Joseph, independent of the Hannibal and St. Joseph Railroad. The zeal manifested by the people along the proposed line of this road, the immense business it would at once command, the undoubted ability of the counties through which it passes and terminates in, to push it on to completion, renders it almost a fixed fact that it will be built at an early day. The counties of Carroll and Ray, have already subscribed over $200,000 each, and the counties of Clay and Platte undoubtedly will increase on these amounts largely should the road be located through them to Weston; or, on the other hand, the counties of Clinton and Buchanan, and the city of St. Joseph, will, if it is found to be best to terminate the road at that city; for these reasons, your Directors concluded they could not do too much to forward this enterprise.

Through the energy of the President, Mr. W. E. Moberly, and the Directors of the Chariton and Randolph Railroad Company, work was commenced at the junction, and prosecuted, until some fifteen miles of the east end of the road is now graded and ready for the superstructure; and it was the intention to have had as much as twenty miles completed and ready for the rolling stock by the present time, but the unfortunate crisis that has fallen upon the whole country prevented—it being thought best to suspend operations during the winter.

It may be as well to repeat here, that with these roads completed, the most timid friends of the North Missouri Road could no longer doubt that it would be eventually the best paying road in the State. In view of this the Directors of the North Missouri Railroad thought best to ask the Legislature to give the company the authority to create a first mortgage on your road, limiting the amount to $2,000,000, one half of which is to be loaned to the Chariton and Randolph Railroad and Missouri River Valley Railroad, believing it would expedite and render certain the building of those roads, for which they are to mortgage their roads and become responsible for the interest on that amount to this company, thus giving the State an additional security for her debt, and the business derived from increased lengths of road of over two hundred miles.

Sale of the Houston and Texas Central R. R.

Some surprise was manifested on our streets yesterday morning when it was reported that the road bed, rolling stock and franchise of the Houston and Texas Central Railroad had been quietly sold the day previous at sheriff's sale, and it was the subject of a good deal of talk yesterday, with, however, but little excitement observable. The names of the purchasers, Messrs. W. J. Hutchins and David H. Paige were taken at once as a full guarantee that nothing improper had been done, and that the rights of their fellow-stockholders would be secure. That this confidence was well-founded, they this morning give good evidence in the circular published in this paper, to which we refer the reader.

From all the information we have been able to obtain, it seems that the affairs of the Company had become so much embarrassed by their floating debts and interest on permanent debt that they could not pay. A sale became inevitable. An execution on judgment for $10,000 obtained at last term of the District Court was levied, and after due advertisement the sale was made. Messrs. Hutchins & Paige being large stockholders and creditors, bid for the amount of the judgment, and became the purchasers to secure themselves, and for their own benefit.

These gentlemen now constitute the corporation of the Houston and Texas Central Railway Company, having all the chartered powers heretofore granted. By reference to their circular it will be seen that they propose to associate with themselves, on equal terms, all the old stockholders who hold "dollar for dollar" stock upon their advancing a proportionate amount on their stock—say ten per cent. in six months, so as to raise a fund to pay the interest due on the permanent debt to the State, and others, which are liens on the road; and also the debt to laborers on the road. They desire to place all *bona fide* stockholders in the old company on equal footing with themselves, and to act in all matters in a spirit of fairness, not solely for their own advantage, but for the benefit of all disposed to meet them on fair and liberal terms, having in view the promotion of the enterprise of completing the road. We think this is manifest from their circular.

The effect of all this will be to place the road on a sound basis, and ere long to raise the stock from its present depreciated value, to something

near par. The market value has been, according to the money market, from $25 to $35, for a year or two past. Twenty-five dollars has been a full price for the past six months. The proposed ten per cent. added, will make it $35. But the knowledge that all liabilities are provided for, and all operations reduced to a cash basis, will raise the value to double that amount.

That the lands and other assets of the old company will be sufficient, if used with prudence, to pay the floating debt, not secured by liens on the road, there can be little doubt, but if they are not, it is the desire of the new company to settle the deficiency as soon as practicable, from the earnings of the road. Whether this can be done, however, depends on future contingencies. Certainly, they are under no obligations to do it. We have the best reasons for knowing that the objects and designs of the new proprietors are honorable and laudable. As a creditor of the company to a small amount, we are satisfied with what has been done. The restoration of confidence will place the enterprise on a good foundation, and this will satisfy the people.

Their determination to secure the dues of the laborers on the road is exceedingly praiseworthy. These men have worked hard and ought to be paid if no one else is. The liberality of Messrs. Hutchins & Paige in providing for them will gain much favor with the public.

On the whole, the enterprise now, to all appearances, has a bright future before it. And we know the people will join us in a hearty wish that the new company may be able to push the work rapidly through.—*Houston Telegraph, April 9th.*

North Missouri Railroad.

At a meeting of the stockholders of this company held in St. Louis on the 1st inst., the following gentlemen were chosen directors for the ensuing year: J. S. Rollins, I. H. Sturgeon, N. B. Coates, A. Harper, Daniel E. Bryan, John Wickham, J. T. Swearengen, D. A. Griffith, J. O'F. Farrar, J. B. Morris, C. Taylor, John Orrick.

At a meeting of the new board, the following officers were elected:

Isaac H. Sturgeon, President.

Andrew Harper, Vice-President.

J. B. Moulton, Chief Engineer and Superintendent.

John Lee, Secretary and Treasurer.

John Wickham, Attorney.

Bald Eagle Valley Railroad Company.

The Tyrone and Lock Haven Railroad having been sold by decree of Court, its purchaser, Philip M. Price, Esq., with others since associated with him, have organized a new company, under the name of the Bald Eagle Valley Railroad Company. The officers of the new corporation, elected Monday, April 1, at Lock Haven, comprise these names, to wit:

President.—Philip M. Price.

Directors.—Thomas A. Scott, John A. Gamble, D. K. Jackman, J. W. Maynard, Edward Blanchard and James Chatham.

Treasurer.—L. A. Mackey.

Secretary.—James Hemphill.

Chief Engineer.—Wm. Harris.

This road is 54 miles long, having its termini in a connection with the Pennsylvania Railroad on the Juniata and with the Philadelphia and Erie Railroad on the West Branch. Its course is north-east and south-west, through a valley at the base of the Alleghany mountain; and in addition to the local traffic which it will carry, it will constitute the sole rail connection between the great river valleys of the Juniata and West Susquehanna.

Very much, nearly all we believe, of the gradnation of the road-bed is completed; so that the funds to be provided to put the road into operation will be chiefly required for superstructure and rolling stock. And as this is one of the roads named in the act for the commutation of the tonnage tax, among which is to be distributed the tax accrued before the repeal, its completion is a foresbadowed certainty.

Railroad Earnings.

The net receipts of the New York and Harlem Railroad for the month of March are as follows:—

March, 1861	$90,710 05
" 1860	88,598 48
Increase	$2,111 57

The following are the earnings of the Great Western Railway of Canada for the week ending April 12, 1860:

Passengers	$20,873 74
Freight and live stock	31,994 67
Mails and sundries	1,569 82
Total	$54,348 23
Corresponding week of last year	47,180 62
Increase	$7,167 61

The earnings of the Norwich and Worcester Railroad for March, were:

	1860.	1861.
Passengers	$8,815 13	$7,459 37
Freight	18,985 87	13,994 99
	$27,801 30	$21,454 36
Decrease		$6,346 95

Cheap Route for Freight.

The chain of railroads from the West over the Pittsburg, Fort Wayne and Chicago, and the Pennsylvania Railroads, now furnish the cheapest, quickest and safest means for the transportation of freight from the West to the East. The cost of carrying a bale of cotton of 500 pounds, from Memphis, Tenn., to Boston, Mass., by the inland route, is $4 50. This is less than to send it to New Orleans, reload it in a ship and send it by sea; and the saving of time about 30 days. One railroad car holds 30 bales of close packed cotton. —*Pittsburg Post.*

Pittsburg and Connellsville Railroad.

The Fayette *Patriot* announces that the bill aiding the Pittsburg and Connellsville Railroad, which was recently read in the Legislature, will not become a law this session, because the Governor, even if it passes, will refuse to sign it. It thinks the bill will pass both Houses, so impressed are the members with its fairness, but the Governor deems it unconstitutional, and as he will not sign it, it will have to go to the next session.

Atlantic and Great Western Railroad.

The engineers of this work have completed the survey at the ground for a track, from Meadville to Utica, eight miles above Franklin, and will soon be in that borough.—The distance from Meadville to Franklin is about twenty miles, and this branch road, when completed, says the *Spectator*, will throw more freight and passenger business to the main line of the Atlantic and Great Western Railroad than five times that distance of extension from Meadville westward.

West Jersey Railroad.

Trains commenced running on Monday, April 1, from Camden to Millville, 38 miles. It is expected that this road will be completed to Bridgeton by July 1st. Soon after that period it will, doubtless be extended to Cape Island City.

Portage Lake Smelting Works.

Commenced the smelting of copper on the 18th of last December, and have at present—March 27th—seven hundred and fourteen tons of ingot and cape copper ready for shipment. This amount might have been exceeded, but it is the result of all the mineral the mines sent in. They have, as stated, we believe, on a former occasion, facilities for smelting one hundred and twenty tons per week, or over six thousand tons a year. But farther observations appear to be unnecessary.—*Houghton Mining Gazette, March 28.*

New Railroad Project.

A movement has been started having for its object the construction of a line of railway from Ridgeway to the coal fields of Elk county. It will be known as the Shannut and Ridgeway Railroad, and will connect with the Sunbury and Erie road at Ridgeway. A bill incorporating a company to build the road has been read in the House. It fixes the capital stock at $100,000, and requires the road to be completed within four years.—*Pittsburg Post.*

Broad Mountain and Mahanoy Railroad.

This road is intended to connect the Reading Railroad and the Schuylkill Navigation with the immense body of coal lands owned by Philadelphia, and, if completed, will enable the city to lease their lands at remunerative prices, because coal can, by this route, be transported to the Philadelphia market at from forty to fifty cents per ton cheaper than by the present outlets. It will, therefore, render these lands a source of profit instead of expense to the city, as at present.

Journal of Railroad Law.

MANUFACTURING CORPORATIONS: PERSONAL LIABILITY OF TRUSTEES FOR NEGLECTING TO FILE THEIR ANNUAL REPORT.

The general act for the organization of manufacturing companies passed in 1848 by the State of New York, requires that within 20 days from the first of January in each year, all companies shall make an annual report stating the amount of capital stock, the proportion actually paid in, and the amount of existing debts; and that if any company shall fail to do so, the trustees shall be personally liable. Under this statute the Rochester Novelty Works—a manufacturing company was organized. From March, 1857, Boody, Otis and Palmer became and continued trustees until the following December. The trustees immediately preceding them neglected to file and publish within the twenty days after January 1st, 1857 or at any time since, the statement or report required by the 12th section of the act.

The corporation became indebted to the plaintiff for goods sold to it at divers times between January 18, 1856, and January 1st, 1857, executed its promissory note for the amount of such indebtedness, for which, with interest, the plaintiff demanded judgment against the defendant Otis and the other trustees. He also demanded the amount of another note made by the corporation in July, 1857, for goods sold to it between January 8th and May 5th, 1857.

The defendant Otis demurred to the complaint and judgment was rendered in his favor by the General Term of the New York Supreme Court for the seventh district, and the plaintiff then appealed to the Court of Appeals. The following is the opinion of the appellate court.

Comstock, J.—The general act under which "The Rochester Novelty Works" was incorporated, declares that the companies organized according to its provisions, shall, annually, within twenty days from the first of January, make a report stating the amount of the capital stock, the proportion actually paid in, and the amount of the existing debts; and that if any company shall fail to do so, "all the trustees of the company shall be jointly and severally liable for all the debts of the company then existing, and for all that shall be contracted before such report shall be made." There is certainly some obscurity in this language when we come to apply it to different conditions of fact. "All the trustees" are declared to be liable for "all debts." The most

literal interpretation will undoubtedly give to the provision a broader significance than the Legislature intended. For example, a board of trustees might be superseded by a new election immediately after a default in making the report had occurred. Of course, the retiring trustees would be liable for the debts then existing. They ought to be so liable, because it would be simply attaching to their own default the consequences which the statute has declared. But in a literal use of the language, they would also be liable for all future debts of the company, if their successors should also fail to make the report, although they had ceased to be trustees, or even stockholders. Thus, notwithstanding the loss of all control in the management of the company and even of all interest in its affairs, they might remain liable forever in consequence of the continuing default of those who succeeded them, a default which they would have no power to prevent, any more than they would to prevent the contracting of future debts. This clearly was not the intention of the Legislature.

Equally opposed, in my judgment, to the equity and good sense of the statute, is a construction which imposes upon a succeeding board of trustees a liability for debts which have become charged upon their predecessors by reason of the default of the latter. According to this construction one body of trustees may retire from office charged with all the debts of the company, because they had not complied with the law, while those who are appointed to succeed in the management cannot assume the trust, without taking also the personal burdens which the former trustees had incurred by their own neglect. This will appear the more reasonable when we consider, that the trustees thus coming into office after a default of those who preceded them, had no power to prevent that default, and that they have none to avert its consequences. They could not prevent it because they were not in the management when it occurred. They cannot avert its consequences if this be the true construction of the law, because although they may with the utmost promptitude, file a report, as the statute requires, that proceeding on their part will not discharge any personal liability, either of themselves or their predecessors, which has already accrued. The liability, when it has once attached and upon whomsoever it has attached, remains fixed and unalterable. This is plain.

Such an interpretation of the statute would be a most unfortunate one for these corporations; for I apprehend the stockholders would find great difficulty in electing prudent and careful trustees in the place of a reckless and improvident board, if the person elected, at the moment of taking office, must become personally involved in all the embarrassments and debts of the company. A sounder and juster view of the question it seems to me, is, that a board of trustees guilty of the default in January, and retiring from office, is liable for all antecedent debts, and for those only; and that the successors, if they continue the default until the next January, and no longer are liable for the debts afterwards contracted during that year, and for no other. If the person succeeding to office promptly obey the requirement of the act, they will escape all liability, and it is plainly just that they should, because there is no failure of duty on their part. If they do not they very properly incur the hazard of the debts, which they themselves as trustees contract. This hazard they may be quite willing to incur; but there is neither principle or policy in making them responsible for the acts and defaults of their predecessors. The general policy of the act is immunity from personal liability, but this is attended by certain conditions demanding the personal observance of the trustees. A single case may occur where successive boards may be liable for the same debts; and that is where there are successive defaults in January. By the express terms of the statute, the trustees omitting to file their statement within the first twenty days of that month are liable for all debts then existing. Now the debts then existing may be wholly or partly the very debts for which their predecessors became liable, by reason of a default in the January of the previous year. But from this liability there is a chance of escape by a simple performance of the duty required, whereas if such liability is assumed by a new board by the very act of taking office, there is no chance of escape except by refusing to serve.

I construe the statute according to these views, and it is a construction which is fatal to the plaintiff's case. The corporation had a board of three trustees who were in office on the 1st of January, 1857, and they neglected, in that month and afterwards to make a report as required by the act. Two of them went out in March, 1857, and were succeeded by two others. The defendant Otis is one of the latter, and he has demurred to the complaint. This suit was brought before the close of that year to recover an indebtedness represented in two notes. One of the notes is averred to have been given on the 8th of April, 1857, for goods sold by the plaintiff to the company prior to the first of January preceding and the other was given in July for goods alleged to have been sold between the 8th of January and the 5th of May, 1857. These averments fail to show that any part of the debt accrued prior to the time in March, when the change of trustees took place. Consistently with the allegation, the portion represented in the note last given might all have accrued in the month of January. The trustees chosen in March, therefore, were not liable to pay for any portion of the goods, according to the view which has been taken of the statute. If the creditor had waited until January, 1858, and no report had then been made, the case might have been different.

It is scarcely necessary, perhaps, to observe that the giving of the notes by the company does not change the result. If the new trustees, on coming into office, were not personally liable for the previous debts of the company, they plainly did not become so because notes were afterwards given for the same debt. We think the demurrer was well taken, and that the judgment should be affirmed.

CEMENTS.

HUDSON RIVER
CEMENT COMPANY.
THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER, and MARBLE DUST, all of full weight, and of a fine and superior quality.
This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of dry concrete and Underwater Works. Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the Works under Government.
It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing 300 lbs. of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), at all seasons of the year, thus avoiding all unnecessary handling.
The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.
Please address, Hudson River Cement Company, Jersey City, N. J., or J. H. BUTTS, Secretary.
N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.
WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We warrant it equal in every respect to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a superior article for masonry coming in contact with water, or requiring great strength.
For sale in tight barrels, well papered, on application at their office, by DELAFIELD & BAXTER, 104 Wall st.
The above CEMENT is used in most of the fortifications building by government. 45

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.
IT HAS STOOD THE BEST OF ALL TESTS—TIME!
IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.
ALL WORK WARRANTED.
Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.
Also, for sale, State and County Rights for a portion of the United States.

Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

ANALYTICAL AND Manufacturing Chemistry,

No. 24 WILLIAM STREET,
Rooms Nos. 28 & 29. NEW YORK.

CAREFUL Analysis made of all Minerals and Commercial Articles. Surveys and Reports made upon Mines and Quarries. Coal Oil Works planned and erected and contracts made. New York, Saturday, May 4, 1861.

Flemington Railroad.

The road is worked by the Belvidere Delaware Railroad Company. The receipts during the year 1860, have been as follows:

From passengers	$6,075 88	
" freights, including coal	9,015 67	
" mails	750 00	
		$15,842 55
Working expenses, salaries, etc.	14,012 32	
Leaving net		$1,830 23

The capital stock of the Company is $150,011. Funded debt, $93,900. Other indebtedness, $86,417 66. Cost of road, $287,087 74.

Indiana Central Railroad.

The earnings of this road for the fiscal year ending December 31, 1860, were:

From passengers		$183,216 82
" freight		183,629 43
" mails and express		19,012 48
" incidentals		14,538 75
		$400,397 48
Disbursed as follows:		
Repairs of track, bridges, etc.	$24,475 76	
Repairs of engines and cars.	46,317 48	
Conductors, enginemen, etc.	26,870 37	
Station expenses	26,629 77	
Wood	27,384 37	
Oil	3,612 86	
Loss and damage	6,064 92	
Miscellaneous	31,841 03	
		193,196 56
Net earnings		$207,200 92
To which add sales of lands, rents, dividends, etc.		10,327 87
		$217,528 79
Interest on 7 per ct. bonds.	$42,000 00	
" 10 " " .	62,350 00	
" unfunded debt..	5,128 35	
Taxes	3,119 54	
Ten per cent. bonds	100 00	
Dayton & Western R.R. Co.	71,073 01	
Unfunded debts	10,733 15	
Commissions and discounts.	1,169 65	
Incidentals	18,796 43	
		214,470 13
Balance		$3,058 66

The increase in earnings over the previous year has been $55,816 90, accompanied by an increase in expenses of $22,959 75—the net increase being $32,857 15. The report says:

The business of your line for the past year has been of an improved character over that of the preceding year. Each month has shown an increase, though not large, yet sufficient to afford the hope that we have reached the point that will show a gradual increase in future years, unless we shall have years of scarcity of agricultural productions or of great pecuniary embarrassments. We commenced the past year with a deficiency in the average surplus of the grains and other productions of the country. But the amount to be transported was considerable and the crops of the last year have been large and prices in general have been remunerative, consequently the earnings from freights have been larger than those of any previous year. The earnings from passengers have not been correspondingly large, though there has been a small increase from that source. The political flurry during the last month in the year doubtless decreased our earnings several thousand dollars. But still on the whole the earnings have been more satisfactory than they have been for three years previous.

Our local business still has maintained its position as to our earnings, being nearly two-thirds of the entire amount and increasing more rapidly than our through business.

Our line has been operated the past year with its usual promptness and safety. And our roadbed and structures have been maintained in fair order to operate with safety, economy and satisfactory speed.

During the year we have had some twenty-eight tons of our rails re-rolled and re placed in the track. The re-rolling cost us twenty-two dollars per ton. We also purchased a little over seventeen gross tons of new rails from the Cambria Iron Works near Johnstown, Pennsylvania, which cost us a little over forty-eight dollars per ton, delivered at Indianapolis. But few of the rails have yet been put down. They are intended to re-place our rails that may have given way so as to be unsuitable to run over and to enable us to lengthen some of our side tracks to facilitate our business. We have put in an additional side track near our pens for live stock at Indianapolis, and have rearranged, extended and improved our tracks in our freight yard at the same place, which improvements have materially facilitated our business. We have also made arrangements to put in a track scale to weigh empty and loaded freight cars, being satisfied that economy and what is due to ourselves will justify the expenditure. It will doubtless save serious injury to our cars by being overloaded and detect attempts to defraud us by way-billing freights at less than their true weights and will leave the dishonest shipper no advantage over the honest one.

We have put into our road-bed over twenty-seven thousand new heavy cross-ties to replace decayed ones, and shall the coming season put in a much larger number.

We have also purchased about one thousand heavy, solid lip wrought iron chairs, which have been used to replace such of our old ones as have broken by time and by being run over when the track was hard frozen or from taking up rails for repairs.

We have renewed the timbers in a large number of our trestle bridges, and cattle guards, so as to insure safety in passing trains over them.

We have also in conjunction with the Western Union Telegraph Company erected a telegraph line between Indianapolis and Dayton, and have found it to conduce greatly to the safety and convenience of operating the line.

We have paid our interest regularly and have made considerable reduction of our unfunded debt, and have during the year adjusted and discharged an old liability growing out of the construction of our line, and the last we believe that exists against our company, and not desiring to increase our construction account, we have charged it among our incidental payments.

Our intercourse with connecting lines has in general been harmonious, and characterized by fairness towards us, and an increasing appreciation of the importance of our line and the great value of our local and through business to them, and we think the prospect for an increased business with our connections for the ensuing year is good.

Our connection with the Dayton and Western Railroad Company remains the same as heretofore and our intercourse with the Officers and Board of Directors of that company has been of the most cordial character.

The number of way passengers carried was 147,849; through passengers, 21,240—total 169,087. Passengers carried east 82,105; do. west 86,984.

The number of miles run by passenger trains was 206,480; by freight trains, 150,392; by wood and other trains, 9,349—total, 366,122.

The equipment consists of 19 locomotives; 15 passenger, 6 baggage and 368 freight and construction cars.

GENERAL BALANCE SHEET.

Construction		$1,667,039 03
Equipment		274,081 00
Bills receivable	$22,593 43	
Remittances	33,005 32	
Fuel and materials on hand	14,565 06	
Real estate unsold	70,086 09	
Union track and depot at Indianapolis	26,640 73	
		166,890 63
		$2,108,010 66
Capital stock		$610,050 00
7 per cent. 1st mortgage bonds		600,000 00
10 " 2d " "		578,000 00
Bills payable		40,550 36
Excess over liabilities		239,710 30
		$2,108,010 66

President and Sup't—J. S. NEWMAN.

Vice-President—CHARLES PARRY.

Directors—Charles Parry, Samuel Hannah, John S. Newman, John T. White, Williams Petty, Joseph W. Jackson, David Commons, W. S. T. Morton.

Sec. and Treasurer—SAMUEL HANNAH.

Acting Sup't—H. G. CAREY.

Assistant Sup't—JOHN L. SHANK.

Millstone and New Brunswick Railroad.

This company was chartered in 1836. The road was completed and opened for use Dec. 21, 1854. Its length is 6.63 miles. One half of the share capital is owned by the New Jersey Railroad Company, which furnishes motive power and rolling stock, this company paying for the use of the same an amount equal to 6¼ per cent on its cost. Its earnings in 1860 were:

From passengers		$3,512 75
" freight		5,319 54
		$8,832 29
Expenses		4,808 96
Balance		$4,023 33

The total number of passengers carried was 16,665; tons of freight, 8,870.

Cost of road		$111,114 00
Capital stock paid in	$102,365	
Floating debt	8,749	
		111,114 00

Paterson and Ramapo Railroad.

The report of this company for the year 1860, is as follows:

Capital stock actually paid in	$248,000 00
Amount of funded debt	90,000 00
Cost of road and equipment	350,000 00
Income, rent for N. Y. & E. R. R Co.	26,500 00
Dividends, 5¾ per cent	14,260 00
Expenditures for taxes, contingе's etc.	2,402 15
Interest on bonds $95,000 at 7 per ct.	6,650 00
Five bonds redeemed at 97 per cent.	4,850 00
Bonds of funded debt redeemed.	10,000 00

This road is under lease to and operated by the New York and Erie Railroad Company.

Important Decision.

At the term of the U. S. District Court recently held in Dubuque, Iowa, Judge Lane delivered an opinion in the case of Herman Gelpcke *et al. vs.* the City of Dubuque, relative to the validity of the bonds issued by the city of Dubuque in aid of the Western Railroad. The suit was brought to recover interest on the lands to the amount of $20,000, but the amount of principal involved in the case is about $200,000. The Judge decided against the validity of the bonds. The plaintiffs will probably appeal it to the United States Supreme Court, and should the decision of the lower Court be approved, it will relieve Dubuque of about $450,000 of her city indebtedness contracted for railroad purposes.

Bellefontaine Railroad Line.

This line is 206 miles in length. It is composed of the *Bellefontain and Indiana* Railroad, extending from Indianapolis to Union 84 miles; and the *Indianapolis, Pittsburg and Cleveland* Railroad, thence to Crestline, 122 miles. We have been favored with a copy of the Fifth Joint Annual Report of the directors of these companies—being the Eleventh Annual Report of the former and Twelfth of the latter company. The following is a statement of the transactions of these roads during the fiscal year ending December 31, 1860:

BELLEFONTAINE AND INDIANA RAILROAD.

Earnings from passengers		$99,892 15
" " freight		188,136 95
" " mail		17,850 00
" " express		7,441 81
" " rents		770 00
		$314,090 91
Expenses during same time:		
Repairs of track	$50,120 79	
" engines	23,284 80	
" cars	16,996 34	
" buildings	4,203 11	
" bridges	3,233 57	
Train expenses	37,403 09	
Depots and stations	15,266 87	
Wood	22,596 30	
Oil and waste	4,565 01	
Salaries	6,446 50	
Loss and damage	2,651 03	
Interest and exchange	2,831 63	
Foreign agencies	6,713 28	
All other expenses	15,013 27	
		211,325 59
Net earnings		$102,765 32
Interest on bonds	$88,362 27	
Taxes	5,608 04	
		93,970 31
Balance		$8,795 01
A comparison of earnings with those of the preceding year shows a gain of		$27,722 67
With an excess in expenses of		6,465 60
Making the net gain		$21,257 07

The increase on through business was $18,261.75; on local business, $14,689 38. The excess of through business over local was $103,650 80. The report says:

The aggregate revenue from passengers, is but slightly increased from last year. There is, however, a much larger increase on through travel, and a corresponding decrease in local. In freights, the local shows a larger proportionate increase than the through traffic. The freight earnings give nearly the whole of our increase, as the excess of travel does not meet the decrease in express. The causes alluded to in the last report, as depressing the business of 1859, continued to influence our traffic until the assurance, and, in fact, the incoming of the harvest of 1860. Consequently, as compared with 1859, there was a loss in January, February and March, of $7,994 09. In the months of April, May, June and July, there was an increase of $16,831 68. A portion of this came from increased through travel, during the three first of those months; the larger amount, however, from the increase of West-bound merchandise; while a part of the month of July, is attributable to the movement of the crop. In August, September and October, we have an increase of $22,848 60; coming mainly from the movement of produce. In November and December, we have a decrease of $3,733 50, upon the very light corresponding months of 1859. The officers of the road have carefully studied and practiced the utmost economy in expenses, consistent with a prompt performance of the business of the line.

The capital stock is unchanged since the last report. The funded debt is changed in two particulars. On the first of January, 1861, the trustee of the real estate bonds redeemed, from the proceeds of that fund, $20,500 00, leaving the present amount of said bonds outstanding, $99,250. The C., C. & C. Railroad Company has redeemed, and now holds, $99,000 of the income bonds, which that company had guaranteed. The present position of that class of bonds is as follows:

Held by the C., C. & C. Company	$99,000
" B. & I. sinking fund	14,000
Extended to 1870	85,500
Outstanding in original form	1,000
Total as issued	$199,500

The long pending controversy in relation to the Sidney connection with the Dayton and Michigan road, was settled during the year. The amount so involved, and the fencing account, after deducting some credits for the sale of the gravel farm, constitute the principal charges to this account:

The Sidney connection	$4,099 73
Fencing account	4,141 58
Old right of way claim	30 00
Total	$8,271 31

On the 16th of May last, the contract of March, 1856, between the B. & Ia. and I., P. & C. Railroad Companies, was extended, and made terminable only by and with the consent of both parties thereto. This renewal contract has been approved by the Boards of Directors of both roads; and has also been ratified by the stockholders of the I., P. & C. Company, at their July meeting. It is herewith presented to the stockholders of the B. & Ia. Company, with a recommendation that it be ratified by them at their present meeting.

The Receivers of the Columbus, Piqua and Indiana Railroad Company have filed a bill in the U. S. Circuit Court, at Indianapolis, praying that this contract of 1856, may be set aside, and a similar arrangement decreed between the I., P. & C. and C., P. & I. Companies. As the B. & I. Company has an important and separate interest in this issue, eminent legal counsel has been retained to protect her rights in the litigation.

The construction account has been increased $7,758 48—that amount having been expended for incidental construction, fencing and right of way. The total funded debt amounts to $1,256,-

750. The following is the general balance sheet, December 31, 1860:

ASSETS.

Cost of road and equipment	$3,027,931 61
Unsold real estate	64,527 12
Mortgages, notes and cash in hands of real estate trustees	86,220 74
Mortgages, notes and cash in hands of income bond trustees	3,186 55
Bills receivable	31,801 79
Track materials and fuel on hand	19,537 26
Due from executive committee Bellefontaine R. R. Line	16,445 00
In hands of treasurer and agents	4,370 72
200 shares of Columbus, Piqua and Indiana R. R. stock	10,000 00
1 bond of Marion Co., Ohio	1,000 00
	$3,265,020 79

LIABILITIES.

do	do	do	1861.	30,750 00
do	do	do	1863.	40,000 00
do	do	do	1866.	48,000 00
Dividend scrip, to be funded in 2d mortgage bonds				9,328 00
Bills payable, $6,281 32; due C., C. & C. R. R., $5,488 43				11,769 76
Car loan from C., C. & C. R. R., at 7 per cent				11,737 29
Unpaid interest on bonds				38,825 75
Balance of transportation account				76,796 97
				$3,265,020 79

The officers and directors are as follows:

President—JOHN BROUGH.

Directors—John Brough, Henry Wick, W. A. Otis, Selah Chamberlain, James H. Godman, Robert H. Canby, John Mills.

Secretary—J. M. TOWNSEND.

Treasurer—HENRY WICK.

INDIANAPOLIS, PITTSBURG AND CLEVELAND R. R.

Earnings from passengers		$111,186 43
" " freight		148,716 67
" " mail		12,750 00
" " express		5,298 97
		$277,952 07
Expenses, viz:		
Repairs of engines	$16,532 91	
" cars	12,214 22	
" road	37,490 72	
" bridges	6,084 05	
" structures, etc.	2,855 03	
Train expenses	30,193 64	
Depots and stations	12,384 94	
Foreign agencies	5,005 83	
Wood	12,456 81	
Oil and waste	3,249 67	
Salaries	4,936 90	
Loss and damage	2,507 21	
All other expenses	12,294 95	
		158,206 88
Net earnings		$119,745 19
Interest on bonds	$78,058 50	
Taxes for 1860	3,616 29	
Interest and cost of floating debt	1,296 82	
		82,971 61
Surplus		$36,773 58
Compared with the previous year the earnings show an increase of		$41,554 96
With an increase in expenses of		1,919 39
Making the net increase		$39,635 57

The increase in local over through travel is $6,942 40, or about 70 per cent.; and in through over local freight, $19,275 31, or about 73 per cent. The working expenses are 58 per cent., against 67⅔ the previous year. The leading item of expense is repairs of road, being $5,451 15 in excess of 1859. This increase is chargeable to re-rolling, repairing and replacing iron, renewing chairs and cross-ties, and re-ballasting a portion of the track.

No material changes have been made in the bond and stock accounts. The extension of first mortgage bonds is progressing satisfactorily, and will no doubt be accomplished. It is also anticipated that during the current year the balance of the income bonds will be exchanged for second mortgages.

The floating debt has been reduced during the year $9,014 08—leaving still owing $9,936 79. The company hope to be able to liquidate this balance during the current year..

Construction account has been charged during the year with $1,501 75; which, corrected by error in last year's account, leaves a balance chargeable of $588 60. The total of this account is $1,837,956 34. There is due this account, when adjusted, a credit of $750, and when this and one or two other small items are arranged, it is suggested that the account be closed.

The track and structures are in very fair condition. Probably 200 tons of iron will require to be re-rolled this year, and a number of wooden culverts renewed by the use of stone.

The following is the General Balance Sheet for the year ending December 31, 1860:

ASSETS.

Cost of road and equipment		$1,837,956 34
Lands and lots		58,258 06
Bills receivable		26,485 96
Stock of C., P. & I. R. R. Co., at par		10,000 00
Sinking Fund		55,002 38
Due from other roads		10,775 53
Individual accounts		300 66
Materials on hand		8,535 38
T. H. Sharpe, Treasurer		1,864 74
Executive Committee		22,763 55
		$2,031,942 60

LIABILITIES.

Capital stock		$835,971 26
Funded debt:		
Domestic bonds	$32,400 00	
First mortgage bonds	649,984 48	
Second " "	314,000 00	
Income bonds	27,000 00	
		1,023,384 48
Bills payable		20,610 94
Surplus earnings to January 1, 1861		135,367 60
Unpaid dividends		900 54
Cash account		57 56
Due to other roads		403 85
Interest on bonds unpaid		12,000 00
Taxes unpaid		3,246 37
		$2,031,942 60

The officers and directors for the ensuing year are:

President—THOS. A. MORRIS.

Directors—John Brough, Simon Yandes, Thos. A. Morris, Thomas H. Shape, Edward King, M. G. Walker, Allen Makepeace, D. Kilgore, S. P. Anthony, David Heuston, Stillman Witt, Henry Wick, Selah Chamberlain, A. B. Stone, James H. Godman.

Secretary—EDWARD KING.

Treasurer—THOMAS H. SHARPE.

Journal of Railroad Law.

THE RIVERS OF PENNSYLVANIA: INJURIES CAUSED BY THE CONSTRUCTION OF RAILROADS TO RIPARIAN OWNERS: PUBLIC AND PRIVATE RIGHTS IN REFERENCE TO SMALL STREAMS.

Rivers are the natural highways of commerce and of intercourse between men. Locomotion and communication are so essential to our existence and happiness that all the facilities which nature affords have ever been the subject of legislative and judicial protection; and private claims, to exclusive privileges in them, must always yield, when their enjoyment by individuals would be incompatible with the public convenience.

We have before us the case of *the Barclay Railroad Company vs. Ingham*, recently decided by the Supreme Court of Pennsylvania, in which the laws of that State in reference to the navigation of streams running through its territory and the relative rights of the public and riparian owners is considered. The court also maintains the liability of railroad companies to the owners of the land bordering upon small streams, for injuries caused to their rights in such streams by the construction of their railroads.

On the 4th of September, 1829, the plaintiff together with one John Black, became the owner of 95 acres of land on the Tonawanda creek. Within three or four years of their purchase, they constructed a dam across it, from two to four feet in height for the purpose of creating a water power; from this dam the water was taken into a race fifteen or twenty rods long, to operate machinery in a small woollen factory, which they erected about the same time. From this mill there was a tail race, which discharged the water again into the creek, a few rods below.

On the 26th March, 1813, an act of Assembly was passed declaring the Tonawanda creek a public highway, from its mouth to Spaulding's Mills. These mills were above the point where the plaintiff's mills were subsequently erected. This act was subject to the restrictions and provisions of the act of 23d March, 1803, as to the right of owners to erect dams across the creek.

In July, 1850, there was an extraordinary flood which cut a new channel for the creek, running straight from the dam past the mill; and after this flood it ran in both the old and the new channel.

In 1855, the defendants caused their road to be graded from the bituminous coal lands in Franklin, to the Susquehanna river at Towanda; and in 1856, rails were laid, and the road had since then been in operation.

The plaintiff alleged that the making of the embankment caused the water to flow down in the channel cut in 1850, and to flow back upon the tail-race, and materially affect the action of his mill. The witnesses estimated his damages, variously, at from $3,000 to $8,000.

The defendants' counsel requested the court to charge "that the defendants had a legal right to erect the embankment, in the construction of their road, on the plaintiff's land; and were not liable for damages to the plaintiff's water power if the jury believed it was situated on the part of Towanda creek which had been declared a public highway." The court declined so to charge, and the court upon appeal sustained this ruling. The following is the opinion of the court upon this point.

Woodward, J.—That the defendants had a legal right to erect the embankment in the construction of their railroad on the plaintiff's land, was a truism, under the law of their incorporation, which the learned judge did not mean to deny; but the other proposition, that the company were not liable for damages done to the plaintiff's water power, if it was situated on the part of the Towanda creek which had been declared a public highway, was the pith of the first point, and this was negatived, as it should have been.

In respect to the great rivers of the State—such as are navigable by nature, and therefore public highways by the common law—it has been repeatedly declared, that the mill-dam act of 23d March, 1803, is but a license to the riparian owner, subject to be revoked whenever the public interests require it. In all these cases, the right claimed by the riparian owner was a permissive right to use rivers, the soil of which had never been granted either by William Penn, his successors, or the commonwealth. The rivers and the beds of the rivers, belonged to the commonwealth, and constituted part of the eminent domain. Private surveys bounding on them were stopped at low-water mark. When the commonwealth by its legislature, authorized riparian owners along such streams to erect dams for their own convenience and profit, it was a sort of public license, like the fisheries and ferries, which, by numerous acts of Assembly, were granted in all our public rivers. And being a mere license to trespass on the public domain without any consideration received therefor, it had none of the indefeasibility of a contract, and might be revoked at the will of the sovereign, or be granted to another.

But in respect to the creeks and smaller streams, everywhere found in Pennsylvania, the practice of the land office whether under the proprietaries, or the commonwealth, has been to include them in warrants and surveys, as part of the public lands. Streams thus falling within the lines of a survey were thus covered by it, and belonged to the owner of the tract, who might afterwards convey the body of the stream to one person, and the adjoining land to another, when any of this class of streams formed the boundary of such tract. The grantee acquired title *ad filum aquæ*. There is but one difference between a stream running through a man's land, and one which runs by the side of it; in the former case he owns the whole, and in the latter but half. It is customary to speak of these streams as not navigable, in contra-distinction to those larger rivers not granted by the commonwealth, and which are called navigable. In England, those streams only are called navigable in which the tides ebb and flow; but, with us, all our public rivers, whether fresh or salt, are navigable; and hence, a very erroneous idea has sprung, that such rivers only are public highways, and that, in the lesser streams, granted by the commonwealth to purchasers, the public have no rights until they are declared by law to be highways. This is a misconception, produced, no doubt, by the very indefinite term navigable—a word which may mean an ascending as well as descending navigation, by boats of considerable burden—or merely a descending navigation, by arks and rafts in seasons of freshets. Our ideas of public and private rights in streams of water, ought not to be dependent on so vague and indeterminate a word.

If we go back to Magna Charta we shall find it written in the 23rd cap. "*Omnes scidelli deponantur*," etc.—a clause which has been translated, "All weirs from henceforth shall be utterly put down, by Thames and Medway, and through all England, but only by the seacoasts." This I understand to have been a formal declaration and vindication of the right of all up stream people to have an unobstructed channel, in streams capable of being used for transportation, not only for purposes of trade and commerce, but also for the ascent of fish, which sometimes were indispensable for subsistence. Accordingly it is laid down by Lord Hale. "All rivers above the flow of tide-water, are, by common law, *prima facie* private; but when they are naturally of sufficient depth for valuable floatage, the public have an easement therein for the purposes of transportation and commercial intercourse; and, in fact, they are public highways by water."

This, I apprehend, is an exact definition of our creeks and smaller rivers, such as have been granted by warrant and survey. They are private property, but if of sufficient capacity at any stages of water, to be used for transportation of lumber, or other goods, they are held subject to that public easement which our English ancestry guarded with great jealousy, as numerous old statutes subsequently to Magna Charta abundantly attest. When, therefore, our Legislature declared such streams to be public highways, the act is merely declaratory of the common law, but beneficial nevertheless, as bringing the stream within the protection of the remedial provisions of the Mill-dam act of 1803. This latter act is by its terms, applicable to "any navigable stream of water declared by law a public highway;" and is itself declaratory of the common law, in the clause which forbids him who erects or maintains a dam "to obstruct or impede the navigation of such stream, or prevent the fish from passing up that stream."

Now to apply these rules and principles to the case in hand: Ingham was the owner of land under a patent issued 3rd November, 1786, and which was bounded by Towanda creek. He was thus the absolute owner of one half of the stream—of the bed of it, and of all the water power it contained, subject only to the public's right of passage for such craft as was suitable to the capacity of the stream, and to an unobstructed passage of fish. In 1813, the Legislature declared this part of Towanda Creek "a public highway for the passing of rafts, boats or other vessels." This did not abridge Ingham's right of property. The Legislature could not take away, without compensation, property fairly vested in him. He was as truly the proprietor of the premises after the act as before. The water power was property and it was *his* property. He might improve it by damming his half of the stream, or, with the consent of his opposite neighbor, the whole of it; and of the water power so improved, he could no more be despoiled, without compensation made to him in the forms of the constitution, than he could be deprived of the solid acres granted to him by the commonwealth. His dam must not obstruct the navigation of fish, because he took title from the commonwealth, subject to that servitude or public right—one of the ancient English "liberties" which Magna Charta rescued from oblivion—which numerous old statutes in the times of Henry IV. and the Edwards, defined and defended—which the emigrants brought over with them, and which Penn expressly recognized in the 22d section of his first frame of government, adopted in 1683—and which became in this manner an indefeasible condition of Pennsylvania tenures. The mill-dam act of 1803 was a fuller provision for the regulation of this public right, and supplied a statutory remedy for its infringement, but was not a *license* to Ingham to build on his own land. When he improved his water power, he did it not as tenant at will under a revocable license, but on the same footing of that dominion which an owner exercises over soil that he holds in fee simple from his sovereign. * * * * * * *

For these reasons, we think, the main proposition in the defendant's first point, was correctly denied. The case was sent back for a second trial upon another point.

Hoboken and Hudson City Railroad.

This road extends from the Ferry at Hoboken to the Five Corners at Hudson City, a distance of 1.79 miles. It is a single track road with four sidings one of which has a length of 300 feet. The road and equiment cost $32,000. It is worked by five cars and 32 horses—the latter belonging to the contractor who horses the road. The line was brought into operation a few weeks ago.

There are a number of other railroads diverging from this flourishing city, which, with this road, will be of great advantage to persons living along the lines, and also to the summer visitors who contribute so much to the prosperity of the place. Among these we may name the Hoboken and West Hoboken, the Jersey City and Hoboken, and the Hoboken and Weehawken, of which we are desirous of obtaining accounts so that we may introduce them to the notice of our readers.

With such provision for easy locomotion, this beautiful suburb of the Metropolis will now become more inviting than ever, though that can hardly be.

The enterprise of Hoboken, however, does not end here. Its aspiration to become one of the river termini of the southern route of railroads is about to be realized, and when the Land Company's line to Newark is completed, there can be little doubt but that the monopoly roads terminating at Jersey City, and South Amboy will experience a loss of many units per cent. in the amounts of their annual dividends.

Excavating Machine for Canal Works.

The new excavator, now at work in the Claiborne draining canal, is the machine known as the Osgood patent. It is on board of a solid boat, 80 feet long and 30 feet wide. The engine is of fifty horse-power and drives a large dirt digger which brings up 2½ cubic feet of earth per minute, and throws it on the side of the canal next the swamp, thus digging a canal and building a levee at the same time.

L. H. Place, the energetic President of the Board of Drainage Commissioners, hopes that, thanks to the powerful and ingenious machine, the Claiborne canal, which, according to contract, is to be completed in one year, can be finished much sooner. This canal will be forty-four feet wide and seven feet deep.—*N. O. Picayune.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, May 4, 1861.

Erie Railway Company.

This company was organized on the 30th ult., by the election of Nathaniel Marsh as President, Samuel Marsh as Vice President, H. N. Otis as Secretary, and Tallman J. Waters as Treasurer, and the Directors of the late New York and Erie Company as Directors. Mr. Wright, of Binghamton, and Mr. Diven, of Elmira, being substituted for Mr. Cobb and Mr. Gelpcke; the capital in common shares to consist of so much of the present $11,550,000 as may be assented to the contract of reorganization before the 29th of July next, and the capital in preferred shares, so much of unsecured and judgment debt as shall be assented by the same time, together with the averages of interest thereon, the whole estimated at about $8,000,000, or the equivalent of about 80,000 preferred shares. Under the terms of the contract for reorganization, with Messrs. Gregory and Davis, Trustees, and the acts of the Legislature of New York, authority is given to assess the shareholders, both common and preferred, to meet the bid at the sale, which was for the entire arrearages of mortgage interest. This power has been exercised by ordering an assessment of 2½ per cent. on the par value of the new shares, both common and preferred, payable on the exchange of the bonds on certificates. Interest will be allowed on these assessments from the date of their payment, and will be charged on them after the 1st day of September next.

Fitchburg and Worcester Railroad.

The directors of this road for the current year are: Ivers Phillips, Wm. D. Cheever, Nath'l Wood, Hiram A. Blood, James H. Carter, Joseph Haskell, Wm. D. Peck, and Samuel Houghton. Ivers Phillips, Esq., was chosen President, and H. F. Coggshall, Clerk and Treasurer.

Delaware and Raritan Canal and Camden and Amboy Railroad and Transportion Cos.

The receipts of the Delaware and Raritan Canal Co., for the year ending December 31, 1860, were $546,650 59
And the expenses were 165,292 63

Leaving net $381,357 96

The receipts of the Camden and Amboy Railroad Co., for the year ending December 31, 1860, were $1,997,064 16
And the expenses were 1,263,114 36

Leaving net $733,949 80

The capital stock paid in of the Delaware and Raritan Canal Co., is $1,500,000 00
To which has been added by authority of the Legislature 798,400 00

$2,298,400 00

The capital stock paid in of the Camden and Amboy Railroad Co., is $1,500,000 00

The funded debts of the above companies are as follows:

A loan at 6 per cent. interest	$800,000
" " " "	367,000
" " " "	800,000
" " " "	1,700,000
	$3,667,000
A loan at 5 per cent. interest	£210,000
" " " "	225,000
	£435,000

Also a loan of $2,500,000 authorized by the stockholders for straightening and doubling the track of branch railroad, and for subscription and advances to associated companies. Of this loan only $817,000 has been issued.

In addition to the above, there has been issued a loan for £185,000 sterling for the track of the Philadelphia and Trenton Railroad Company, since converted into dollar bonds at $4 80 per pound sterling, bearing an interest of 5 per cent. per annum.

Also a loan of $1,175,000 bearing an interest of 6 per cent. per annum for subscription to the Belvidere Delaware Railroad and branches, and Freehold and Jamesburg Agricultural Railroad Companies.

Also, a premium loan of £48,333 6s. 8d., for the extension to the year 1880 of the sterling loans of £210,000 and £225,000. For the redemption of which loans before the expiration of the year 1880, a sinking fund has been provided.

And the companies are under obligations to pay certain small annuities to persons who have been injured on the railroad.

Dividends have been paid in cash during the year 1860, of 12 per cent. on the capital stock of the joint companies.

There has been invested during the past year, on account of a sinking fund the sum of $112,367 19.

New Orleans, Jackson and Great Northern Railroad.

The following gentlemen have been elected directors of this road for the ensuing year:

Louisiana—H. J. Ranney, C. Fellowes, M. O. H. Norton, P. N. Wood, E. Salomon, Jno. G. Gaines, A. M. Holbrook, Jno. Fox, Hy. Florance, J. J. Warren, H. W. Schwartz, Rich'd Esterbrook.

Mississippi—W. McWillie, C. C. Shackleford, James Drane, Wirt Adams, James McAdorey, L. E. Houston,

Warren Railroad.

This road is 21 miles in length, extending from Bridgeville to Clarkesville Junction on the Central Railroad of New Jersey. It is leased by and forms part of the line of the Delaware, Lackawanna and Western Railroad—the trains of the latter company running over it between Delaware and Clarkesville 18.7 miles. The Warren Railroad Company was chartered February 12, 1851. Construction was commenced in 1855, and the road opened in June, 1856. On the 27th January, 1854, an agreement was made, whereby the Delaware, Lackawanna and Western Railroad Company agreed to subscribe $150,000 to its share capital, and guaranty $300,000 of its bonds; and the Central Railroad Company to subscribe a like amount of stock, and guaranty $250,000 of its bonds. These sums, with the stock taken by contractors and others, constituted the means of building the road. The former company also agreed to take a perpetual lease of it, paying therefor 7 per cent. annually on its cost. From the report of the Company made to the Legislature of New Jersey for the year ending December, 1860, we obtain the following:

Capital stock issued and actually paid in	$1,140,000 00	
First mortgage 7 per cent. bonds, due 1875, sold	600,000 00	
Other indebtedness	712 92	
		$1,740,712 92

—which constitutes the cost of the road, including lands for right of way, depot buildings, temporary track, and expenditures on the Van Ness Gap tunnel up to that date.

The earnings of the road during the year were:

From freight on coal	$167,832 56	
" " merchandise	50,209 82	
" passenger fares	14,627 15	
" mail, express, etc.	2,883 24	
		$235,552 77
Operating expenses and repairs	123,111 65	
Net earnings		$112,441 12
Interest on first mort. bonds	$42,000	
Interest div. of 3 per cent. on $1,045,000, April 15th	31,350	
Do. 3½ per cent. on $1,104,000, Oct. 15th	38,640	
	111,990 00	
Balance applicable to debts		$451 12

The high grade to pass over the temporary line while the tunnel is constructing, increases the expense of operating the road. The tunnel, when completed, will shorten the road about three miles, and reduce the grade to 21 feet to the mile going east, uniform with the other parts of the road and the Central of New Jersey. The tunnel will be about 3,000 feet long. The rock is very hard. The expenditures the past year upon this work has been about $115,400. Estimates to contractors have been paid monthly in cash. Hopes are entertained that it can be completed by April, 1862.

Cairo and Fulton Railroad.

At an election for directors of this company on the 11th ult., the following gentlemen were chosen: A. M. Bedford, Geo. Whitcomb, S. C. Kitchen, H. H. Bedford, and Daniel B. Miller. The officers, subsequently elected, are: President, S. C. Kitchen; Vice-President, Geo. Whitcomb; Treasurer, G. L. Poplin; Superintendent, A. M. Bedford.

Financial Condition of Virginia.

On the first day of January, 1852, the public (bonded) debt of Virginia was $10,709,995.

The increase of that debt went on at the following rate:

In 1852	$2,962,687
In 1853	4,571,416
In 1854	4,121,884
In 1855	1,504,203
In 1856	2,653,570
In 1857	583,060
In 1858	1,866,800
In 1859	1,226,500
Total, January 1st, 1860	$29,196,657

Early in the year 1860, this vast debt of registered bonds had run up, as appears by a report made in March, 1860, to the total of $31,679,659.

At the same time, the Commonwealth was liable as guarantor on bonds of city corporations and internal improvement companies, on which *default had been made*, to the amount of $2,760,000. And the Commonwealth also owed to the Literary Fund of the State $1,279,669, the interest of which is obliged to be regularly paid.

This rendered the Funded Debt of the State as follows, say in March, 1860:

Coupon Bonds	$31,678,659
Guarantied Bonds	2,760,000
Due Literary Fund	1,279,669
Total	$35,718,328

The annual interest on the debt is $2,422,934.

There are contingent liabilities, as follows:

Guarantied bonds of the—	
City of Petersburg	$323,500
Central Railroad	100,000
Richmond and Danville Railroad	200,000
City of Wheeling	500,000
City and County of Alexandria	15,000
	$1,138,500

Since the above summing up of the bonded debt, the following subscriptions and appropriations have been made, by which the liabilities of the State are actually increased:

Subscriptions to railroads	$3,133,357
Do. Internal Improvement Companies	4,851,000
Appropriations to pay expenses of John Brown raid	260,000
Appropriation to arm the State	500,000
Appropriation at extra session to arm the State	1,000,000
To which may be added expenses of recent extra session of the Legislature and the present State Convention	150,000
Total	$9,894,357

This complete schedule enables us to sum up the grand total of the liabilities of the State of Virginia, at the present time, in the following reliable figures:

Funded debt	$35,718,328
Contingent (guarantied)	1,138,500
Subscriptions to railroads	3,133,357
Subscriptions to Internal Improvement Companies	4,851,000
Appropriations—	
John Brown raid	260,000
To arm the State—total	1,500,000
Expenses of Legislature and Convention	150,000
Total	$46,752,185

Virginia has appropriated to railroads the sum of $18,000,000. Her annual income from her interest in these roads is $156,000. She has appropriated to canals the large amount of $15,000,000, and receives no dividend or interest from her canal stock.

She has invested in turn-pikes, plank roads and bridges, $4,617,092. The amount received annually from this source is $3,098 on the whole amount invested.

Delaware Division Canal.

From the report of the board of managers we learn that the total tonnage of the canal for the year 1860 was 808,662 tons, and for 1859, 770,065—showing an increase during 1860 of 38,597 tons. The coal tonnage for the year was 639,323 tons—being an increase in that item alone of 32,817 tons over 1859. During the year, 45,359 tons of pig iron arrived at Bristol, of which 40,493 tons entered the canal at Easton, showing an increase in that article of 5,368 tons over the previous year. The two items of coal and pig iron constitute the principal trade on the canal; and as they are both leading artcles in manufacture and commerce, and as the sources from whence the supply comes, possess at least equal, if not greater advantages, for production and transportation to market, than any other region in the State, there are reasonable grounds to expect an increase from year to year in the tonnage of both.

The receipts during the year from tolls, rents and interest were $240,864 07

And the expenses properly chargeable to maintenance	58,618 02	
Leaving as net earnings		$182,246 05
To which add balance from previous year	64,172 28	
In hands of disbursing agents	227 97	
Total balance		$246,646 30
Against which has been charged:		
Interest on bonds	$18,000 00	
Dividends paid	114,334 50	
Expended on construction enlarging the canal	11,315 35	
Land damages	2,665 51	
Real estate	300 00	
	176,615 36	
Available balance		$70,030 94

The managers congratulate the stockholders upon the completion of the enlargement of the canal. The expenditures for this purpose have all been paid out of the receipts of the company. The charges to construction on this account, including land damages and real estate, have been $56,196 15, equal to nearly 3½ per cent. on the capital stock of the company, and now stands to the credit of the stockholders, in the increased value of their property, which, at some future time, it may be policy to represent in capital stock by a stock dividend to equal the amount so expended.

The interruptions to the navigation during the season, caused by breaks in the canal banks, were equal to about 18 days, and the loss of revenue equal to as many thousand dollars, besides the expense incurred for repairs, amounting to $5,631 04. There was also expended for renewing 19 bridges, head-walls and guard locks at Easton, etc., $8,296 93, all of which has been charged to ordinary repairs. It is believed that the company will not be subjected to so heavy an expenditure for repairs in any one year hereafter. The report says:

The Canal at this time is in good condition. The expenses of repairs during the present winter

are very trifling, compared with what they were at this time last year; and if we meet with no disasters, our expenses for maintaining the Canal for the year 1861, will, from present appearances, be at least $20,000 less than they were in 1860. No further expenditure will be required for the enlargement; and the amount required for the renewal of bridges and other superstructures, will be much less than that of the past year.

The winter repairs are so far advanced at this time, that there is no difficulty in the way of opening the navigation as early in the season as the weather will permit.

In order to meet the demand for boats, and with a view of increasing the tonnage, the Board of Managers authorized the President to enter into an arrangement with the Lehigh Coal and Navigation Company and the Delaware and Raritan Canal Company, for each party to procure a supply of boats in exact proportion to the tolls received by each, to be placed upon the Canal during the early part of next season. In accordance with this authority, a contract has been entered into between the parties, which places it in the power of every operator to secure a supply of boats subject to his own control, (so far as relates to the trade destined to New York waters,) by an advance on their part of only $200 on each boat. It was supposed that the object of having control of a certain number of boats should be a sufficient inducement to warrant every one engaged in the transportation of coal to make such advance. This arrangement will subject the Company to an investment of over $20,000 in boats during the present year; but as they will be managed and used by the operators and builders, who will gradually return the principal, and pay interest on the capital invested, it is believed to be policy on the part of the Company to encourage in this way the production of boats, which must result in increasing the tonnage and revenues of the Canal.

All the expenses of the Canal are paid monthly in cash; and it is a source of satisfaction to the managers to be able to state to the stockholders, that the company is entirely free from floating debt.

BALANCE SHEET.

Stock	$1,633,350 00
Bonds	800,000 00
Profit and loss	119,381 64

The officers chosen February 5, 1861, are as follows:

President—J. B. Moorehead.

Managers—Ephraim Marsh, Samuel Hepburn, J. G. Fell, Wm. W. Longstreth, A. S. Roberts, J. V. Williamson, Jay Cooke, C. H. Fisher.

Secretary and Treasurer—J. W. Woolston.

Burlington and Mount Holly Railroad.

The receipts of this road for the year ending December 31, 1860, were:

From passengers	$14,929 09
" freight	6,605 21
" rents and mail	538 33
	$22,072 63
And the disbursements	13,741 94
	$8,330 69
Dividends 5 per cent.	5,500 00
Balance	$2,830 69
The capital stock actually paid in is	$100,000 00
Borrowed on mortgage bonds	20,000 00
	$120,000 00

Great Western Railway of Canada.

We give below a portion of the report of the directors of this company for the half-year ending January 31, 1861. It is dated London, March 27, 1861, and signed, on behalf of the board of directors in England, by Robert Gill, President of the company, and chairman of the English board:

The receipts on capital account during the last half-year have been 17,835*l.* for arrears of calls on shares, &c. Bonds to the amount of 27,700*l*, matured on 15th October, 1860, and having been paid off, the bond capital has been reduced to that extent. The total receipts on capital account to 31st January, 1860, were 5,194,156*l.* The expenditure on capital account during the half-year has amounted to 11,108*l.*

There has also been written back to capital account the sum of 36,986*l.*, which was deducted from that account in the half-year ending 31st July, 1857, being the amount of the par value of the securities received on the sale of the company's steamers on Lake Ontario, as reported to and approved by the shareholders in the report for the half-year ending 31st January 1857. The amount since that date has been standing as a credit item in the balance sheet; but as the foreclosure of this company's mortgages on the Detroit and Milwaukee has altered the position and amount of those shares, it is now written back to the debt of capital. This brings the total expenditure on capital account to 31st January, 1861, to the sum of 4,976,048*l.*

The revenue account shows the following results:—

Total receipts from all sources		£252,824
Deduct working expenses, including maintenance of way, taxes, insurance, and rent of suspension bridge		121,407
Balance of net revenue		£131,417
From which have to be deducted the following:—		
Interest on Government loan	£17,498	
" company's bonds	36,078	
Renewals of rails, sleepers, bridges, fencing, &c	25,698	79,275
Leaving the balance from the half-year's working		£52,142
Out of which the directors recommend the payment of a dividend at the rate of 3 per cent. per annum, which will absorb		49,949
Surplus		£2,193
Add surplus from last half-year	£29,684	
Deduct items standing as suspense accounts, viz:—		
Balance of bad debts	£4,746	
Desjardins bonds, &c	4,167	
Interest credited on Detroit and Milwaukee	4,315	
Galt and Guelph interest	782	
Ditto working	2,076	16,086 13,598
Balance carried over		£15,791

The working of the last half year, irrespective of the former surplus, has thus yielded the sum of 2,193*l.* more than the amount required to pay the dividend now recommended. The average dividend paid by this company during the last seven years has been at the rate of 4¾ per cent. per annum.

The comparison of gross traffic and working expenses during the last half-year and the corresponding period will be seen by the following table:—

Jan. 31.	Passen. & mails.	Goods & live stock.	Rents.	Total.	Expenses. &c.
1861.	£123,251	128,619	958	252,824	121,407
1860.	120,539	86,247	718	207,503	116,171
Incre'e.	£2,712	42,372	235	45,231	5,236

It will be observed that whilst the traffic has increased 45,321*l.*, the extra expenses have only amounted to 5,236*l.*, which is the more satisfactory, as nearly the whole increase has been in goods traffic.

The passenger traffic has, in common with all other east and west railways in America, remained much depressed throughout the half-year, but it is hoped that the bountiful harvest of 1860, which has already produced such satisfactory results in the goods traffic, will this year produce a corresponding improvement in passenger business.

The stocks of stores, fuel, and rails on 31st January, 1861, have been reduced by the sum of 39,789*l.*, as compared with the amounts at which they stood on 31st January, 1860.

In the accounts for the previous half-year there was included the sum of 3,278*l.*, due from the Grand Trunk, as admitted by them. Up to 31st December, 1860, a further sum has accrued, amounting to 5,626*l.*, also admitted by the Grand Trunk as due from them under the agreement between the two companies, making the total amount unpaid 8,905*l.* But the Grand Trunk having refused to pay these sums, and having declined to adhere to the terms of the agreement, the directors have therefore for the present not brought the sum of 5,626*l.* to the credit of revenue.

The renewal of rails, sleepers, bridges, &c., during the last six months, has amounted to 25,698*l.*

Referring to the report last half-year of Mr. Reid, the engineer, estimating the total cost of renewals during five years at 364,212*l.*, Mr. Reid has since admitted that, without diminishing the quantity of work, he may, by various economies, reduce the estimate he then published by a sum of 65,000*l.* This will make the gross charge during the next five years average 60,000*l.* per annum. During the last half-year the cost of renewals has been at the rate of nearly 52,000*l.* a year, so that the future charge at that reduced estimate will not much exceed its present rate. But the directors are not without hopes that the expenditure thus contemplated may be even further reduced.

In the last report it was stated that the mortgages held by this company for its loans of 250,000*l.* to the Detroit and Milwaukee had been foreclosed, and that Mr. Brydges had been requested to proceed to England for the purpose of explaining personally to the board the steps which had been taken in relation to that company, and since his arrival the whole matter had been thoroughly considered; and on the 9th January last the board issued a circular stating the result at which they had arrived. They came to the unanimous opinion that in order to avoid long and harassing lawsuits, involving great expense and delay, it was desirable, if possible, to make amicable terms for the re-organization of the Detroit and Milwaukee. The point insisted upon by the board was the continuance of this company's loan in its position as respects priority of charge on that company: this will be accomplished by the creation of preference shares to the amount of 250,000*l.*, bearing interest at the rate of 7 per cent. per annum out of the net earnings, to be secured by a mortgage ranking next after the original first and second mortgage bonds.

To provide for the payment of certain other debts of the Detroit and Milwaukee, a fourth mortgage will be executed, to rank after the mortgage to this company; both these mortgages to carry interest at the rate of 7 per cent. per annum out of the net earnings of the line. The peculiar circumstances attending these debts have induced the directors to recommend that until December 31, 1864, the interest on this fourth mortgage should be paid, equally with the interest on the mortgage to this company, *pro rata* out of the net earnings of the line, and after paying interest on the two prior mortgages. From and after that date, interest on the different classes of securities will be paid in the order of their legal priorities.

As a necessary preliminary the consent of the first and second mortgage bondholders had to be asked to the funding of their coupons up to 15th May, 1862, to permit of the payment of certain

debts ordered by the court, when the decree of foreclosure was passed, to be paid in cash. This concurrence has been given by nearly the whole of the bondholders in this country.

The traffic receipts from business to and from the Detroit and Milwaukee amounted during the last half-year to $115,223. The gross traffic of the Detroit and Milwaukee itself for the half-years ending 31st December, 1860 and 1859, shows the following comparative results, viz:—

31st December, 1860	$414,038
31st December, 1859	331,618
Increase	$82,419

The committee of investigation, appointed on the 4th April, 1860, issued their report on 21st February, 1861, and the directors have now placed their reply in the hands of the shareholders. Your directors now repeat the recommendation which they made 18 months ago, before the appointment of the committee of investigation, viz:—that the shareholders appoint two of their number to act as auditors. Complete duplicates of all the books, accounts, vouchers, &c., are regularly forwarded from Canada, and thus the materials exist at the London office for instituting a complete audit of the accounts and transactions of the company.

Interest and Dividends.

The Pennsylvania Railroad Company have declared a semi-annual dividend of three per cent., clear of State tax, payable on and after the 15th May.

The interest coupons of the first mortgage bonds, and bonds of 1867, of the New York and Harlem Railroad Co., will be paid on and after May 1, at the Treasurer's office.

The coupons on the Huron (Ohio) County bonds due May 1 will be paid at the Mercantile Bank in this city.

The coupons of the city of San Francisco school bonds due May 1, will be paid at the office of William T. Coleman & Co., No. 88 Wall street.

The coupons of the Evansville and Crawfordville Railroad, due May 1, will be paid at the office of the Farmers' Loan and Trust Company of this city.

The coupons of the second mortgage bonds of the Central Railroad Company of New Jersey, which matured on the 1st inst., will be paid on presentation at the office of the company 69 Wall street.

A separation of the genuine from the spurious stock in the New York and New Haven Railroad Company, having been judicially made, and the injunction restraining the company from paying dividends removed, notice is given that the Transfer Books are now open, and a dividend of three dollars on a share will be paid to the stockholders on demand.

Composition of Merchant Iron and Steel.

Mr. Fremy, of the French Academy, has lately made a very important discovery in the course of a series of experiments conducted by him, for the purpose of ascertaining the composition of merchant iron and steel which he communicated to the academy, at a meeting in Paris on the 11th March. The discovery consists in the fact that, when iron is submitted first to a current of ammonia, and subsequently to a current of common coal gas, the surface is converted into steel, and that the longer the iron is submitted to the influence of nitrogen, the more complete is the subsequent conversion of the iron into steel. He concludes therefrom, and from other experiments, that without nitrogen steel cannot be produced, and that, properly speaking, steel is not a carburet, but a nitro-carburet of iron. Messrs. Boussingault, Dumas, and Chevreuil complimented Mr. Fremy on his discovery, which is of immense importance to the progress of metallurgic industry.

Morris and Essex Railroad.

From the annual report of this company for the year ending December 31, 1860, we learn that the income was:

From passengers	$157,761 66
" freight	97,964 60
" mails, etc.	7,769 22
	$263,495 48
Paid for repairs, maintenance of way, motive power, etc.	154,384 03
	$109,111 45
Paid interest on debt of Company	23,500 00
Balance	$75,611 45

Two dividends have been paid in cash during the year, amounting to $86,835; one being a dividend for seven months, in consequence of a change being made in the fiscal year, and the other a semi-annual one.

There have been transported over the road during the year 490,871 passengers, exclusive of commuters, and those who ride free. The number of miles run by passenger trains has been 114,543; by freight trains, 42,660; wood and gravel trains, 6,500.

Capital stock	$1,157,800 00
Funded debt	340,000 00
Contingent fund	270,440 84
	$1,768,240 84
Cost of road and appendages	$1,626,987 52
Capital stock of Newark and Bloomfield Railroad Company	55,000 00
Capital stock of Telegraph Co.	2,000 00
Wood on hand and paid for	4,500 00
Cash and cash items	79,753 22
	$1,768,240 84

Belvidere Delaware Railroad.

The receipts of this road for the year 1860 were:

From passengers	$75,178 49
" freights including coal	167,703 08
" mails, etc.	31,322 39
	$274,203 96
And the expenditures	162,841 34
Leaving net	$111,362 62

The capital stock of the company is $1,000,000, of which $997,862 24 has been paid in. The indebtedness of the company is as follows:

Funded debt	$2,081,000 00
Special loans not properly included in funded debt	80,774 03
Due other companies	23,105 31
	$2,184,879 34

The cost of the road and equipment, exclusive of cash and materials on hand is $3,128,257 18. No dividends have yet been declared. The Flemington railroad is worked by this company.

Macon and Warrenton Railroad.

We are informed that the question of route has finally been settled. The connection is to be inside the corporation as first contemplated. The grade work through town will be commenced in a few days. John H. Coit has charge of the bridge work, and is progressing finely with it. He will be ready to raise one of the creek bridges this week, and the next in a few days after. Mr. Orr's contract for grading is progressing as fast as the nature of the work will allow. We are told that all the contracts between Warrenton and Sparta are being pushed forward.—*Warrenton Clipper.*

Freehold and Jamesburg Railroad.

This road is in operation from Freehold to Jamesburg, N. J., a distance of 11½ miles. The receipts during 1860 were:

From passengers	$14,253 30
" freight	24,794 95
" U. S. Mail	858 00
	$39,906 25
The working expenses, including repairs, maintenance of way, motive power, etc. were	21,225 91
Leaving net earnings	$18,680 34
Interest received	121 81
	$18,802 15

The capital stock paid in is $230,844 80. The cost of road and equipment, $229,064 80.

A cash dividend of $9,212 has been paid; also a stock dividend of 33⅓ per cent.

The number of passengers carried during the year was 54,904. Tons of merchandise, 29,339. Miles run by trains, 23,974.

Northern (N. J.) Railroad.

At the recent annual election for directors of this company the following gentlemen were chosen: Thomas H. Herring, Thomas W. Demarest, C. D. Van Wageman, John W. Fendon, Thomas Cumming, R. S. Demarest, I. M. Dederer, J. J. Van Buskirk, John Van Brunt.

At a subsequent meeting of the board, Thomas H. Herring was chosen President; Cornelius D. Van Wagemen, Treasurer; and John Van Brunt, Secretary.

Thomas Demarest will probably be the new Superintendent of the road.

Camden and Atlantic Railroad.

The receipts of this road for 1860, were:

From passengers	$113,534 72
" freight	43,620 31
" other sources	2,887 84
	$160,042 87
And the expenses were	105,181 44
	$54,861 43

The capital stock paid in is $976,843 41. Funded debt, $1,032,075 80. Floating debt, $83,641 52. Cost of road and equipment, $1,329,473 16. Interest paid during the year, $161,601 59.

West Jersey Railroad.

The receipts from passengers and freight in 1860, were | $16,884 55
Current expenditures | 13,330 10
| $3,554 45

The capital stock paid in is $483,550. Floating debt $44,831 70. Other indebtedness, $22,824 90. Cost of road and appurtenances, $553,851 53. Whole number of passengers carried 86,901.

Newark and Bloomfield Railroad.

The income of this company from passengers, freight, etc., during the year 1860, were $19,413 01
Paid for repairs, maintenance of way and contingencies | 13,267 62
| $6,145 39

The amount of capital stock paid in is $103,950. The cost of road and appendages to December 31, 1860, was $109,651 58. There were carried over the road during the year 180,175 passengers, exclusive of commuters and those who ride free. The number of miles run during the year was 20,149.

Sussex (N. J.) Railroad.

The receipts of this company for passengers and freight during 1860 were $32,381 10
Due for carrying mail 137 50

$32,518 60

Paid for operating expenses. $9,567 46
Repairs of road, new locomotives and other equipments 10,873 48

20,440 94

$12,077 66

Cost of road and appurtenances $407,767 40
Capital stock $182,186 00
Funded debt 222,052 05
Floating debt 3,529 35

$407,767 40

No dividends have been paid. Interest paid on debt of company, $13,972 16.

East Mahanoy Tunnel Through the Broad Mountain.

Up to the 10th of last month (says an exchange paper) twenty-three months of labor had been bestowed upon the tunnel; having accomplished during that time, 2,311 feet, an average of more than one hundred feet per month. The workmen have reached the conglomerate or "backbone" of the mountain, which has thus far proved to be not so hard as was anticipated. It is predicted by many experienced miners that they will have two more coal veins to pass through; should this be the case, they will easily be able to continue the average of one hundred feet per month.

Reading and Columbia Railroad.

The Directors of the Reading and Columbia Railroad held a meeting the 15th April, and elected Mr. W. Y. Cass, of Columbia, President of the road, in place of Hon. Joseph Konigmacher, deceased.

New York Central Railroad.

The freight traffic on this road, now that the upper lakes are re-opened, is on the increase, and this line, as well as the Erie, is to derive another advantage from the suspension of business on the Baltimore and Ohio, as one of the great carriers from the West. The Rochester *Democrat* remarks:

"The New York Central Railroad Company is now doing an enormous freight business, both through and local. The business at this station has seldom been more active than now. The cars are bringing here from Buffalo considerable wheat, and the mills are grinding freely, shipping their flour by rail as fast as made. There were above 5,000 barrels of flour yesterday in the Railroad Freight House, and 40 cars, chiefly loaded with flour, were sent eastward from this city. Within the past ten days, about 20,000 bushels of wheat have been sent East in bags,—by rail.

The obstruction of the Baltimore and Ohio Railroad will make one less competitor to the Central for some time, and will no doubt contribute materially to the increase of traffic this way."

Southern Michigan and Northern Indiana Railroad.

The following is a list of the Directors of the Michigan Southern and Northern Indiana Railroad Company, elected at Toledo on the 24th ult.: E. M. Gilbert, of Utica, N. Y.; M. L. Sykes, of Chicago, Ill.; John S. Barry, of Constantine, Mich.; Philo Morchins, of Elkhart, Ind.; Stillman Witt, of Cleveland, Ohio; William Williams, of Buffalo, N. Y.; William Keep, of Lockport, N. Y.; Hamilton White, of Syracuse. N. Y.; Nelson Beardsley, of Auburn, N. Y.; Milton Cartwright, of New York; Albert Havemeyer, of New York; Henry Keep, of New York; Allan Campbell, of New York. All of the last year's Board, except Wm. Keep who fills a vacancy. All the last year's officers were re-elected.

Reading and Columbia Railroad.

On Wednesday (April 10) the contract for making the Reading and Columbia Railroad was awarded as follows: Moore, Balch, Danforth & Co., take the job and sublet to the following parties: Thomas W. Sargent, James Sheridan, Rehill and Meers; Foley, Lake & Co.; D. Ryan, M. Malone & Co., Andrew Crumlish, Sullivan & Brady, Wm. Call, Foley & Dooley, O. F. Brackett, John McGovern, William Collins, John Lee. Now that this road has a start, we trust that no obstacle may be thrown in the way of a vigorous prosecution to completion, as there never has been any question as to the necessity of it.—*Reading Times.*

The *Reading Gazette* says: "Ground for the new road has been already broken, and the expectation is that the work will be completed for travel by the 4th of July, 1862. The main line will run directly to Columbia, and connect with the York and Wrightsville Railroad. A branch road six miles in length will be built to the city of Lancaster. At Ephrata the line will form a junction with the Downingtown and Wanesboro' Railroad, and at Manheim with the Cornwall road. The Reading and Columbia Railroad will thus form a very important trunk line through Berks and Lancaster counties, and will furnish coal to a population of two hundred thousand people. The Cornwall branch will carry the primitive ores from the mines for all the furnances at Columbia and Marietta. The main lines will pass through the Chestnut Hill ore mines, were the cold short ores lie in a basin one hundred feet thick. There is probably no portion of the country where the population is denser or where the local traffic will be greater than over the country traversed by this new railroad."

Mobile and Great Northern Railroad Co.

At the election for directors of this company, held on the 10th ult., the following named gentlemen were unanimously elected: Wm. D. Dunn, B. F. Marshall, N. St. John, J. A. M. Battle, R. A. Baker, L. M. Wilson, James Boykin, Lewis Troost.

All the above are former members of the Board, except Mr. Marshall, elected to the place lately held by Wm. Jones, Jr., Esq., deceased.

At a meeting of the directors, the following gentlemen were elected officers for the ensuing year:

President—W. D. Dunn.
Sec. and Treasurer—S. W. Allen.
Executive Committee—Lewis Troost, Chairman; R. A. Baker, L. M. Wilson.

The Salem, N. J., Railroad.

The route selected for the Salem Branch of the West Jersey Railroad, is to commence on the north side of Salem creek, near the Market street bridge or Clayville, and to run in an easterly course to near Alloways town, thence northeast to near Humphry Cann's (about two miles from Woodstown,) thence easterly by Daretown to Pittstown, to join the West Jersey Railroad at the station at that point.

Iron Bridges for the Pennsylvania Railroad.

The Pennsylvania Railroad Bridge to cross the Schuylkill near the U. S. Arsenal, is to be of iron, three spans, each 192 feet. The top chord of the bridge will be of cast iron, and the lower chord of wrought iron eye bars. The verticals and main diagonals will also be of wrought iron, and the counter diagonals will be adjusted by screws.

A bridge on the Murphy-Whipple plan, for the Harrisburg and Lancaster Railroad Company, recently leased by the Pennsylvania Railroad, will cross the stream at Middletown. It is 118 feet span, having three trusses proportioned to carry 6,000 pounds per lineal foot, at a maximum load. This bridge is to supply the place of a wooden one put up in 1855.—*Phil. Ledger*

Clinton Line Railroad.

The road of this Company was sold at Hudson, Ohio, the 12th ult., by William Collins, special master, to J. P. Converse, as trustee for the first mortgage bondholders for $46,670. The sale was made by virtue of an order issued by the U. S. Circuit Court for the Northern District of Ohio, in the suit of Ludlow, trustee, *vs.* the Company to foreclose the first mortgage.

Pontchartrain (N. O.) Railroad.

The directors of this company are J. M. Lapeyre, N. R. Jennings, Edward Briggs, Alphonso Miltenberger, F. A. Luling, Jos. Lanata and John Watt.

Finances of Louisiana.

We copy from the N. O. *Picayune* the following statement of the financial condition of this State on the 1st January last:

The Finance Committee of the House of Representatives have made an elaborate report on the condition of the State Treasury.

It is accompanied by tables which, with the regular annual reports of the Auditor and Treasurer, furnish a clear financial history of the State for about ten years, and enable us to state, very accurately, what is the condition of our finances at this time.

The debts and liabilities of the State were, in 1840, $23,309,346 43; they are now $10,099,074 32, showing a reduction of $13,210,172 11.

The reduction has been mainly effected by the winding up of the old property banks and the withdrawing of the State bonds upon which they were founded. There are two sets still outstanding, those for the Consolidated Association, which is in liquidation, amounting to $1,101,200, and the bonds for the Citizens' Bank amounting to $4,297,333.

The debt proper of the State, in 1840, for its own purposes, that is to supply deficiencies in the general funds, was only $1,164,886 43. It is now, on the same head, $2,064,300 99. The remainder of the State debt is for on account of investments in railroad stocks, and for liabilities to banks and corporations.

The whole debt on the first day of January last was composed of the following items:

Bonds for Citizens' Bank		$4,297,333 33
" Consolidated Association.		1,101,200 00
		$5,398,533 33
Railroad subscriptions—		
Jackson Railroad	$884,000	
Opelousas Railroad.....	641,000	
Vicksburg and Shreveport.	260,000	
Grosse Tete.....	70,000	
		1,855,000 00
The Railroad Debts—		
Old Nashville Bonds.....	$483,000	
Mexican Gulf Railroad ...	100,000	
Port Hudson and Clinton..	9,000	
		592,000 00
Old Second Municipality..	$198,240	
Charity Hospital	125,000	
		323,240 00
Juvenile School fund	$529,000	
Seminary fund.....	136,000	
		665,000 00
For relief of Treasury		750,000 00
Whole bond debt		$9,585,773 33
There are trust funds, for which the State is liable, payable on demand, amounting to.....		575,300 99
Making the whole State debt about,		$10,099,074 30

Among these trust funds, stated as payable on demand, is the old United States deposits of 1836, which amount to $479,919 14. The gross amount of the State debt is, therefore, about $11,000,000; but of this about $7,500,000 is for liabilities well secured, or investments in railroads, which ar

looked to directly or indirectly to supply the means of extinguishing the debt; $665,000 are for trust funds, for public uses, of which the capital need never to be paid, and other items, amounting to half a million more, are mere debts of accounts, leaving in round numbers for the debt proper of the State not far from $2,500,000, for losses and bad investments, and expenditures beyond revenue since beginning of government.

The amount of direct responsibilities of the State for which she must provide in the first instance is about $4,500,000.

The State herself provides for the interest on all these bonds, except those of the property banks, and the Second Municipality debt, which are provided for by the banks and the city of New Orleans, respectively. The annual interest payable and paid during the last year amounted to $341,405 14.

This includes interest on the U. S. deposit, which was appropriated to the annual school fund.

The total receipts into the Treasury last year, including receipts on account of trust funds, were $2,378,793 44; the expenditures, $2,224,-702 10.

Added to the balance remaining in the Treasury, July 1, 1860, there remained a balance, on the 1st of January last, of $1,331,402 57 belonging to the various funds. The general fund, $1,073,217 42; paid out, $980,801 12; apparent surplus, $193,416 30.

But the general fund report $150,000 borrowed of the Louisiana State Bank in 1859, so that the actual excess of receipts over ordinary expenditures was $242,416; and, added to the balance in the treasury at the beginning of the year, made a surplus of resources over expenditures during last year of $376,112 39.

The committee suggest that with the same economy of appropriation the surplus available this year for any extraordinary expenses would reach to $600,000.

The taxable property of the State has increased within ten years from $265,000,000, at which it was assessed in 1850 and 1851, to $420,000,000, at which it was assessed in 1860—an increase of $150,000,000. The rate has averaged about $15,-000,000 per annum, but it has been quite irregular; 1853 was assessed at nearly $30,000,000 over 1852, and 1856 $37,000,000 over 1855, while the estimated excess of 1860 over 1859 is only $4,-000,000. The increase has, however, been constant, if not uniform.

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending April 13th, 1861, were..... $86,973 79
Corresponding week, 1860..... 70,858 89

Increase..... $16,114 90
Tot. traffic from July 1, 1860, to date, $2,732,841 23
Corresponding period, 1859 ..... 2,259,137 01

Increase..... $473,704 22

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,

Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE, Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,

W. H. BELL, Major of Ordnance.

ANALYTICAL AND Manufacturing Chemistry,

No. 24 WILLIAM STREET,

New York, Saturday, May 11, 1861.

Texas and New Orleans Railroad.

The Texas and New Orleans road is now complete from Houston to Beaumont, with the exception of the first six miles from Houston, and about five miles between Green's bayou and the San Jacinto. It is presumed that the whole road will be complete in twenty days. The Eastern Texas road from Beaumont to Sabine Pass will also be put in operation in from thirty to forty days.

Arrangements have been made for running a line of steamers from Sabine Pass to Berwick's Bay, four or six times a week. Owing to the fact that both bars will have to be crossed by day light, the time table will have to be fixed so as to admit of passengers embarking on the steamers at both places at about sun-down, the steamers arriving at their destination at daylight next morning.

The saving over present time from New Orleans to Houston will be nine hours; and from Houston to New Orleans about twenty hours. This saving will turn the tide of travel altogether over this route.—*Houston Telegraph, April 16th.*

Cleveland, Columbus and Cincinnati R. R.

The earning and expenditures of this road for the years ending December 31, 1859 and 1860, were as follows:

EARNINGS.

	1859.	1860.
From passengers	$348,556 94	$354,580 59
" freight	551,944 21	596,906 28
" express	13,748 27	16,452 31
" mails	29,100 00	29,100 00
" rents	75,529 43	76,382 77
" interest	4,220 17	5,711 14

Oil and waste	9,864 13	8,095 69
Cattle damages	1,189 28	1,207 25
Fire "	166 75	49 25
Repairs and expenses for telegraph	.....	2,091 82
Total operating expenses	$469,195 50	$483,520 29
New swing bridge over Cuyahoga River, Cleveland	16,550 00	.....
Taxes	21,999 99	21,658 22
Interest and exchange	5,255 36	2,223 65
Total expenditures	$513,000 85	$507,402 16

	1859.	1860.
Total earnings	$1,036,941 83	$1,085,799 40
" expenditures	513,000 85	507,402 16
Net income	$523,940 98	$578,397 24
Dividends 10 per ct.	474,610 00	474,620 00
Surplus	$49,330 98	$103,777 24

Compared with the previous year, the earnings show an increase of $48,857 57; with a decrease in expenditures of $5,598 69—making the increase in net earnings, $54,456 26.

The revenue of 1859 was $76,698 12 below that of 1858, viz: a decrease in freight of $86,516 41; in rents, express and mail of $1,402 90; with an increase in passengers and other sources of $11,221 19. It will be observed that the decrease in freights exceeded the total decrease in the revenue of the road for that year. This decrease is attributed to the almost total failure of the wheat crop along the entire road, and of a portion of its tributaries, and to the low rates of freights caused by the excessive competition of rival lines.

The assets and liabilities of the past and preceding years compare as follows:

ASSETS.

	1859.	1860.
Road and depots	$4,000,000 00	$4,029,200 22

The injunction prohibiting the payment by this Company of the principal or interest of certain bonds of the Columbus, Piqua and Indiana Railroad Company, (indorsed by this Company,) having been removed, it was thought advisable to save further litigation and expense, that said bonds, although not due, be bought by this Company if the same could be done on equitable terms. To that end propositions were made to the holders thereof for the purchase of said bonds, at the actual cost of the same, with interest on such cost. This proposition being so fair and just, most of the holders of said bonds have availed themselves of it.

For the purpose of providing means for the purchasing of said Columbus, Piqua and Indiana Railroad Company's bonds, and for the purpose of aiding the Bellefontaine and Indiana Railroad Company in the retiring of certain of its bonds indorsed by this Company, and now due, (for which aid this Company is secured by a deposit of Second Mortgage Bonds of the latter Company,) there has been issued and sold at par during the year, $500,000 of the bonds of this Company, secured by a first mortgage upon the road and equipments; said bonds bearing interest at the rate of seven per cent. per annum, and falling due in sums of $25,000 per year, commencing with the year 1864. It is confidently expected that, by this mode of annual payment, the debt will be extinguished without materially effecting the dividends to stockholders.

President—L. M. Hubby.

Directors—John M. Woolsey, David Dows, Erastus S. Prosser, Hosea Williams, John Miller, Amasa Stone, Jr., Stillman Witt, Samuel William son, Martin B. Scott, Joseph Perkins, Leander M. Hubby.

Superintendent—E. S. Flint.

Engineer—P. Kidder.

Secretary—Geo. H. Russell.

Treasurer—T. P. Handy.

The Hon. John Young, of Montreal was exhibiting in the House of Parliament some elaborate plans of a new conception of his. He proposes to tap the St. Lawrence somewhere near the Lachine rapids, to excavate a great hydraulic canal thence to the neighborhood of Point St. Charles, and there to build an enormous basin or reservoir. Between the reservoir and the harbor of Montreal there is to be a short canal, with locks, permitting ships to go up and down, and, in fact, making another harbor where now there is nothing but a sort of shoal or marsh. All along the new canal and all around the reservoir there will be an enormous amount of water-power available. This, Mr. Young thinks, will not only be used for manufacturing purposes, but for working elevators and hydraulic cranes for transferring the cargoes of ocean-going vessels lying in the reservoir, to fresh water propellers or railway cars, and *vice versa*. The scheme is a grand one, and if carried out, which it may be, it will probably add fifty per cent. to the population of Montreal within ten years, and quadruple the value of Mr. Young's property in the neighborhood of the proposed improvement.

What Mr. Young wants from Parliament is, he says, a charter; private individuals, of whom there are several with plenty of means at his back, desiring Legislative facilities for organizing themselves into a joint stock company. In addition, he also wishes for the right of way through some government property, and the privilege of using a portion of the bed of the St. Lawrence.—*Quebec Chronicle.*

Delaware Railroad.

This road is 84 miles in length, extending from Delmar on the Maryland State line, to a junction with the Newcastle and Frenchtown Railroad, about 7 miles from Newcastle, and 14 from Wilmington, Del. The length of the Newcastle and Frenchtown Railroad is 16.19 miles: but, since the completion of the Newcastle and Wilmington Railroad, only that portion has been in use which forms the connection between the Newcastle and Wilmington and the Delaware Railroads. About 8 miles of the Eastern Shore Railroad, extending from the Southern terminus of the Delaware road to Salisbury, Md., has also been completed, and is operated, in connection with the above roads, by the Philadelphia, Wilmington and Baltimore Railroad Company.

The Newcastle and Wilmington Railroad Company was chartered in 1839, and the road constructed in 1854. Since its completion it has been operated under lease by the Philadelphia, Wilmington and Baltimore Railroad Company, which pays as rent therefor a sum equal to 7 per cent. on its cost of $150,000.

The Delaware Railroad Company was chartered Feb. 22, 1849. The work of construction was commenced in Nov., 1852. The different sections were opened as follows: From the Delaware Junction to Middletown, 12 miles, in Sept., 1855; from Middletown to Dover, 23 miles, in Jan., 1856; to Seaford, 36 miles, Jan., 1857; and to Delmar, 13 miles, in April, 1860. The Maryland section to Salisbury was also opened in April, 1860. The Delaware road was leased for 21 years from the date of its opening by the Philadelphia, Wilmington and Baltimore Railroad Company, which agreed to equip, maintain and run it, and pay as rent 6 per cent. annually on its cost.

The Junction and Breakwater Railroad leaves the Delaware Railroad at Warrington, and will terminate at Lewes, its length being 29 miles. It was completed and opened to Milford, 8½ miles, in Sept., 1859, and has since been operated by the Philadelphia, Wilmington and Baltimore Railroad Company, at a fixed rate of payment for services.

The Maryland and Delaware Railroad will also leave the Delaware Railroad at Smyrna, and have its Western terminus in Oxford, Md. Only a short section is within this State.

We have received the report of the Delaware Railroad Company for the year 1860, from which we learn that the receipts have been $138,970 97; and the expenses $97,524 88—excess of earnings $41,466 09. The increase in receipts over the previous year has been $23,181 96. The expenses have been proportionably larger, owing chiefly to the larger amount of service performed. The report says:

During this year the aggregate of miles run is 136,631; an amount of service much larger than that of any preceding year, possibly more than a close regard to present economy would sanction, but conceded to apparent demands for public accommodation, and a liberal purpose on the part of our lessees to meet those demands in their fullest extent. The accompanying tables will show some details of this service; and, when it is remembered that the peach crop this year was nearly cut off, and the crop of corn much below an average, you will be gratified to learn that the freight and tonnage moved is considerably increased over the last year. The progressive increase of travel is also maintained, a feature in which our road is peculiar. This is due to the fact that it is sustained by local travel, and is not subject to the general depression which has recently affected the great railroads of through travel. The number of passengers carried is 118,264, against 84,603 last year, (eleven months); of bushels of grain 508,604, against 374,781; lime 206,370 bushels, and 74,994 tons of merchandise, &c.

You are indebted to the through organization and unsurpassed management of the P. W. & B. R. R. Company, for the safety, regularity, and ease, with which this large business is done. With the same means at command it would be impossible for our own, or any other newly organized company, to operate the Delaware Railroad with such exactness, ease, and success. It is the daily highway of travel, at this season the only mode of travel, for your entire community; the means of transportation of a large portion of their marketable products, and receipt of goods for retail distribution throughout the peninsula, to the extent before stated.

The repairs and renewals of the road made this year have been of the most permanent character, by which the necessity of repairs in future will be diminished, and the safety of travel improved. Since January, 1858, thirteen stone culverts have been built, and these, with two others previously put in, have been filled over. One bridge has also been filled up, which experience proved to require no culvert—making the whole number of trestle bridges got rid of sixteen.

To increase the freighting and passenger accommodations, granaries have, within that time, been built at Seaford and Bridgeville, each 56 by 25 feet; at Felton, Dover, and Smyrna, each 50 by 22 feet; at Laurel and Camden, each 56 by 23 feet; at Smyrna, (a second building,) 81 by 31 feet, and at Townsend one 63 by 31. In addition to these, and to the granary at Middletown station, previously built, (200 by 35 feet,) there are granaries built by individuals, and leased by the P. W. & B. Company, for the use of this road, at Greenwood and Harrington stations; also private granaries at Farmington and Felton stations. There is now, in all, storage for about one hundred thousand bushels of grain on the line of the road. A handsome two story brick passenger station, with offices, has been built at Dover. One is much needed at Smyrna station. A telegraph line has been constructed and put in operation over the road as far as Middletown; and, recently, measures have been taken to extend it further down the road.

Since our last report, the Eastern Shore Railroad, in extension of our peninsula route, has been prosecuted to the extent of opening to Salisbury, survey, location, and contract for building the residue to Somer's Cove. At present, active progress in its construction is delayed by causes which are believed to be temporary, but it is confidently expected, that without a continuance of these causes, which so much embarrass the general financial affairs of the country, this through line will be finished in another year. In the meantime, a steamboat connection has been made with Norfolk, by way of the Nanticoke river, which is altogether in the hands of other parties, and, though not hitherto conducted with much regularity, it has added considerably to the business of this road.

Watertown and Rome Railroad.

The earnings of this road for the year ending January 1, 1861, were:

From passengers	$138,470 61
" freight	193,519 08
" other sources	24,107 37
	$356,097 06

And the payments were:

Maintaining road	$52,472 65
Repairing machinery, etc.	25,516 05
Operating road	90,511 62
	168,500 32
Balance	$187,596 73
Add balance from last report	16,103 80
Received from bills receivable	6,043 38
" " on interest account.	1,345 58
" " for sinking fund bonds sold	4,000 00
Received from bills land sold	280 00
	$215,369 50

Disbursed as follows:

Interest on funded and floating debt	$52,571 95
Dividends	354 00
Mortgage bonds paid	60,500 00
Bills payable	10,682 92
Insurance and repairs to steamer	907 19
Coupons P. & W. R. R. $56,105	
Less received for do. 44,000	
	12,105 00
Paid in purchase of P. & W. R. R	29,511 69
Sinking fund	13,500 00
Loss by freight agent in 1858	1,996 40
Cash	33,240 35
	$215,359 50

The assets on hand consist of—

Cash, as above, including amounts due from freight agents	$33,240 35
Bills receivable, good	11,478 00
Materials on hand	18,416 39
Steamer Highlander	4,000 00

	$78,631 41

The immediate liabilities were—

Bills payable	$5,000 00
Due to sundries	1,000 00
	$6,000 00

A bond dividend, amounting to $150,000, being 10 per cent. on the capital stock of the company was paid to the shareholders on the first of March, 1860. A dividend in cash of three per cent. was paid on the first of January, 1861. The Superintendent in his report says:

"The prospect for business on the road another year, so far as can be judged, is encouraging. The business of the section of the country through which it is located seems to be on the increase, and the local business of the road will probably improve. Not much effort has been made, the past season to secure through freight, the price ranging so low during the early portion of the season that it was considered no object. During the latter portion of the season, while prices were better more attention was given to it and as much was transacted as the limited facilities would allow."

Regarding the Potsdam and Watertown Railroad the report says:

At the time the report for last year was made to the stockholders, legal measures were in progress for obtaining possession of the Potsdam and Watertown Railroad, whose bonds this company had guaranteed to the amount of $800,000, the interest on which this company had been obliged to pay to a considerable amount. The original contract entered into between this company and the Potsdam and Watertown, provided, that in default of the payment of the interest on the guaranteed bonds by the Potsdam Company, the Watertown and Rome Company should have immediate and peaceable possession of that road till they should be reimbursed. On such default demand was at once made on the Directors of that company for the surrender of the road under the contract above referred to. This was refused, and litigation followed, which promised to involve both companies to large amounts in law expenses and other losses, all of which would finally have rested on the Watertown and Rome road. To avoid such useless expense, and with a view to attain absolute ownership of the Potsdam road, the Board of Directors of the Watertown and Rome Company decided upon a plan by which they would become the owner of the $200,000 in bonds of the former road secured by a second mortgage. This was accomplished at an expense of about $30,000; and, on the 25th day of July last, the Potsdam and Watertown Railroad was sold, under foreclosure of the second mortgage, and the Watertown and Rome Railroad Company became the purchaser, under a law of 1860, especially authorizing such purchase, and received possession of the road and a deed of transfer, and has since managed it and received its earnings.

By the provisions of the Statute of 1860, before referred to, power is given to consolidate the Potsdam and Watertown Road with the Watertown and Rome road and make it a part of the line of the latter—a power which the Directors have not yet exercised.

The earnings of the Potsdam and Watertown road from December 1, 1859, to December 31, 1860, were $109,509 76; and the expenses $54,638 58—leaving net, $54,871 18.

According to the report of the company made to the Legislature for the year ending Sept. 30, 1860, the receipts during that time were: from passengers $137,831 64; from freight $192,186 84; other sources $21,149 08—total, $351,167 56; and the expenses for operating and maintaining road and machinery, $173,099 82—leaving net earnings for the year $178,067 74, or a fraction less than 12 per cent. on the capital stock of the company; while the expenses were less than 50 per cent. on the gross earnings, although sundry items were embraced therein, amounting to $29,392 02, which might appropriately be termed renewal or extraordinary expenditures, having been made to a large extent for permanent improvements to the road. During the year about 10 miles of the road were re-laid in re-rolled and welded iron; and 18 tons of spikes, 50 tons of chairs, and about 14,000 new ties were used in repairs. Similar expenditures to a considerable extent will be required during the ensuing year.

The characteristics of the road are as follows: Length of main line of road from Rome to Cape Vincent, 96.76 miles; length of double track, including sidings, 11 miles; weight of rail, 56 lbs.; No. of engine houses, etc., 5. The equipment consists of 17 engines; 11 first class passenger, 8 baggage, mail and express, and 280 freight cars.

The number of miles run by engines with trains was 212,235. Number of passengers carried, 122,845; number carried one mile, 4,060,780. Tons of freight carried, 108,293; tons carried one mile, 6,287,545.

STOCK AND DEBTS.

Superintendent—ADDISON DAY.

Secretary and Treasurer—R. E. HUNGERFORD.

Punjaub (India) Railway.

It was stated in the report of 25th September last, that since the month of March thirty ships had been dispatched with nearly fifteen thousand tons of railway material and rolling stock—that other vessels were loading with similar freight—that the works of the railway were proceeding as rapidly as local circumstances admitted—that locomotives had been safely landed at Kurrachee—and that arrangements were being made for conveying them up the Indus—that carriages and wagons were being constructed—that large quantities of permanent way material had been distributed along the line—that sites for stations were being prepared—that wells were being sunk and bricks burnt—that the pier and depot at Kurrachee for this railway had been completed—and that during the current year two calls had been made, and a large sum paid in anticipation. Since the 25th September, the date of the last report, twelve thousand tons of permanent way material, and a large quantity of rolling stock, have been dispatched from this country for Kurrachee, and the iron work of every description necessary for the construction and working of the railway, is either contracted for or in course of delivery for shipment to India. The earthwork on the section between Lahore and Umritsir is reported to be of excellent quality, and the only two bridges on this section are in a forward state. By a prompt fulfilment of their engagements by the native contractors for the supply of ballast and sleepers this most important section would be speedily com-

pleted and opened for the accommodation of the public. The whole of the iron-work has been for some time on the spot, and the plate-layers despatched from this country to put it together have arrived. The Umritsir station designs have received the sanction of Government, and the Mean Meer and Atarree stations are all but completed. The works at the Great Central Station at Lahore have been greatly advanced during the past half-year. The earthworks remaining to be completed between Lahore and Mooltan are inconsiderable, and beyond Mooltan to Shere Shah they are so advanced as to be within a short distance of the Cheenab river, at which spot the interchange of traffic coming from Kurrachee for the north, and *vice versa*, will be effected. There are few works of masonry between Lahore and Mooltan, with the exception of culverts for draining the railway works and stations. A bridge across the Barree Doab canal is the only work of any importance between Lahore and a few miles north of Mooltan. The iron girders for this bridge, and those for the bridges near Lahore have been delivered at their intended sites. The bungalows along the line for the accommodation of the engineering staff, which will hereafter be converted into railway stations, are in progress of construction. A design for the Mooltan terminal station and works connected therewith has been submitted to Government for sanction. The Chief Engineer, in his half-yearly report, dated Lahore, January 14, 1861, states that—"Since the last half-yearly report, the railway staff has been augmented by arrivals from England. In addition to the plate-layers, the employees of the locomotive department have reached this country. Superintendence is now in every department of the work, for the contingencies of rapid progress in which the authorities of home have in their discretion amply provided. If the company and the Government will, having progress in view, resolve upon any fresh arrangement that shall assist progress, they have official representatives now here in all branches of the work, who, officially speaking, are able to carry out their views. The same providence in England to wants here is manifest in the large quantities of materials dispatched to this country, and whilst accidents in retarding their delivery have happened—accidents which, though ever so guarded against, will happen in the transport of material to so great a distance—it is satisfactory to remark that the arrivals of iron work for permanent way have been steady and continuous, and that contractors have been found in this country of energy and prudence, who have brought them regularly and in large quantities unimpaired to our works. The arrangements for effecting this have not been those of any department, but they have been so well managed as to demand notice." Last month a call of £5 per share was made payable on the capital of this railway, which was well responded to. No other call will be made on the Proprietors during the current year. A considerable proportion of the shares are now fully paid up, and payments will continue for the present to be received in anticipation. A statement of receipts and disbursements for the past year is appended, which, with the books of the undertaking, have been examined by the auditors, and also by the Accountant-General of the Secretary of State for India in Council. The accounts in England are made up to 31st December, 1860, and in India to 30th September of the same year. The financial statement shows that from the commencement the sum of £887,000 has been received, and the sum of £676,900 has been expended, leaving an available balance of £217,000 at the credit of the undertaking with the Secretary of State for India in Council, and with Government in India. The Directors are well satisfied with the progress of the several undertakings entrusted to them, and continue to receive from the home authorities the fullest support.

Finances of Connecticut.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

An examination of the reports of the Treasurer and Comptroller shows that the balance in the Treasury on the 1st of April, 1860, to the credit of the civil list, was $14,889 65

To which has been added during year:

Dividends from Banks	33,839 00
For taxes on stocks of non-residents..	12,450 40
For taxes from savings banks	49,561 35
For taxes from Mutual Insurance Companies	7,778 55
For taxes from railroad companies...	19,911 38
For taxes from towns	122,069 12
From other sources.....	8,942 18
	$269,441 63

The expenditures have been:

For the General Assembly	$35,977 72
Salaries.....	23,900 00
Judiciary expenses	77,130 91
For public institutions and buildings .	27,934 52
Interest.....	5,330 33
Other expenditures.....	56,877 65
Balance now in Treasury.....	42,290 60
	$269,441 63

Deduct the sum in the treasury from a loan of $50,000, due from the State, and our indebtedness will be $7,709 50, which is $26,432 54 less than it was a year ago, and $73,451 56 less than in 1858. The expenses for the year have been $227,-151 13.

The resources are such, that our ordinary expenses are met by light taxations; but our present positions is so unlike any which we have hitherto occupied, that it is impossible to form a reliable estimate of expenses for the current year. That they will be largely increased is certain. In justice to ourselves and to those who are to succeed us, we should increase the rate of taxation upon the grand list, and give authority to the Treasurer to make such loans as may be necessary to meet the demands upon his department.

With the exception of lands in the State of New York, valued at $5,000, the School Fund of the State is invested in bank stocks and in bonds and mortgages, and on the 2d day of September, 1860, amounted to $2,050,460 49. The income for the year ending April 1st, 1861, has been $137,305 07, or a fraction more than 6¼ per cent. The number of children, between the ages of four and sixteen, is 108,356, which is an increase of 2,862 over that of the previous year. As the number increases, the rate of dividend for each must necessarily diminish. The last year, the distribution was made among the several school districts which had conformed to the provisions of law, upon the basis of $1.15 to each scholar. The number of public schools is 1843, sustained at an expense of over $338,000,—about nine-tenths of which is met by a tax on property, and the income from public funds. Over $24,000 have been expended in repairing schoolhouses, and over $60,000 in erecting new ones, during the year.

The expense of the school, borne by the State, for the past year, including repairs upon the buildings, has been $5,186 42. The General Assembly of 1859 made an annual appropriation of $5,000 for the support of the school for two years, which time has now expired.

The State Reform School contained 112 juvenile delinquents on the 1st day of April, 65 of whom have been received during the year.

The Institution has never given greater promise of accomplishing the objects for which it was founded, and your co-operation with the Trustees is essential to its final success.

The State's Prison contained on the 1st day of April last, 168 prisoners.

The earnings of the convicts for the year have been	$15,330 03
And the expenses of the Prison.....	14,907 61
Showing a gain to the State of....	$422 42

There are 75 banks of discount in the State with $1,004,381 60, in specie, with a circulation of $6,661,939; deposits amounting to $5,023,928 55, and an aggregate capital of $21,838,029. There are 84,614 depositors, in 44 savings banks, with deposits amounting to $19,377,670 18. The aggregate deposits, in Savings banks, and in Building associations, is $20,791,856 34.

The capital of the several railroad companies, is	$23,675,838 00
Of which there has been paid....	18,756,627 31
The total amount of floating and funded debt, is	10,987,875 73
The net earnings for the year have been	1,301,662 20

Finances of Maryland.

We copy from the Annapolis *Gazette* a portion of its synopsis of the Report of the Comptroller of the Treasury of Maryland for the fiscal year ending the 30th of September, 1860.

The total receipts for the fiscal year were $1,-048,339 67; which, added to the balance in the treasury September 30th, 1859, makes an aggregate of $1,561,630 83. The actual receipts in the preceding fiscal year exceeded those of the year just closed by the sum of $152,213 10. The revenue which accrued and was received in 1860 was $97,058 46 less than the sum which accrued and was received in 1859.

The disbursements for 1860 amounted to $1,-306,043 08; exceeding the revenue which accrued and was received within the fiscal year by the large sum of $411,231 88.

The sum remaining in the treasury at the close of the fiscal year was $255,587 75, subject, however, to certain charges therein enumerated, amounting in all to $284,849 20, which being deducted would leave a balance against the treasury of $29,261 45. So that if all these demands had been made on the 1st of October, 1860, the treasury would have been unable to meet them. Fortunately they were not made, and the State has thus far escaped such embarrassment and discredit.

The probable receipts into the treasury during the present fiscal year are estimated by the Comptroller at $1,119,640 80. But many of the sources of revenue are so irregular and uncertain as to render it difficult to form a satisfactory and reliable estimate, and of course the receipts will be affected by the monetary condition of the country incident to the crisis. The probable demands upon the treasury are estimated at $998,544.

The total assessed value of real and personal property in the State for the year 1860, was $282,680,498.

Galt and Guelph Railway.

For two months past the traffic over the Galt and Guelph Railway has been unusually large. Three trains now run daily, up and down, while "specials" have also to be in requisition. As many as 18 to 20 freight cars attached to a single train are getting to be a common occurrence. Nothing could better indicate returning prosperity to this section of Canada than this gratifying increase of railway traffic. May it long continue.—*Dumfries Reformer.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, May 11, 1861.

Share and Money Market.

The share market at the present low prices has been comparatively quiet and uniform for some time past, the changes that occur depending almost entirely upon the views taken of our political matters. A great many of the State stocks are exceedingly depressed, and will not, probably, show much recovery until it is certain that the July interest will be paid. The earnings of the great majority of our railroads hold up pretty well, but this does not keep up the price of their shares. The future is so uncertain that there is no disposition on the part of the public to purchase even at the present low prices.

Money continues very abundant. No new works are in progress, and very little is doing in commercial affairs. A paralysis, in fact, rests upon all business operations which must continue till we see ourselves more clearly out of our present political difficulties.

Ohio and Mississippi Railroad.

An order has been made by Judge Leavitt, of the United States District Court of Ohio, for the sale of the Eastern Division of the Ohio and Mississippi Railroad. The order provides that the road shall be sold upon three months notice, and the sale shall be subject to the first mortgage bonds. The minimum price fixed is $1,000,000, and the purchaser must first deposit $50,000 in United States currency, or $100,000 in bonds, in the Commercial Bank of Cincinnati. The Receiver is required to file in the United States Court, at least 30 days before the day of sale, a schedule of all the property, real and personal, of the Ohio and Mississippi Company. It is further provided that this decree shall take effect when the United States District Court of Indiana shall make a similar decree.

New York and Erie Railroad.

The trustees give notice that the time for becoming parties to the contract for the purchase of the road will expire on the 28th of July next. No exchange of stock, bonds, debts or claims of the old company will be made into stock in the new company after that day. The trustees have decided to make an assessment of two and one-half per cent. on the par value of the new common stock and preferred stock, payable on delivery of the new certificates, in cash, or in fourth or fifth mortgage coupons in arrear.

Scrip will be issued for the assessments, redeemable with interest at the office of the company in New York, from the net earnings, pursuant to the provisions of the contract. All assessments made on the 1st of September next will be charged with interest from that day.

The Erie Railway Company was organized on the 1st inst., since which time the new certificates have been issued as called for and assessments paid.

Gutta Percha Cement Roofing.

Owing to the rapid increase of business, and the necessity of more extensive arrangements to enable them to fill orders promptly, Messrs. JOHNS & CROSLEY, have been compelled to *remove* their office (from 510 Broadway) to the Wholesale Warehouse, No. 78 William St., corner of Liberty. Their advertisement will be found in another column. The improved Gutta Percha Cement Roofing has been thoroughly tested during the past five years on roofs of all kinds in all parts of the United States, Canadas, West Indies, and South America, and has proved to be in every respect all that is claimed for it, viz: a *Fire, water, weather*, and *time* proof roofing. It is sent to any part of the country with directions for using. Specimens and references can be seen, and any desired information obtained on application by letter, or in person, to Messrs. JOHNS & CROSLEY, No. 78 William St., New York.

Long Island Railroad.

On the 6th inst., the freight trains commenced running between Greenport and the depot at Hunter's Point. Since that date no freight train has been started from the South Ferry depot; and no freight has been received at that point since the 4th. An office has been established at the James' Slip Ferry, New York side, both for the receipt and delivery of freight. Passenger trains also commenced running to and from Hunter's Point on the 10th. Hereafter passengers for the trains will take the ferry-boat at James' Slip, or at 34th St., for Hunter's Point.

Housatonic and Naugatuck Railroads.

Proposals are invited by the Presidents of these companies at Bridgeport, Ct., for the performing by contract all the labor connected with the freighting business, including the loading and unloading of freight, the way-billing of the same, the switching of the cars, the making up of the freight trains, the collecting of the freight-bills, &c. Full explanation in regard to the labor to be performed, will be given upon application. Persons desirous of proposing for the contract should first make a personal examination of the premises. The time for receiving proposals is limited to the 15th of June next.

Railroads and Canals of New Jersey.

An abstract statement of their finances, etc., for the year ending December 31st, 1860.

(*Compiled from the official returns to the Legislature.*)

* Paid to the sinking fund, $112,367.

† Also a stock dividend of 33⅓ per cent.

‡ Including $17,778 transit duty and $18,745 tax on capital stock.

NOTE.—The non-reporting roads are—the Hackensack and New York, 4½ miles long; the Long Dock and Tunnel, 2.88 miles; the Millville and Glassboro', 22.30 miles; the Northern, 21.27 miles; the Orange and Newark, 3½ miles; and the Hoboken Passenger railroads (three), about six miles. There are also in the State several roads owned by individuals.

The quantity of coal carried over the Central Railroad was 854,769 tons, and of iron 55,355 tons.

Public Lands of Canada.

The reports of the various public departments for 1860, have been published, showing the progress that Canada has made during the past year. From the Report of the Commissioner of Crown Lands we learn that the sales of lands in Lower Canada, and the receipts therefor, were as follows:

	Acres sold.	Amount of purchase-money.	Receipts.
Crown lands..	290,026	$149,068 41	$78,901 60
Clergy lands..	44,545	34,355 69	27,734 27
	334,571	$183,419 10	$106,635 87

In addition to this, the Jesuits' estates yielded the sum of $24,492 46; the net receipts of the Seigniory of Lauzon were $8,042 41; and those of the Crown domain $3,487 45. In Upper Canada the transactions were much larger:—

	Acres sold.	Amount of purchase-money.	Receipts.
Crown lands.	126,413	$144,840.12	$199,855.15
Clergy lands.	62,522½	174,808.70	77,688.13
G. S. lands ..	6,900½	11,401.93	24,392.52
C. S. lands ..	3,221½	10,006.60	92,042.64
	199,057½	$341,059.35	$393,937.31

This is exclusive of the Woods and Forest department; the receipts given are not, in all cases except the Crown lands. In Lower Canada, it will be seen, the saleable public lands are divided only into Crown and Clergy, besides the Jesuits' estates; and it is the proceeds of the Crown lands only that go into the consolidated revenue fund. The clergy lands and the Jesuits' estates are the only special lands in Lower Canada; while in Upper Canada there are Clergy lands, Grammar School lands, and Common School lands to a great extent. The proceeds of none of these go into the consolidated fund; so that if the lands situate in Upper Canada yield more than those of Lower Canada, Upper Canada gets the benefit. The amount of the purchase-money of Crown lands sold in Lower Canada in 1860 was greater than that of those sold in Upper Canada. The ordnance lands had produced a revenue of $50,175 25 in 1860, applicable to the support of the militia. The amount is annually increasing, and will in a few years be adequate to the support of an efficient militia.

The sales of Crown lands in Lower Canada were more than double the amount sold in 1859. The free grants on the Colonization roads amounted to 19,421 acres, being an increase of 1,429 acres. There is still an almost inexhaustable supply of lands for intended purchasers, there being no less than 5,397,191 acres surveyed, and as yet not granted, and a great deal more which the surveyors have not yet visited. Of the Clergy lands, ten times as much were sold as in 1859.

In addition to the sales of Crown lands in Upper Canada, 26,300 acres were located as free grants. There are still for sale surveyed Crown lands, amounting to 1,853,121 acres; Clergy lands, 198,974 acres; and School lands, 76,000 acres.

Respecting the townships sold *en bloc*, the Commissioner says:

Under the regulations of the 13th January, 1859, ten townships, comprising 439,000 acres, were conditionally sold through the "Canada Agency Association," acting for certain gentlemen of high standing and wealth in England, and a payment of $19,200 received on account.

The advantage to the country of procuring the settlement of ten newly surveyed townships, in the very centre of the great tract of land lying between the Ottawa and the St. Lawrence, cannot be over estimated. It will form a nucleus for colonization on a more enlarged scale, as even the individual immigrant attracts to his neighborhood relatives and friends from abroad, and thus becomes an agent in the work.

With respect to the Ordnance lands, which were transferred to the Province by the Imperial Government, whose property they once were, on condition that it should maintain an efficient militia of its own, the report says:

The receipts for the year amounted to $26,210.49, of which $7,261 63 was proceeds of sales and $18,948 85 rent income; the salaries and expenses, including those of the sales, were $10,467 18. The annual revenue for 1860 applicable to the support of the militia, comprising net rent income and interest on proceeds of sales since 1857 inclusive, and on the value of land assumed by the province for reformatories, &c., as estimated by the Ordnance Land Agent, amounts to $50,175 25.

The lands at Amherstburg, Pelham Farm, Prescott, Cornwall, Cape Vesey, and 250 acres on the Rideau, were brought into the market, and 1,601 acres were sold and leased for $51,850 05. This sum represents the aggregate value of the sales and leases capitalised. The values of the lands sold are payable in ten annual instalments, with interest at 6 per cent. In all cases one instalment was paid at the time of sale.

When the Ordnance lands were transferred to the province in 1856, the annual income from all the above last mentioned properties was only $280; the amount is now $3,106 83.

The Ordnance lands have been assiduously turned to account where favorable opportunities have offered, and the same course will be followed for the future.

The surveys of lands, with a view to their allotment and occupation, are being pushed forward with vigor. During the last year the principal lands surveyed were in the Ottawa and Huron territory, in rear of the counties of Victoria, Peterborough, Hastings, and Frontenac; and on the north shores of Lakes Huron and Superior, and in rear of the Sault Ste. Marie. In Lower Canada, the whole extent which has been sub-divided into farm lots amounts to 328,639 acres, and no less than fourteen counties partake of the area thus surveyed in Lower Canada—from the Gulf shore of the St. Lawrence, at Cape Rosier, to the Ottawa, county of Pontiac.

Railroads in Northern Mexico.

By letters from the United States we are advised that the Hon. Duff Green is to make a visit to Mexico very soon in connection with the railroad across Mexico, from the Rio Bravo to Mazatlan.

In connection with the railroad from the American frontier to the port of Guaymas we find the following in a late letter from Sonora:

The Legislature of the State is in session at Ures, deliberating upon matters of grave importance. General D. Angel Trias' railroad project to unite El Paso with Guaymas is the principal measure to be discussed and acted upon by that body. It has already received the legislative sanction of the State of Chihuahua, and it is now generally believed that it will receive the cordial support of Sonora as soon as it is understood that Governor Pesqueira favors the adoption of the scheme. It is said that two of the wealthy and enterprising

citizens of the Eastern States, George Law and Col. Samuel Colt, besides many others, are concerned in the enterprise. The route of the railway is some 600 or 700 miles in length through a generally level country, full of mineral wealth, and abounding in fine agricultural and grazing lands. The route is entirely practicable, and it is believed $20,000,000 is amply sufficient to construct the road.—*Mexican Extraordinary.*

Society Library.

The annual meeting of the shareholders of this institution was held Tuesday evening, 28th ult., at the Library, No. 67 University-place. In the absence of Hon. G. C. VERPANCK, Chairman, OTIS D. SWAN, Esq., Treasurer, called the meeting to order. HENRY R. WINTHROP, Esq., was elected Chairman of the meeting, and ISAAC LAWRENCE, Esq., Secretary. The Secretary read the annual report of the Trustees, from which it appears that the institution is in an unusually prosperous condition, there being a balance in treasury of $531 52, while the corporation is entirely free from debt, and owns property worth at least $100,000. The number of volumes added to the Library during the year ending April 1, 1861, was 1,611. The following gentlemen were unanimously elected Trustees for the ensuing year: Gulian C. Verplanck, Charles R. Swords, Geo. Folsom, Robert Lenox Kennedy, Charles E. Strong, Wm. J. Hoppin, Otis D. Swan, Wm. Adams, John Romeyn Brodhead, Henry C. Dorr, Evart A. Duyckinck, Stacy B. Collins, Wm. McMurray, Wm. Allen Butler, Thos. Ward.

Great Western, Ca., Railway.

The important announcement is made that the Great Western Railway directors have in contemplation the construction of a branch, in the shape of a tramroad, from Wyoming station to the oil springs of Enniskillen. This probably supplies the best practical evidence that the springs are already productive; for it could be no common inducement which would bring the board to such a determination in times like these.—*London Prototype.*

Steam Fire Engines.

Two of the Oakland Company's, (Portland, Maine,) Steam Fire Engines were exhibited in this city, Friday. They were second and third class machines. The largest one weighs 4,000 lbs., the smallest 3,000 lbs. These engines work with the horizontal piston, and the pumps have no valves. Mr. J. B. JOHNSON, is the Patentee of this Engine, and he was present here yesterday.

The larger machine was tried first. It commenced working in 7 minutes after its fire was lighted. It threw 1⅛ inch stream to the top of the liberty pole on the State House, making a height of 200 feet. Through 50 feet of hose with 1¼ nozzle, it threw a horizontal stream 190 feet; and from the hydrant, 100 feet of hose, it threw a stream 180 feet.

The machine was then tested through 550 feet of hose, one inch nozzle, upon the Centre Church steeple. It threw a stream 170 feet in height, when the hose burst.

During these trials, the pressure upon the boiler was from 40 to 70 lbs. to the square inch, and upon the hose from 100 to 195 lbs. to the square inch.

The third class machine—handy, and easily managed, was fired up in 7½ minutes. From 100 feet hose ⅞ pipe, it threw a horizontal stream 192 feet; same length hose, one inch pipe, 198 feet. This machine also threw an inch stream over the flag staff on Robinson's marble block.

The Manchester machine, the day previous, threw a horizontal stream, 168 feet, with 50 feet of hose. And a perpendicular stream, 105 feet, with 550 feet of hose, 1¼ nozzle, when the hose burst.

At a recent trial in Portland, one of Mr. Johnson's first class machines, was tested through 1,200 feet of hose, and threw a stream 165 feet, with 56 lbs. of steam.—*Hartford Times, May 4th.*

Chesapeake and Ohio Canal.

At a meeting of the Commissioners of Public Works of Maryland, held at the office of the Chesapeake and Ohio Canal Company, in Washington, D. C., on the 2nd inst., the following named persons were elected President and Directors:

President—Col. Alfred Spates, Alleghany county. Directors—Edward M. Mealey, Enoch B. Hutton, Victor Holmes, John Jamison, Robert R. Vandever, J. J. Heckart.

Scinde (India) Railroad.

In the half-yearly report of the 25th September, it was stated that all the permanent way material, rolling stock and machinery, necessary for the line had been shipped for Kurrachee, with the exception of iron girders, for harbor viaduct—that the works were proceeding in a highly satisfactory manner, and were in a forward state—that locomotives were running in several districts—that more than one hundred carriages and wagons were ready for use—that the trade of the port had greatly increased in amount and value—that the shares had been converted into stock—and that the amount of the first issue of debentures had been paid to the credit of the Secretary of State for India in Council. All the materials and appliances necessary for the construction and working of the line have now arrived at Kurrachee. The cuttings and embankments are in such a state of forwardness that they may probably be already completed throughout the entire length between Kurrachee and Kotree, leaving to be finished only the side trenches, catch water drains, and slope trimming, the progress of which will not interfere with the traffic of the line. On the 26th of January the permanent way was laid over the Bahrun viaduct, and an engine with a train of materials passed over it. This viaduct consists of 30 arches. It is built of hard white durable stone found on the spot, and which has a very handsome appearance when dressed. The Bahrun is 1,782 feet long, and with the exception of the Mulleer, the longest viaduct on the line. The Chief Resident Engineer says that "The amount of work executed at this viaduct during the last four months is worthy of record; an arch of 45 feet clear span having been turned every fourth day during that period." In the month of October, 1859, several hundred persons were conveyed by the railway to witness the ceremony of laying, by the Commissioner in Scinde, the foundation-stone of the Mulleer viaduct, the most extensive engineering work on the line. This viaduct is composed of Warren's patent iron girders, of 80 feet span, resting on stone piers, and is 1,860 feet in length. The completion of this important work has been delayed by the difficulty experienced in the foundations, which have, however, been entirely overcome. The smaller viaducts, bridges, and culverts are all reported either as finished, or so rapidly approaching completion, that it is expected that the permanent way will have been laid over every one of them throughout the line by the middle of the present month, with the exception of one culvert, which will be passed as at present, by a temporary embankment, without any inconvenience, and the stone for finishing this culvert, which although not of much height, is of considerable length, will be brought along the opened line. The agent of the company in Scinde, in a letter to the Chairman, dated Kurrachee, 7th February, 1861, has the following:—"Upon my return from Moultan, last month, I came along the line from Kotree, and it is gratifying to be able to report the nearly complete state of the line, and the substantial appearance of all the works. On the 20th of last month the roadway was opened for use over the Bahrun viaduct. This viaduct is a very striking object, and is as fine a piece of masonry as can be seen in any part of the world. It has all been done by contracts with natives, chiefly Cutchees." The ballasting of the line is all but completed, and is of excellent quality, and the outlay for maintenance promises to be exceedingly moderate. The laying of the permanent way was impeded for a short time by the deficiency in the supply of sleepers, occasioned by the unusual dryness of the season, which prevented the contractor floating the timber down the upper rivers of the Punjaub. Great exertions, however, have been made, and there is every reason to believe that the whole line will be laid down and ready for opening in the early part of this month. The fencing along the whole course of the line was, according to the last advices, about being completed. Telegraphic communication has been established for several months between Kurrachee and Kotree, and the intermediate stations of the railway. The locomotive repairing shops are completed, and the smiths' shops and the foundry have been at work for nearly five months. Engines, carriages, and trucks are ready in sufficient numbers for the expected opening this month. Although the terminal and other stations will not be finished for the opening of the line, sufficient temporary accommodation will be afforded for both passengers and goods. Mr. Brunton, the Chief Resident Engineer, states that he has fixed "the 15th of March next as the day when all the works are to be in such a state of completion as to allow of the line being opened for traffic. Every exertion is being made to achieve this." "The Indus steam ferry boat was erected at Keamaree, and successfully towed round to Kotree by the 'Stanley' steamer. Her draught, with machinery on board, is 9 inches. On the 12th and 18th inst. (January), with the assistance of Tug A, of the Indus Steam Flotilla, the chains were successfully laid across the river and moored. The ferry boat will be at work in the course of two or three days," and, it is confidently believed, will prove "one of the most signal public improvements that have been introduced into the country." The harbor improvement works, so important to the railway, are being energetically carried out by Government. The external and internal trade of Scinde continues to increase in the most satisfactory manner. The attention of the Proprietors is particularly requested to the annexed excellent report by Mr. J. Neville Warren, on the position and prospects of the railway. Much credit is due to the officers and servants of the company in Scinde, for their steadfast and untiring exertions to bring the important work entrusted to them to an early and satisfactory completion, and, if possible, to throw open the line for public traffic in the short space of three

years from the date on which the first sod was turned by the chief Government authority in Scinde. Since the last report a further sum of £83,000, raised by debentures, has been paid to the credit of the Secretary of State for India in Council, making, with £250,000 previously raised, in all £333,000, being to the extent of the present borrowing powers of the company for the purposes of the Scinde railway. A statement of receipts and disbursements for the past year is appended, which, with the books of the undertaking, have been examined by the auditors and also by the Accountant-General of the Secretary of State for India in Council. The accounts in England are made up to the 31st December, 1860, and in India to the 30th September of the same year. The financial statement shows that from the commencement the sum of £1,329,000 has been received, and that the sum of £1,164,000 has been expended, leaving an available balance of £160,000 to the credit of the undertaking with the Secretary of State for India in Council and with Government in India.

Pacific Railway.

The people of this province may yet look forward to the time when this country shall be the great highway, not only for the imports and exports of the west, but of the Pacific, of Japan, of China, of Australia, and of the numerous islands of the Pacific. We have always contended—First, that the only feasible route for a railway across this continent was through British America, because here we have a level and fertile territory to the Rocky Mountains, with light snows, good ports upon both coasts, abundance of coal just where it is wanted, near Halifax and Vancouver, and on the Saskatchewan. Now the discovery of passes in the Rocky Mountains, 2,000 feet lower than any through the United States, puts the feasibility beyond a doubt. Secondly, through United States territory there exists a desert 1,000 (Horace Greely says 1,500) miles; parallel with this we have a good wheat country, and can line the railway with a continuous settlement to the Pacific. Third, the distances are shorter from Britain to Japan and China through British America. We said fifteen years ago that the present generation would see the accomplishment of this great scheme, and have often advocated it since and been laughed at for our pains. The Queen calls the attention of Parliament to it, and who would venture to predict the effects of such a railway upon the trade of this country, upon the Grand Trunk, upon the St. Lawrence, upon the settlement of the North-West, &c.? From 20,000,000*l.* to 30,000,000*l.* sterling, or from one hundred to one hundred and fifty millions of dollars, would be expended upon it, and such works must be pushed on with dispatch. Britain's interests in the Pacific and in Asia imperatively demand such a road.—*Hamilton Spectator.*

Railroad Earnings.

The traffic receipts of the Northern Railway of Canada, for the week ending April 13th, were $8,953 38, an increase of $1,940 52 over the corresponding week of last year.

The receipts of the Grand Trunk Railway of Canada for the week ending April 20th, 1861, were.....$77,646 13
Corresponding week, 1860..... 70,244 89

Increase.....$7,401 24
Tot. traffic from July 1, 1860, to date,$2,810,487 36
Corresponding period, 1859 ..... 2,329,381 90

Increase.....$481,105 46

The report of the Receiver of the Cincinnati, Wilmington and Zanesville Railroad, for March, is as follows:

Corresponding month, 1860.....	50,357 06
Increase.....	$10,987 04

Street Tramways.

On Saturday, the 23rd instant, Mr. Train opened his first line of street or road tramway for public traffic. The line extends for about a mile in length from the Marble Arch towards Notting-hill. The tramway is about the width of a narrow gauge line, having plates of five inches wide to run on a flat ledge about two inches wide on the outside portion of the plates is raised half-an-inch from the port on which the wheels run forming the flange which keeps the carriage on the line. The carriages are spacious, handsome, and convenient, capable of accommodating 20 persons inside sitting and 12 standing. They are about 14 feet long by 6 feet wide in the clear. Two horses draw each carriage which it appears was well filled every trip, the novelty having attracted a large number of persons to the locality. The traveling is very pleasant while the carriages are enabled to keep on the track, but it sometimes happens that the carriage gets off the line and then there is some difficulty to get it on again. The flange of the tramway should probably have an inch rise instead of half-an-inch. It is very doubtful whether this contrivance will be of much use in the crowded thoroughfares of London, although it might be very useful and agreeable to travelers on roads in the suburban districts. It appears that efforts will be made to get permission to run a line into the City through Cheapside and Cornhill, and another by way of Moorgate and the City-road. Also a line from Westminster, along Fleet-street by St. Pauls, to Cannon street.

The event was celebrated at St. James's Hall, by a grand dinner to which 400 guests were invited and at which Mr. Train presided, supported by many friends on his right and left. The proceedings were of an interesting character throughout, many gentlemen connected with railways were

present, and several literary gentlemen favored the assembly with speeches on various topics. Mr. Train exerted himself manfully to animate the entertainment, and every one seemed pleased with him.—*Herapath, March* 30.

Journal of Railroad Law.

POWER OF THE GOVERNOR TO APPROVE BILLS AFTER THE ADJOURNMENT OF THE LEGISLATURE; GENERAL AND SPECIAL ACTS RELATIVE TO THE FORMATION OF CORPORATIONS.

We have heretofore reported in the Journal the case of the People *vs.* Bowen *et al.* in which it was held by the General Term of the New York Supreme Court that the Governor had no power to sign any bills after the adjournment of the Legislature. The question is one of vital importance involving immense interests, and would, if this decision had been sustained, have rendered invalid many acts and laws whose validity has never been doubted. We, therefore, now give the decision of the Court of Appeals to which the case has been carried, reversing the decision of the General Term, and holding that the Governor has power to sign bills after the adjournment of the Legislature.

The action was brought against the defendants for assuming to, and acting as a corporation, without authority of law. The complaint alleged that the defendants claimed to exercise the franchise under the "act to incorporate the Metropolitan Gas Light Company of the City of New York." It averred that the act never was a law, because the bill was signed after the adjournment of the Legislature. The following is the decision of the Court of Appeals.

DENIO, J.—The provision of the constitution under consideration seems to me naturally to refer to two classes of cases, namely, to bills in respect to which the two houses of the Legislature and the Governor shall agree in sentiment; and, secondly, to those in which they shall differ. In respect to the former class, the provision is extremely brief. After declaring that "every bill which shall have passed the Senate and Assembly shall, before it becomes a law, be presented to the Governor," it adds, "if he approves, he shall sign it;" and this is all which is said respecting bills where there shall be a concurrence on the part of the Governor with the houses. The remainder of the section is devoted exclusively to the consideration of cases in which the Governor shall not approve of bills which have been presented to him on the part of the houses; and the subject of those, in respect to which there has been no difference of opinion, is not again adverted to.

Specific directions are given for the purpose of bringing about a reconsideration, by the Senate and Assembly, of bills to which the Governor shall have objected; and a new scrutiny is required to be had under which such bills are to become laws, notwithstanding the Governor's objections, provided two-thirds of all the members present in such house shall so determine. The case was then to be provided for where the Governor should neglect or refuse to act upon a bill. Such neglect is not to be permitted to thwart the bill of the Legislature, and the remainder of the section is occupied with a provision to meet that case. It is as follows: "If any bill shall not be returned by the Governor in ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Legislature by their adjournment, prevent its return, in which case it shall not be a law." It is plain that this relates exclusively to bills which the Governor has neglected to approve and sign. It is such bills, and not those which he approved and signed, which are not to become laws on account of a prematnre adjournment of the Legislature. The provision does not qualify the mandate contained in the earlier part of the section, by which it is enjoined upon the Governor, that if he approves of a bill, he shall sign it. I am, therefore, of opinion that there is nothing in the language of the constitution, forbidding the approving and signing of a bill, by the Governor after the session of the Legislature shall have terminated by an adjournment. If he cannot legally do so, it is on account of some implication arising out of the nature of the subject or of the act to be performed, or the general arrangements of the constitution.

The leading idea of the Constitution is, that a concurrence of the legislative and executive branches shall always be sufficient to enact a statute, and that, in certain cases, the two houses alone shall be sufficient; but this is only where the objection of the executive branch shall have been considered and overruled by an extraordinary majority in the houses, and again where the Governor neglects his duty by withholding his opinion.

It is argued that, upon the construction which I have suggested, no time whatever is fixed within which bills are, in such cases, to be signed, and that if it can be done after adjournment, it may be done at any indefinite period thereafter; and that the inconvenience would rise, that it might remain a long time uncertain whether a measure which has received the assent of both branches of the Legislature, should eventually be a law or not. This consequence will certainly follow, unless there is an implication arising out of the fixing of a period of ten days for the consideration of bills presented to the Governor while the Legislature remain in actual session. It is plain that the authors of the Constitution considered that period sufficiently long for the performance of that duty; and I think he would not be justified in acting upon a bill after his ten days had elapsed, whether the session continued or not. But, if this were otherwise, it would not afford a reason for adding to the constitution by a judicial determination, a qualification of the power of the Governor to approve bills which is not contained in the instrument. The Constitution does not often describe detailed provisions for the regulation of the departments of the Government. A general power is usually conferred, and it is then left to the Legislature to provide by law as to the time and manner of its performance. But if we concede that the limitation of ten days does not apply, and cannot be fixed by law, I am of opinion that the concession would not authorize a determination against the existence of the right to approve bills after the adjournment. It would plainly be the duty of the Governor to act upon such bills as had been left in his hands on the adjournment, at the earliest practicable time thereafter.

The nature of the duty, and the inconveniences of delay, would sufficiently inculcate the obligation of diligence in that respect. The Governor, it is true, may by neglecting his duty, betray the trust committed to him; and so, in a variety of ways, he may, by official dereliction, endanger the very existence of the Government.

It has been urged, by the counsel for the people, that the power vested in the Governor is not to be looked upon in the light of a participation on his part in the law-making power, but rather as an authority of an executive character, to require, under certain circumstances, a reconsideration by the Legislature, of measures already adopted by it, and a larger proportion of concurring voices to be given in order to confirm what has been done. This being taken to be the nature of the power, it is further urged that it cannot be applied to bills left in the Governor's hands at the period of adjournment, although the ten days allowed for consideration had not expired; because, as it would then be impossible for him to require a reconsideration, and as that is the only function, according to the argument, confided to him, it having become incapable of performance in respect to such bills, he has no duty to perform concerning them. In confirmation of this view, the first section of the third article is referred to, which purports to vest the legislative power of the State in the Senate and Assembly; whence it is argued that no portion of such power can reside elsewhere. The question as to the nature of the Governor's agency raises, I think, rather a dispute about terms, than one concerning the substance of things. Whatever the authority, touching the enactment of laws, with which the Governor is clothed, shall be called, it is of the same general nature with that which is exercised by the members of the two houses. He is to consider as to the constitutionality, justice and public expediency of such legislative measures as shall have been agreed upon by the two houses, by the ordinary majorities, and be presented to him; and he is to accord or withhold his approbation, according to the result of his deliberation. This is plainly the function of a Legislature. The sovereign of England, who is charged with the same duty in respect to acts of Parliament, is considered to be a constituent part of the Supreme legislative power. It is true that his determination to disapprove a bill deprives it of any effect: while one disallowed by the Governor may yet be established by an extra-concurrence of votes in the houses. Thus, though the action of the executive is less potential here than in England, the quality of the act, namely, deliberating and determining upon the propriety of laws purposed to be enacted, is precisely the same. Besides making his determination, the Governor is required, in case it is unfavorable to the law, to submit his objections to the Legislature, which is to examine them, and again pass upon them in the light of the discussion which they have thus undergone. To my mind, it is clear that this involved a participation on the part of Governor, with the two houses of the Legislature, in the enactment of laws. It would not be correct language to say, that he forms a branch of the Legislature, for the Constitution has limited that designation to the Senate and Assembly; but it would be equally incorrect to affirm, that the sanction which he is required to give to or withhold from bills before they can become operative,

does not render him a participator in the function of making laws. I am, therefore, of opinion that it is not a just construction of the power entrusted to the Governor to consider as merely an authority to require a further consideration of bills which he shall disapprove. In one respect, the effect of the Governor's determination is different when the Legislature is in session and when it is not. In the latter case, if he approves, the concurrence of the whole law-making power is secured precisely as though the Legislature was in session. The bill has received the concurrence of all the functionaries which the Constitution requires should unite in enacting a perfect law. He cannot state objections, for there is no public body in existence to whom they can be submitted. If he neglects to act, which he will, of course do if the bill is disapproved of by him, it falls to the ground by the express provisions of the Constitution; for the grounds of his disapproval cannot be passed upon by the Legislature. But if the proposed law meets with his approval, there is no reason why the public will, expressed by all the official bodies and persons with whom the Constitution has entrusted the province of making laws, should fail of effect. It has been agreed, that, as the Governor cannot, in the recess of the Legislature, compel the reconsideration of bills to which he is unwilling to yield his consent, he might be induced to approve those which are, in some respects, objectionable, but which contain other provisions, important to the public welfare. This argument is not without force: but I think it should be assumed that he would never interpose a veto to a bill which he did not conscientiously believe ought not to become a law, and that he would never approve one to which such objections, in his opinion, existed. Should a bill of the character suggested be left in his hands at the adjournment, the remedy for the public inconvenience, which might be occasioned by the failure to enact the sound parts, would be found in the power to again call the Legislature together which is vested in him for this and the like occasions.

Some other reasons of less cogency than those which have been mentioned, were urged on the argument. They have received the attentive consideration of the judges; but we are of opinion upon the whole case, that the act under consideration is not void on account of its having received the executive approval after the Legislature had adjourned.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, May 1, 1861.

THE ANNUAL MEETING of the Shareholders of the ILLINOIS CENTRAL RAILROAD COMPANY, for the election of Directors and the transaction of any other business, will be held at the office of the Company, in the City of Chicago, on WEDNESDAY, May 29, 1861, at 10½ o'clock a. m.

The Transfer Books will be closed on the 21st of May, and re-opened on the 1st of June.

W. M. PHILLIPS, Secretary.

WILLIAM H. BERRYMAN,
Commission Iron Merchant,
No. 38 HARRISON STREET,
And 335, 337 & 339 Washington St.,
NEW YORK.
DEALER IN BOILER PLATE AND RIVETS.
TANK, ANGLE AND BAR IRON,
SMOKE PIPE, BOILER TUBES, ETC.

NIAGARA STEAM FORGE,
COR. PERRY ST. AND OHIO BASIN SLIP.
T. D. PATCHIN, Lessee,
CHAS. D. DELANEY, Sup't. } Buffalo, N.Y.
MANUFACTURE to order all kinds of Light and Heavy Forgings and Hammered Shapes, such as
Car Axles, Crank Axles,
TRUCK AND DRIVING AXLES,
Steamboat and Propeller Shafts and Cranks,
MILL SHAFTS, LOCOMOTIVE FRAMES, CONNECTING RODS, PISTON RODS, CRANK PINS,
Wrought Shafting of any Length and Size, etc., etc.
Also, Every Description of HEAVY BLACKSMITHING.
Orders or inquiry by mail, will receive prompt attention.

28 Platt St., New York.

LACKAWANNA
IRON AND COAL COMPANY,
SCRANTON, LUZERNE CO., PA.
BY the completion of the DELAWARE, LACKAWANNA AND WESTERN RAILROAD, this Company are enabled to obtain the MAGNETIC ORES from the most celebrated mines in New Jersey, which used in combination with their native ores, produce a **quality of iron not surpassed.**
These Works have been greatly enlarged the past year, and are, therefore, prepared to execute orders promptly for **RAILROAD IRON** of any pattern and weight, **Car Axles, Spikes,** and **Merchant Iron.** They have on hand patterns for **T Rails,** of the following weights per lineal yard, viz —**25, 30, 36, 40, 45, 50, 60, 62,** and **75** lbs.
Samples of RAILS and MERCHANT IRON may be seen at the office of the Company, **46 Exchange Place,** N. York.
Address **J. H. SCRANTON,** President, **Scranton, Pa.**
or **DAVID S. DODGE,** Treasurer, **46 Exchange Place, NEW YORK.**

RAILROAD IRON.
THE undersigned, agents for the manufacturers, are prepared to make **CONTRACTS FOR RAILS** delivered free on board at ports in England, or exship at ports in the United States
M. K. JESUP & COMP'Y,
44 Exchange Place.
New York, 1st June, 1859.

RAILROAD IRON.
THE subscriber is prepared to sell AMERICAN and ENGLISH **RAILROAD IRON, CHAIRS, SPIKES, CARS** and **LOCOMOTIVES,** at the lowest market price, and securities taken in part payment.
B. F. FRENCH,
Cor. Nassau and Cedar Sts., N. Y.

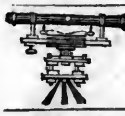
Sale every day at 1 o'clock. See Catalogue.

VENTILATION.
THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.
Address HENRY RUTTAN,
Coburg, Canada.



LOCOMOTIVES FOR SALE.
THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.
They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.
The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.
WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, May 18, 1861.

Pittsburg, Fort Wayne and Chicago R. R.

We have received the report of this company for the fiscal year ending December 31, 1860, from which we learn that the earnings during that time were:

From local freights	$464,391 84
" through "	845,322 95
" express "	31 300 00
" local passengers	203,938 46
" through "	231,501 26
" mails	93,900 00
" rent of road	83,809 33
" rents	7,376 78
" miscellaneous sources	3,766 89
	$2,335,353 83

And the expenses were:

Conducting transportation	$332,508 67	
Motive power	533,349 05	
Maintenance of way	510,579 34	
" cars	150,720 23	
General expenses	46,641 58	
		1,573,798 87
Leaving as net earnings		$761,554 96

—being 33⅓ per cent. of the gross earnings.

Compared with the previous year, the gross earnings show an increase of $369,366 03
with an increase in expenses of 282,465 92

Making the increase in net earnings .. $86,900 11

The gross earning per mile of road were $5,000 76, and the earnings per mile run by trains were $1 29.3. The net earnings show an advance of $186 08 per mile of road, and 2.3 cents per mile run by trains.

Comparing the different classes of earnings with those of 1859, we find that the revenue from local freights has increased $48,932 12; from through freights, $296,649 94; from local passengers, $13,932 59; from rent of road, $17,809 33; from rents, $3,544 52; and from miscellaneous sources, $582 57—while a decrease of $7,897 92 is shown in the earnings from express freight, and $4,186 12 from through passengers.

The expenses of operating, etc., show an increase of 23.4 per cent. The expenses per mile of road were $3,370 02; and per mile run by trains, 87 cents—showing an increase in the first item of $604 85; and in the latter of 10 cents.

The increase in the several departments of expense has been as follows: in conducting transportation $47,618 49, or 16.7 per cent.; in motive power, $72,583 94, or 17.7 per cent.; in maintenance of way $159,180 58, or 53.8 per cent.; in maintenance of cars, $13,837 51, or 10.1 per cent. A decrease of $10,754 60 is at the same time shown in general expenses, equivalent to 18.2 per cent.

Tables are given showing the local and through tonnage, the mileage of, and revenue derived from the same; also the number of local and through passengers carried, the mileage of, and revenue derived from the same, compared with the previous year. From these we learn that there were transported over the road during the year 465,204 tons of freight, (of which 214,885 tons were local, and 250,319 through), the mileage of which was 78,223,319—being an increase of 102,598 tons, or 28.4 per cent., in the amount transported; and 19,802,114 tons, or 33.9 per cent., in the number carried one mile, and 35.8 per cent. in the revenue received.

The increase in the local tonnage has been 14.9 per cent., and in the through tonnage, 42.6 per cent.; in the revenue from local tonnage, 11.8 per cent., and from through tonnage, 50.4 per cent.

During the year 436,664 passengers were carried over the road, (of which 364,602 were local, and 72,062 through) the number carried one mile being 30,434,289—showing an increase of 23,347, or 5.6 per cent. in the number carried; and of 1.2 per cent. in the revenue received from them, while there is a decrease of 670,153, or 2.1 per cent. in the number carried one mile. The increase in local passengers has been 8.7 per cent.; in the number carried one mile, 5.4 per cent, and in the revenue received 3.3 per cent.; while a decrease is shown in the through passengers of 7.3 per cent., in the number carried one mile, 8.3 per cent., and in the revenue received, 1.1 per cent.

Tables are also given exhibiting the number of miles averaged in the transportation of local and through freight, and the average revenue per ton, and per ton per mile for each class; also the same species of information in regard to the passenger business. The most important fact exhibited by these tables is the excessively low rates obtained by this company on its legitimate local business, differing but little from the rates obtained on through tonnage, in which an eager and incessant competition is being exercised by rival lines. Another noticeable feature is, that the result of each year's business since the organization of the company has shown that the rates on local tonnage have regularly diminished, so that at the present time they are barely remunerative. In 1857, they averaged 2.8 cents per ton per mile; in 1858, 2.2 cents; in 1859, 1.8 cent; and in 1860, 1.7 cent per ton per mile.

The income account for the year ending December 31, 1860, is as follows:

	Cr.
Earnings, as above	$2,335,353 88
Balance December 31, 1859	266,879 61
Do., December 31, 1860, being deficit of earnings the past year	43,033 55
	$2,645,266 99
	Dr.
Expenses, as above	$1,573,798 87
One year's interest on bonds	629,291 25
Interest on floating debt	43,409 17
Discount on currency	6,337 60
Taxes	59.009 17
Drawbacks and overcharges	32,295 88
Expenses of receivership and sequestration	34,245 44
Balance December 31, 1859	266,879 61
	$2,645,266 69

In the report of this company for 1859, the total deficiency at the close of that year was stated at $236,510 04; but returns and settlements subsequently made have increased it to $266,879 61—being a difference of $30,269 57; which is composed mainly of interest accrued prior to January 1, 1860, on bonds issued since that date in settlement of claims against the company.

A comparison of the annexed exhibit of the financial condition of the company with that of the preceding year, shows an increase of $885,697 58 in its capital and liabilities, viz: capital stock, $89 20; funded debt, $1,016,985; bills payable of receiver (this item not existing in 1859) $32,912 13; current expenditures for account of construction and transportation, $17,418 40—less an apparent decrease of $181,676 15 in the floating debt, and $31 of scrip, convertible into construction bonds at par. The reduction in the floating debt does not exhibit as important results as have actually been accomplished, in consequence of the addition to this class of liabilities of almost one year's interest on the outstanding bonds of the Company. There has been retired during the year $3,000 of notes of the Fort Wayne and Chicago Railroad Company; $270,270 21 of the acceptances of this company; $3,786 15 of the warrants or scrip issued in 1857, for labor and materials; $22,101 05 of liabilities incurred in the construction of the road; $437,114 99 of the debt to the Pennsylvania Railroad Company for iron, etc., used in the extension of the road west of Plymouth; $6,162 87 of liabilities incurred in the operation of the road prior to the receivership, and $76,777 88 in other accounts—the whole amounting to $819,213 15; and the deduction of $635,537 of coupons for interest matured and unpaid on the bonds of the company, together with $2,000, the amount of a bond and mortgage of the Ohio and Pennsylvania Railroad Company, erroneously credited back to that company in 1859, will give the above apparent net reduction of the floating debt. The amount of this debt is stated at $1,727,161 52, but virtually it is $2,382,051 52—the addition being composed of $654,890 still outstanding of the so-called sinking fund bonds, issued in 1858 in exchange for 18 months interest on certain bonds of the original companies, and which, in consequence of the interest on them not having been paid during the past year, revert, according to the deed of trust under which they were issued, to their original state.

The increase in debts of the original companies assumed by this company is $15,884 06; in expenditures on account of permanent way, station grounds, equipment, etc., $553,406 05; in discount on bonds, $274,039 55; in unapplied materials $58,243 74; in cash, $71,979 19; and in balance to debit of income account, $73,403 12—making a total of $1,046,955 71. Less decrease in cost of real estate, $130,018 27; in available assets, $28,954 74; and in doubtful and bad assets, $2,285 12—a total decrease of $161,258 13; making the net increase in property and assets, $885,697 58.

The construction expenditures during the year were $49,816 99 on the eastern division, extending from Pittsburg to Crestline, a distance of 188 miles, and $503,589 06 on the western division, 249 miles. The large expenditures on the western division is chiefly the result of the purchase of valuable and extensive depot grounds in Chicago, and the expense attendant upon the extension of the track thereto; the graduation of three street approaches, and the construction of the same number of bridges over the tracks in that city; an increase in the equipment; a large amount of fencing; additions to the machine shops and machinery therein; the settlement of several heretofore unadjusted claims for right of way, and payments made to secure the necessary right of way in Chicago, and the erection of new station houses at Fort Wayne, Plymouth and Hanna, together with additions to the fixtures and appurtenances of those previously built. Almost the entire amount of the increase in the discount on bonds is caused by the large number of construction bonds issued during the year. This increase is composed of $731 25 on the Bridge bonds of the Ohio and Pennsylvania Railroad Company; $271,808 27 on the Construction bonds; and $1,487 23 on the real estate bonds of the company.

The reduction of the floating debt for the year has been $819,213 15; and at the close of the year it was (exclusive of over-due coupons) $814,484 02. At the date of the report, March 28, 1861, a still further reduction had been made, leaving it at that time about $750,000.

In reference to the re-organization of the company, the President says:

During the past year, the several committees entrusted with the duty of maturing a plan of re-organization, have perfected the same, and so far as heard, it seems to be very generally acceptable to all the parties in interest. To carry into effect the plan agreed upon, it was very important that appropriate legislation should be had in all the States through which the road passed. The necessary legislation was had in Pennsylvania just after the close of your annual meeting in March last. In Illinois and Indiana the legislation asked for has just been had. A bill is now before the Legislature of Ohio, (having passed the Senate,) and we have reasonable assurance it will become a law before the close of the present session.* So soon as the necessary legislation is had, it is expected that the committee having the matter in charge, will press forward the re-organization, so that the property may be got out of the courts by midsummer,

The complication in the management of the business of the road, by reason of a conflict of jurisdiction between the United States Circuit Court for the Northern District of Ohio, and the District Court of Alleghany County, Pennsylvania, each of which Courts had appointed officers to take charge of the road, was happily terminated early in May last, by the District Court of Alleghany County discharging its sequestrator, and thus putting the entire property in charge of the Receiver. The legal conflict and attendant troubles, doubtless materially diminished the earnings during the first three months of the year and increased the expenses in the subsequent months, by reason of the unavoidable neglect of the road, growing out of the peculiar surroundings of the case.

During the year there was placed in the track 301,741 new cross ties, 42,000 new chairs, 4,000 kegs of spikes, 1,000 tons of repaired rails, 3,800 tons re-rolled rails, and 1,300 tons of new rails, at an aggregate cost for materials alone of $250,000, which is equivalent to the building of sixty miles of new track. Three new station-houses have been erected. One at Fort Wayne, another at Bucyrus, and the third at Valparaiso. At Fort Wayne, a very substantial brick building with tin roof was erected, at a cost of $12,000. The building at Bucyrus is a neat frame, erected at a cost of $1,500, and is designed for both passengers and freight. The station house at Valparaiso was contracted for in 1859, but built during the year, at a cost of $1,000.

The smith, carpenter and machine shops at Alleghany City have been enlarged by adding a story to each of the two last, and extending the former in length, covering all with galvanized iron roofs, at a total cost of $4,000. Substantial car shops have been erected at Fort Wayne, at a cost of $7,000; $2,500 has also been expended for tools. The report says:

The board has purchased in Chicago for a passenger station, two entire blocks of ground, fronting 852 feet on the Chicago river, and otherwise bounded by Madison, Canal and Adams streets, at a cost of $333,000, payable on the 1st day of May, 1865, interest at six per centum per annum, payable semi-annually.

The United States Circuit Court directed the Receiver to pay the interest on the purchase money due in November, 1860, and May, 1861. This plot of ground (852 by 255 feet) is sufficient to furnish passenger accommodations for all the railroads running north and west from Chicago; and it is believed most of them will sooner or later avail themselves of so eligible a location in the very centre of the population of the City, to unite in forming a Union Passenger Depot on these grounds. At the present time, the Chicago, Alton and St. Louis Road is the only one occupying these grounds in common with our road.

In the month of December, the track of your road was extended not only to these grounds, but, in conjunction with the North-western Railroad Company, was carried north through the city to the station of that company, and also to connect with the tracks of the Chicago and Milwaukee and the Galena and Chicago Union Railroads. This extension connects the track of your road with the track of every road running north and west from Chicago, and has been the cause of bringing to the road, ever since, a large trade not hitherto enjoyed. The advantages, in the future, of this connection to the freight, as well as the passenger traffic of the road, cannot well be now estimated, but must be very great. As yet, only very cheap passenger accommodations have been provided, but permanent buildings should this year be commenced.

The business of the road during the past year, and thus far in the present, is sufficient to reassure you that there is a value in your property somewhat commensurate with its cost. As the country along the line of the road, and especially west of Crestline, becomes developed—as it soon must—the local traffic will very largely increase, and eventually equal the "through" traffic; the latter being now nearly double the former as regards freight. Up to the first of this year, our advantages as a through line between Chicago and the Atlantic cities were hardly recognized by our competitors; but another year will, we think, give us a position equal to any of the through lines—from which corresponding benefits must flow, and will be exhibited in increased business and earnings.

The mileage of engines during the year, compared with the preceding year was as follows:

	Eastern Div.	Western Div.	Total.
1860	1,067,422	881,079	1,948,501
1859	956,855	902,176	1,859,031
Increase...	110,567	.....	89,470
Decrease ..	.....	21,097	.....

* The Law of Ohio was published in the *Journal* of April 20th. That of Indiana will be found in the present issue. And those of Illinois and Pennsylvania will be given in the next and succeeding numbers.

The following statement exhibits the condition of the company at the close of the fiscal year, December 31, 1860:

Pittsburg, Fort Wayne and Chicago R. R.

The coal tonnage of the Pittsburg, Fort Wayne and Chicago Railroad for the year ending December 31, 1860 was 103,351 tons.

The St. Lawrence Route.

In the Legislative Council, the Honorable Mr. Merritt rose to move the appointment of a committee to investigate the course of trade from the West to the seaboard, and said:—The St. Lawrence used to command the trade of the west, and even of the south shore of Lake Ontario. The trade of every tributary of the St. Lawrence went up and down it, and the whole trade of the Lakes with Great Britain went by this channel. Since that time, however, almost the whole of the trade of the West had been diverted, and now went down the Hudson to New York. The committee he wanted was for the purpose of investigating the cause of this unnatural change. The Welland Canal, commenced in 1824, was for a time successful in regaining the trade; but when the Erie Canal was completed, it was lost again. Inquiries into the canse of this had often been made. In 1849, a commission was appointed to investigate it. In 1850, he had drawn up a report which showed that, in 1847, there were 95,000 emigrants landed at the port of Quebec, while at New York there were only 88,000, whereas in three years the number at New York increase to 300,000 and decreased at Quebec to 32,000. There must be some striking cause to produce so striking an effect. In his former investigation he had the advice of the Boards of Trade of Quebec and of Montreal, but had failed to perceive that reason. He was now, however, convinced that the cause was this: the Cunard line, when first established, went to Halifax and Boston, and did not affect our trade with the West, because neither of those places were on the river leading up to it; but the Collins line was subsequently established by New York merchants with the aid of a Government subsidy of $800,000, and Mr. Cunard then found that he had to go there too. These two lines of steamers displaced the packet ships which had formerly been in the first-class passenger trade, and threw them into the emigrant business. But as there were no emigrants back to Europe they took freight at a very cheap rate, as low indeed as 6*d.* or 1*s.* per bushel for grain, and this gave the command of the trade to New York. It remained to be seen what further diversion the Galway line would effect, and on that score he believed the Government had made representations and done all they reasonably could be expected to do. We once had the whole of this trade, which was a proof that we could get it again. Nobody could deny that the St. Lawrence was a natural channel for the trade of the West. A report had been made by Mr. Thomas Keefer in 1852, and another by Mr. Samuel Keefer, in which they entered fully into the subject of deepening the rapids; and honorable gentlemen would hardly believe that there were only three rapids between Lake Ontario and tide-water. There were the Coteau rapids, the Cedars, and the Gallops—besides a small rapid at Lachine, and the whole of these could be removed for the trifling sum of £30,000 or £50,000 at most, so that a vessel drawing 10½ feet could come from Lake Ontario to Quebec without any obstacle whatever. The Board of Works' report last year gave the cost of deepening the canals. It was stated that the Beauharnois canal could be deepened for $250,000, and that was the only one they wanted deepened now. There was no doubt whatever that these works should be undertaken at once. But there was another recent improvement in the matter of transportation. Canals were at one time indispensable. Now we had railways too. Canals were still necessary for some descriptions of traffic; railways for another. The Americans had just become sensible that for railways to compete with canals, under ordinary circumstances, was a failure, and had just put fifty per cent. on their tolls, which would enable us to put tolls on our canals again and get a revenue to pay the subsidy to the Canadian line of steamers. A daily line was what we wanted. Our mail line now carried only 30,000 bushels of wheat; if they were to run a daily line they could carry 6,000,000 bushels. Even this was not enough; Quebec ought to export 18,000,000. With the necessary preparations she could handle all that came down the St. Lawrence. He would now show the plan he proposed to adopt. All were aware what Toledo was. It was a city into which three separate lines of railways ran—one from the valley of the Wabash, one from that of the Ohio, one from that of the Illinois. He proposed to establish a line from Toledo to Quebec, and he read the following statement, showing the amount of capital required to establish a line of steam communications from Toledo, over the Welland Railway to Quebec:—

The capital already expended on constructing the Welland Railway, 25 miles in length, is	$1,300,000
Remaining to be provided, 6 propellers of 1,000 tons burden, with a speed of 12 miles per hour, from Port Dalhousie on Lake Ontario to Quebec, 500 miles at $30,000	180,000
Contingencies	20,000
Total inland capital	$1,500,000

Toledo to Port Colborne on Lake Erie, a distance of 275 miles, makes in all 755 miles; to which add 2,500 miles for ocean steamers, making a distance of 3,255 miles from Lake Erie to Liverpool.

With the present rolling stock on the Welland Railway, 40,000 bushels of grain per day can be carried from Lake Erie to Lake Ontario at 2 cents per bushel	$800
Elevating at ¼ cent. per bushel (paid by shippers)	100
Making receipts equal to	$900
Less working expenses per day	200
Net profit	$700

200 days per season will yield $140,000. With an additional capital of $50,000, an extra elevator at Port Colborne, 50 hopper cars of 200 bushels each, with one engine, a weighing machine, and a receiver at Port Dalhousie, can be erected, and carry over the road 10,000 bushels per trip, 4 trips or 40,000 bushels of grains per day.

The expense of elevating from vessel to car is ¼ of a cent. per bushel (paid by shippers), equal to $100 per day, more than sufficient to cover the expense of removing and transhipment from lake to lake, as the cargo is spouted into the hold of a vessel on Lake Ontario, after descending by its own gravity, leaving a clear profit to the company of 2 cents per bushel, amounting to $800; or at 200 days per season, $160,000.

After making a dividend of five per cent. half yearly on the share capital of $1,500,000 the surplus will be reserved for the purpose of erecting additional elevators, ware-houses, rolling-stock, and laying a double track between the two lakes, estimated at only $400,000 1 line of steamers between Port Dalhousie, carrying 25,000 bushels is estimated at 6 cents per bushel	$1,500
200 tons of freight at 2 cents per ton, returning	400
Will make gross earnings	$1,900
Less expenses, 10 days at $100 per day	1,000
Net earnings per trip	$900
20 trips per season	$18,000
This will give a dividend of 25 per cent. on cost of propellers, $30,000	7,500
Leaving a surplus of	$10,500

The surplus (after paying a dividend of 25 per cent. to the shareholders) will be reserved for the purpose of building additional propellers from year to year as the trade increases.

200 tons may be considered extravagant for return freight per day, judging from the present quantity, but this line intersects the Buffalo and Lake Huron Railway at Port Colborne, from whence it is but 140 miles over a comparatively

level road to Lake Huron, where that company has already connected by a line of propellers with Lakes Michigan and Superior, this being the shortest and quickest route for the supply of every port on these lakes, whether from New York or Quebec. Preparations have already been made on a large scale at Port Dalhousie for the trans-shipment with despatch from vessels to car, on the principle of Sir William Armstrong's self-acting crane, which can transfer a ton per minute. Everything connected with the Welland Railway is made with a view to the increased magnitude of the trade, and above of sufficient burden; therefore it is not necessary to estimate additional capital for their construction.

With these large propellers a reduction in price of inland freight is estimated of 100 per cent. (see the relative profits between large and small vessels between Chicago and Buffalo, 1,000 miles, Public Works report).

Tons.	Gross Receipts.	Expenses.	Profits.
600	$2,505 00	$905 00	$1,600
300	1,237 50	727 50	579
Difference	$1,267 50	$177 50	$1,090

The actual cost of running propellers of the American Great Western Transportation Company is 85 cents per mile. The cost of running propeller *Oriental* 950 tons was 78 cents per mile.

Estimated reduction between Chicago and Liverpool:—

	Miles.	Present rates, in cents.	Proposed rates, cents.	Reduction, cents.	Cents.
Chicago to Port Colborne	1,000	16	7	9	
Welland Railroad	25	2	2	0	11
Port Dalousie to Quebec	570	8	6	2	
Insurance, etc.					2½
Commission					2½
When elevators are erected at Quebec the reduction on transhipment will be					3
Ocean freight now charged at 26 cents will be reduced to 19,* making					7

Thus the total reduction in the estimate of transportation between Chicago and Liverpool *via* Quebec will be ..... 26 cts.

Besides shortening the time from 28 to 18 days, 30,000 bushels of grain per day for 200 days will only give 6,000,000 bushels per year, which is as much as our present mail line could carry supposing they sailed daily.

Quebec connects the valley of the Ohio, the valley of the Wabash, Mississippi and Missouri, all of which are connected by railway, and the Ohio and Wabash Canals with Toledo, thus the greatest producing and the greatest consuming countries are connected by Quebec.

The only competition for this immense grain trade is *via* Buffalo and New York, where they have in addition to twelve elevators and warehouses, already built and erected seven more during the past season, with a storage capacity of 3,560,000 bushels and capable of elevating from vessel to canal boat or railway car 1,000,000 bushels per day; and Oswego, where they have at least one-half of the number of elevators. Contrast these ports with Quebec, where there is not one elevator erected.

The following facts are extracted from the Board of Works report, 1858:

"It is undoubted that a very large share not only of the western foreign trade in grain but of the Canadian finds its way to the sea-board and the Eastern States through American channels. It is equally certain that the best and cheapest channel of commerce, as regards transportation, is a natural navigation such as by sea, lake, or river, in contra-distinction to the artificial navigation by canals, the latter requiring a heavy outlay for working superintendence and repairs, in addition to the original cost of construction. Now it is equally undeniable that Canada possesses (with the exception of 25 miles of canal) these advantages from her geographical position.

And yet the arrivals at the two ports of Buffalo and Oswego alone have during the last five years averaged 1,313,277 barrels of flour and 27,527,088 bushels of grain, while the average shipments from Canadian ports seaward have been but 205,821 barrels and 972,625 bushels.

The shipments from Toronto alone from the 1st September to the 31st December, 1859 were—

Flour, barrels	63,627
Wheat, bushels	805,224
Barley	107,364

Of which the ports of Montreal and Quebec received but 19,715 barrels and 21,691 bushels of wheat, or about 2 per cent. only of the latter, the remainder finding its way to Oswego and other American ports of Lake Ontario.

The entire shipments by sea from Canada last year were only 140,235 barrels of flour, 58,629 bushels of wheat, and 439,328 bushels of other grain."—*Canadian News.*

North Missouri Railroad.

The Board of County Commissioners have ordered that the North Missouri Railroad Company be released from paying to the County any interest that may have accrued against it by reason of its last subscription of $750,000 to the capital stock of said company, and from all payment in future to the County of any interest, on account of said subscription to the capital stock of said company, on condition that the State shall grant legislation sufficient to complete said road to Iowa, and for the building up of the Missouri Valley Road from the North Missouri Road to St. Joseph.

It was further ordered that the President of the Board of Commissioners be requested to communicate the above information to the Governor, and inform him that in addition to the $750,000, St. Louis county holds $500,000 of additional stock in said company, making in all $1,250,000, and that he be requested to refrain from selling said road, whereby this amount of the means of the county would be irretrievably lost.

That the President of the Board be further requested to inform the Governor that he has hopes that with the road extended to Iowa, and the Missouri Valley Road completed, the North Missouri Road will soon be able to pay the interest on the bonds of the State granted to it, and become remunerative to its stockholders, and respectfully urge upon him the importance of granting every indulgence to said company, before sacrificing so large an amount of stock so generously subscribed to develop the resources of and benefit the State. —*St. Louis News, May 9th.*

Philadelphia, Wilmington and Baltimore Railroad.

Resumption of Travel.—On and after to-day the trains upon the Philadelphia, Wilmington and Baltimore Railroad will run as before the obstruction of the road. Of this we have official intimation from Mr. Felton, President. There is every reason to believe that the road will again resume its position as a regular and certain thoroughfare to the South. No further interference is apprehended.—*Phila. Inq., May 14th.*

Burning of a Railway Bridge in Maine.

Waterville, Me., May 13.—A large part of the Androscoggin and Kennebec Railroad bridges at Kendall's mills, were accidently burned this morning. The loss amounted to $20,000. The fire caught from the sparks of a locomotive which had just passed over with the Bangor Regiment for Portland.

Atlantic and Great Western Railroad.

"A meeting of the Board of Directors of the Atlantic and Great Western Railroad was held on the 4th inst. It was a full and important meeting, and much interest was felt by the friends of the road in its doings and results. Matters of great importance were brought up for its action. Among others, the entire road in our part of the State is so far completed, that the settlement between the contractors and company was under consideration, and in a final and satisfactory settlement to all parties—the company receiving the road from the contractors. From this date, therefore, the former take the whole control of the works in the State.

The continuation of the line in Pennsylvania, to a junction with the Sunbury and Erie Road, is to be prosecuted without delay. Chief Engineer Kennard left our place on Friday last, for New York, to hasten the immediate shipment of the balance of the rails necessary to the completion of this road to that point.

The further prosecution of the enterprise in Pennsylvania and Ohio, to a connection with the Cleveland roads, and to Akron, will be urged without delay, under the new contracts now closed by the companies with James McHenry, Esq., of Liverpool, England. The work is to be under the immediate direction of Mr. Kennard, as Engineer-in-Chief of the company, and Dr. S. W. Strator, the late contractor, as Superintendent of the works.

Mr. Kennard hopes to open the road for traffic to Cleveland and Akron, Ohio, early in the Fall, which he will, no doubt, be able to do, as he will be promptly and fully sustained by the able capitalists in England, France and Spain."—*Jamestown Journal.*

Baltimore and Ohio Railroad.

It is gratifying to state that the travel on the Baltimore and Ohio Railroad is unrestricted, comparatively speaking, and both burthen and passenger trains are passing along with but a slight detention at the Relay House. According to the arrangements effected by John W. Garrett, Esq., President of the road, and Gen. Butler, the cars will pass freely along without they contain munitions of war. Not less than seven passenger trains left yesterday, and but for the unpleasant weather which prevailed they would have been filled with passengers. The officers of the road desire it to be stated that the arrangements already made with the Government are such as to ensure rapid and regular transportation of passengers.—*Baltimore American.*

Northern Central Railway.

A statement has previously been made that workmen were diligently employed in repairing such bridges on the line of the Northern Central Railway as had been partially burned, as well as constructing anew those completely destroyed on the night of the 19th ultimo. All these bridges have been completed, and a train of cars, with a locomotive and a few passengers, left Bolton Depot yesterday morning at 8½ o'clock, and passing safely over the line, reached York last evening. A train of cars, also with a few passengers, left York yesterday morning, and arrived at Calvert Station last evening shortly after six o'clock, thus evidencing the fact of the road being fully opened and safe for travel. It is designed to commence the running of trains on the old time-table, commencing on Monday next. To-day trains will leave and arrive in this city. With respect to the bridges, it may be mentioned that all the new bridges have been constructed of iron and are regarded as very substantial.—*Balt. American.*

Pacific Railroad.

We are requested to state that the travel on this road will be but slightly impeded by the destruction of one of the spans of the Osage bridge. Passengers will change cars at the bridge, and the regular trains will continue uninterrupted without any interference on the part of Federal or State authority.—*St. Louis Republican.*

* 30,000 bushels of grain are equal to 910 tons, which, at the rate of 14 per cent. per ton per mile for 2,500 miles, amounts to $5,675, equal to about 9 cents per bushel (an ample price between Quebec and Liverpool.)

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, May 18, 1861.

Share and Money Market.

There has been considerable improvement the past week in shares, and the tendency still appears to be an upward one. There is a better feeling, but the advance is due to combinations in the street, rather than to any outside demand. With the numerous elements of disturbance in the future, nothing like permanence or stability in prices can be counted on.

Money continues in great abundance. The only quarter from which a large demand may be expected is the Government. The expenses of the war are very large, but these for the present are largely borne by the various States. As the expenditures thus far have been made chiefly within those furnishing the money, no noticeable disturbance has been caused. We are, however, apparently at the very threshold of hostilities, and what they may ultimately lead to, no one can foresee.

The railroads from which we have regular reports, are doing fairly; some of them very well. But the market is influenced by other considerations than their apparent prosperity. The stocks of several of the States continue greatly depressed, with a very gloomy prospect for the future. It is feared that several of them may omit to pay the interest next falling due on their bonds, which will be treated by the public as tantamount to insolvency, if not something worse.

Central Railroad of New Jersey.

At the annual election of this company held on the 6th inst., at Elizabethtown, New Jersey, John T. Johnston, John C. Green, William E. Dodge, Adam Norice, William S. Wetmore, Benjamin Williamson, John O. Sterns, Frederick T. Frelinghuysen and Henry D. Maxwell, were re-elected Directors. And at a meeting of the Directors held this day, John T. Johnston was re-elected President, and Samuel Knox, Secretary and Treasurer, for the ensuing year.

Atlantic and Great Western Railway.

The report of Mr. T. W. Kennard, engineer, states that the works open for traffic between Jamestown and Salamanca were in good order. The works on the section between Jamestown and Columbus were, to all intents and purposes, completed, with the exception of the permanent way, which he proposed should be laid down immediately. He was of opinion they would obtain a net income of 400*l.* weekly the moment they reached Columbus, which sum would more than pay interest upon all bonds issued. On the completion of the works contemplated Akron and Cleveland would be their western termini, and New York *via* Salamanca and the New York and Erie their eastern depot. The present traffic from Akron was not less than 3,000 tons per week, and from Cleveland vastly more. The line being broad gauge, he thought that nine-tenths of the cattle traffic would come on the road. The line being in direct communication with the port of New York by the long dock, grain in bulk would as a matter of course be sent on the line. They were now raising from the oil wells 300 barrels of oil per day at Warren, which was within two miles of the railway, and a vast deal more would be raised in the course of a few months. The line would be a continuation of the Erie, with, in Mr. Kennard's opinion, an equal traffic per mile, or about 65*l.* per mile per week, one-fourth of which would more than pay the interest on the whole bonded debt. The report of Mr. Shryock states that all the oil wells that were down 600 feet were pumping from ten to forty barrels in twenty-four hours. —*London Railway Times.*

Lehigh Coal and Navigation Company.

At the stated annual meeting of this company held in Philadelphia on the 7th inst., the following officers were chosen for the ensuing year: *President*, James Cox. *Managers*, Erkine Hazard, John Farnum, Henry J. Boller, Richard Richardson, Alexander Fullerton, Andrew Manderson, James S. Cox, Jacob P. Jones, Francis C. Yarnall, Samuel E. Stokes. *Treasurer*—Edwin Walter.

On motion, the following resolution was unanimously adopted:

Resolved, That this meeting of stockholders recommend to their future Board of Managers, that their early and earnest consideration be given to the justice and propriety of the conversion, at an early day, of the scrip shares heretofore issued, as representative of future stock, into shares of stock to be entitled to dividends thereon.

Southern Pacific Railroad.

The Marshall (Texas) *Republican*, of the 20th ult., reports that over 250 new hands are at work on this road, and that the grading of the second section of twenty-five miles, it is expected will be completed in sixty days.

Austin and Brenham (Texas) Railroad.

The State *Gazette* urges the importance of this road. Twelve miles will be completed this year. This will embrace the heaviest work on the route. Five miles of it will cost $15,000 per mile for grading.

New Orleans and Texas Railroad.

The early completion of the Texas division of the New Orleans Railroad is now a fixed fact, but six miles are wanted to place us in connection with Louisiana by rail, and the iron is being laid on that every day.—*Houston Telegraph.*

☞ The Vicksburg *Whig* says the telegraph company is about to erect a line on the Southern Railroad, from Jackson to the Mobile and Ohio Railroad. This will put Vicksburg in direct communication with Mobile, as well as the Eastern part of Mississippi.

Shamokin Valley and Pottsville Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: President—James S. Biddle. Managers—Chas. L. Borie, A M. Eastwick, Wm. R. Lejee, John Farnum, W. C. Houston, Edward S. Whelen. J. L. Goddard, Secretary.

Cairo and Fulton Railroad.

This road is progressing very rapidly to the interior. Col. Bedford, Superintendent, informs us that two miles of track is laid beyond Sikeston, and that by the first of June it will be at Little River, connecting with the gravel road now completed to that point from Bloomfield. The enterprising contractor deserves all praise for the improvements now being made upon this road.—*Charleston (Mo.) Courier.*

Catawissa Railroad.

The following gentlemen were elected directors of this company on the 6th inst.: President—T. Haskins Du Puy. Directors—Samuel V. Merrick, Charles Macalester, Jas. S. Cox, William Schott, of Philadelphia; Joseph Paxton, of Catawissa; Robert Bayard, of New York.

Railroad to Pensacola.

The Montgomery *Mail* of the 4th inst., says:—"The Alabama and Florida Railroad, connecting Montgomery with Pensacola, has been finished, and we learn that the cars came through from Pensacola for the first time yesterday."

New York Central Railroad.

The following are the official earnings, as given by the Treasurer of the New York Central Railroad Company for the past two years, to May 1, 861:

	1859–60.	1860–61.
May	$409,627 84	$551,699 52
June	447,813 16	495,942 82
July	504,217 40	544,494 07
August	591,919 97	692,382 21
September	743,598 98	868,984 78
October	709,671 26	810,890 83
November	637,792 13	730,591 58
December	520,396 26	522,918 85
January	387,128 14	489,065 44
February	402,530 38	520,792 98
March	561,078 49	631,290 20
April	585,140 94	600,646 38
Total	$6,500,914 96	$7,449,699 70
For year ending April 30, 1860	6,500,714 90	
Increase this year over last	$948,784 80	

Railroad Earnings.

The revenue of the Baltimore and Ohio Rail, road for April was as follows:

MAIN STEM.

From Passengers	$53,230 31	
" Mails	7,833 34	
" Express	3,798 19	
" Tonnage	231,586 98	
		$296,448 82

WASHINGTON BRANCH.

From Passengers	$24,174 97	
" Mails	1,000 00	
" Express	1,000 00	
" Tonnage	4,868 19	
		31,043 16

N. W. VIRGINIA BRANCH.

From Passengers	$6,380 80	
" Mails	866 66	
" Tonnage	19,688 31	
		26,935 77

Summary of Revenue for April, 1860 *and* 1861.

	1860.	1861.
Main stem	$323,965 41	$296,448 82
Washington Branch	38,768 48	31,043 16
N. W. Virginia Railroad	20,085 79	26,935 76
Totals	$382,819 68	$354,427 75

Showing a net decrease of $28,391 93 on the whole road.

The receipts of the Grand Trunk Railway of Canada for the week ending April 27th, 1861, were $73,063 66
Corresponding week, 1860 66,754 65
Increase $6,309 01
Tot. traffic from July 1, 1860, to date, $2,883,551 02
Corresponding period, 1859 2,396,136 55
Increase $487,414 47

The following is a statement of the approximate earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of April, compared with the same period of last year, viz:

	1861.	1860.
From Freight	$171,338 24	$99,380 34
" Passengers	78,211 74	64,328 31
" Express	2,600 00	2,500 00
" Mails	7,825 00	7,825 00
" Rent of road	7,083 34	7,083 34
" Miscellaneous	950 25	1,448 73
	$268,008 57	$182,565 72
Increase		$85,442 85
Earnings January 1, to April 30	$953,052 65	$667,669 56
Increase		$285,383 09

The earnings of the Watertown and Rome Railroad for April were:

April, 1861 $31,666 85
April, 1860 27,800 77
Increase $3,257 08

The earnings of the Erie Railroad for April, as compared with the corresponding period last year, were as follows:

April, 1861 $544,511 26
" 1860 462,815 65
Increase $81,695 62

Journal of Railroad Law.

A NOVEL CASE: INJURIES CAUSED BY THE CONSTRUCTION OF A RAILROAD TO THE PLAINTIFF'S SUBTERRANEAN SPRING: PROPERTY BENEATH THE SURFACE OF THE EARTH.

The plaintiff complained of the defendants, the New Albany and Salem Railroad Company, for an injury to his premises by the construction of their railroad. The injury complained of, was the diverting of the waters of a subterranean spring under the plaintiff's land, by which his well was drained and rendered valueless. The case was tried in the Tippecanoe Circuit Court of Indiana and a judgment rendered in favor of the plaintiff for the sum of fifty dollars. From this judgment an appeal was taken to the Supreme Court of Indiana, upon an agreed state of facts. It appears that the plaintiff was the owner in fee of the premises; and that the defendants in the construction of their road under their charter, caused the water from the subterranean spring to be diverted from the well, and the well itself to be entirely drained, by means of which the plaintiff was damaged to the amount of fifty dollars. The railroad passes near to, but does not touch the land of the plaintiff, nor is any part of the plaintiff's land appropriated for the use of the railroad. The defendants acted in the usual and proper manner in the contruction of such road, and before the commencement or pendency of this suit, doing no unnecessary damage. The draining was caused by cutting off the underground springs or foundation which supplied the well, in excavating for the road-bed of their railroad. It was agreed, that if on appeal the court should find the law, upon this state of facts, to be in favor of the plaintiff, then judgment should be rendered to him for the fifty dollars; but if the law was found in favor of the defendants, then judgment should be rendered for the defendants.

The question thus presented is somewhat novel, important, and interesting. The rights of the owners of the soil to superficial streams of water running thereon, are, by our law, pretty definitely known and understood. The elementary books abound in discussions on the subject, and the reports contain numerous adjudications upon it. But the same is not the case in reference to underground watercourses, and the rights of parties in reference thereto. The reports are meager of decisions in respect to subterranean streams, and the elementary writers throw but little light on the subject. The following is in substance the opinion of the appellate tribunal.

WORDEN, J.—In *Acton vs. Blundell* the subject underwent a full examination. That action was brought by the plaintiff to recover damages for a disturbance of his right to the water of certain underground springs, streams and watercourses, with a count for draining off the water of a certain spring or well. The defendants had cut off and diminished the supply of water in the well, by sinking a coal pit on lands belonging to one of themselves. It was held that the plaintiff could not recover. JUSTICE TINDALL, in delivering the opinion of the court after stating the case, says: "The question argued before us was, in substance, this: whether the right to the enjoyment of an underground spring, or of a well supplied by such underground spring, is governed by the same rule of law, as that which applies to, and regulates a watercourse flowing on the surface." After stating the law in reference to streams running upon the surface of the earth, he proceeds: "And if the right of the enjoyment of underground springs or to a well supplied thereby is to be governed by the same law, then, undoubtedly, the defendants could not justify the sinking of the coal pits, and the directions of the learned judge would be wrong. But we think, on considering the grounds and origin of the law which is held to govern running streams, the consequences which would result if the same law is made applicable to springs beneath the surface, and, lastly, the authorities, to be found in the books, so far as any inference can be drawn from them bearing upon the point now under discussion, that there is a marked and substantial difference between the two cases, and that they are not to be governed by the same rule of law." The court after having discussed, at length, the reason and policy of the law, and having examined the civil as well as the common law authorities conclude their opinion as follows: "It is scarcely necessary to say that we intimate no opinion whatever as to what might be the rule of law, if there had been an uninterrupted use of the right for more than the last twenty years; but, confining ourselves strictly to the facts stated in the bill of exceptions, we think the present case, for the reason above given, is not to be governed by the law which applies to rivers and flowing streams, but it rather falls within that principle which gives to the owner of the soil all that lies beneath

his surface; that the land immediately below is his property, whether it is solid rock, or porous ground, or venous earth, or part soil and part water; that the person who owns the surface may dig therein, and apply all that is there found to his own purpose, at his free will and pleasure; and that if in the exercise of such right he intercepts or drains off the water collected from underground springs in his neighbor's well, this inconvenience to his neighbor falls within the description of *damnum absque injuria* (a loss without a wrong) which cannot be the ground of an action."

The case of *Chatfield vs. Wilson* decided by the Supreme Court of Vermont fully recognizes the doctrine of the above case; and the cases of *Routh vs. Driscoll* and *Greenleaf vs. Francis* are cited as being substantially to the same effect. The case at bar and *Acton vs. Blundell* seem to be precisely alike in principle. The railroad company for the purpose of constructing their road, had the same right to excavate, within the limits of their right of way, that a private individual would have to dig upon his land for any purpose; and we know of no statute or principle which would hold them liable for any injury, such as that complained of, beyond the liability of a natural person for a like injury. On the above authority we are of opinion that upon the facts agreed upon, the judgment below must be reversed. Judgment in favor of the defendants, reversing the judgment below.

HEAVY DAMAGES AGAINST A CITY RAILROAD COMPANY: CONCURRENT NEGLIGENCE: PROBABILITY OF THE ACCIDENT NOTWITHSTANDING FAULT IN THE PLAINTIFF: NECESSITY OF BRAKES.

The case of David O. Nichols *vs.* The Sixth Avenue Railroad Company, came up in the Supreme Court of the City of New York. The plaintiff on the morning of August 9th, 1858 took a sea beside the driver on a one horse car, running on the defendant's road. When between Twelfth and Thirteenth streets he states that he asked the driver to stop; the driver did not answer, but he supposed heard him, from the fact of the horse being brought from a trot to a walk; near the south side of Thirteenth street, again told the driver to stop, and got up and stood upon the top step, to be ready to get off when the car stood still; while in that position, the horse started suddenly, and he was thrown six or seven feet in front of the car, across the track, and the wheel caught him across the loins, causing serious internal and external injuries, from which he still suffers. The car had no brake; and the driver subsequently acknowledged if there had been one, he could have stopped the car in time and prevented the accident.

The evidence for the defence was, that the boy did not ask the driver to stop, but while the driver was making change for a passenger who had got in above Twelfth street, the boy, without his knowledge, and while the horse was on a walk, got upon the step, descended to the ground, and, his feet slipping, was thrown under the wheel. The driver denies that he ever said if there had been a brake he could have prevented the accident, but said if he had known of the accident in time, and had had a brake, he might have prevented it.

Defendant's counsel contended that the act of the boy, in taking his dangerous position on the step while the car was in motion, was such an act of negligence as precluded his recovering against the defendants, and asked for a dismissal of the complaint. The Court denied the motion, making the distinction that it was for the Jury to say whether the boy, in taking that position, intended to leap from the car before it had come to a standstill; and whether, if such was not his intention, the fact of taking that position, so as to hurry off when the car stood still, was an act of such negligence as would preclude a recovery.

Three questions were submitted to the Jury by the Court:

I. Was the driver guilty of negligence in the management of the car, which negligence caused the accident and injury?

II. If the driver was not in fault, then did they believe, upon the evidence, that if there had been a brake upon that car, the accident could have been averted? And were they satisfied that such brakes had been before in use, and had been thoroughly tested and demonstrated to be of efficiency?

III. If, on either ground, they found the defendants chargeable, then did the carelessness and negligence of the boy contribute to the accident?

On the last question, in charging the fixed rule of law, that if negligence on the part of the plaintiff in any way concurred to produce the accident, the plaintiff could not recover, the learned Judge added that there was often great difficulty in determining how far that rule went. He had adopted this mode of presenting the proposition to the jury: Were they satisfied, upon the evidence that it was certain or equally probable, that but for the negligence of the party complaining, the injury would not have taken place. In this case, for example, were they satisfied that any negligence of this young man, in his conduct on that occasion, was a producing cause of this accident? If so, he could not recover. Or, secondly, if they found it was just as possible that but for his negligence the accident would not have occurred, as that it would have occurred, he was not entitled to recover. Verdict for plaintiff for $7,500.

Public Works of North Carolina.

The following acts were passed at the recent session of the Legislature of this State:

An act to amend the charter of the Western N. C. Railroad. It provides for running a road down the French Broad river, from Asheville to Paint Rock, on the Tennessee line; and for building a road to Asheville into Haywood County (38 miles), on the way to Ducktown. These branches to be built with the present appropriation, of which it is thought there will be $1,400,000 left after completing the Western N. C. road to the French Broad at Asheville.

An act to amend charter, and further assist the Wilmington, Charlotte and Rutherford Railroad. This road commences at Wilmington, on the Cape Fear river, near the ocean, and thence with a slight curve northwest, to the town of Charlotte, the western termination of the N. C. Railroad, and northern of the Columbia and Charlotte Railroad. From Charlotte, after a slight northerly curve, it runs directly west, to the town of Rutherfordton. It is nearly an air-line; and, though laboring under many disadvantages, has, by the energy of its president and chief engineer, been well managed. Seventy-five miles are completed, and in use at its eastern end; twenty are in use from Charlotte west. The act appropriates $1,000,000 for the use of the road. H. W. Guion, President; Jno. C. McRae, Chief Engineer.

An act to amend charter of the Western Railroad (runs from Fayetteville, at head of steamboat navigation on Cape Fear river, to the coal fields on Deep river.) The act provides for the completion of the road into the heart of the coal field, and for its extension to some point on the North Carolina Railroad, and appropriates $500,000. The iron for the extension must be made in the State, which will be easily done, as several rolling mills are now going up on Deep river. The coal-carrying length of this road will be about forty-three miles, with a descending grade to the point of shipment at Fayetteville.

An act to charter the Fayetteville and Warsaw Railroad. Incorporates a company to build a railroad from Fayetteville, on the Cape Fear, to Warsaw depot, on the Wilmington and Weldon Railroad; appropriates $200,000. Will be cheaply built, as the country is perfectly level.

An act to incorporate the Chatham Railroad, to be built from the coal fields to some point on the N. C. Railroad, near Raleigh. Appropriates $200,000.

An act to incorporate the Dallas (N. C.) and Yorkville (N. C.) Railroad Company. No appropriation.

An act to give additional aid to the Chesapeake and Albemarle Canal Company. Appropriates $200,000.

A large number of bills incorporating mining and manufacturing companies were passed, indicating that the people of the State are disposed to develop their mineral wealth, and to be independent in manufactures. It is full time that the former should be developed, and the latter encouraged.

The revenue bill was passed with promptness, showing that all the citizens of North Carolina, however they may differ as to the mode, are ever willing to provide the means to pay her debt. The tax is slightly raised in the average, over the bill of two years ago. The amendment to the Constitution, providing for an ad valorem system of taxation, failed to receive a constitutional majority.

An act to charter a company to build a railroad from Greensborough, on the N. C. Railroad, to Leaksville, on the Virginia line, was passed. This is in reali y what is called the Danville connection, and with the proposed railroad extension to Cleveland, Tenn., via Ducktown, will make the shortest route from Memphis or New Orleans to Virginia or the North.

Incrustation in Steam Boilers.

By HENRY RANSFORD.

All the world knows that the incrustation in steam boilers is deposited from the water, and that, in tubular boilers, it is very difficult to get rid of; but few are aware that "blowing out" a boiler, to get rid of the sediment on the bottom, hardens the sediment that adheres to the tubes, converting it into a calcareous shell, requiring a smart blow of a hammer to dislodge it.

Will you oblige me by giving to the world, through the columns of your *Journal*, a very simple and efficacious remedy?

I tried the experiment on a 30-horse tubular boiler. In addition to the blow-off cock at the bottom another was fitted over the fire-pan, at the usual level of the water, and to the end of it, inside the boiler, was screwed on a funnel of sheet iron, partly flattened, so that, on the cock being opened, anything floating within eight or ten inches on each side was drawn through.

The engine-driver had directions to open the lower cock once a day, and the upper one when he saw the water in the glass gauge was thick, and keep them open until the water ran clear, but never to blow out the boiler as formerly. Three or four gallons from the lower, and half that quantity from the upper cock was sufficient to carry off all thick and dirty water.

At the end of *three months*, first allowing the water to get nearly cold, the boiler was emptied; a stream of water was then introduced by the

man-hole, and the tubes thoroughly washed. On examination the under half of the tubes was as clean as the day they were made, the upper half discolored, but no scale, and the sides of the boiler in a similar state; on the bottom was abont a half bushel of thin scale, broken up into small pieces, that apparently had fallen or been washed from the tubes; thus, after three months work, there was nothing to do but to get up steam again.

The secret consists in never blowing out the boiler when hot, the usual custom, as the result is—the heat of the tubes and sides instantaneously convert the soft deposit into a hard calcareous substance, and every time the boiler is blown out an additional stratum is added. If the man-hole is taken off on Saturday afternoon, and the flues opened, the water is cold enough to run off by Monday morning, so that no time is lost, and I have no doubt the hot water might be allowed to run off on the Saturday provided an equally large stream of cold water was allowed to run in at the same time, until the boiler and tubes were cold. I will merely add, the water was pumped from the Thames, and allowed to settle, before being used for the boiler. There is no reason why the plan should not answer equally well for locomotives.—*Journal of the Society of Arts.*

Erie Railroad Company.

The following has been issued by the Secretary of the Erie Railroad Co.:

The Erie Railroad Company is now organized, and ready to issue the new certificates as called for and assessments paid. The time for becoming parties to the contract for purchase of the road will expire on the 28th day of June next, and no exchange of stock, bonds, debts, or claims of the old company will be made into new stock in the new company after that day. The Trustees have decided to make an assessment of two and one-half (2½) dollars per share on the new common stock and preferred stock, payable on delivery of the new certificates. There will be no assessment on the fractional parts of preferred shares.

Scrip receipts will be issued for the assessments, redeemable, with interest, at the office of the company in New York, from the first net earnings of the road, before the payment of dividends on the preferred stock. All assessments on the trustees' scrip already issued remaining unpaid on the 28th July will be charged with interest from that day.

The holders of fourth mortgage coupons now in arrear, and the holders of fifth mortgage coupons now in arrear, or to mature June 1, 1861, on surrendering them to the Trustees, will be entitled to interest from May 1, 1861, on the amount surrendered, the Directors of the Erie Railway Company having resolved to pay interest from that day on all fourth and fifth mortgage coupons now or hereafter surrendered to said Trustees. Such unsurrendered coupons will also be received in payment of assessments on the stock if desired.

All such creditors and stockholders as surrender their bonds, debts or certificates, and pay the assessments levied, will become entitled to receive certificates of stock in said Erie Railway Company, as follows:

Holders of bonds of 1862, for the principal of their bonds, and interest up to July 1st, 1861, in preferred stock, bearing interest at the rate of 7 per cent. per annum, when earned, in the current year.

Holders of bonds of 1875, for the principal of their bonds, and interest up to August 1st, 1861, in like preferred stock.

Holders of bonds of 1871, for the principal of their bonds, and interest up to August 1st, 1861, in like preferred stock.

Holders of judgments against the company, for the amount of their judgment, with interest to January 28, 1861, the day of the sale, in such preferred stock.

The holders of the *stock* of the New York and Erie Railroad Company will be entitled to receive an amount of common stock in the Erie Railway Company equal to the amount of their present stock.

Operations of the United States Mint at Philadelphia.

The following is a statement of the deposits and coinage of the U. S. Mint, in this city, for the month of April, 1861:

DEPOSITS.

Gold deposits from all sources.....	$3,284,951 97
Silver and purchases	217,501 76
	$3,502,453 73
Copper cents (O. S.) received in exchange for cents of new issue....	6,920 00
Total deposits	$3,509,373 73

COINAGE.

	Pieces.	Value.
Gold	229,937	$4,489,751 90
Silver.	838,000	179,026 00
Copper..	1,300,000	13,000 00
Total.....	2,367,937	$4,681,771 90

Water Department of Philadelphia.

Annual Report of the Chief Engineer of the Water Department of the City of Philadelphia. Presented to Councils Feb. 21st, 1861.

We extract from this document, which will be found very interesting to our immediate citizens, the following information, which is of general interest, as showing the efficiency of the works and fixing data for calculations for other works of similar character.

Philadelphia is supplied with water by four water-works of different character and locations, but under the charge of the same committee of Councils and Chief Engineer. The amount of work done by each of these works, with the character of the motors used is given in the following table, which is condensed from those in the report.

Works.	Average quantity in gallons per day for each month. Maximum.	Minimum.	Mean.	Cost of raising 1,000,000 galls. 1 ft. high.	Average duty of engine.
1 Fairmount...12,446,775 (July.)	7,731,735 (Dec.)	9,867,378	11.7 cts.	[100 lbs. anthr.	
2 Schuylkill...10,812,817 "	4,864,850 "	7,360,849	10.3 "	32,115,800 lbs. per.	
3 Delaware... 3,015,148 "	1,500,091 (Feb.)	2,379,727	21. "	20,525,800 "	
4 24th Ward... 1,070,436 "	611,165 "	774,112	14.4 "	38,500,800 "	

No. 1. Is driven by eight breast wheels, and one Turbine (Jonval); Pumps 16 ins.

No. 2. Two reciprocating overhead beam engines, 36 ins. × 6 ft.; Pumps 18 in. × 6 ft.

One reciprocating bell crank engine, 36 in. × 6 ft.; Pump 21 ins. × 6 ft.

One Cornish overhead beam engine, 60 in. × 10 ft.; Pumps 30 in. × 10 ft.

No. 3. One horizontal high-pressure engine 30. in. × 6 ft.; Pump 18 in. × 6 ft.

One beam, condensing engine, 36 in. × 6 ft.; Pump 18 in. × 6 ft.

No. 4. Two Cornish Bull-engines, 50 in. × 8 ft.; Pumps 17 in. × 8 ft.

The total supply during the year was, from

Fairmount	3,612,987,017 gallons.
Schuylkill	2,696,960,210 "
Delaware.....	872,144,980 "
24th Ward	283,646,070 "
	7,465,738,277 "

The cost of raising the water has been less this year than it was last, and very materially less than that of 1858. Yet the average duty of the engines, which is given as 321,158 lbs. raised 1 ft. high per lb. of anthracite, shows that much is yet to be done in the improvement of the steam works while the water-wheels at Fairmount are now far behind our wants, and will be soon replaced.

The report terminates with an account of the experiments made to determine the best form of wheel to be used in the extension of the Fairmount works. We do not propose to go into the details of these experiments, which can scarcely be usefully condensed, but confine ourselves to stating as the general result, that the contract has been given to M. Geyelin of this city, who is the agent for the Jonval Turbine. The subjoined note will give the reasons for this decision.

DEPART. FOR SUPPLYING THE CITY WITH WATER.
PHILADELPHIA, April 5th, 1861.

EMILE GEYELIN, ESQ.—DEAR SIR:—The following are the reasons that influenced the Department in awarding you the contract for furnishing the Jonval Turbine Water Wheels for working the New Pumps at the Fairmount Water Works:—

First: The fact that your model gave the best average per centage over all others brought into competition.

Second: The durability and continued satisfactory operation of your Jonval Turbine erected at Fairmount in 1851.

Third: The general and highly competent evidence brought before the committee of your ability as a constructor of Turbine Wheels.

Fourth: The fact of your estimate of cost being considerably lower than that of any other party.

Yours, respectfully,
HENRY P. M. BIRKINBINE, *Chief Engineer.*

Indian Finances.

The total revenues and receipts for the year 1856-7 amounted to £33,499,980; including £121,954 from railways; in 1857-58 to £31,860,582; including £153,803 from railways; in 1858-59 to £36,293,153, including £232,265, from railways; in 1859-60 to £38,127,332, including £330,700, from railways; and in regular estimate for 1860-61 to £39,052,791, including £443,160, from railways. The total expenditure for the year 1856-57 amounted to £33,974,188; for the year 1857-58 to £40,251,224; for the year 1858-59 to £50,480,770; for the year 1859 60 to £46,417,462; for 1860-61 to £46,630,888, showing a deficiency for the year 1856-57 of £474,208; for the year 1857-58 of £8,390,642; for the year 1858-59 of £14,187,617; for the year 1859-60 of £8,290,130; and for 1860 61 (regular estimate) a deficiency of £6,678,097, including the payments for the Mutiny Compensation. This amount is nearly half a million in excess of Mr. Wilson's estimates of last June. The prospects, certainly, are not bright, but if the month of June next can be tided over without borrowing there is some hope that in 1861-62 we may make some way towards recovering an equilibrium. The increase in opium and in stamps already surpasses expectation. We may look forward also to a considerable addition from the income tax; from salt, and from railway receipts—"*Times*," *Calcutta Correspondent.*

Great Western Railway of Canada.

The great battle so long expected to come off between the Investigating Committee and the Directors was fought on Thursday, and ended in a complete defeat of the committee, whose report we gather from the account of the proceeding, was not even formally received by the meeting, the motion of the Chairman of the investigating committee having been as an amendment to the chairman's motion for the reception and entering on the minutes of the reports of the Directors, that "the report of the committee and the rejoinder be received." This amendment moved by the chairman of the investigating committee was rejected, and the reports of the Directors were received and entered on the minutes. It is true a poll was demanded to take place in Canada, but whatever a London meeting decides will be adopted in Canada, the great mass of the stock being held here. This is, we think, the first occasion on which an investigating committee's report has not been received by a meeting.

The meeting also passed a resolution "discharging the committee," but another authorising the

Directors "to pay the expenses of the committee, if they thought them fair and reasonable."

As to the amount of these exposes—"Mr. Cannon (the investigating chairman) stated he did not know the amount, but Mr. Giles, the engineer, was to receive £1,000, and the accountants about £6,000, not including money out of pocket."

How much, then, will the investigation cost? Apparently £7,000, "not including money out of pocket."

It strikes us that if the investigation into the affairs of the Great Western of Canada is to cost so much, the Shareholders of the Grand Trunk will cheerfully pay Mr. H. C. Chapman at least his money out of pocket for his investigation into the Grand Trunk affairs, which had a beneficial effect, and to accomplish which that gentleman traveled from one end of Canada to the other.

A vote of thanks to the Great Western of Canada investigating committee was negatived by the meeting on Thursday. Thus the Great Western Proprietors do not mind paying the investigating committee, but they would neither thank them for their labors nor receive their report.

We presume that their expenses, which are heavy, will have to be paid out of the revenue of the Great Western of Canada, but it is a once and away expense. The present generation of Proprietors will probably not be desirous for another investigating committee.

We have elsewhere spoken of the present position and prospects of the undertaking, which we think are good notwithstanding the additional charge caused by the expenses of the committee of investigation. There is great force in the observation of Mr. Alexander Beattie that "two bad harvests and a monetary crisis were quite sufficient to account for the falling off in the dividends," and also not a little interest will be attached to those of Mr. Gill, the Chairman—"He rejoiced to say they were enabled to resume the payment of dividends, Providence having after some years of failure blest Canada with a bountiful harvest. He was glad, also, to see that their present traffic was largely on the increase with every prospect of a continuance. Their capital account was practically closed, indeed they had been able during the last six months to reduce their bond debt by £28,000. They had no money to raise to pay off debts or to equip their line like some of their neighbors, but all they had now to do was to work their line to the best advantage, so soon as their attention ceased to be distracted by the dissensions into which the company had been plunged during the last year. They had at this moment nearly £100,000 in London, bearing interest on special deposit; they had also a good working account at their bankers; they had £35,000 of bills of exchange not yet matured; and their arrangements were to receive monthly remittances from Canada of the net profit of the working of the line. During the last twelve months they had received in this way £185,000. Their financial position was, therefore, of the soundest character, and in paying the dividend now announced they had simply to give a check upon their bankers. He dwelt strongly upon this point of finance, for it was one of immense importance, especially when considered with reference to the position of all their neighbors in Canada."

As to the company's connection with the Detroit and Milwaukee. They have only lent at interest (as Mr. Brydges explained) £250,000, which is but one-seventh of the whole cost of the Detroit and Milwaukee railway, and "for this outlay or loan of £250,000 they (the Great Western) had obtained control of a line 180 miles in length," which line (Detroit and Milwaukee) feeds the Great Western proper with traffic and secures it from the loss of much through traffic. "The Grand Trunk Company had guaranteed for a line 60 miles in length 8 per cent., on £500,000, while they (the Great Western) lent £250,000 and got the control of a line 180 miles in length."

From the great increase in the traffic of the Detroit and Milwaukee line, there is every reason to believe the Great Western will eventually lose nothing by their loan of £250,000, while the line is and will be of considerable advantage to the Great Western. Generally speaking, we are opposed to extensions, but, on the terms and under all the circumstances, the Detroit and Milwaukee connection is in our mind not likely to be injurious to the Great Western. However, the company have done with extensions. They have no more irons in the fire, and the investigating committee being dissolved all attention will now be given to working the line to the greatest advantage for the Proprietors.

Two auditors have been appointed. Mr. Lance is one of them, a gentleman of character and possessed of much railway knowledge.—*Herapath, April* 13.

Re-organization of Railroads in Indiana.

SECTION 1. *Be it enacted by the Generaly Assembly of the State of Indiana:* That in case a majority in interest of the creditors of a railroad company, and the majority in interest of the Stockholders of such company, shall agree upon a plan for the re-adjustment or capitalizatiou of the debt and stock thereof, thereupon an agreement, as aforesaid, either before or after a sale of said railroad under judicial proceedings, and a purchase at such sale by Trustees, on behalf of the parties to such agreement, all the franchises and powers, including the franchises to act as a corporation, conferred by the charter of such railroad company, shall pass by such sale, and vest in the said Trustees, together with the railroad, and all the other property embraced in the sale; and in case any railroad situate wholly or partly within this State, or any part thereof situate within this State, shall, in pursuance of such agreement, be sold by virtue of any mortgage or mortgages, or deed or deeds of trust, either by foreclosure, or other proceeding in law or equity, or pursuant to any power in such mortgage or mortgages, or deed or deeds of trust contained, or by the joint exercise of those authorities as hereafter provided, the purchaser or purchasers of the same, or their survivor or survivors, or they, or their, or he and his associates, may form a corporation, by filing in the office of the Secretary of State, a certificate under their or his signature, specifying the name of such corporation, the number of directors, the names of the first directors, and the period of their service, not exceeding one year, the amount of the original capital, and the number of shares into which such capital is to be divided; and the persons signing said certificate, and their successors, shall be a body politic and corporate by the name therein specified; and a copy of such certificate, attested by the signature of the Secretary of State, or his deputy, shall, in all courts and places, be evidence of the due organization and existence of the said corporation, and of the facts in the said certificate stated: *Provided*, that no sale under the provisions of this act shall be valid, unless notice thereof stating time and place of sale, shall have been published in some newspaper of general circulation in the city of New York, and also by publishing said notice in at least one newspaper of general circulation, published in each County in this State, through which said railroad may run, not less than thirty nor more than sixty days, at the discretion of the Court ordering said sale, immediately preceding said sale. And all sales of railroads, made under the order or decree of a Court of Record, are hereby legalized as fully as though the sale had been made in pursuance of this act: *Provided*, that nothing herein contained shall be construed to legalize the decree itself, or to correct any error therein, or to legalize the sale or conveyance of any real estate by, or to any railroad company, or to legalize any consolidation by any railroad companies in this State, but only to confine the sale of the road-bed, depot grounds, and such realty as is essential to the operations of the railroad, including also the rolling stock, machinery, and equipments upon the road, as embraced in the decree.

SEC. 2. Such corporation shall possess all the powers, rights, privileges, immunities, faculties and franchises, in respect to the said railroad, or the part thereof purchased, as aforesaid, which were possessed or enjoyed by the corporation that owned or held the said railroad, previous to such sale by virtue of its charter, or amendments thereto, or other laws of this State, or of any State, not inconsistent with the laws of this State, in which any part of the said railroad is situate; and shall also have power, by agreement of the persons forming the said corporation, as aforesaid, or by a vote of a majority in interest of the stockholders, at any time within six months after the formation of the said corporation, to assume any debts or liabilities of the corporation which owned or held the said railroad before the said sale, and in like manner, and within a like period, to make such adjustments with any stockholders of the said last mentioned corporation, as it may deem expedient, and for the said purposes to use such portions of the bonds and stock it may be authorized to create, as it may deem necessary, and in such manner as it may deem proper; and shall also have power to make and issue bonds, payable at such times and places, and bearing such rates of interest as it may deem expedient, and to sell or dispose of such bonds at such prices, and in such manner as it may deem proper; and to secure the payment of any bonds which it may make, issue, or assume to pay, by a mortgage or mortgages, or deed or deeds of trust, of its railroad, or of any part thereof, or any other of its property, real or personal, and may include in such mortgage or mortgages, or deed or deeds of trust, any locomotives, cars, and other rolling stock and equipments, and any machinery, tools, implements, fuel, and materials, whether then held or thereafter to be acquired, for the constructing, operating, repairing or replacing the said railroad, or any part thereof, or any of its equipments or appurtenances, all of which property so included, whether then held or thereafter to be acquired, shall be subject to the lien and operation of such mortgage or mortgages, or deed or deeds of trust, all franchises held by the said corporation, and connected with, or relating to the said railroad, and all corporate franchises of the said company, which said franchises, in case of sale, by virtue of any such mortgage or mortgages, or deed or deeds of trust, are hereby declared to pass to the purchasers, so as to enable them to form a corporation in the manner herein prescribed, and to vest in such corporations all the faculties, powers, authorities, immunities and franchises, conferred by this act. And the said corporation shall have power to establish sinking funds, for the redemption of any of its debts; and shall likewise have power to issue capital stock to such aggregate amount as it shall deem necessary, not exceeding any limitation which may be fixed by agreement, with the persons forming the said company, in the manner hereinbefore provided, and may establish preferences in respect to dividends, in favor of one or more classes of the said stock, in such order and manner, and to such extent and with securities, as it may deem expedient; and may confer on holders of any bonds which it may issue or assume to pay, such rights to vote at all meetings of stockholders, not exceeding one vote for every one hundred dollars of the par amount of the said bonds, as may by it be deemed advisable; which rights, when once fixed, shall attach to and pass with such bonds, under such regulations as the by-laws may prescribe, to the successive holders thereof, but shall not subject any holders to any assessment by the said company, or to any liability from its debts, or entitle any holder to dividends. And the said corporation shall also have capacity to hold, and enjoy, and exercise within other States, the aforesaid faculties, powers, rights, immunities and franchies, and such others as may be conferred upon it by any law of the State, or of any other State in which any part of its railroad may be situate, or in which it may do any part of its business, and to hold meetings of stockholders and directors, and do all corporate acts, and all things without this State, as validly as it may do the same within this State.

SEC. 3. In case the part situate within this State of any railroad, a part of which is situate in another State, shall become vested in a corporation of such other State, and such corporation shall

also acquire a part situate in such other State, of the said railroad, the said corporation may exercise and enjoy within this State, for the purpose of the said railroad, and its business, so far as it may be endowed by the laws of the State of its creation, with capacity to do so, all the powers, rights, faculties, privileges, immunities and franchises, enumerated in section second of this act, and its mortgages or trust deeds, shall operate as therein specified.

SEC. 4. Next in the order of lien to the existing mortgage debt of the old road, shall stand the amounts due persons for labor performed, and wood and other such materials furnished the old company in running the road, and damages for killing stock and right of way; *Provided*, that all the property of said company shall be liable for damages recovered against said company for stock killed or injured by them, or exempt from mortgage liens.

SEC. 5. So much of any railroad as lies in this State, and is embraced in the mortgage or mortgages sought to be foreclosed, may be sold at any such sale as an entirety, and the Court making a decree or order of sale, may declare in the order where the principal office of the railroad company is situate within the State, and may order the sale to be made at the Court House door of the county in which the principal office within the State is situate.

SEC. 6. In case of the sale of a railroad, or any part thereof, as in the first section of this act mentioned, full power is hereby given to the corporate authorities of the several counties, cities, townships and other municipal corporations, holding stock in the company, by which such railroad was owned, and to all persons holding such stock in a fiduciary capacity, to surrender or assign such stock, and to accept and receive such new stock in any corporation, which, after such sale, may become the owners of said railroad, or any part thereof, as may be apportioned or given in respect to the said first mentioned stock, under any reorganization of the owership of the said railroad.

SEC. 7. That no purchaser or purchasers of any railroad shall be entitled to any rights or benefits under this act, until such purchaser or purchasers shall first assume and pay in money, or first-class or satisfactory securities, to be issued by the new corporation, formed upon the sale or transfer of any railroad as herein provided for, as the creditor or creditors may elect, all ticket balances or back charges for freight, with interest, whether due upon account, judgment of a Court of Record, bond, note, or other instrument in writing, which the former railroad corporation may have owed or been in arrears for, to any connecting railroad company operating a railroad entirely or in part in this State.

SEC. 8. This Act may be amended or repealed at the discretion of the Legislature.

SEC. 9. It is hereby declared that an emergency exists for the immediate taking effect of this Act; and, therefore, the same shall be in force from and after its passage.

Approved March 5, 1861.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, May 1, 1861.

THE ANNUAL MEETING of the Shareholders of the ILLINOIS CENTRAL RAILROAD COMPANY, for the election of Directors and the transaction of any other business, will be held at the office of the Company, in the City of Chicago, on WEDNESDAY, May 29, 1861, at 10½ o'clock a. m.

The Transfer Books will be closed on the 21st of May, and re-opened on the 1st of June.

W. M. PHILLIPS, Secretary.

LOCOMOTIVES FOR SALE.
THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.
They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.
The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

Mobile and Ohio Railroad.

The thirteenth annual meeting of the stockholders of this company was held in Mobile on the 7th inst. The following gentlemen were elected directors for the ensuing year: Milton Brown, of Tennessee; C. W. Williams, James Whitfield, J. M. Cunningham, John J. McRae and Eli Abbott, of Mississippi; G. M. Parker, Jonathan Emanuel, Charles P. Page, Duke W. Goodman, M. H. Bloodgood, Robert A. Baker and Charles K. Foote, of Alabama. The Board elect is the same as that of last year, with the exception of Messrs. Abbott and Parker, in place of W. Jones, Jr., deceased, and J. C. Rupert, who declined a re-election. The whole number of shares represented was 18,854. We give below the reports of the President and Chief Engineer:

To the Stockholders of the Mobile and Ohio Railroad Company:

The President and Directors of your company present the following report of their proceedings for the past year:

REPORT.

By our last annual report, you were informed that the track was laid from Mobile north as far as Okolona, including the Columbus (Miss.) Branch; and that it was laid from Columbus, Ky., south to a point two miles below Jackson, Tennessee. Since that report, and since your last annual meeting, we have laid down one hundred and nineteen miles of track, completing the entire line between Columbus, Ky., and the city of Mobile. The last bar of iron was laid and the last rail driven in the presence of a large crowd of spectators, and with appropriate ceremonies, on the twenty-second day of April, 1861.

In ordinary times, with our road finished, we might safely expect a large increase of income; and the time would seem appropriate to enter on a review of our financial condition, and make suggestions in regard to the future. But in the present uncertain condition of things, with a hostile army at Cairo, and a threatened, if not actual blockade of the port of Mobile, and the whole country in arms, almost entirely breaking up commercial intercourse and the ordinary business transactions of the country, it would be unsafe, at present, to make estimates of income, or propose measures of future policy. This we leave until the development of events may throw additional light on the subject.

Of one thing, however, we can speak with confidence and certainty—that your road, running through four States, will furnish in times of peace a great artery of commerce, and in war a powerful arm of defence; and that in peace or in war its influence will be exerted in support of Southern commerce and the maintenance of Southern institutions.

For the receipts and disbursements, and the operations of the several departments during the past year, we refer to the appended tables and the report of the Chief Engineer and General Superintendent. These tables and statements furnish all the material facts relating to the progress, completion and present condition of your great enterprise.

We take great pleasure in repeating the announcement made in our last report that, "to the heads of the several departments too much praise cannot be awarded for their faithful and laborious discharge of duty."

All of which is respectfully submitted.

MILTON BROWN,
President Mobile and Ohio Railroad Company.

CHIEF ENGINEER'S REPORT.

OFFICE MOBILE AND OHIO RAILROAD COMPANY. May 6, 1861.

HON. MILTON BROWN,
President Mobile and Ohio R. R. Company:

SIR:—I have the honor to report that the last spike was driven on the 22d ult., by M. J. D. Baldwyn, the projector of this great work, and the trains commenced to run regularly through the entire road Monday last.

The usual tables and statements, from No. 1, to 16, contain detailed explanations of the earnings, expenses, and movement of freight and passengers.

The earnings have been:

From pass'gers—South div.	$265,197.55	
Do. do. —North do.	127,049.68	$392,247.23
Do. freight—South div..	884,021.20	
Do. do. —North do.	74,009.71	958,030.91
Do. mails—South div ..	26,700.75	
Do. do. —North do...	15,225.00	41,925.75
Do. express—South div.	8,891.44	
Do. do —North do..	1,763.06	10,654.50
Total earnings		$1,402,858.30

And the expenses:

For rep'rs of r'd—South div.	$227,761.06	
Do. do. —North div.	49,071.40	$267,832.46
Do. mach'y—South div.	88,371.58	
Do. do. —North div.	16,862.10	105,233.68
For conducting transportation—South division...	281,105.95	
For conducting transportation—North division...	53,316.08	334,422.03
Total expenses		$707,488.17
Leaving a net revenue of.....		$695,370.22
Of which there has been paid for interest South Division.....		398,727.24
Balance after payment of interest....		$296,642.98

The earnings to the 1st September exhibit an increase over the same period of the previous year corresponding with the greater length of the road, and—but for the short crop and political agitation—would have continued during the remainder and swelled the receipts to $1,750,000, with comparatively a small increased expenditure. As soon as it was evident that the crop was unusually short, the expenses were reduced to the lowest point consistent with safety and efficiency, but this was again followed by the complete prostration of business, consequent upon the late Presidential election, which reduced the travel and upward bound freight to less than one-half of the amount it would have been in times of prosperity and peace.

The expenses of the past year were greatly increased by the renewal of 150,000 cross-ties, the reconstruction of trestle work and Howe Truss Bridges over Noxubee and Running Water, which were originally constructed of bad materials—and the transportation of materials for construction. This latter item, if charged at cost, would exceed $150,000.

It was my intention on the completion of the road to review its history and present for your consideration the prospects of its ultimate success as an investment of capital, but the Revolution of the Government, and the consequent destruction of business in every department of industry, and the uncertainty as to when commerce will resume its accustomed channels, destroys the value of all such speculations, and they are therefore omitted.

The trains have been run during the year with the usual regularity, and without the slighest injury to a passenger; and it gives me pleasure to say that this has resulted from the watchfulness and strict attention to duty of the officers, agents, and employees in every department.

Very Respectfully, L. J. FLEMING,
Chief Eng. and General Sup't.

After the reading of the report the following resolutions were adopted:

Resolved, That the completion of the road forms a proper period for an examination into the affairs of the company for the purpose of showing in detail the full cost of the work, with its attendant expenses, in a more extended form than can be expected in the ordinary annual reports, with a full and complete statement in detail of its present indebtedness, that the stockholders may be the better enabled to inaugurate a sound policy in its operation and management, so that its just debts may be promptly paid as they mature, and the stockholders be enabled to realize their proper remuneration for the capital expended.

Resolved, That for this purpose a committee of two from the State of Alabama, one from Mississippi, one from Tennessee and one from Kentucky, be appointed, with full power to make such examination, and that for this purpose the President and Directors be requested to give the said committee access to all the books, papers and vouchers, and generally to give all information in their power.

Resolved, That said committee, or a majority of them, shall have power to sit at such periods and for such length of time, or times, between this and the next annual meeting of the company, as in their judgment a proper discharge of their duties may require; and that they be allowed such compensation as the Directors shall deem just, after their labors have been completed.

Resolved, That said committee be instructed to report at the next annual meeting of this company.

Milwaukee and Minnesota Railroad.

A meeting of the stockholders of this Company, for the choice of Directors will be held on the 29th inst., at the office of the Company, in Milwaukee.

Lehigh Coal and Navigation Company.

The annual report of the Lehigh Coal and Navigation Company has just been issued. It sets forth that the shipments of coal from Mauch Chunk commenced on the 2d of April, 1860, and continued uninterrupted on the Company's Canal until the close of the season, on the 10th of December. The shipments during the year were—

	Tons.
At Mauch Chunk	474,085
At East Mauch Chunk	163,498
At Penn Haven	248,823
At Rockport	104,349
At White Haven	100,277
Total shipment on the navigation	1,091,032

Showing an increase of 40,373 tons over the tonnage of 1859. In addition to the above, there were taken from the Company's mines at Tamaqua 43,072 tons. The great bulk of the shipments passed into the Delaware Division Canal, which connects with the Lehigh at Easton and empties into the Delaware river at Bristol. The shipments of lumber were 45,525,564 feet; an increase over those of the previous year of 2,591,909 feet. The freight of all description passing over the Lehigh Canal for the year, ascending and descending, amounted to 1,338,375 tons. The net earnings were $528,601, against $415,641 for the preceding year; exhibiting an improvement of $112,959.—*Philadelphia Shipping List.*

Grand Trunk (Ca.) Railway.

We have before us a copy of the report of the Auditors of this company, dated at Montreal, December 21, 1860, from which we have obtained the annexed statements of the financial condition of the company. In presenting these statements, the Auditors remark that they "have already signed a certificate to the effect that the books of the railroad are properly kept, that the balance sheet corresponds with the ledger, and that vouchers have been produced for the sums charged as cash payments." But that "the balance sheet, *as printed*, does not represent intelligently the position of the company's affairs, inasmuch as many accounts stand open which should be closed and charged against such standing accounts as construction, capital, revenue or profit and loss, among which are the following: Interest account and discount on bills; steamers and barges for ferries; London office expense account; insurance; goods purchased in London, and others of minor character, as appears in a *newly classified balance sheet*, made by them, and which they trust will be found plain and suggestive."

In regard to the balance at credit of revenue account, $1,473,281 41, they say that "unless examined, this would appear to exhibit a profit on the running of the line in past years, which, however, is not the case, inasmuch as several large items have yet to be classed against it, such as lease of Portland road, lease of Chicago and Detroit road, carriage of Company's stores," etc., etc., amounting to $2,482,772 61—being greater than the revenue account by $1,009,491 20.

After calling attention to the defective mode of examining and passing accounts; the extra pay allowed to clerks for extra time; the manner of purchasing stores; fuel; car and engine oils; Toronto rolling mill; the Sarnia lands and stations, etc., the Report says:

The Auditors, however, feel persuaded that while for the efficient management of the road, these and other matters require revision and improvement, the changes recommended will go but a short way in affording any permanent relief to the shareholders of the Company in its present embarrassed position.

The evil is too deep to be adequately reached by any change in the system of management, although such change may be imperatively necessary, and though the undersigned may be said to be going beyond their province, in entering here into the discussion of such matters, they feel constrained, both as Shareholders and Auditors, to record their opinion, founded on long observation, that the present embarrassments of the company have arisen chiefly from its connection with the successive Governments of the Province and the necessity therefrom of conciliating political support. To this may be attributed the immense loss of capital involved in the purchase of the "St. Lawrence and Atlantic Railway" at 37½ per cent. premium, when it might have been purchased at 50 per cent. discount. In the leasing of the Portland end at 6 per cent. annual interest on its entire capital, when its stock was selling at a very large discount, and the control of it could have been obtained by the purchase of the stock at or below that rate, or by leasing it at a proportionate rate of interest. These items alone involve a loss to the company of a sum not less than six millions of dollars. Say $6,000,000
And an additional sum required to put the road in proper running order of. 1,600,000
To the same influence may be attributed the necessity which was forced on the company of building this line, from Quebec to River du Loup, 120 miles, at a cost of. 3,000,000
Also the Three Rivers and Arthabaska Road or Branch..... 162,000
And the subsidies to the "Ottawa and Prescott" and other branches, say at cost of. 737,000
And the Kingston extension..... 214,510

The undersigned feel justified in affirming that from these and other such political necessities, a sum has been engulped equal to the entire aid given by the Province to the enterprise, and to make the matter worse, these extensions are not self supporting, and if not closed, will remain a continual expense annually to the company. Nor has the Province been benefitted to any material extent by the expenditure, because these branches and extensions were not required at the time, nor since, do not pay, and would not under other circumstances have been built for many years to come.

The Auditors are further of opinion that if this great enterprise had been originally commenced and conducted as a mercantile business, independent of political influences, the line in the first instance would have been confined to the district between Montreal and Toronto, would have paid well, and could afterwards have been extended East and West, as the business of the country demanded, and the finances of the company would have permitted. Had this been done, the affairs of the road would to-day have presented a very different aspect, and even now the undersigned are of opinion that the true interest of this company, is to get over its present embarrassments from its own resources; and to cut off at once and forever all connection with Government, or with politics, and in future to conduct the business purely as a commercial enterprise on mercantile principles, having all its connections and arrangements such, as will best advance its own interests.

This road occupies a peculiar position, in so far as it may be regarded in a double capacity. First as a Local Canadian Line, and next in its through capacity as a competitor with the United States Lines for the through business passing between the States of Ohio, Michigan and Illinois in the West, and Portland, Boston and the sea-board in the East. Its connection with Portland compels it to cultivate a through Western trade, and it seems to be doing so successfully, and at fair rates. From the want of a due appreciation of its position in this respect, much unnecessary blame has been cast on the Manager for encouraging the through trade, but the undersigned are of opinion that while the development of the Local Canadian traffic should always be the first object, the other is not to be neglected or lost sight of.

The company has suffered much inconvenience, expense and loss, from a want of a railroad connection and terminus with the City of Montreal, the place from whence it derives by far the largest and most profitable part of its traffic. And the undersigned are of opinion, that if the money spent to achieve a connection with Kingston, (the trade with which is comparatively insignificant,) and at Sarnia, which has very little trade; or at Chapman's Quebec Docks, which seems an outlay entirely uncalled for, had been devoted to the great necessity of connecting the largest city in British America with the railway, it would have been in every respect more conducive to the interests and prosperity of the company.

The Auditors feel warranted in expressing their conviction, however, from a knowledge of the constantly increasing and elastic trade of the Province, that with proper management and equipment, a connection with the City and Harbor of Montreal, strict surveillance and economy in every department, the enterprise would soon pay interest on its bonds, and before many years give something to its Shareholders also.

It may not be amiss for the Auditors to suggest, that it would be desirable if the Province would exchange its claims on the company for a transfer of the branches and extensions which had to be made to obtain the Provincial Aid. This would be a strictly just arrangement, and might be advantageous to both parties; it certainly would be to the Grand Trunk Company.

The capital account of the Grand Trunk Railway Company June 30, 1860, was as follows:

RECEIPTS.

By capital raised from shares, debentures, as per balance sheet		$58,469,643 61
Borrowed from bills payable		2,112,583 53
" " exchange		362,991 26
" " London bankers		6,853,681 48
" " do. expended on Chicago and Detroit line		86,836 44
		$67,885,734 32

EXPENDITURES.

	Miles.		
Eastern Division	363	cost	$15,840,432 96
Central "	335	"	17,177,882 80
Western "	190	"	8,761,802 23
	886		$41,779,617 99
Portland line	149		1,615,915 12

		$3,243,549 56
Balance at debit of revenue account lost on total business of the road,		1,009,491 20
		$4,253,040 76

New Telegraph Line.

The arrangements are completed for the construction of a telegraph line from Vincennes to Terre Haute, which will give us a direct telegraph communication with the capital of the State, and an additional route to the North and East. The work will be prosecuted vigorously by Mr. Ingle, President of the E. & C. R. R., and the Western Union Telegraph Company, and a speedy completion of the line is beyond question.—*Evansville Journal.*

Iron Works at Pompton.

We learn that the long dormant but extensive iron works at Pompton, formerly operated by Peter M. Ryerson, and closed by the tariff of 1846, are about to be re-modeled and modernized by the Messrs. Horner from New York City, who, under promise of the benefits likely to arise from the new tariff, will commence operations sometime during the summer, or as soon as they can get the Works in complete order.—Mr. Morrison, a gentleman thoroughly conversant with the heavy iron manufactures in Massachusetts, is now upon the ground, using his best efforts and skill in forwarding the improvements.—*Paterson, N.J., Guardian.*

Bonded Debt of St. Louis.

We have received the report of the Comptroller of St. Louis, for the fiscal year ending April 8, 1861, from which we copy the following tabular statements in reference to the bonded debt of that city, showing where and for what purpose bonds were issued and the time of maturity of same. No. 1 represents those which are payable from the general revenue of the city, while No. 2 are those to be met from sources of special revenue.

[No. 1.]

Bonds issued for Railroads.

PACIFIC RAILROAD.

1851	May 31, 20,	May 31,	1871,	2610	$21,000

					$59,500

Aggregate amount of bonds payable from sources of special revenue..... ....$961,500

Total amount of bonds outstanding April 8th, 1861, was. 4,913,700

Recapitulation as follows:

Bonds issued for railroads..... ....$1,599,000	
" to pay bonds, balances, judgments, &c	1,136,200
" to purchase ground and erect buildings	532,000
" to construct public sewers	425,000
" to improve streets in old limits...	260,000
" for water-works	497,000
" to improve the harbor.....	239,000
" to improve the wharf.....	166,000
" to construct district sewers.....	59,500
	$4,913,700

Of this amount there will mature during the fiscal year $120,200.

Of which there will be due, and payable from the general revenue ninety thousand and two hundred dollars, leaving thirty thousand dollars payable from special accounts, not requiring an appropriation from general revenue.

The receipts of the city from all sources in 1859-60 were $1,358,742 74; in 1860-61 they were $1,374,415 39.

The floating debt of the city amounts to $255,-824 46; in addition to which, over $352,000 is due to special funds established by charter, making the whole floating debt over $607,000, exclusive of what may be due to district sewers and other minor sources. The Comptroller estimates the probable necessities of the government, including bonds falling due for the current fiscal year, with the closest and most rigid economy at $913,200, making the sum necessary to pay just demands upon the city, $1,169,024 46. To meet this expenditure, the revenue from all sources applicable to general accounts, is estimated at $783,000—leaving a deficit of $386,024 46 to be provided for. The Mayor is of the opinion that reductions may be made in the current expenses to an amount to bring them by possibility *nearly* within the estimated revenue.

The Assessor estimates the reduction in the valuation of property at $25,602,057 58, and a consequent decrease in the taxes to be collected of $260,710 40. In view, however, of the heavy burdens, still resting on property owners, of the almost universal falling off in rents and of the general stagnation in business, the Mayor recommends a still further reduction in taxes, by *first*, a suspension of the harbor tax, which ought to be continued; and *second*, a reduction of the public sewer tax from one-tenth of one per cent., to one-twentieth, or its total suspension for the present year, if practicable.

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending May 4, were..... .....$65,808 20
Week ending May 5, 1860 .... 60,329 62

Increase.... ....$5,478 58
Total traffic from July 1st, 1860 ...$2,949,359 22
Corresponding period previous year 2,456,466 17

Increase.... ....$492,893 05

The earnings of the New York and New Haven Railroad for April, 1861, were:

Passengers $65,349 62
Freight 14,000 00

Total.... ....$79,349 62
Corresponding month, 1860.... .... 78,184 68

Increase.... ....$1,164 94

The earnings of the Macon and Western Road for April were:

From passengers	$8,575 84
" mails	838 50
" freight.....	31,381 34
Total.... ....$40,985 68	
1860. .... 28,798 71	
Increase.... ....$11,186 97	

This large increase is due to the fact that the traffic which has hitherto been diverted from this road to Charleston, now, in consequence of the troubles at that port, is sent over the whole length of this road to Savannah.

The receipts of the Central Ohio Railroad Company in March were $81,030 90, and the expenditures $68,769 20—leaving balance on hand $12,-261 70.

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of April, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal $167,415 41		$160,773 22
" " merch'dise	41,361 63	53,114 64
" " travel, etc.	43,377 24	34,222 42
Total.. ....$252,154 28		$248,110 28
Transportation, roadway, dumpage, renewal fund, and all charges	122,386 63	130,102 05
Net profit for the m'th,$129,767 65		$118,007 63
Profit for the previous 4 months	339,353 47	344,395 66
Total profit for 5 mos.$469,121 12		$462,403 29

The following table shows the earnings of the Vermont and Massachusetts Railroad for

	1860.	1861.	Decrease.
January ...$18,616 49	$14,329 19	$4,287 33
February .. 16,946 11	14,867 27	2,078 84
March 22,860 36	17,953 83	4,906 53
	$58,423 96	$47,150 26	$11,272 70

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics*."
